Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Heather Rose

Dear Alaska Senate Resources Committee,

My husband and I are long time residents and small business owners in the Matanuska Susitna Valley. We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries. We both worked for ADF&G in the 80's and 90's and know how essential this role is to manage our fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Heather Kalmakoff

Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Alice Artzt

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

I live in Bristol Bay and Abe Williams does not represent the fishery but instead is someone who is being paid by Pebble and only for his own gain and is not the voice of Bristol Bay people.

Now that we have an election, we are seeing where our representatives stand on Pebble. I will only vote for candidates that are against Pebble.

How can anyone justify appointing a person who does not live in Bristol Bay and does not want to protect our fishery?

Get rid of Abe Williams and appoint someone who properly represents the largest red salmon fishery in the world. I would like to see Robert Heyano in the position.

Remember that Canada has very little respect for their fisheries. The Frazier River used to be the largest red salmon run in the world and it is now a very small run. Excavation of gravel, dredging, and mines have devastated the Frazier. We must protect the environment of our special fishery.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

I urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The Pebble Project PLP has been allowed by Gov. Dunleavy to infiltrate nearly all agencies in State and local government agencies and boards. This project will be catastrophic for Bristol Bay. Already Lake and Pen Borough has been infiltrated. Now Gov Dunleavy is trying to add to Jason Brune in ADEC. This is ridiculous.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Bonnie Scheele

Dear Alaska Senate Resources Committee,

Gov Dunleavy has once again proven his contempt for the will of Alaskans concerning whether the Pebble mine should move forward. Appointing a PEBBLE MINE EMPLOYEE to the a board of people that can heavily influence this direction is an egregious attempt to force his questionable will on the well being of citizens of the state of Alaska. And it makes me wonder how something like this is even legal. Please do all you can to put to death his efforts to make a handful of millionaires and billionaires even richer than they already are.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Casimir Abramczyk

Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

I would respectfully suggest that is past time for a member of the board of fish to have someone from the small independent boat owners represented. I would like to suggest my husband Mike Friccero. He has served as chair of the BBRSDA and on many boards and is someone most folks enjoy working with in this capacity....well, in any capacity really.

Thank you  
Gina Peru Friccero

Dear senator Micciche,

Just wanted to express my concern about Board of Fish nominees, especially Abe Williams, as with his joining the board there will be not just one but two members who currently work or have worked for Pebble in the past. Also, even though I have ties with groups predominately concerned with sport fishing, I was a commercial fisher for many years, and have no love of KRSA and their often shortsighted interests. Therefore, I am also concerned with their continued overarching influence on the BOF. It does not always serve the community or the resource it claims to. That's why several other appointees , mainly due to where they are from or their backgrounds, are also of concern.

Thanks,  
Dave

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Amy Roberts

Dear Alaska Senate Resources Committee,

I am writing to express my concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and un-resolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

**Subject:** \*\*\*\*\*SPAM\*\*\*\*\* I am writing to you today regarding a very important issue

Dear Alaska Senate Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Benjamin Soon

Re: Mr. Abe Williams BOF appointment

The Honorable Peter Micciche  
Chairman Senate Resources Committee  
Alaska State Legislature  
Juneau, AK 99801

Dear Chairman Micciche,

As a fierce opponent of the Pebble Mine Project, I was relieved to learn of the recent developments from the Trump administration that elevated the environmental bar for Northern Dynasty. As we all catch our collective breath, it leaves a moment to comment on the appointment / confirmation of Mr. Abe Williams to the Alaska Board of Fisheries.

Having served two terms, in many capacities on the Bristol Bay Regional Seafood Development Association, I had an opportunity to work alongside Mr. Williams who also served as a director and President of the organization. In spite of the fever pitch that the Pebble Project presented to us all during that period, Mr. Williams was professional in disclosing his conflicts and did not need any prodding to leave the room when Pebble Mine issues were on the agenda.

On either side of that conflict, Mr. Williams did a wonderful job of collaborating with all of us – sometimes dragging a few of us – to projects that definitely improved the value and marketability of Bristol Bay sockeye. His institutional knowledge of the fishery and practicality of what works was a resource that we all relied upon and valued.

As a respected senator, I am sure that there are issues of division between you and your colleagues that bog down your processes. Yet the essence of leadership is to work around them, to find consensus and to move the ball down the field. You will find that Mr. Williams has just that collaborative capacity and will “give more than he will get” in his service to the Board of Fisheries. Moreover, the state of Alaska will be better off for it.

