FISCAL NOTE ANALYSIS

STATE OF ALASKA
2017 LEGISLATIVE SESSION

BILL NO. HB 51

Analysis

This bill reinstates expired statutes that allow small cruise ships and State ferries to continue to discharge treated wastewater under State-approved Best Management Practices Plans. Costs of installing the advanced wastewater treatment systems that would enable these small vessels to comply with existing statutes are cost and space-prohibitive.

This bill has no fiscal impact on the Department of Environmental Conservation. The only action that will be required is the modification of regulations to update citations to reflect the new statutes.

If the bill does not pass, the cost to the Department to develop permits for small cruise ships and ferries is estimated to be \$216,000 in FY2018. Out year cost estimates are \$25,000 per/year for compliance work, data review, and sampling. This work would be done with existing staff, but other work of the Commercial Passenger Environmental Compliance program would be delayed or curtailed in order to develop the permit.
