Dear House Fisheries Committee,

I am a resident of Talkeetna and am writing in support of H.B. 199. I think it is high time to pass a law that reflects the importance of salmon to our economy, our recreation and our way of life. Salmon habitat protection hasn't been updated for decades and it is critical to upgrade what is considered "protection of fish and game."

Please do everything you can to assure that our rivers and streams will remain healthy and support wild salmon for unending generations. Salmon sustain us!!

Please support this bill!

Sincerely,

Diane Calamar Okonuk
