Hi,

This is a concerned citizen from the Wasilla area. I just wanted to email to let you know that I support medical freedom in Alaska.

Mandates that are health related should not be the governments business. I have reacted to a vaccine in the past and will not take this current one under any circumstances.

Please support SB 156!!!!

Thanks Rosanna Ylitalo, Wasilla

Subject: Re: Senate Bill 156

Hello Senator Mike Shower,

I am writing to urge you to support Senate Bill 156, especially for the following readings:

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

I personally have a pre-existing autoimmune disease that flares and becomes extremely aggravated by any kind of vaccines. I take it upon myself to be responsible and avoid large gatherings during flu/sickness seasons and rely on many homeopathic remedies to aid my immune system; I do these by choice and of course because I cannot tolerate vaccines. I feel that preserving this ability to choose what is best for me is important and no mandate should threaten this freedom to choose.

Thanks so much for taking the time to hear my concerns and I sincerely hope you take Alaskans like myself in consideration when it comes to Senate Bill 156.

Sincerely,

Rochelle King (Kenai Peninsula resident)

Subject: Senate Bill 156

Dear Senator Mike Shower,

Thank you for your service to our great state of Alaska.

I see that the Senate Bill 156 will be considered tomorrow in the Senate State Affairs committee. I urge you to support Senate Bill 156. As I read the bill, I understand it will protect Alaskan's freedom to make their own choice about the COVID 19 vaccination. This choice should be with each individual and should not determine their job status or infringe on their medical privacy rights to disclose their status. There are many reason someone may or may not take the vaccine. That should be a private decision for them to make. One that they are able to weigh the benefits as well as the risks of the COVID 19 vaccination without feeling coerced.

Again, I ask the you stand in support of Senate Bill 156.

Thank you,

Sharon Walsh

Subject: Senate bill 156. I am writing to urge you to support SB 156.

Why should anyone be fired from their job or denied access to a public place for declining a medical intervention? There are good reasons for deciding against vaccination. Personal health situations, pre-existing immunity from having Covid, and objection to

the unethical methods used to make the Covid vaccines are all legitimate reasons to refuse an experimental vaccine for your own body. Alaska citizens should be free to decide for themselves the benefits or risks of Covid-19 vaccination. Please protect the right to make this personal decision for Alaskans. Thank you

Subject: NO Mandates

Not a word was said by employers forcing this shot about who would pay the hospitalization and medical bills should there be an adverse event; or death. I found that odd. I'm surprised the Nuremberg Code isn't talked about more. The reason this was written was to prevent future occurrences of forcing people into medical experiments. The Code says people MUST have informed consent. "Informed" means to 1) be told the ingredients in a medication. 2) know what the drug is supposed to do and how it works 3) be given a full list of all known side effects and certain health conditions under which a person might not be a good candidate for receiving the drug. Well...we know NONE of this happened during the roll out. We know the dangers of the MRNA drug were ignored by those promoting it. CDC and State Health officials were even urging pregnant women to get the shot against the advice of the manufacturer who stated the drug should NOT be given to pregnant or nursing women. Sadly, some women did experience a miscarriage after being convinced to take the drug. So, it sounds to me like those who violated the Nuremberg Code should be held accountable. Sen Reinbold is correct. No one should be coerced (and that's what it WAS!) to take medical risks by injecting themselves with an experimental pharmaceutical product.

Subject: SB 156

Hello, My name is Desiree Cook and I am a Palmer resident with my husband and 4 kids. My husband works on the slope and the uncertainty of pending vaccine mandates over the last 12 +\- months had been very stressful. Thankfully, due to the SCOTUS ruling, he doesn't have to worry about choosing between his personal autonomy and feeding his family.

I am not in the same boat. I am going to graduate from UAA with my bachelors of science in nursing in May 2022 and the uncertainty of whether or not I will be employable due to turning down a vaccine for an illness I've recovered from twice weighs heavily on me.

All nursing theories throughout nursing school have taught that individual autonomy is to be respected, that the patient always has the right to refuse, and that the job of healthcare workers is to educate not force any medical treatment - this is called provided informed consent. These are fundamental nursing concepts.

Therefore the thought that an individual forfeits the autonomy of their body by merely entering the field of health care is an atrocity and violates basic human rights. The counter argument that I've heard is invalid which is that the job of the nurse is to protect their patients. The vaccine does not stop transmissibility and this has been proven time and time again. Therefore, an unvaccinated and vaccinated nurse must practice the same safety protocols to prevent a hospital acquired infection. The real issue is that nurses and doctors are being segregated from society by losing their jobs and being denied certain services. This is not ok nor is it what being an Alaskan is about. We embrace diversity and foster an environment that is welcoming to opposing ideas. We do not force one sect of a population to succumb to another.

I implore to the committee to protect every Alaskan's right to work and right to decline a medical intervention through informed consent in the state of Alaska.

Thank you,

Desiree Cook

Subject: Senate Bill 156

Dear Senators,

I extend many thanks to Sen. Reinbold for sponsoring SB156 and I implore you all to champion this legislation fervently until it is safely enacted in Alaska. The draconian mandates in place in this and other areas of the state in the name of Covid-19 - a virus with over a 99% survival rate - must end now, particularly with regard to injections. Numerous reasons exist for declining the current experimental "vaccines" available, not the least of which include the questionable safety and known poor efficacy of any mRNA injection for the prevention and spread of the virus and its many variants. Aside from the aforementioned issues, Alaskans who do not wish to participate in the federal government's experimental medical injection program cannot easily pack up and leave the state for a more personal health friendly environment due to the logistical barriers for doing so.

Please preserve Alaskan's rights for making the best personal medical decisions for themselves and their children without government interference or restriction.

