Greetings,

I am writing in to ask for support of Senate Bill 156.

While I already believe that the Government shouldn't try to restrict the movement of the people, I have an additional reason I believe this bill should go through.

Demanding vaccination in order to move freely is detrimental to anyone who chooses not to receive the vaccine, but is further detrimental to those who cannot receive the vaccine.

The Covid 19 vaccine is not recommended for anyone who has ever had anaphylaxis. I have two children who have had anaphylaxis to certain exposures, and both require an epi-pen for life saving measures. I believe if our population is required to show a vaccine passport, to move freely, it will unnecessarily discriminate against those who cannot safely obtain the vaccine.

I believe in the right to medical care absent the interference of Government, and I respectfully request you adopt this bill, not only to protect our already valuable freedoms, but to protect those who would be persecuted for something they literally have no control over.

Thank you very much for your time and attention to this important matter.

Hello Fellows,

I want to share this, Please please DO not let them mandate us, We all have the freedom of choice . A Lot of medical people cannot have anymore on top of risk injury, Also there are a lot of people who have allergies that are in the vaccine and cannot have it. Leave that to CHOICE of I TO the people. If you do not let people have a choice of their own bodies. People will rise, people will fight back. We don't need problems in this Alaska state.. We are doing well. So please support SB156 and support the construction of the United States for the people even ALASKANS!! They have violated the hippa rights, ada rights. We want it back.. our private lives ...

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

Good morning,

I was on the line for the public hearing SB156 yesterday before time ran out. Thank you for taking the time to listen and for reading my story.

I would really appreciate it if our legislators would send a clear and resounding reminder to every organization, agency, employer, corporation, etc that Alaska citizens are still free.

I was laid off from the north slope on the first day that all employees were required to wear a non-prescribed medical device over their faces. I haven't found suitable employment that require a mask or an injection as a condition of employment. Consequently my unemployment benefits ran out in December 2020.

Over the past 2 summers, I travelled to western Alaska (where my family is from) to go to fish camp. Summer 2020, we were required to complete paperwork and show proof of negative "covid" tests. I was compliant.

Summer 2021, the village of Unalakleet demanded paperwork to be completed, proof of a covid "vaccine" or proof of a negative test. (The shot or test were also required as a condition of travel for one of the air carriers). This time, I did not comply. Upon arrival at the airport, I was asked for private health information (which I pointed out to them), I answered their questions honestly. I was told that I wouldn't be able to travel. I explained that I had purchased the tickets unconditionally and my money was accepted. At this point they called Unalakleet and passed the phone to me. The lady on the phone identified herself as some covid team and asked for my health information, again I pointed out that she was asking me for private information, but I would answer. She replied that I would have to reschedule my travel until I had proof of a negative test. My question, was "under whose authority?" She replied that this was from this tri-villages covid team, or something like that. I replied that this team had not purchased my tickets. Upon my arrival in Unalakleet, I was met by the covid team representative and the Unalakleet police. They told me that I had to step outside to talk to them, where I was told that I had to fill out the paperwork. Incidentally, their paperwork includes all of my personal details (name, residence address, phone number), purpose for travel, destination, vaccination status, quarantine options. By signing the paperwork, a person is agreeing that they will comply and if not, agrees to fines of \$250-\$1000 and refusal to complete incurs a \$500 fine. I am not yet aware of any consequences for non-compliance. I had pointed out to them that the year prior, they were requiring proof of a negative

test. This year they were requiring proof on an injection or a negative test, what would they require next year? A mark on my forehead or on my right hand? This is straight out of the book of Revelation in the Bible. This is exactly where they are so boldy

leading us.

My life has been turned upside down by the fear that everyone is harboring.

I thank you so much for the work you are doing to protect and help us.

God bless you and protect you! You are in my prayers.

Kind regards,

Brenda Hastie

Please note:

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Subject: Senate Bill 156

Good Evening,

I am writing to ask that you please protect the rights of Alaskans by passing this bill which would protect our freedom of choice. It is critical that Alaskans should not be made to turn against one another over the issue of being vaccinated vs not vaccinated. I and others like me, should not need to live in fear of losing our jobs or being denied entry into public buildings because of our beliefs against vaccination. If we cannot protect our basic freedom of choosing what we put into our bodies then we cannot say that we live in a free country.

Thank you for your time.

Ashley

Sent: Tuesday, February 8, 2022 6:19 PM

To: Sen. Mike Shower <sen.mike.shower@akleg.gov>

Subject: No to the mandates

Dear Senator Shower, Senator Roger Holland,

I think these mandates need to end. These are encroaching on peoples rights to have employment, to travel, to seek medical care, and turning people against each other.

I know there are doctors who won't see patients because they don't have the The patient doesn't have the vaccinations.

My dad needed a procedure and they threaten not to do a life-saving procedure because he didn't have the vaccine. We were able to discuss with the physician and plead for him to do the procedure. I know my dad is in a vulnerable population but he was not well enough. We felt that he should not have that in his system. Awhile after his procedure, he had contracted Covid, Was sick for a while and recovered.

