Subject: NO to SJR13

Alaskans don't do things just because other states are doing them. Stop this wrong thinking right here in this committee—do not move SJR 13.

Instead of prohibiting abortion, why not support women's reproductive rights with increased access to contraceptives; and support both men and women with more support for public health facilities/ professionals; sex education in schools and increased opportunities for planning when to become a parent.

Privacy rights are fundamental to our constitution. This resolution attacks privacy. Please do not let it move from committee.

Thank you,

Deborah Craig (38 year Alaskan)

Jody Simpson

Support for abortion access is at an all-time high. Nearly 8 in 10 Americans say they do not want to see Roe overturned and nearly 6 in 10 Alaska voters are pro-choice. I am one of those Alaskan pro-choice voters. As your constituent, I ask you not to move SJR 13 from committee.

Instead of prohibiting abortion, pass legislation to support women's reproductive rights with increased access to contraceptives; and support both men and women with more support for public health facilities/professionals; sex education in schools and increased opportunities for planning when to become a parent.

This constitutional amendment is part of an aggressive anti-abortion agenda pushed by politicians here and across the country to do one thing — deny women their right to sovereignty over their own bodies. Stop this wrong thinking right here in this committee — do not move SJR 13.

Privacy rights are fundamental to our constitution. This resolution attacks privacy and moreover is very close to that slippery separation of church and state. Religious beliefs have no place in a court of law.
