Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Margaret McNeil

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

There is a conflict of interest Mr. Williams' nomination to the Board of Fisheries. I don't believe he can put on his Board of Fisheries hat and then switch to his Pebble hat without bias. I don't believe he can be objective in the role of being on the Board of Fisheries. That concerns me because fish for Alaskans is VERY important as a food source. In addition, fishing is a significant portion of our economy.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Jeff Harvey

Dear Alaska House Resources Committee,

I am writing about the Governor's short-sighted desire to put a Pebble Mine employee, Abe Williams, on the fisheries board. How outrageous a suggestion! A wolf (with lots of money to influence others) in the hen house!

It is NOT the role of the Alaska Board of Fisheries to have members that represent a specific development such as Pebble Mine. Its role is to protect fisheries from unreasonable risk and COUNTERBALANCE other sections of government that have as their mission to encourage development.

Expecting a lake filled with pollutants created by the Pebble Mine that is supposed to last in perpetuity and never leak, is RIDICULOUS. I doubt it would last past 50 years. And there are many other aspects of Pebble's plan that are outrageous.

Our red salmon fisheries in Bristol Bay that has provided nutrients to Alaska for millions of years is WAY MORE VALUABLE and is way more likely to last in perpetuity if we protect it.

PLEASE REJECT THIS NOMINATION.

Thank you,

Bill (William) Herman  
Resident of Alaska for 45 years

Sincerely,  
William Herman  
1845 Parkside Dr Anchorage, AK 99501-5751

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Paula Muschinske

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Lori Stephenson

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination. How is mining compatible with fishing!?? It isn't and he doesn't belong on the board!

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Dear Alaska House Resources Committee,

I am writing to express my concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject this nomination.

It is unlikely Mr. Williams will be able to be an objective representative on this Board. For that reason alone, it is important to reject his nomination and find a more non-partisan, less personally involved Board member.

Sincerely,

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska House Resources Committee,

I have been coming to Alaska with my brother every summer since 1990 to fish at various Lodges. We even made it this year amidst the Covid 19 mess. I wish to express my significant concerns about Governor Dunleavy's nomination of Mr. Abe Williams' to serve on the Board of Fisheries and I urge the Legislature to reject his nomination.

A person who makes their living supporting a project that could have devastating impacts on Alaska's Fisheries and its habitat and people has no business serving on a Board.that is supposed to be acting as a trustee protecting the interests of the people as a whole. Mr. Williams cannot be expected to objectively look at the facts of a situation and act for the greater good, instead when it comes to the interests of the many over a few who stand to make a lot of money, he will support the few. You don't put the fox in charge of the hen house.

The supporters of the Pebble Mine would never consider appointing an environmentalist to run their company. Likewise, the people of Alaska should never have someone like someone like Mr. Williams serving on a Board where he is supposed to be acting as a trustee in support of the public trust, looking out and protecting the long term interests of all people and Alaska's fisheries.

Reject Mr. William's nomination

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Dear Alaska House Resources Committee,

I am writing to express my significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Aside from the severe impacts to the sustainability and profitability of one of our state's most important fisheries, Mr. Williams serving on the Board of Fisheries would be a gross conflict of interest. Mr. Williams has spent much of his career working to promote the proposed Pebble mine. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

I strongly urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Siobhan Choi

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Ron Mendelblat

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska House Resources Committee,

This letter expresses my feelings better than I can, but I want to reiterate that I am very concerned about the proposed Pebble Mine's effect on the Bristol Bay's fisheries and do not believe that the mine can be built and operated in a manner that protects the fisheries. Nominating Mr. Abe Williams to the Board of Fisheries appears to me to be a direct conflict of interest.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
ALYSSA Hopkins

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

Dear Alaska House Resources Committee,

As someone who lived Dillingham for 10 years, I am writing to express my significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination. Bristol Bay is a world class treasure and needs a local representative on the Board. I also worked for ADF&G so I understand the important role of BoF members. It is a travesty to fill this seat with a Pebble employee.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Sharon McEntee

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska House Resources Committee,

One of the greatest tenets of the USA's democratic system is the notion of checks and balances. When one branch overextends their reach of authority to immorally use their position of power to influence decisions, it us up to the other branches to reign in that unlawful use. Without checks and balances our system is a dictatorship, not a democracy.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

Dear Alaska House Resources Committee,

I am writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

As a retired biologist from ADF&G I clearly understand the role of the Board of Fish members to conserve and developing Alaska's fisheries. Confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries. As a biologist who early in my career worked in the head waters of Bristol Bay understand how important the head waters streams and the water quality are to the production of salmon in Bristol Bay.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent and is a foolish and short sighted.

I urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Richard Gustafson

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries. Having participated in the Board of Fish process, as both the secretary for the Sitka Advisory Committee and in providing written and oral testimony on behalf of subsistence issues, I am appalled at the decision by Mr. Dunleavy to continually undermine the fish and wildlife resources of Alaska and the people who harvest them.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries and the largest sockeye salmon fishery in the world. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Fannie Dock

Dear Alaska House Resources Committee,

I am writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

I have attended several Board of Fisheries meetings and testified; and the Board of Fisheries is meant to offer unbiased thought and consideration on each proposal and action. Abe Williams would severely cloud that unbiased arena. As a Indigenous woman with a science degree and more than two decades of experience working with salmon; please think about the greater picture here.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Carla Fabian

Dear Alaska House Resources Committee,

I am writing to express concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination. Someone who is currently part of the Pebble Partnership to promote the Pebble Mine has a clear conflict of interest with a role in the Board of Fish. Confirmation of Mr. Williams would call into question the Board's ability to responsibly and ethically manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

I urge the legislature to reject this nomination that has a clear conflict of interest.

Sincerely,  
Nicole Balazs

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Bradford Buddenberg

Dear Alaska House Resources Committee,

My husband and I are long time residents and small business owners in the Matanuska Susitna Valley. We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries. We both worked for ADF&G in the 80's and 90's and know how essential this role is to manage our fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Dear Alaska House Resources Committee,

I am writing to express significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage YOU to reject his nomination. This appointment is an incredulous attempt to populate the board with members who do not have Protection of Alaska's fisheries resource as a priority.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

I strongly urge YOU to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Philip Young

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

Were Abe to serve on the board of Fish, the balance of representation would be further skewed, and the board would lack adequate representation from coastal residents and commercial fishermen.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska House Resources Committee,

Conflict of interest much? This looks scummy, and I don't mean algae.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska House Resources Committee,

We are writing to express our concern, our outrage and disgust, over the nomination of Mr. Abe Williams to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine. He has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries is very concerning and raises unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

I live in Bristol Bay and Abe Williams does not represent the fishery but instead is someone who is being paid by Pebble and only for his own gain and is not the voice of Bristol Bay people.

Now that we have an election, we are seeing where our representatives stand on Pebble. I will only vote for candidates that are against Pebble.

How can anyone justify appointing a person who does not live in Bristol Bay and does not want to protect our fishery?

Get rid of Abe Williams and appoint someone who properly represents the largest red salmon fishery in the world. I would like to see Robert Heyano in the position.

Remember that Canada has very little respect for their fisheries. The Frazier River used to be the largest red salmon run in the world and it is now a very small run. Excavation of gravel, dredging, and mines have devastated the Frazier. We must protect the environment of our special fishery.

Dear Alaska House Resources Committee,

Dear Sen Kiehl,

I am writing to express my significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

I urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing Alaska's fisheries.

Sincerely,  
Abigail Calkin

As A "summer" resident of Alaska, and within a three year period, a full-time resident, I come there for the grayling, Char, salmon, and trout fishing, not to have some, most probably multi-national corporation destroy the salmon fishery for cheap metals. I don't know what part of the two-lettered word NO these people do not understand?

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
JUDITH A KEARNS-STEFFEN

Dear Alaska House Resources Committee,

I have written before to express my outrage and concern about the obvious "stacking of the deck" that is going on by Governor Dunleavy with his appointments that are designed to bulldoze his desires through any and all objections. I know Abe Williams personally and I know his family, and although I believe Abe to be a good person, his appointment to the board of fisheries is a blatant attempt to push Dunleavy's agenda no matter what. I join with the other folks who drafted and are sending the letter below.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Jeanne Parker

Dear Alaska House Resources Committee,

As a former Bristol Bay salmon fisherman I am writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Roger Clyne

Dear Alaska House Resources Committee,

I am writing to express my significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries, not destroying them, and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts on the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, he has consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and he has testified dozens of times in support of developing the project, despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raises grave concerns and unacceptable conflicts with his ability to fulfill the responsibilities of the Board of Fisheries to conserve and develop Alaska's fisheries.

Bristol Bay has maintained nearly constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent. It is also unforgivable and very obviously self-serving, rather than serving the state as Governor Dunleavy should be doing.

We urge the legislature to reject the nomination and encourage the governor to find a more suitable candidate who has the faith of fishermen in fulfilling the Board's important role in managing our fisheries. After all, it is the Board of Fisheries, not the Board of Mining.

