Dear Finance Committee,

Thanks for your service. My primary idea is that the Gov and legislators as well as all State employees need to work daily on economic development !!

The state needs to expand the staff of economic development officers to at least 33. Many CEO's and firms want to leave the states of California and New York. So now is the perfect time to recruit them with free land and tax breaks.

Because the Federal government owns the majority of the land in the state, the state needs to work on a daily basis the require the federal government to deed back the majority of this land to the state for development. No other state is forced to operate with such a small percentage of land. This has always been unfair.

In order to make Alaska more attractive for development , the state needs to install the fastest Internet in the world by hiring the designer of the Internet infrastructure of Singapore. They have the fastest INternet and Alaska cannot compete with them now.

Alaska also needs to develop the lowest electrical cost in the US in order to attract more firms. Geothermal, hydro and wind can be developed in achieve this.

The following map shows the wind potential of the state and the state is fortunate to have this !!

The state must attract thousands of entrepreneurs as well as new corporations, etc

Budget cutting does not create jobs.

NYSE just announced they are leaving NYC. Does the state have a proposal to attract them?

The New York Stock Exchange warned Tuesday that it **may leave the state if the legislature imposes a tax on stock transfers**, escalating a fight with Democrats who argue the move would help address a historic budget shortfall. New York Stock Exchange (NYSE) at Wall Street on January 12, 2021 in New York City.

This is just one example and your economic development office-commerce should have already been working on this.

The State must create advantages for relocation such as low electric rates, best Internet speeds in the world, etc.

Keep up the great work !!!

James Glenn