Thank you - Joaquina Martin Chugiak, Alaska 907-441-8887

Subject: Please support SB 156

Hello all,

I'm writing to urge you to support SB 156 to protect medical freedom in Alaska. A "one-size-fits-all" approach to healthcare has never worked in the past, nor will it work with COVID-19. Alaskans have a right to decide for themselves whether they want to inject themselves with the COVID-19 shot every 3-4 months as a treatment option (I abstain from calling it a vaccine since it does not function as one) or whether they want to take care of themselves and those around them using other effective and proven protocols. To hold Alaskan livelihoods, educational opportunities and rights to medical treatment hostage is a horrific violation of human rights. I urge you to take a stand on this issue to protect freedoms over our own bodies.

The COVID-19 shot comes with risks (as does all of life) and Alaskans should be able to decide for ourselves whether we want to accept those risks or take other routes.

Thank you for your time.

Subject: Support SB 156

Greetings from Juneau, Alaska. I am writing you today, Senator Shower, regarding Senate Bill 156. I urge you to support SB 156 for the protection of medical freedom in Alaska.

All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention.

There are serious and valid reasons that any people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska.

Thank you for your attention,

Melissa Zahasky

Senators, WE THE PEOPLE ARE THE MASTERS OF BOTH CONGRESS AND THE COURTS. NOT TO OVERTHROW THE CONSTITUTION BUT TO OVERTHROW THE MEN WHO PERVERT THE CONSTITUTION

The fact that we even have to do this so that we can have choice blows my mind!

I can tell you right now that if any forced shots or vaccine passports are even considered you will have the biggest push back ever.

I will never be an "illegal person".

If you want the shot without researching it that's on you. But no one will ever put anything into my body that I don't want there!

Needle rape, or just rape from a rape survivor I can assure you if anyone tries to come at me with a forced anything. I will come out in top. The amount of control that people want over our bodies is sickening.

Subject: SB 156 Support

Dear Senate State of Affairs Commitee,

I am emailing in regards to Bill SB 156. I'm urging all of you to support this Bill for all Alaskans and our FREEDOM.

1st because it is the Constitutional thing to do and also the moral thing to do.

This Country was founded on FREEDOM to choose our religion and how we choose or not choose to live our lives and that includes our MEDICAL FREEDOMS..I had to quit my job at ANTHC (AK Native Medical

Center) I was a Medical Biller working at their Business office because of the illegal Covid Mandates this current administration has been pushing.

I had several LEGAL grounds for asking for an exemption all of which were never considered.

1. I am Christian and I do not agree with injecting myself with aborted fetal cells
2. I had just recovered from stage 4 colon cancer treatments which included chemotherapy. I was not going to put my body under any more undue stress then its already been through
- 3 Most important, it is ILLEGAL to force any experimental drugs / procedures on ANYONE pursuant to the Nuremberg Code unless they consent.

This "consent" should be VOLUNTARY. And by VOLUNTARY I mean it shouldnt be a stipulation for keeping your job or being able to travel FREELY or to be out in public.

People will be watching closely. Those of you who do not support this Bill for our freedom will be remembered when election season rolls around.

Thank you Lora Reinbolt for introducing this Bill. I support it whole heartedly! Please keep fighting for our freedom.

Sincerely,

Alice Amik

Subject: SB 156

I urge you to support S B 156 to protect medical freedom in Alaska.

Many people have a number of valid reasons for declining vaccination. The whole program to date has been a real goat rope with false and unscientific information being given as the rationale for draconian government overreach. Everyday we hear a new unsubstantiated reason for doing things. We have set many students back years in their development, from learning to talk on through the whole gambit of education. Many may never catch up.

The government says you must take the shot and if it kills or severely damages you that is tough. Neither the pharmaceutical company nor the government is liable.

Government should also not be allowed to selectively decide which medicine prescribed by a doctor can or can't be given to the patient. In the case of COVID-19 there are too many verified stories of patients who were not allowed to obtain medications that in many instances were shown to save the lives of those who received them.

Thank you for your consideration of my comments. It is a pleasure to hear of a bill, being considered, which has something to do with day to day Alaskan life and is not a political witch hunt.

Respectfully,

Chuck Bickley

Subject: Senate Bill 156

Dear Senator Shower,

I am writing to ask you to stand up for the rights of Alaskans to live healthy lives and decide for ourselves whether or not to put certain things in our bodies.

The idea of vaccine mandates and immunity passports just chills my bones, reminding me of Nazi Germany and current life in China under communist rule.

As a follower of Christ, I have a moral abhorrence to the way the mRNA "vaccines" were tested and/or manufactured using aborted human baby tissue.

Furthermore, the University of Pittsburgh expose has revealed that the fetal tissue is sometimes taken from aborted babies, delivered alive, with tissue gleaned before the heart stops.

If I were to accept one of these "vaccines," I would be supporting that evil industry.

I cannot be a part of that.

If vaccine mandates and immunity passports become the law in Alaska, our beloved state becomes a partner to that horrible crime.

Please support Senate Bill 156.

Subject: SUPPORT SB 156

Dear Alaska Senators:

I would like to implore you to support SB 156! This will protect the rights and medical freedoms of all Alaskans! I am a firm believer of Life, Liberty and the Pursuit of Happiness. If the liberal agenda gains support, and vaccine mandates, medical passports, and other agendas become more widespread, this will severely hamper every Alaskan from making the best decisions possible for them and their families. No one should be fired from their job, kicked out of school, denied jobs and schooling and denied access to public areas simply for having a differing opinion on medical procedures (immunizations, vaccines, masks, etc.).

All Alaskans have the right to weigh the benefits and risks of COVID 19 vaccination, just like all other medical procedures and interventions, and to make their free and informed choice...not forced through coercion or bribed with lottery style winnings. Many Alaskans have valid reasons for declining vaccination, including (but not limited to) personal health conditions, pre-existing immunity from prior COVID infection and moral/ethical objections to how the vaccine was developed.