Sincerely,

---

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Dan Anderson

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Bill O'Brien

---

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Nadene Thorne

Dear Alaska House Resources Committee,

Dear Senator Costello,

I am writing you in regard to the protection of the Alaskan salmon industry.

Appointing a lobbyist for Pebble Mine to the Board of Fish will create an appalling conflict of interest. The role of the Board of Fish is to conserve our fisheries and to resolve allocation between the various user groups. Pebble is certainly not a user group, and the question of whether the Bristol Bay salmon fishery is worth saving is not part of the Board's job. Appointing Abe Williams to the Board of Fisheries is like appointing Ethan Berkowitz to the Republican Party's Central Committee. This henhouse needs a fox-proof rejection.

Sincerely,

Wilson Rice

His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Avram Salzmänn

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Teresa Lowrey

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

I also want to express my disappointment that you will not be returning as my representative. Your willingness to work across party lines and refuse to let partisan politics determine your stand and position on issue impresses me. This is a frightening time for me and my family due to Covid-19 and the economy. The solution has to be a compromise and a focus on preserving the Permanent Fund rather than increasing or even maintaining the PFD distribution at unsustainable levels. Investing in Alaska's public services - Medicare for all, education, environmental protection and investment in energy alternatives - is critical for the long term public prosperity. It is imperative that this legislature consider an income tax and an increase in oil company taxation as well as other resource taxes - fishing and timber.

Thank you for your service.

Sincerely,

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
George Keefe

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The Pebble Project PLP has been allowed by Gov. Dunleavy to infiltrate nearly all agencies in State and local government agencies and boards. This project will be catastrophic for Bristol Bay. Already Lake and Pen Borough has been infiltrated. Now Gov Dunleavy is trying to add to Jason Brune in ADEC. This is ridiculous.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Eugene Maltzef

Dear Alaska House Resources Committee,

I live and work in Naknek and I personally know Abe Williams and his family. I believe that Abe is a good man, and although he does live in Anchorage now, he grew up here. Nevertheless, I don't think that Abe represents the vast majority of the people who live here, or Alaskans in general. I think it's wrong to put someone on the influential board of fisheries that derives a significant part of his income from a company that wants to put a mine in the headwaters of Bristol Bay, putting water and salmon at high risk. I am signing the letter below, along with many others who see this as "stacking the deck", something that our governor and president have been doing shamefully.

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
eric mauro

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent. It is outrageous, knowing how controversial this project is, that you would even consider Mr. Williams for a position on the Board of Fisheries!! My family fished in Bristol Bay for almost 20 years and I testified at many Board of Fishery meetings...This is unacceptable!

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Dear Alaska House Resources Committee,

**\* GOVERNOR DUNLEAVY IS A MAJOR THREAT TO THE ENVIRONMENT \***

I commercial fished Bristol Bay for years. For a decade, I worked to save Alaska's Delta-nesting wild geese, a key subsistence resource for Yup'ik villagers. I created the first subsistence waterfowl hunting survey that is now standard on all Federal lands in Alaska. I love Alaska pristine ecosystems with all my heart. Dunleavy, on the other hand, would sell his own mother. His soul is owned by Pebble Partnership. Putting a Pebble Partnership flunkey on the Board of Fisheries is insane! DON'T DO IT!

I am writing to express my significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
alana peterson

Dear Alaska House Resources Committee,

We are writing to encourage the Legislature to reject Mr. Abe William's nomination to the Board of Fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries.

Governor Dunleavy's nomination is a gross attempt to manipulate fishing regulations in Alaska. The role of the Board of Fisheries is conserving and developing Alaska's fisheries and confirmation of Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

In recent years Williams has filed a lawsuit funded by the Pebble Limited Partnership against commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Dear Alaska House Resources Committee,

Gov Dunleavy has once again proven his contempt for the will of Alaskans concerning whether the Pebble mine should move forward. Appointing a PEBBLE MINE EMPLOYEE to the a board of people that can heavily influence this direction is an egregious attempt to force his questionable will on the well being of citizens of the state of Alaska. And it makes me wonder how something like this is even legal. Please do all you can to put to death his efforts to make a handful of millionaires and billionaires even richer than they already are.

Dear Alaska House Resources Committee,

I am writing to express serious concern about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to ask the Legislature to reject his nomination. This position on the Board should be for a resident of the Bristol Bay area, not Anchorage. Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries not only because he does not live in the area but also because his interest certainly appears to be development of the Pebble Mine.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

I urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Marian Allen

Dear Alaska House Resources Committee,

After living in Alaska for 40 years and seeing the struggles between environmental and economic interests, it is unbelievable that the Pebble Mine project with its advocates continues to have a voice and a possible future. We should have learned that Incidents like the Exxon Valdez happen and the toll is NEVER erased.

