

Dear House Fisheries Committee,

Wild salmon put food on the table, provide recreation, and create tens of thousands of jobs for Alaskans. Our truly unique Alaskan way of life depends on wild salmon, which also generate hundreds of millions of dollars in economic activity each year.

While Alaska's constitution outlines strong protections for our state's unmatched fish and game resources, our current system fails to provide clear and reliable protections for our fisheries and often leaves Alaskans out of the process. HB 199 updates Alaska's fish habitat permitting law by expanding Alaska Department of Fish and Game's authority to protect fish habitat; creating enforceable protection standards; and giving Alaskans a voice in the permitting process.

Please support HB 199 for the future of Alaska's fisheries. Our economies and heritage depend on it.

Sincerely,

610 Alaskans:
