

# Information Technology Consolidation

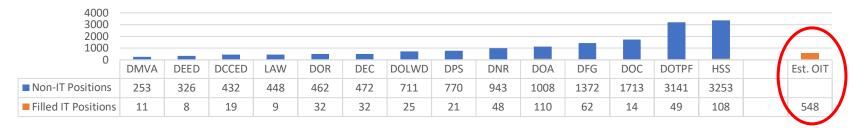

**Bill Smith, Chief Information Officer** 

March 4, 2021 | House Finance Committee Presentation

### Information Technology Consolidation: Background

- Administrative Order 284 (April 25, 2017) was designed to address a lack of scale and coordination that led to
  inefficient IT spend and performance. It established the Office of Information Technology (OIT) within the Department
  of Administration (DOA) as well as the position of Chief Information Officer.
- During the initial implementation attempt in 2018, the planned wave in of PCN transfers was not completed. Currently, OIT has an approved PCN count of 240 positions (compared to the initially estimated requirement of 548).

#### SOA Executive Branch Filled Positions (FY17)

#### Filled IT Positions Non-IT Positions

OIT Presentation (January 2018)

### Information Technology Consolidation: Initial Results

- The current statewide IT operating model does not reflect the intent of Order 284, nor do the organization structure, resource deployment or process capabilities enable efficient consolidation adoption.
- Adoption of IT consolidation services has been inconsistent across State Agencies. Conflicting priorities have delayed the adoption and implementation of standard technology and process, resulting in service shortfalls and cost inefficiencies.
- Despite limited implementation, initial consolidation work has provided benefits:
  - 2018 first attempt at statewide IT spend monitoring
  - Annualized savings growing year over year (>\$1M in 2020)
  - >\$1.9M saved with purchase of standard computers in 2020
  - Rapid launch of Microsoft Teams collaboration software statewide
  - Rapid launch of DocuSign electronic signature software statewide

### Information Technology Consolidation: AAPEX Project

- The Department of Administration initiated the Alaska Administrative Productivity and Excellence (AAPEX) project to independently assess the IT Environment, recommend a path to complete the implementation of AO 284 and execute the plan.
- 'Outside in' assessment conducted by Alvarez & Marsal, a recognized management consulting firm with turnaround experience in the public sector, specifically centered around shared services and technology.

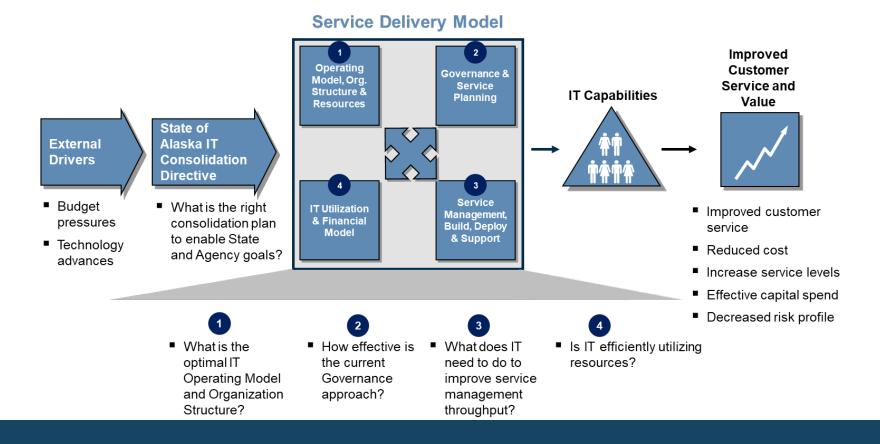

Alvarez & Marsal Experience

Client	Project Description	Information Technology	Centralized Procurement	Travel Administration	Finance & Accounting	Leasing	Centralized Mail and Print
City of Seattle	IT consolidation and effectiveness assessment, back-office shared services performance improvement	~	~	~	~		
State of Wyoming	Statewide Efficiency Study, including IT and shared services workstreams	~	~	~	~		~
State of Kansas	Efficiency study and business process review, including IT and administrative back-office functions (e.g., procurement, real estate and leasing, etc.)	~	~		~	~	~
Major Toy Retailer	Implementation of IT shared services center	~	~		~		

### Information Technology Consolidation: Assessment Framework

• Assessment utilized a standard framework – Control Objectives for Information Technology (COBIT)

### Information Technology Consolidation: AAPEX Assessment

• Based upon interviews across the departments, empirical analysis and other reviews several factors were identified that contributed to substandard IT performance and cost inefficiencies.

