FISCAL NOTE ANALYSIS

STATE OF ALASKA
2021 LEGISLATIVE SESSION

Analysis

This legislation changes the amount calculated for the appropriation for the payment of permanent fund dividends to 50 percent of the 5.0% percent of market value (POMV) draw from the permanent fund earnings reserve account (ERA). This bill directs the legislature to appropriate 50 percent of the statutory POMV draw to the general fund and 50 percent to the dividend fund for the payment of permanent fund dividends (PFDs).

The Governor's fiscal year 2022 budget included an appropriation from the ERA for the current statutory permanent fund dividend calculation, estimated to be \$2,023,947.0. This legislation is effective for fiscal year 2022, and if enacted, the new statutory calculation for the PFD appropriation would be \$1,534,648.0, a difference of \$489,299.0.

The values on page one of this fiscal note for fiscal years 2023 through 2027 are based on 50 percent of Alaska Department of Revenue official projections for the 5.0% POMV draw. Out-year estimates are subject to significant variation based on future market returns and whether additional appropriations are made from the ERA.

Under the calculation proposed by this legislation, the PFD amount to be paid to eligible applicants in calendar year 2021 is estimated to be \$2,329. The table below shows estimated dividends per recipient for fiscal years 2022 through 2027.