Again, I implore you to side with the American way of life, side with personal freedoms and dignity for all Alaskans! No one should be forced by medical and political tyrants to conform to their medical opinions.

Subject: Senate Bill 156

Dear Senator,

Please support Senate Bill 156. It is essential that Alaskans remain free to make informed decisions on their healthcare without coercion. Nobody should ever be fired from their job, refused entry into school, or denied access to public places for refusing a medical procedure. There are many of us who have valid reasons for not getting a covid-19 vaccine. These include: natural immunity via prior infection, personal health concerns, reported side effects, and conscientious objection to manufacturing methods. Mandating a vaccine is unethical, anti-freedom and flat-out wrong.

People who advocate mandatory vaccines do so through erroneous logic: if they vaccine worked and they have it, then why does somebody else need to get the vaccine in order for them to feel safe? That flies in the face of reason. The argument that we need to relieve pressure on the medical system is laughable. Obesity and the many diseases directly caused by lifestyle choices that lead to obesity is the largest drain on the healthcare system. If lawmakers were really concerned about the health of their constituents they would take aim at the fast-food and processed-foods industry.

Subject: SB156

I am writing today in support of SB156, a bill which will help keep Alaskans safe from vaccine mandates and 'immunity passports.'

Too many Alaskans have faced terrible discrimination due to simply exercising their rights as an American citizen to the freedom to their own private medical decisions over the past year. No one should be forced or coerced into taking an unwanted, experimental injection in order to keep their employment and provide for their family, to travel, or to in any way participate in society. Medical privacy rights have been trampled and can only be seen as the first step in the onslaught of our other rights as Americans and Alaskan citizens. I am expressing my unequivocal support for this bill. Thank you.

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Your supporting vote would be appreciated.

Thank You,

Subject: SUPPORT SB 156: Protect Medical Freedom in Alaska

Honorable Senators,

I am writing to ask for your support for SB 156, to make vaccine passports and so-call immunity passports" unlawful in Alaska. It is unconscionable to force people to take any kind of medical treatment without their permission or restrict their access to society based on it. Instead we should insist on education and let every family decide what measures are best for them.

My arguments: –

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Best regards,

John Hawkins

Subject: SB156

Senators and Committee Members;

I'm writing this evening to express my thoughts as a determined and informed Alaskan voter who was struck down in my prime with long-term disability from vaccine injury. I support Constitutionally-protected human rights, promote medical privacy, and decry discrimination. To this end, I support SB156 "an Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine." However, the bill does not go far enough. The bill should be broadened beyond COVID-19 medical issues and include specific minimum fines/compensation to affected/injured parties and minimum penalties for each violation, possibly including criminal penalties if so authorized.

Government exists in service to the community that empowers it, to preserve our Constitutionally-protected human rights, including the right to make informed medical decisions with trusted medical experts and family. Government does not exist to take the place of our private medical decisions. Similarly, schools are for educating, not stepping in place of parents and administering medical procedures. Furthermore, free movement within our country's borders is vital to commerce and defense; free right to employment and economic participation is essential to our country's strength and stability. Americans who make medical decisions based on individual considerations are not lesser Americans and they are entitled to the same Constitutional protections of their human rights as all Americans.

I'm reaching out to ask you to consider this matter carefully before you have an opportunity to discuss this bill with fellow lawmakers or cast a committee or Floor vote. Please make this a priority to pass this session.

Heather O'Claray

Juneau, Alaska

Hello people,

I am in favor of this bill and the favoring of freedom and civil liberties and would like our legislature to back this senate bill to protect the people against this unjust employment discrimination that is dividing our country.

Thank you for your attention to this matter!

Kimberly Frey <kimberly.frey@alaska.edu>

UAA BSEE Student

Hello,

See below. Can you please hold a hearing on this bill as soon as possible?

Thank you!

Patti Asman

There is a bill that was filed on 1/18/2022 that we need to get behind. It is SB (Senate Bill)-156 its title is "An Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine." This bill would make it where you cannot be discriminated against for vaccination status. <http://www.akleg.gov/basis/Bill/Detail/32?Root=SB%20156>

Please hold a hearing on SB 156 as soon as possible. There currently seem to be no protections for those who make different decisions than what the propaganda machines want for us to do. Thanks so much.

Shannon Wileman shannon.wileman@alaska.edu

Dear Senate Affairs,

I am requesting that you bring this bill to the Senate Bill and discuss as soon as possible. There needs to be some relief for people in regards to vaccinations. There should be no coercion or discrimination for anyone that does not want to participate in an experiment.

Thank you for your immediate attention to this matter.

Sincerely, Sherry Coburn [REDACTED]@protonmail.com

I am writing today to request you hold a hearing on SB-156 as soon as possible. Alaskans need to be assured they will be treated equally and will not be discriminated against, ridiculed, bullied or refused from an establishment based on vaccination status.

As the pandemic goes on we obtain new information. We now know that while the Biden Administration and the Mayor Austin D. Quinn in Anchorage were ridiculing American Citizens and ostracizing the "essential workers" of the pandemic who have gone to work since day one, got COVID-19 and recovered, those COVID-19 survivors were 6x more protected against the Delta Variant than the vaccinated population. These divisive, manipulative comments were harmful and I believe if you were to look at the vaccination status of Alaska's victims of suicide in 2021, you would find a high correlation of unvaccinated in that population in 2021 due to the government's bullying actions and them feeling hopeless. We know of situations where passengers would not sit next to children on airplanes because they were not vaccinated! It's unconscionable and this behavior must stop.

SB-156 will help support the growing population of Alaska resident COVID-19 survivors who were 6x as protected as the vaccinated against the Delta variant and are, to this day, unable to provide "informed consent" for the vaccine, as is required by law. If you would like to know more about this, please ask. I'm happy to share why.

