

Dear Honorable Senate Judiciary Committee:

Please strike section 1.E from HB3. The only thing more fearsome and disasterous than “the occurrence or imminent threat of widespread or severe damage, injury, loss of life or property, or shortage of food, water, or fuel resulting from... an outbreak of disease or a credible threat of an imminent outbreak of disease” is a coordinated government response to such a perceived threat.

Please work to make public health private.

Sincerely,
Lucas Smith
Senate District L
House District 24