The Pebble Mine project is certainly of local consequence, but the worldwide effect would be catastrophic. The resource that should be protected is not one that can be recreated. We, as a world, cannot FARM our way to a healthy food source.

The recent appointment of Abe Williams to the Alaska Board of Fisheries should be seen as a glaring sign of Dunleavy's bias In favor of the Pebble Mine interest, as Williams role on the Board would be clearly a conflict of interest as he is a significant part of, and paid by, the Pebble Mine Canadian owners.

The appointment should be seen for what it is: A vote from the current administration to move an economic interest forward that would sacrifice the interests of local Alaskans, Alaskans as a whole, and the world-wide health of the salmon industry.

Abe Williams should NOT be confirmed.

Sincerely,  
Sharon Snelling

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

Citizen Representative,

The overt bias that is being exercised in appointments of PUBLIC - not personal opinion nor interests - agents now takes on a force which only the acting individuals in control ( if they actually have any power to exercise influence) can shift from the corrupt personalities now over-whelming state and international gov't. Having been a lifelong Democrat, the last few years have revealed the weakness of most people to have any say in the stewardship of resources which predominately serve alien and exclusive entities not connected in any way but to be a city-capitalist in a territory surrounded by resources which best serve that community's profile of tax-return and system budgeting. What comes of property is of little concern as long as profit for road contractors, outside construction crews ( now that you have all voted out the age old law of Local-Hire requirements), foreign-state/country special-interest corporations, and the associated 'gift-ees' of campaign support and who knows what else, has brought me to the point where even voting Republican as I have in the last 2 years, no longer affects the yas or nays of the chambers. It is only upon individuals with enough wisdom to gain fellowship among legislators, and the courage to lead what inevitably is going to be this lifetime's battle for preservation for what will otherwise become as any other obvious condition seen in any other state, or country, that any child can google, and recognize, is the trash ridden, poison saturated, wastage becoming the legacy of 'the-so-called-peoples'-choice(s) implemented by 'our' Decision-making truth-sayers of Juneau.

'Oh,yes, Mr. Dunleavy, that's exactly how you represented yourself in the debate in my home town." Some claimers to humanity announce, "I did not lie!" Yet, no divorcee of this new age would argue that kind of conveyance WAS deceitful. It is a matter of individuals now, to find their allies, and lead against the conformist consumer-serving mechanisms that the we-the-masses choose. Belief is insufficient. What to believe matters.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

They really do need to be stopped from this violent plane called "pebble"  
The state of Alaska has gold other places that are already in active state and federal mining districts the value Bristol Bay provides 70% of the global commercial wild natural caught salmon. Nothing can replace that once it is gone.

The "pebble" would bring the salmon products produced from Bristol Bay from 70% global wild natural caught salmon to 0%.

The way salmon work is they have DNA part of that is the minerals in their spawning grounds, once their spawning ground minerals composition is altered in the way "pebble" will the salmon will not be able to return and spawn but instead they will be confused of where their home is and die off without spawning.

And no more salmon.

Sincerely,  
Aaron Johnson

---

Dear Alaska House Resources Committee,

We are writing to express our significant concerns about Mr. Abe Williams' nomination to the Board of Fisheries by Governor Dunleavy, and to encourage the Legislature to reject his nomination.

The role of the Board of Fish is conserving and developing Alaska's fisheries and confirmation of Mr. Williams would call into question the Board's ability to responsibly manage Bristol Bay fisheries.

Mr. Williams has spent much of his career working to promote the proposed Pebble mine, which risks severe impacts to the sustainability and profitability of one of our state's most important fisheries. In recent years he has filed a lawsuit funded by the Pebble Limited Partnership against fellow commercial fishermen, consistently mischaracterized the overwhelming views of commercial fishermen and local communities from the region on the proposed mine, and testified dozens of times in support of developing the project despite the fact that it would permanently destroy between 105-300 miles of rivers and streams in the region. His long-standing commitment to the proposed Pebble mine and willingness to cast aside the undeniable harm it would cause to the local fisheries raise grave concerns and unresolvable conflicts with his ability to fulfill the responsibilities of the Board to conserve and develop Alaska's fisheries.

Bristol Bay has maintained near constant representation on the Board of Fish for 40 years. Replacing a board member in good standing who represents both the State's largest salmon fishery and rural Alaska with an active advocate for the Pebble Mine flies in the face of the values and priorities the Board of Fish is mandated to represent.

We urge the legislature to reject the nomination and encourage the Governor to find a more suitable candidate that has the faith of fishermen in fulfilling the Board's important role in managing our fisheries.

Sincerely,  
Jan Atkinson
