Subject: Nomination of Commissioner of DEC

Dear Senators of the Senate Resources Committee, I urge you to not confirm the appointment of Jason Brune as the Commissioner of the Department of Environmental Conservation. With his background, it is clearly apparent that Mr. Brune would be coming into this position with a partiality that does NOT lend itself to the job. This position MUST be one that considers science when weighing and permitting huge projects that affect the environment and those who live in it. Jason Brune is not this individual. He obviously has an agenda which is simply not appropriate for this particular job. We cannot have trust in our government when it is filled with people with special interests. My trust in my state government is quickly diminishing.

Please, I strongly urge you to NOT CONFIRM Jason Brune as Commissioner of the DEC.

sincerely,
Rika Mouw
