Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,
Victoria Ryan

Dear Alaska Senate Resources Committee,

I live and work in Naknek and I personally know Abe Williams and his family. I believe that Abe is a good man, and although he does live in Anchorage now, he grew up here. Nevertheless, I don't think that Abe represents the vast majority of the people who live here, or Alaskans in general. I think it's wrong to put someone on the influential board of fisheries that derives a significant part of his income from a company that wants to put a mine in the headwaters of Bristol Bay, putting water and salmon at high risk. I am signing the letter below, along with many others who see this as "stacking the deck", something that our governor and president have been doing shamefully.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Date: Thursday, August 27, 2020 4:19:20 PM

Dear Alaska Senate Resources Committee,

I am writing about the Governor's short-sighted desire to put a Pebble Mine employee, Abe Williams, on the fisheries board. How outrageous a suggestion! A wolf (with lots of money to influence others) in the hen house!

It is NOT the role of the Alaska Board of Fisheries to have members that represent a specific development such as Pebble Mine. Its role is to protect fisheries from unreasonable risk and COUNTERBALANCE other sections of government that have as their mission to encourage development.

Expecting a lake filled with pollutants created by the Pebble Mine that is supposed to last in perpetuity and never leak, is RIDICULOUS. I doubt it would last past 50 years. And there are many other aspects of Pebble's plan that are outrageous.

Our red salmon fisheries in Bristol Bay that has provided nutrients to Alaska for millions of years is WAY MORE VALUABLE and is way more likely to last in perpetuity if we protect it.

PLEASE REJECT THIS NOMINATION.

Thank you,

Bill (William) Herman
Resident of Alaska for 45 years

Dear Alaska Senate Resources Committee,

Dear Senator Costello,

I am writing you in regard to the protection of the Alaskan salmon industry.

Appointing a lobbyist for Pebble Mine to the Board of Fish will create an appalling conflict of interest. The role of the Board of Fish is to conserve our fisheries and to resolve allocation between the various user groups. Pebble is certainly not a user group, and the question of whether the Bristol Bay salmon fishery is worth saving is not part of the Board's job. Appointing Abe Williams to the Board of Fisheries is like appointing Ethan Berkowitz to the Republican Party's Central Committee. This henhouse needs a fox-proof rejection.

Sincerely,

Wilson Rice

I am writing to express my significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

I urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,
Renee Blake

Dear Alaska Senate Resources Committee,

I am writing to express significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is to conserve and develop Alaska's fisheries; confirmation of Mr. Williams would create an undeniable conflict of interest for the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe damage to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,
Roy Ferguson

Dear Alaska Senate Resources Committee,

After living in Alaska for 40 years and seeing the struggles between environmental and economic interests, it is unbelievable that the Pebble Mine project with its advocates continues to have a voice and a possible future. We should have learned that Incidents like the Exxon Valdez happen and the toll is NEVER erased.

The Pebble Mine project is certainly of local consequence, but the worldwide effect would be catastrophic. The resource that should be protected is not one that can be recreated. We, as a world, cannot FARM our way to a healthy food source.

The recent appointment of Abe Williams to the Alaska Board of Fisheries should be seen as a glaring sign of Dunleavy's bias In favor of the Pebble Mine interest, as Williams role on the Board would be clearly a conflict of interest as he is a significant part of, and paid by, the Pebble Mine Canadian owners.

The appointment should be seen for what it is: A vote from the current administration to move an economic interest forward that would sacrifice the interests of local Alaskans, Alaskans as a whole, and the world-wide health of the salmon industry.

Abe Williams should NOT be confirmed.

Sincerely,
Sharon Snelling

Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,
Susan Falk

Dear Alaska Senate Resources Committee,

This letter expresses my feelings better than I can, but I want to reiterate that I am very concerned about the proposed Pebble Mine's effect on the Bristol Bay's fisheries and do not believe that the mine can be built and operated in a manner that protects the fisheries. Nominating Mr. Abe Williams to the Board of Fisheries appears to me to be a direct conflict of interest.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

Subject: Board of Fish appointments
Date: Friday, August 28, 2020 9:25:46 AM

Senate Resource Committee Members,

Regarding the current makeup of the Board of Fish (BoF), ask yourself for each one, is this person there to do what is best for fish and ALL Alaskans or is there an underlying motive for their appointment? It may be well past time to form a professional board to manage this resource. Barring that, Robert Ruffner looked at science data and was a neutral, yet strong voice on the BoF.

Please consider, please remember, that your actions on board appointments affect lives. We need to fish, to feed the world and to feed our own families. We need elected people that will truly represent people. One way you can do this is by taking a stand against unfair practices of allowing appointees to be confirmed when in your heart you know they may not be the best person for the position.

Please confirm Jensen, appoint Ruffner, and again consider that this needs to be a professional, unbiased board for future generations of both fish, and fishermen.

Please represent, don't allow pay to play as a way to be appointed and confirmed for a board seat.

Thank you,
Tony Jackson

Subject: Board of Fish Nominines
Date: Thursday, August 27, 2020 7:31:47 PM

Dear Senators,

With these appointments, the board will be dominated with members from Gov. Dunleavy's home districts.

Of these nominations, I ask you to ONLY confirm John Jensen. He is a previous board member and the only candidate from a coastal community.

I also ask for you to appoint Robert Ruffner. Mr. Ruffner is a scientist and previous director of the Kenai Watershed Forum. He DID NOT get appointed for campaigning or donating to a governor's campaign, and although he requested to continue to serve, (and is not a sports fisherman, guide or commercial fisherman) he was not re-appointed by Gov. Dunleavy. Nor, did Gov. Dunleavy even reply to him. Our B.O.F. sends all of Alaska to fish on the Kenai Peninsula, and we have no representation on the board. We need a representative from the Kenai and also one who votes for the FISH.

It is a slap in the face to the people of the upper Cook Inlet to have John Woods writing proposals and voting on those proposals, and regulations for the upper Cook Inlet commercial fishermen WITHOUT ever being confirmed by the legislature. This should not happen. And it looks like it could happen again.

Thank you for your consideration,
Richard C. McGahan, Sr.
Nikiski, Alaska

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,
Tara Findlay