Asking who is vaccinated and who is not vaccinated must cease as it is discriminatory based upon confidential medical conditions. Furthermore, it is an outdated measurement tool. We now know vaccines do not keep someone from getting the virus, from being contagious with the virus, or from spreading it. In fact, the most recent data shows the vaccinated are more likely to have the virus and be asymptomatic, they replicate the virus more aggressively (produce more of it faster), and they are MORE likely to transmit it to others unknowingly than the unvaccinated.

Please take up this discussion immediately and remove the outdated, divisive messaging of "vaccinated" vs "unvaccinated" and correct the record. We do not have a "pandemic of the unvaccinated." What we have according to the CDC is a pandemic of the obese with 78% of people hospitalized with covid being overweight or obese. We have a pandemic of the unwell according to the CDC with a vast majority of people dying with covid already having 4 or more comorbidities and being extremely ill before they contracted COVID-19. We also have an alarming amount of mistrust by the American people of our government officials at this time as a result of not making quick changes as a result of new information contradicting lockdowns and restrictions on the public. It's long past time for that to stop.

Thank you,

Ruby Dee Buchanan

Thank you

Mary Jane Majdic [REDACTED]

Kodiak Alaska

To the Senate State Affairs Committee ,

YES, I fully support this bill. I think it is totally irresponsible to vaccinate the whole population , especially our kids, with an experimental 'vaccine'. I hear of more and more side effects and deaths from the jab and who knows what the long term consequences will be.... If people want to take the jab, that is their decision. It should be a choice not a mandate.

Thank you very much for supporting this bill.

anna seuffert [REDACTED]

Hi, both my husband and I are registered voters and we support SB 156. Please support this bill. It's critical. Thanks, Cary and Lydia Kimball, Kodiak

Dear Chairman Shower and Members,

I am pleased that SB156 will be before you on Feb.3. I encourage you to support this bill. I strongly believe that Alaskans' right to choose whether or not to receive a Covid-19 inoculation needs to be protected in law.

Informed Consent is a bedrock principle of medicine and public health. Covid vaccine mandates and passports would supplant informed consent with a system of social rewards and penalties instead of the rational consideration of medical risk and benefit that defines this basic freedom. Under the current patchwork of Covid vaccine requirements in the U.S., people are being pressured to accept Covid vaccines in order to keep their jobs, attend college, visit restaurants, etc. That is a form of coercion that deserves a strong prohibition in Alaska.

The Covid vaccines are still in trial under FDA Emergency Use Authorization while their safety and effectiveness are being evaluated. The US Vaccine Adverse Event Reporting System, the best vaccine safety data gathering system in the world, has recorded over 20,000 deaths associated with the Covid vaccines, compared to an average of just 155 deaths each year from normal vaccines in the preceding 10 years. Millions of Americans are paying attention and declining to participate in these Covid vaccine trials.

Declining to be Covid-vaccinated is a safe and responsible position. Effective and safe treatments are available to prevent hospitalization and death from Covid. Well informed Alaskans can make the choice.

Alaska needs clear statutory protection of the right to informed consent, and the right to decline these potentially harmful Covid vaccines. Thank you for considering my comments,

Carolyn Beck

Carolyn Beck [REDACTED]

The Alaska state government or any other form of government shouldn't be allowed to mandate or coerce any individual to take a fake vaccine (eua) or have a passport or even to take a test if it's against the will of the individual especially given the facts they now know about this so called man made covid virus. They can't come up with a cure of any kind for any other virus so to think and act differently with this virus is absolutely ridiculous. Please pass sb156 and keep Alaskans safe from mandates or any other forced control that isn't necessarily beneficial for the masses. Thank you for keeping us safe and allowing us as individuals to have our own choice in serious issues like this.

Keep looking up!!!!

Andy Cizek [REDACTED]

Good morning,

I strongly support this bill and hope our legislature does everything in its power to pass it. This will absolutely prevent a 2-tiered social structure in which 40% of Alaskans will be discriminated against. I commend Senator Reinbold and Senator Shower for standing up for the rights of all Alaskans.

Sincerely,

Jake Plancich

Anchorage Resident

Jake [REDACTED]

I lived in Alaska for my entire life, until recently relocating to Illinois for employment opportunities and want to share my experience with COVID-19 vaccine passports and voice my support for SB156.

1. There is no worse feeling than not being permitted access to a building / restaurant / funeral home / or church as currently is strictly enforced in Cook County Illinois. It is completely degrading to the human experience and gives a stigma of being “unclean” and not included.
2. Allowing for the freedom for people to make personal decisions related to their medical needs, as recommended by their personal doctor is a core principle for living in the “Last Frontier”. Generations of men and women braved Alaska’s harsh weather, vast mountaintops, and forging across one of the continent’s largest rivers in pursuit of a lifestyle that cannot be replicated in any other place in the world. Alaskans have forsaken safety as the number one priority for this pursuit of freedom; and my family has been following this path for 5 generations. As Alaskans, we don’t want this freedom that has always been so integral to our creed to be diminished.
3. As the COVID-19 pandemic continues in full force in Illinois, with no end in sight, our family is re-considering relocating back to my home state. Alaska would most certainly be able to attract more conservative, working, tax paying people relocating to the state by writing into law a bill outlawing COVID-19 vaccination passports.
4. I would also like to make it clear that there is no study, and no evidence that indicates that the current mRNA technologies employed for the COVID-19 shots provide any benefit from transmission of COVID-19, therefore someone vaccinated against COVID-19 will spread COVID-19, exactly the same as someone unvaccinated against COVID-19.

Please consider the comments above. Look at your own roots as an Alaskan, and ask why you live here & what brought your family here generations ago. Please, pass SB 156, to keep the last frontier free.

To Whom It May Concern,

I would like to voice my support for SB156 "An Act relating to COVID-19 immunization rights; and relating to objection to the1

administration of a COVID-19 vaccine." I have 2 recommendations:

1. Remove the specificity to COVID-19 so that it would cover all vaccines, past, present, or future. This would eliminate the need to re-address this issue in the face of similar threats to freedom.
2. Add clarification that it also applies to contractors and subcontractors. The imposition of a vaccine requirement for contractors is effectively the same treatment and should be clarified that this is not acceptable.

