FISCAL NOTE ANALYSIS

STATE OF ALASKA
2017 LEGISLATIVE SESSION

BILL NO. HB 19

Analysis

HB 19 limits the application of neonicotinoid products to seeds, foliage, or soil within the confines of a greenhouse. The Department of Environmental Conservation has authority to regulate pesticide sale and use in Alaska. Due to the widespread availability of neonicotinoid products, it will be challenging for Solid Waste Management to ensure that products are limited to use in greenhouses.

To enforce this legislation, the Department will require an additional Environmental Program Specialist III (range 18) position located in the Wasilla office. The position would be responsible for proper enforcement of this legislation through inspections, applicator training, and pesticide certification activities.

Travel costs include national training and in-state inspections. Contractual costs include assistance from the Department of Law and the cost of training, expected to decrease after the first year. Supplies include new employee equipment for the first year, and normal office supplies needs in subsequent years.