Yours in good fishing,

Warren “Buck” Gibbons  
F/V West Point  
Bellingham, WA

Re: Senate Resources Committee Letter of Support for the Reappointment of Abe Williams to the Board of Fisheries

Dear Senator Micciche,

I am a retired Chignik commercial fishermen and I support the appointment of Abe Williams to the Board of Fisheries. Commercial salmon fishing is the sole economic base of every municipality, most businesses, and a majority of the individuals living and working in the Chignik area.

The Chignik sockeye fishery is a historic fishery, and commercial fishing is an ingrained way of life for generations of people in and around the Chignik area. The Chignik sockeye fishery is wedged in between two larger intercept fisheries - the Kodiak Area fisheries to the East and South Alaska Peninsula fisheries to the West - that routinely harvest significant numbers of sockeye bound for the Chignik area. Decisions made by the Board of Fisheries about how to best manage these surrounding intercept fisheries are crucially important to the survival of the Chignik sockeye fishery and the economic and cultural survival of Association members.

Abe Williams has been appointed to begin serving on the Board July 1, 2020. As a fourth generation Bristol Bay fisherman, Abe Williams certainly has credibility as a candidate for the Board of Fisheries. He appears to have the dedication and willingness to work to understand the many different fisheries of the State of Alaska that the position requires. His position with the Pebble Partnership does not automatically disqualify him as some seem to think. In reviewing the kinds of proposals that most often come before the Board there does not appear to be a conflict of interest with regard to Pebble and if one does arise then he should be recused from participating on those issues.

Support the appointment of Abe Williams to the Board of Fisheries.

Sincerely,

Charles McCallum

Re: Chignik Intertribal Coalition's Letter of Support for the Confirmation of Abe Williams to the Board of Fisheries

Dear Hon. Dunleavy,

The Chignik Intertribal Coalition wishes to express its support for the confirmation of Abe Williams to the Board of Fisheries. The Coalition is comprised of the five federally-recognized tribes in the Chignik area – Chignik Bay, Chignik Lagoon, Chignik Lake, Ivanof Bay, and Perryville – and works to preserve and advance the economic and social interests of its members. Commercial salmon fishing is the sole economic base of every municipality, most businesses, and a majority of the individuals living and working in the Chignik area.

The Chignik sockeye fishery is an historic fishery, and commercial fishing is an ingrained way of life for generations of people in and around the Chignik area. The Chignik sockeye fishery is wedged in between two larger intercept fisheries – the Kodiak Area fisheries to the East, and South Alaska Peninsula fisheries to the West – that routinely harvest significant numbers of sockeye bound for the Chignik area. Decisions made by the Board of Fisheries about how to best manage these surrounding intercept fisheries are crucially important to the survival of the Chignik sockeye fishery, and the economic and cultural survival of Coalition members. In fact, as of this morning we are only at a mere 6% of our escapement range for this date in Chignik for Sockeye.

Abe Williams has been appointed to begin serving on the Board July 1, 2020. As a fourth generation Bristol Bay fisherman, Abe Williams certainly has credibility as a candidate for the Board of Fisheries. He appears to have the dedication and willingness to work to understand the many different fisheries of the State of Alaska that the position requires. His position with the Pebble Partnership does not automatically disqualify him as some seem to think. In reviewing the kinds of proposals that most often come before the Board there does not appear to be a conflict of interest with regard to Pebble and if one does arise then he should be recused from participating on those specific issues.

The Chignik Intertribal Coalition supports the appointment of Abe Williams to the Board of Fisheries.

Sincerely,

George Anderson  
President, Chignik Intertribal Coalition

Re: Chignik Intertribal Coalition's Letter of Support for the Reappointment of John Wood to the Board of Fisheries

Dear Hon. Dunleavy,

The Chignik Intertribal Coalition wishes to express its support for the reappointment of John Wood to the Board of Fisheries. The Coalition is comprised of the five federally-recognized tribes in the Chignik area – Chignik Bay, Chignik Lagoon, Chignik Lake, Ivanof Bay, and Perryville – and works to preserve and advance the economic and social interests of its members. Commercial salmon fishing is the sole economic base of every municipality, most businesses, and a majority of the individuals living and working in the Chignik area. Following the failure of the sockeye run in 2018, the Coalition was created in order to advance Chignik area economic interests and assist individuals amidst the fall-out of the 2018 season.