Thank you,

David Durst

I would implore you to please support SB 156 so that peoples individual rights, health and well being is being taken into consideration. Allow for people to have the freedoms to choose instead of it being chosen for them. Our state and our nation need to know that the individuals rights outweigh the minorities fears.

Thank You

Micah Miessner micahmiessner@gmail.com

Alaskans should have the right to choose whether they want to receive injections into the body or not. Making it a mandate removes Alaskan's freedom of choice; especially since it's a well known fact that as any virus mutates it becomes weaker, just as this Covid virus has been doing.

Covid Inoculations have not kept individuals from contracting Covid or from having serious symptoms, evidenced by a large majority of people ending up in the hospital, though they had been vaccinated.

Vote for the freedom of Alaskans. Thank you,

Kathy Murray STTS Murray kathy@murraystts.com

I respectfully request that you SUPPORT SB 156, to protect medical freedom for the people residing in our Great State of Alaska.

We, the People, should not be punished in any way for not wanting to participate in any medical procedure, including vaccinations.

We, the People, should be able to make our own decisions when it comes to our health.

Thank you.

Carla Eisberg carlaeisberg@gmail.com Eagle River, AK 99577

Carla Eisberg carlaeisberg@gmail.com

I am writing today in support of SB156, a bill which will help keep Alaskans safe from vaccine mandates and 'immunity passports.'

Too many Alaskans have faced terrible discrimination due to simply exercising their rights as an American citizen to the freedom to their own private medical decisions over the past year. No one should be forced or coerced into taking an unwanted, experimental injection in order to keep their employment and provide for their family, to travel, or to in any way participate in society. Medical privacy rights have been trampled and can only be seen as the first step in the onslaught of our other rights as Americans and Alaskan citizens. I am expressing my unequivocal support for this bill. Thank you.

My family and I are lifelong Alaskans, local business owners, and job creators.

We acknowledge that government mandates regarding personal health decisions are unethical and inappropriate. Though we may not agree with their values, we echo the creed of those pro-abortionists who claim: "My body, my choice".

We SUPPORT SENATE BILL 156. Alaska doesn't need to follow the trend of the progressive anti-freedom states.

Sándor Yager

Anchorage, Alaska Sándor Yager [REDACTED] [\[REDACTED\]](#)

Dear Senator,

Please support Senate Bill 156. It is essential that Alaskans remain free to make informed decisions on their healthcare without coercion. Nobody should ever be fired from their job, refused entry into school, or denied access to public places for refusing a medical procedure. There are many of us who have valid reasons for not getting a covid-19 vaccine. These include: natural immunity via prior infection, personal health concerns, reported side effects, and conscientious objection to manufacturing methods. Mandating a vaccine is unethical, anti-freedom and flat-out wrong.

People who advocate mandatory vaccines do so through erroneous logic: if they vaccine worked and they have it, then why does somebody else need to get the vaccine in order for them to feel safe? That flies in the face of reason. The argument that we need to relieve pressure on the medical system is laughable. Obesity and the many diseases directly caused by lifestyle choices that lead to obesity is the largest drain on the healthcare system. If lawmakers were really concerned about the health of their constituents they would take aim at the fast-food and processed-foods industry.

Sincerely,

Travis Robotkay

Travis Robotkay [REDACTED] @robotkaymail.com

Dear Alaska Senators:

I would like to implore you to support SB 156! This will protect the rights and medical freedoms of all Alaskans! I am a firm believer of Life, Liberty and the Pursuit of Happiness. If the liberal agenda gains support, and vaccine mandates, medical passports, and other agendas become more widespread, this will severely hamper every Alaskan from making the best decisions possible for them and their families. No one should be fired from their job, kicked out of school, denied jobs and schooling and denied access to public areas simply for having a differing opinion on medical procedures (immunizations, vaccines, masks, etc.).

All Alaskans have the right to weigh the benefits and risks of COVID 19 vaccination, just like all other medical procedures and interventions, and to make their free and informed choice...not forced through coercion or bribed with lottery style winnings. Many Alaskans have valid reasons for declining vaccination, including (but not limited to) personal health conditions, pre-existing immunity from prior COVID infection and moral/ethical objections to how the vaccine was developed.

Again, I implore you to side with the American way of life, side with personal freedoms and dignity for all Alaskans! No one should be forced by medical and political tyrants to conform to their medical opinions.

Respectfully:

Jonathan Bailey [REDACTED] (Retired) Anchorage

I am writing to address SB 156.

I urge each member of this committee to pass then forward this bill to the next level. Our nation is based on the foundation of having inalienable rights direct from the Creator to life, liberty, and to pursue happiness. Those basic rights are shelved when each person cannot do their own research on a medical procedure which is injected into their own bodies (right of life) using these experimental shots. To pursue happiness MUST remain with the individual- even if you think this procedure will keep them alive. We, as citizens, MUST be free (right of liberty) to choose our own way.

Please allow this bill to advance. Keep vaccine mandates and any use of vaccine passports unlawful in this beautiful state I call home.

Thank you for a moment of your time.

Dennis & Susan Tayman dwt [REDACTED] [\[REDACTED\]](#)

Who is support SB 156 to protect medical freedom in Alaska or Alaskans thank you Carolyn Morse

Sent from my iPad Carolyn Morse [REDACTED]

Members of the State Affairs Committee:

I add my voice to those urging you to recommend passage of SB 156 and make vaccine mandates and "passports" unlawful in Alaska. This legislation is needed to guard against government abuse of power to control individual lives and compel individual private medical choices that are constitutionally protected. This legislation is particularly important to end this over broad covid emergency orders and prevent a recurrence of these abuses in the future. No one should be forced to obtain particular medical interventions to keep their jobs or have the freedom to live and move in society. It has always been the case under our constitutional law that each individual is free to determine their individual risks and benefits from any medical treatment and choose the most appropriate course for themselves. If a medical intervention does have clear benefits relative to risk, people will not have to be forced into it. Many prefer not to participate in experimental medical trials unless all other interventions have failed and they should not be forced into it against their will.

