FISCAL NOTE ANALYSIS

STATE OF ALASKA
2021 LEGISLATIVE SESSION

BILL NO. HB 22

Analysis

This bill would explicitly allow shared ownership of milk-producing animals as well as sharing of raw milk and raw milk products among multiple owners.

The bill prohibits the Department from restricting or imposing requirements on the sharing or transfer of raw milk or raw milk products between co-owners, and provides a definition of “raw milk” and “raw milk product”. There would be no regulatory oversight, testing, or inspections required of the Department under this proposed legislation.

Food borne illness outbreaks related to raw milk distributed through herd share agreements are an existing risk. The Department would be able to assist the Department of Health and Social Services with investigating these outbreaks within its current resources.
