I support Rep. Kreiss-Tomkin's bill HJR 1 that would preserve the POMV formula and prevent the legislature from overdrawing the permanent fund. POMV is a logical way to keep the permanent fund intact for our future. Instead of using it up now, we need to create other forms of revenue like an income tax.

Please consider this bill. Thank you for your time,

Cheryl Lovegreen

This is to completely support HJR1 which provides for a no more draw than 5% annually from the PFD earnings. This is good rational economic policy. We cannot afford to start spending down or otherwise endangering the capital in the PFD. We need to look to the future because earnings from the Permanent Fund are vital to the economic stability of Alaska. Thank you. John Jensen 99516