Distinguished Committee Members,

As a proud citizen of this state, I am thankful that our communities are small and represent the fierce independent nature that Alaskans are known for.

In regards to SB 156 which you will be considering tomorrow, I plainly urge you to support this bill. Alaskans have the right to determine whether a COVID-19 injection is the right medical choice for themselves and their children, just like we would with any other medical choice.

This decision should be able to be made freely, without coercion and with access to accurate, transparent information. Any variation or inability to make this decision based on these factors or obstacles created to access this information is blatantly illegal, considering test subjects in medical trials or any human experiment are given a full picture of the tests they are to undergo or KNOWINGLY forfeit those rights. We should be given the same decency.

Trusting for an outcome of freedom tomorrow.

All the Best,

Devin Cress and the Cress family Devin Cress devincress@live.com

Hello,

I am writing in support of SB 156.

All Alaskan's should have a choice and should not be discriminated against, especially for something that is under emergency use authorization. Many people have valid reasons for not wanting to get vaccinated. The science does not back up the COVID vaccines. Look at other counties opening up and removing all mandates, and getting rid of vaccine passports.

No Alaskan should be fired from their job because they are not vaccinated.

It is time to end the charade.

Thanks,

Mike

North Pole Mike mike@northpole.com

Dear Senate State of Affairs Committee,

I am emailing in regards to Bill SB 156. I'm urging all of you to support this Bill for all Alaskans and our FREEDOM. 1st because it is the Constitutional thing to do and also the moral thing to do.

This Country was founded on FREEDOM to choose our religion and how we choose or not choose to live our lives and that includes our MEDICAL FREEDOMS..

I had to quit my job at ANTHC (AK Native Medical Center) I was a Medical Biller working at their Business office because of the illegal Covid Mandates this current administration has been pushing.

I had several LEGAL grounds for asking for an exemption all of which were never considered.

1. I am Christian and I do not agree with injecting myself with aborted fetal cells
2. I had just recovered from stage 4 colon cancer treatments which included chemotherapy. I was not going to put my body under any more undue stress than it's already been through
- 3 Most important, it is ILLEGAL to force any experimental drugs / procedures on ANYONE pursuant to the Nuremberg Code unless they consent.

This "consent" should be VOLUNTARY. And by VOLUNTARY I mean it shouldn't be a stipulation for keeping your job or being able to travel FREELY or to be out in public.

People will be watching closely. Those of you who do not support this Bill for our freedom will be remembered when election season rolls around.

Thank you Lora Reinbolt for introducing this Bill. I support it wholeheartedly! Please keep fighting for our freedom.

Sincerely,

Alice Amik Anchorage, AK ally amik ally@amik.com

Subject: Please vote YES! in favor of supporting SB 156

February 7, 2022

RE: Please Support Bill SB 156 as proposed by Senator Lora Reinbold

Dear Senator Shower,

My name is Kailah Marie, and I was a full-time student and federal student worker attending the University of Alaska pursuing a Bachelors's Degree in Biological Sciences. After my bachelor's, I anticipated moving forward in obtaining a Doctorate degree in Pharmacognosy. My passion resides in phytomedicinal drug development. In short, my dream was to solve one of the most significant threats to global health and food security we face today – antibiotic resistance.

On November 21, 2021, I received an email from Pat Pitney, Interim UA President, that due to the threat of losing over 200 million dollars in federal aid, the institution had essentially no choice but to implement a vaccination requirement for all faculty and staff. On Dec 9, 2021, I received another disturbing email. This email outlined the institution's decision that all students attending 'in-person' classes or on-campus services must be vaccinated, further instructing students that unless the college received proof of vaccination must be submitted by January 21, 2022, or the student would be dropped from enrolled classes.

As a science degree-seeking student, I am required to take science courses – and accompanied labs – on campus. The University of Alaska has not implemented a reasonable online alternative for students who do not wish to get the vaccine. As a result, multiple students, including myself, were ejected from the college system and could not continue their education.

Although it is possible to attend an online college elsewhere, I can't help but feel disheartened that I am not obtaining this education within the community and culture of Alaska and its great people. That I am unable to participate in the local programs and events that support friends, neighbors, and businesses which is a staple in what makes Alaska such a great place to live. That and the culture that no matter who you are, where you come from, what you believe that Alaska offers opportunity. I just want that same opportunity back.

Please vote YES! in favor of supporting SB 156.

Kailah Marie

Hi,

I support SB 156. I feel that it is my right as an US citizen to choose what goes into my body. The Government is not a doctor. If people want to get the vax to protect themselves they have every right to but to have it forced on me is taking my rights away. Vaccinated or not, people still get and spread covid.

Thank you for your time. Chris Hustman Chris Meserve [\[redacted\]@alaska.com](#)

Hello Fellows,

I want to share this, Please please DO not let them mandate us, We all have the freedom of choice . A Lot of medical people cannot have anymore on top of risk injury, Also there are a lot of people who have allergies that are in the vaccine and cannot have it. Leave that to CHOICE of I TO the people. If you do not let people have a choice of their own bodies. People will rise, people will fight back. We don't need problems in this Alaska state.. We are doing well. So please support SB156 and support the construction of the United States for the people even ALASKANS!! They have violated the hipa rights, ada rights. We want it back.. our private lives ...