The Chignik sockeye fishery is an historic fishery, and commercial fishing is an ingrained way of life for generations of people in and around the Chignik area. The Chignik sockeye fishery is wedged in between two larger intercept fisheries – the Kodiak Area fisheries to the East, and South Alaska Peninsula fisheries to the West – that routinely harvest significant numbers of sockeye bound for the Chignik area. Decisions made by the Board of Fisheries about how to best manage these surrounding intercept fisheries are crucially important to the survival of the Chignik sockeye fishery, and the economic and cultural survival of Coalition members.

Since John Wood was appointed in 2019, he has shown himself to be a quick study of complex management issues with a willingness to view issues from an independent point of view. He has demonstrated an extraordinary ability to listen to and understand all sides of complicated issues and achieve reasonable and equitable management compromises. The Board of Fisheries needs intelligent, perceptive, fair minded individuals like John Wood. Alaska's natural fishery resources are vitally important and deserve highly qualified members like John Wood to serve on the Alaska Board of Fisheries.

The Chignik Intertribal Coalition strongly supports the appointment of John Wood to the Board of Fisheries.

Sincerely,

George Anderson  
President, Chignik Intertribal Coalition

Cc: Rep. Bryce Edgmon, Speaker of the House

Re: Chignik Intertribal Coalition's Letter of Support for the Confirmation of  
McKenzie Mitchell to the Board of Fisheries

Dear Hon. Dunleavy,

The Chignik Intertribal Coalition wishes to express its support for the confirmation of McKenzie Mitchell to the Board of Fisheries. The Coalition is comprised of the five federally-recognized tribes in the Chignik area – Chignik Bay, Chignik Lagoon, Chignik Lake, Ivanof Bay, and Perryville – and works to preserve and advance the economic and social interests of its members. Commercial salmon fishing is the sole economic base of every municipality, most businesses, and a majority of the individuals living and working in the Chignik area. Following the failure of the sockeye run in 2018, the Coalition was created in order to advance Chignik area economic interests and assist individuals amidst the fall-out of the 2018 season.

The Chignik sockeye fishery is an historic fishery, and commercial fishing is an ingrained way of life for generations of people in and around the Chignik area. The Chignik sockeye fishery is wedged in between two larger intercept fisheries – the Kodiak Area fisheries to the East, and South Alaska Peninsula fisheries to the West – that routinely harvest significant numbers of sockeye bound for the Chignik area. Decisions made by the Board of Fisheries about how to best manage these surrounding intercept fisheries are crucially important to the survival of the Chignik sockeye fishery, and the economic and cultural survival of Coalition members.

McKenzie Mitchell has been appointed to begin serving on the Board July 1, 2020. She is an avid sport fisherman and adjunct faculty in the school of management in sport and recreation business with an emphasis in economics. An economist would be a welcome addition to the Board of Fisheries. McKenzie Mitchell appears to have the dedication to work to understand the states many commercial, recreational, subsistence, and personal use fisheries and, therefore, has the makings of a good board member.

The Chignik Intertribal Coalition strongly supports the appointment of McKenzie Mitchell to the Board of Fisheries.

Sincerely,

George Anderson  
President, Chignik Intertribal Coalition

Re: Senate Resources Committee Letter of Support for the Appointment of McKenzie Mitchell to the Board of Fisheries

Dear Senator Micciche,

Chignik Regional Aquaculture Association (CRAA) represents the interests of commercial, sport, and subsistence users of the salmon resources of the Chignik management area. CRAA supports the appointment of McKenzie Mitchell to the Board of Fisheries. Commercial salmon fishing is the sole economic base of every municipality, most businesses, and a majority of the individuals living and working in the Chignik area.

The Chignik sockeye fishery is a historic fishery, and commercial fishing is an ingrained way of life for generations of people in and around the Chignik area. The Chignik sockeye fishery is wedged in between two larger intercept fisheries - the Kodiak Area fisheries to the East and South Alaska Peninsula fisheries to the West - that routinely harvest significant numbers of sockeye bound for the Chignik area. Decisions made by the Board of Fisheries about how to best manage these surrounding intercept fisheries are crucially important to the survival of the Chignik sockeye fishery and the economic and cultural survival of Association members.

McKenzie Mitchell has been appointed to begin serving on the Board July 1, 2020. She is an avid sport fisherman and adjunct faculty in the school of management in sport and recreation business with an emphasis in economics. An economist would be a welcome addition to the Board of Fisheries. McKenzie Mitchell appears to have the dedication to work to understand the states many commercial, recreational, subsistence, and personal use fisheries and, therefore, has the makings of a good board member.

The Chignik Regional Aquaculture Association supports the appointment of McKenzie Mitchell to the Board of Fisheries.

Sincerely,

Charles McCallum, Executive Director
