Dear Alaska House Resources Committee Members,

As an Alaskan, I am deeply concerned about human-caused climate change. Just last year we have witnessed heat and wildfires, melting sea ice and coastal erosion, and resulting impacts to human health and our subsistence wildlife. Salmon perished in warming streams, caribou struggled with increased rain on snow events, and birds lost habitat. I urge you to support H.R. 12 to form a Special Committee on Climate Change.

Alaska is on the forefront of climate change and ought to be a global leader in implementing climate solutions. It is time for our elected officials to step into leadership roles on climate issues. H.R. 12 would help implement a step in the right direction.

Thank you for your attention to this critical issue.

Sincerely,

Ms Brenda Johnson

Dear Alaska House Resources Committee Members,

As an Alaskan, I am deeply concerned about human-caused climate change. L

This last year was the warmest on record. Crab shells are deteriorating due to increased CO2 in the ocean. We have witnessed heat and wildfires, melting sea ice and coastal erosion, and resulting impacts to human health and our subsistence wildlife. Salmon perished in warming streams, caribou struggled with increased rain on snow events, and birds lost habitat.

I urge you to support H.R. 12 to form a Special Committee on Climate Change.

Alaska is on the forefront of climate change and ought to be a global leader in implementing climate solutions. It is time for our elected officials to step into leadership roles on climate issues. H.R. 12 would help implement a step in the right direction.

Thank you for your attention to this critical issue.
