

**Department of Education & Early Development**

The Alaska Developmental Profile (ADP) is an observational tool administered to all Kindergarten students at the beginning of the school year. Educators determine ratings for each student in 13 goals within five domains. The ADP covers five domains—or areas—of development and is comprised of several goal statements that express a specific expectation of what children should know, understand, and be able to do at Kindergarten Entry based upon the Alaska Early Learning Guidelines. A student is marked that they “consistently met” a goal if they are generally able to demonstrate that skill or behavior 80% or more of the time.

To protect student privacy, the Department of Education & Early Development implements suppression rules as follows:

No results will be reported if less than five students total are tested. In these cases, an asterisk will appear in place of the result.

If either level (% meeting or % not meeting) contains zero, one, or two students, the number of students will be eliminated and the percentage of students at each level will be reported as a range.

If both levels contain at least three students, the exact percentage of students at each level will be reported. Ranges will be reported according to the table below.

Number of Students Tested	Level Range
5	60% or more 40% or fewer
8	75% or more 25% or fewer
10	80% or more 20% or fewer
20	90% or more 10% or fewer
40 (or more)	95% or more 5% or fewer

Additionally, after implementing primary suppression, complementary suppression is applied as well. Complementary suppression is applied when only one unit in a given level is suppressed. In these cases, simple subtraction would allow the audience to derive the suppressed value. In order to prevent this, a second unit in a given level is suppressed so that the value cannot be derived using simple subtraction. When complementary suppression is applied, a double asterisk will be displayed.