I have a granddaughter who's three and they're talking about pushing the vaccine on them. I think this is wrong. She has cancer and they've been pushing her to get the vaccine. She's had recently got sick with Covid and she was able to fight the virus. Her whole immediate family all have had Covid and survived. I am afraid that these mandates will force my daughter to inject her three year old so she can get treatment for her cancer. She should have the right to receive treatments and ability to fly to receive treatment no matter if she had the vaccine or not.

We were in the middle of the pandemic flying back-and-forth to Seattle children's on a plane full of sick people while she was receiving care/chemo. That was a very stressful time and unsure time. But now we know she did fine during that season. after catching Covid recently.

I'm a nurse, and raised my two daughters on my own. I can't believe that they can take away my ability to keep a job as a nurse. After all the hard work and sacrifices I made to become a nurse. I'm not military but I was willing to put myself out there and care for people in the beginning of this pandemic of the COVID-19. At the time nobody knew much of anything or what would happen to people. I made a choice despite if this thing would kill me I was going to still take care of other people. I chose to put myself in harms way. I should still be able to choose and not be forced to do what I feel is right.

I have seen patients with The two vaccinations and the booster. They Still get sick of Covid. Some of them are hospitalized. The vaccines honestly are not the cure to prevent this. Why should people be forced to have something that's not a cure. The vaccine can cause harm. It's not 100% safe.

I ask that you please vote NO for the vaccine and other mandates.

Thank you Amy Paul

Subject: FW: SUPPORT SB 156

Dear Chairman Shower

I urge you to SUPPORT SB 156, which would make vaccine mandates and so-called "immunity passports" unlawful in Alaska.

If anyone wishes to get vaccinated, they should have that choice. But to demand that everyone become vaccinated in order to hold employment, buy food at the store, travel, or do any other activity required for life and survival is beyond reckless -- it is what totalitarian dictatorships do.

Hitler's government performed medical experiments on people against their will. These mandates are not that far from Hitler's work. Basically, the Federal government has been telling people that if they did not comply and get something injected into their bodies that they did not feel comfortable having done, then -- as far as the dictators in government are concerned -- that person can just go away and lose their home, and can go starve to death! That's the ultimate end for those being forced out of employment.

This bill needs to be supported so that Alaska sends a clear message that vaccine mandates and "immunity passports" go against everything Alaskans stand for, many of whom moved here to get away from the heavy hand government trying to control everything about our lives.

Subject: I ask you to support SB156

My dearest senator,

I ask you to support SB156 to protect the rights of Alaska's citizens and your constituents against COVID 19 mandates. Alaskans must not be coerced when it comes to our health and the health of our children.

Coercion is illegal in Alaska and Alaskans have the right to determine the benefits and risks of COVID-19 vaccination just like any other medication. There are multiple reasons to refuse the vaccination:

1. Immunity from prior COVID infections.
2. Personal health reasons.
3. Objections over the unethical methods used to coerce Alaskans to get the shot.

Senator, Alaska must protect its citizens by following the example set by other states by prohibiting vaccination mandates in our state law, immediately.

No one should lose their job, be thrown out of school, or denied access to public spaces for turning down the COVID 19 vaccination. For example, no one can attend events at the Anchorage Performing Arts Center unless you provide proof of vaccination or a negative Covid test. I believe this is against my HIPA rights to medical privacy when an unknown/non-medical admin person must approve entry to our public property based on my medical status.

Again Senator, I implore you to vote for SB156 to protect your constituents from vaccine mandates.

Sincerely,

Joan Henry

Concerned Alaska Citizen

Subject: Support Senate Bill 156

Dear Senators,

I support Senate Bill 156, sponsored by Senator Lora Reinbold, which would make vaccine mandates and so-called "immunity passports" unlawful in Alaska. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Requiring proof of a "vaccine" or proof of any other medical intervention or negative test until very recently would have been considered discrimination and would have been subject to prosecution. When have we ever asked someone if they were positive for Hepatitis to go to the movie theater? Or Tuberculosis? Or HIV? Those health issues are both contagious and have a higher mortality rate than COVID.

Are we going to mandate that no one may use cigarettes and other tobacco products, those cause serious health issues and my health can be negatively affected by 2nd hand smoke, strain is placed on the health care industry from COPD and lung cancer, so we should mandate no one may use tobacco? No one gets a choice about their own health right? This is where the logic of demanding people accept one course of action goes, we then add more and more mandates until there is no freedom or choice ever again.

My body! My Choice! The constitution says I have the right to LIFE, LIBERTY, and the PURSUIT OF HAPPINESS! I cannot be mandated to accept any medical intervention that I am concerned will affect my LIFE, LIBERTY or PURSUIT OF HAPPINESS!

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion or discrimination.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for standing for freedom!