#### **Organizational Realities**

- 700 state-wide headcount PCNs
- 280 (42%) in DOA; 420 (58%) in Agencies
- 8-10 Reporting variations between OIT & the 15 agencies
- 68 Job Titles not uniformly skilled across IT
- 153 people moved to OIT; Most still taking direction from their home agency

#### **Technical Complexities**

- 1,713 Business Application
- 894 Custom Applications (known)
- 3,464 Databases
- 77 Development Platforms
- 2,526 Infrastructure Assets

#### **Resource & Skill Gaps**

- 20% of budgeted positions are unfilled statewide; while demand for services is unchanged
- Ticket resolution delayed by random skill assignment
- IT Architecture roles are unfilled for OIT
- No formal training programs in place

#### Governance & Controls

- Unclear responsibilities across agencies & OIT; no RACI or charter documents found
- No statewide IT strategic planning processes, policies or procedure doocuments
- No common statewide IT project investment and control process
- No understanding of state-wide total IT spend

#### **Process Deficiencies**

- 37 IT processes evaluated; 100% rated below average
- Most IT processes require ad-hoc skills handling to compensate for process shortcommings
- No formal architecture guidelines
- No project lifecycle proceses
- No portfolio management standards

### Information Technology Consolidation: AAPEX Implementation

- Current assessment drove a planning phase and roadmap generation presented in March 2020.
- The AAPEX portfolio calculated an investment of \$16.5M to implement the suite of 23 recommendations with a projected \$33.8M net statewide IT run rate reduction over 5 years.
- In May, facing competing pandemic priorities, 4 foundational projects moved forward with implementation.

Implement Consolidated IT Organization Implement Technology Governance & Key Working Groups Implement a Desktop Service and Standardization Program Implement New Rate Calculation Methodology

### Information Technology Consolidation: Consolidated IT Organization

• Prerequisite to consolidate infrastructure and applications. Includes aligning IT skills with job titles and filling key skill gaps.

	1. Build the Foundat	ion	3. Consolidate Shared Applicatio
		2. Consolidate Infrastructure	
Objective	Implement standard processes for Service Management (Helpdesk) and standardize Desktop	Consolidate Server Room infrastructure to 3 locations or Cloud; implement project management	Implement statewide operating model for applications used by all Agencies (e.g. IRIS)
Operating Model, Org. Structure & Resources	<ul> <li>Implement first stage of consolidated IT organization</li> <li>Rationalize IT job titles</li> </ul>	<ul> <li>Expand infrastructure operation resources in consolidated organization model</li> </ul>	<ul> <li>Expand responsibilities for Enterprise Applications in consolidated organization model</li> </ul>
Governance & Service Planning	<ul> <li>Govern statewide spend for new capital expenditures</li> <li>Govern statewide technology standards, policies, and priorities</li> </ul>	<ul> <li>Govern operating and capital spend for statewide infrastructure</li> <li>Implement annual IT Operating Plan, align capacity with demand</li> </ul>	<ul> <li>Govern operating and capital spend for shared applications</li> <li>Build 3 Year Strategic Technology Roadmap</li> </ul>
Service Management, Build, Deploy & Support	<ul> <li>Design Azure migration</li> <li>Continue mainframe retirement</li> <li>Implement statewide standard desktop program</li> <li>Implement DOA Service Management (Helpdesk)</li> <li>Improve IT project management templates and methods</li> </ul>	<ul> <li>Consolidate 23 server rooms and leverage cloud</li> <li>Implement statewide IT project management method and tool</li> <li>Define statewide integration architecture and standards</li> </ul>	<ul> <li>Expand Service Management to include end user self service and asset management</li> <li>Implement application lifecycle management practices</li> <li>Rationalize application portfolio for Shared Application</li> </ul>
IT Utilization &	<ul> <li>Consolidate technology purchases</li> <li>Implement new IT chargeback model</li> </ul>	<ul> <li>Implement IT chargeback true-up process</li> </ul>	<ul> <li>Implement statewide IT spend tracking</li> <li>Implement productivity measures</li> </ul>

### Information Technology Consolidation: Way Ahead

#### • DOA is evaluating resources and sequencing for remaining projects, and the planned projects will move.

	Focus Area	Project ID	Project Description	FY 2020		FY 2020 FY 2021		021			FY 2022			FY 2023	
				Q3 Jan-Mar	Q4 Apr-Jun	Q1 Jul-Sep	Q2 Oct-Dec	Q3 Jan-Mar	Q4 Apr-Jun	Q1 Jul-Sep	Q2 Oct-Dec	Q3 Jan-Mar	Q4 Apr-Jun	Q1 Jul-Sep	Q2 Oct-Dec