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

Thank you! Christy Montero Christy Montero [\[redacted\]@alaska.com](#)

I am writing to support the SB156 George Hodges [REDACTED]

Please support Senate Bill 156 and protect our freedom to chose what is best for each individual. I am 67 and have had Covid twice. It was not fun either time, but I didn't die! I took Ivermectin and had the monoclonal antibody infusion which was quite helpful. Prior to getting Covid, I was told by two different doctors to NOT get the so called vaccine due to some very serious health issues. In addition, I had allergic reactions to flu shots on 2 different occasions in the past. Had I received the so called Covid vaccine I was told by a local doctor he had not doubt I wouldn't be alive today.

Should the Covid vaccine be mandated it would be a death sentence for me! My children may very well carry the same gene(s) which causes me to be at risk for dire consequences from the experimental shot. They should not be forced to get the jab due to what could be a death sentence for them.

Important information regarding the lack of research in the development of the experimental vaccine has been censored and medical professionals locally and around our country speaking out have been persecuted. What's wrong with this picture!? Why is the public being used as lab rats? This vaccine was rushed without proper testing and should not be forced on anyone. The negative outcomes on those receiving the jab are being covered up and not addressed by mainstream media, but the information is out there and can be found.

The fact that children 5-11 are now being encouraged to take the jab is deeply concerning to me. This is a group that isn't at risk for developing complications or death. Why would any parent subject their child to an experimental vaccine that can't be validated as non harmful to children? To mandate the jab for children is reprehensible!

This Covid jab is experimental and saying it isn't is just bad science. It can't be equated with the current vaccines given to our children. All those vaccines underwent YEARS of testing and never were mandated.

Instead of years of testing, the "Covid vaccine" was thrust on people around the world and they quickly became test subjects without informed consent or the ability to receive any compensation should negative side effects occur. People received this experimental vaccine under the guise that it prevented Covid. Then the boosters came on the scene. They did not prevent Covid and yet the mandate is still being considered! Why?

Vaccinated and unvaccinated are both at risk of getting covid. Boosters are pretty much worthless and appear to not be able to keep up with the variants. Then the "powers that be" said those vaccinated will have a less severe virus to deal with. Well, that's still to be determined and at this point if anyone is still listening to "the authorities" they can't be believed at this point.

There has been so much false and deceptive information regarding the "Covid vaccine." So much of what was given as fact in the beginning has now proved to be false. Please don't allow this "vaccine" to be mandated in our state. This is not a "one size fits all" situation and we have a right to make our own choice based on our own situation and personal values and health issues.

Thank You for listening. Cheryl Tatom [Cheryl Tatom@alaska.com](#)

Dear Sirs,

I am writing to ask you to support Senate Bill 156 to protect medical freedom in Alaska.

As a prior service Army officer I hold freedom near and dear to my heart. I ask you to please protect our jobs, schools, freedom to public access and our freedom to decide for ourselves with our doctors of choice the medical treatments that we feel best suit each of our personal needs.

Thank you for your attention,

Yours, Deborah Peterson [Deborah Peterson@alaska.com](#)

I am against government mandates for Covid vaccinations. Medical treatments should be each individual choice. I am not against vaccinations, I have been vaccinated. I just do not want the government forcing it. Forcing vaccinations and other medical treatment is like China or other communist countries. We need to fight to keep our freedoms!

J.E. Merry Judith Merry [JEMerry@alaska.com](#)

Greetings from Juneau, Alaska. I am writing today to all members of the Senate State Affairs Committee regarding Senate Bill 156. I urge each of you to support SB 156 for the protection of medical freedom in Alaska.

All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention.

There are serious and valid reasons that many people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska.

Thank you for your attention,

Melissa Zahasky Paul Zahasky [REDACTED]

SUPPORT SB 156 [REDACTED]

I urge you to support S B 156 to protect medical freedom in Alaska.

Many people have a number of valid reasons for declining vaccination. The whole program to date has been a real goat rope with false and unscientific information being given as the rationale for draconian government overreach. Everyday we hear a new unsubstantiated reason for doing things. We have set many students back years in their development, from learning to talk on through the whole gambit of education. Many may never catch up. The government says you must take the shot and if it kills or severely damages you that is tough. Neither the pharmaceutical company nor the government is liable.

Government should also not be allowed to selectively decide which medicine prescribed by a doctor can or can't be given to the patient. In the case of COVID-19 there are too many verified stories of patients who were not allowed to obtain medications that in many instances were shown to save the lives of those who received them. Thank you for your consideration of my comments. It is a pleasure to hear of a bill, being considered, which has something to do with day to day Alaskan life and is not a political witch hunt.

Respectfully, Chuck Bickley Wasilla, 99623 Chuck Bickley [REDACTED]

Dear Honorable Committee Members,

Please support Alaskan's rights to medical freedom and self-determination by allowing Senate Bill 156 to be moved forward for Legislative consideration.

Thanks, Mike M D [REDACTED]

Please support bill SB 156. Protect medical freedom.

Thank you Kathy Doyle Kathy Doyle [REDACTED]

As an Alaskan Resident I would like to urge you to SUPPORT SB 156, to protect medical freedom in Alaska.

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thanks for your support on Senate Bill 156,

Tracy

Hello all,

I'm writing to urge you to support SB 156 to protect medical freedom in Alaska. A "one-size-fits-all" approach to healthcare has never worked in the past, nor will it work with COVID-19. Alaskans have a right to decide for themselves whether they want to inject themselves with the COVID-19 shot every 3-4 months as a treatment option (I abstain from calling it a vaccine since it does not function as one) or whether they want to take care of themselves and those around them using other effective and proven protocols. To hold Alaskan livelihoods, educational opportunities and rights to medical treatment hostage is a horrific violation of human rights. I urge you to take a stand on this issue to protect freedoms over our own bodies. The COVID-19 shot comes with risks (as does all of life) and Alaskans should be able to decide for ourselves whether we want to accept those risks or take other routes. Thank you for your time.

