Initial coverage may be subject to gateway deployment and regulatory approvals

The Pikangikum First Nation, Ontario, Canada

World's Largest Satellite Operator

1,445 Starlink satellites launched

Launching 120+ satellites/month

A long-exposure night photograph showing a bright, curved meteor streaking across a dark, star-filled sky. The streak starts from the bottom right, near a bright city light, and curves upwards and to the left. The bottom of the image shows a dark horizon with various city lights and a body of water reflecting some of the light. The word "QUESTIONS" is centered in the middle of the image in a white, bold, sans-serif font.
