STATE OF ALASKA 2021 LEGISLATIVE SESSION

BILL NO. HB 121

Analysis

Background

The education tax credit is a credit for qualifying contributions to Alaska universities and accredited nonprofit Alaska twoor four-year colleges for facilities, direct instruction, research and educational support purposes. The tax credit can also be claimed for donations to a school district or a state-operated vocational technical education and training school for vocational education courses, programs and facilities. Donations for Alaska Native cultural or heritage programs for public school staff and students, and a facility in the state that qualifies as a coastal ecosystem learning center under the Coastal American Partnership also qualify. Contributions to the Alaska Higher Education Investment Fund established in 2012 qualify as well.

The credit is available to be claimed against insurance premiums tax, title insurance premiums tax, corporate income tax, oil and gas production tax, oil and gas property tax, mining license tax, fisheries business tax, and fishery resource landing tax. The credit for any one taxpayer cannot exceed \$1,000,000 annually across all tax types.

The proposed legislation would expand the education tax credit to include donations made to childcare facilities for the children of the taxpayer's employees, or for payments made to an employee of the taxpayer for the purpose of offsetting the employee's childcare costs. The new provisions would take effect January 1, 2022.

Revenue Impact

The estimated revenue impact of this proposed legislation cannot be determined because the Department of Revenue does not have Alaska-specific data to estimate how many taxpayers will claim the expansion of the credit, how many taxpayers currently pay their employees' childcare costs or make donations to childcare facilities for the children of their employees, or how many taxpayers will start paying their employees' childcare costs or making donations to childcare facilities for the children of their facilities for the children of their employees. Other sources of uncertainty stem from the high contribution limits and high cost of care in Alaska, as well as the fact that the credit is available against multiple tax types in Alaska.

Implementation Cost

This proposed legislation would not require the Department of Revenue to make material changes to its Tax Revenue Management System (TRMS). Therefore, there would be no cost to the Department for implementation. Resources required to implement this bill would include staff time to updated tax forms, TRMS, and Revenue Online, and other miscellaneous costs when applicable. These costs will be absorbed by the Tax Division using existing resources.