Sarah Hoover Sarah Tyndall [REDACTED]

To whom it may concern,

I am writing today in favor of SB 156. I fully support the bill and want to see it passed. Alaskans (and all people across the world, really) deserve bodily autonomy and to be protected against forced medical procedures. This shouldn't even be a question! Please do the right thing for the people and protect their rights by passing this bill.

Thank you, Cassandra Cassandra Ryan [REDACTED]

Hello,

My name is Desiree Cook and I am a Palmer resident with my husband and 4 kids. My husband works on the slope and the uncertainty of pending vaccine mandates over the last 12 +\ months had been very stressful. Thankfully, due to the SCOTUS ruling, he doesn't have to worry about choosing between his personal autonomy and feeding his family.

I am not in the same boat. I am going to graduate from UAA with my bachelors of science in nursing in May 2022 and the uncertainty of whether or not I will be employable due to turning down a vaccine for an illness I've recovered from twice weighs heavily on me.

All nursing theories throughout nursing school have taught that individual autonomy is to be respected, that the patient always has the right to refuse, and that the job of healthcare workers is to educate not force any medical treatment - this is called provided informed consent. These are fundamental nursing concepts. Therefore the thought that an individual forfeits the autonomy of their body by merely entering the field of health care is an atrocity and violates basic human rights. The counter argument that I've heard is invalid which is that the job of the nurse is to protect their patients. The vaccine does not stop transmissibility and this has been proven time and time again. Therefore, an unvaccinated and vaccinated nurse must practice the same safety protocols to prevent a hospital acquired infection.

The real issue is that nurses and doctors are being segregated from society by losing their jobs and being denied certain services. This is not ok nor is it what being an Alaskan is about. We embrace diversity and foster an environment that is welcoming to opposing ideas. We do not force one sect of a population to succumb to another.

I implore to the committee to protect every Alaskan's right to work and right to decline a medical intervention through informed consent in the state of Alaska.

Thank you, Desiree Cook [desiree cook \[REDACTED\]](#)

I am emailing you to ask you to please support SB 156, the government has no business telling people what they should be putting in their bodies!!! Please support this bill! Thank you!! Jerilee Musgrove, Soldotna, Alaska and a life long Alaskan

Honorable Senators,

I am writing to ask for your support for SB 156, to make vaccine passports and so-call immunity passports" unlawful in Alaska. It is unconscionable to force people to take any kind of medical treatment without their permission or restrict their access to society based on it. Instead we should insist on education and let every family decide what measures are best for them.

My arguments: -

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Subject: Please read this and join me in supporting SB 156

Dear Senator:

My husband and I are residents of Anchor Point (Senate District P, House District 31). We love our country and vote in every local, state, and federal election.

I am pleased to see that SB 156 is now in front of you for consideration. SB 156 has my total support: No one should be fired from their job, kicked out of school, or denied access to a public place simply because they decline to participate in a government-sponsored, scientifically questionable, and suspiciously-supported medical experiment. ALL Americans have the right to make their own medical decisions. With regard to the veracity of Covid-19 reports, claims, cures, and "vaccines," you and I as citizens have the RIGHT to make our own free and informed choice, without coercion. Many people have valid reasons for declining vaccination, including personal health, pre-existing immunity from previous infection, and simply the right to a conscientious objection to the methods, sources, and real motivation (\$\$\$) behind the development and administration of Covid "vaccines". The CDC has reversed its views and unethically disregarded studies that run counter to their current position. At this point they are not in an honorable position to dictate nor force medical procedures, injections, medications for treatment of Covid, much less disregard our citizens' basic human rights under our Constitution.

I exhort you to take a stand for our American citizenry. Graciously persuade your fellow senators to put personal freedom, civil rights, and human dignity first by fully supporting and passing SB 156. I would be honored if you would thoughtfully consider the full import of your decision and contact me if I may support your efforts.

Respectfully,

Ann G. Cline

Dear Senate State Affairs Committee,

We ask you to support SB 156.

We believe that nobody should be fired from their job, ineligible to apply for a job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention. We believe Alaskans should have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion. We believe many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for supporting SB 156! Jerel and Kimberly Price Anchorage, AK Jerel and Kimberly Price

It is essential that you vote yes on Senate bill 156. No one should lose a job over bodily autonomy. This experimental gene therapy has not been vetted. People must remain free to decide for themselves which medical treatments they may need, there are several options that have been documented to work well against Covid.

Thank you ,Jim Way Sitka Jim Way [\[REDACTED\]](#)

Dear Senators,

I am an Alaskan family medicine physician. One of the things that makes healthcare in Alaska so great is that we have the freedom to practice the art of medicine, meaning unique and individualized care based on each person's goals and values. By allowing vaccine mandates and passports, not only would individuality be jeopardized, but also basic human rights and freedom. If there is risk, there must be choice. Not only do the currently available COVID-19 vaccines have known risks such as myocarditis, but the extent of risks such as blood clots, paralysis, and even death is unquantified. How then is it ethical to mandate such a vaccine if the vaccine itself does not prevent infection or transmission of the virus and is not current to the infection we are now facing? The COVID-19 vaccines only code for the spike protein of the original COVID-19 virus. The spike protein present in the omicron strain has at least 30 mutations in that one protein alone, rendering the vaccine virtually ineffective.

I have been actively treating COVID-19 since before the onset of the omicron variant and have seen vaccinated person after vaccinated person test positive for COVID-19 with symptoms that are largely indistinguishable from those who are not vaccinated. Thankfully a large percentage of our population now has natural immunity which is at least as effective if not more than vaccine immunity.

In sum, mandating the COVID-19 vaccines for all would strip the individualism and freedom that make Alaskans Alaskan, cause unnecessary injury and even death without choice for little to no benefit to our communities or workplaces. As a physician who took an oath not to harm, I ask that as human beings you do the same and make the right choice for the people of this great state.

Julie Stewart MD
