Subject: ATVs and snowmachines on roadways

Committee Members—

This is an incredibly dangerous proposition! There is already a large problem with these machines on our rural roads, that we can't afford to exacerbate. The machine aren't safe for the roads, and the roads aren't safe for them. I do not want to be responsible for hurting a driver of such a vehicle that pulls out in front of me, slides on the ice, or does anything else over which I have no control. Stop this nonsense now!
