Subject: Senate Bill 156

Dear Senator Mike Shower,

Thank you for your service to our great state of Alaska.

I see that the Senate Bill 156 will be considered tomorrow in the Senate State Affairs committee. I urge you to support Senate Bill 156. As I read the bill, I understand it will protect Alaskan's freedom to make their own choice about the COVID 19 vaccination. This choice should be with each individual and should not determine their job status or infringe on their medical privacy rights to disclose their status. There are many reasons someone may or may not take the vaccine. That should be a private decision for them to make. One that they are able to weigh the benefits as well as the risks of the COVID 19 vaccination without feeling coerced.

Again, I ask that you stand in support of Senate Bill 156.

Thank you,

Sharon Walsh

Mia Costello <Sen.Mia.Costello@akleg.gov>; Sen. Roger Holland <Senator.Roger.Holland@akleg.gov>; Sen. Scott Kawasaki <Sen.Scott.Kawasaki@akleg.gov>

Subject: Senate bill 156. I am writing to urge you to support SB 156.

Why should anyone be fired from their job or denied access to a public place for declining a medical intervention? There are good reasons for deciding against vaccination. Personal health situations, pre-existing immunity from having Covid, and objection to

the unethical methods used to make the Covid vaccines are all legitimate reasons to refuse an experimental vaccine for your own body. Alaska citizens should be free to decide for themselves the benefits or risks of Covid-19 vaccination. Please protect the right to make this personal decision for Alaskans. Thank you

Subject: NO Mandates

Not a word was said by employers forcing this shot about who would pay the hospitalization and medical bills should there be an adverse event; or death. I found that odd. I'm surprised the Nuremberg Code isn't talked about more. The reason this was written was to prevent future occurrences of forcing people into medical experiments. The Code says people MUST have informed consent. "Informed" means to 1) be told the ingredients in a medication. 2) know what the drug is supposed do and how it works 3) be given a full list of all known side effects and certain health conditions under which a person might not be a good candidate for receiving the drug. Well...we know NONE of this happened during the roll out. We know the dangers of the MRNA drug were ignored by those promoting it. CDC and State Health officials were even urging pregnant women to get the shot against the advice of the manufacturer who stated the drug should NOT be given to pregnant or nursing women. Sadly, some women did experience a miscarriage after being convinced to take the drug. So, it sounds to me like those who violated the Nuremberg Code should be help accountable. Sen Reinbold is correct. No one should be coerced (and that's what it WAS!) to take medical risks by injecting themselves with an experimental pharmaceutical product.

Hello Senator! Thank you for representing me! I am a surgeon on Kodiak island and I hope that you will support this bill to allow Alaskans the right to informed consent, shared decision making, and patient autonomy in vaccine decision making. I learned these three principles on my first day of medical school. I hope as a country we realize the importance of Liberty. Human experimentation must be done with informed consent and without coercion. Please help end vaccine mandates, especially with experimental vaccines.

Sincerely,

Janet Abadir, MD FACS 509-481-5390

Subject: SB 156

Hello, My name is Desiree Cook and I am a Palmer resident with my husband and 4 kids. My husband works on the slope and the uncertainty of pending vaccine mandates over the last 12 +/- months had been very stressful. Thankfully, due to the SCOTUS ruling, he doesn't have to worry about choosing between his personal autonomy and feeding his family.

I am not in the same boat. I am going to graduate from UAA with my bachelors of science in nursing in May 2022 and the uncertainty of whether or not I will be employable due to turning down a vaccine for an illness I've recovered from twice weighs heavily on me.

All nursing theories throughout nursing school have taught that individual autonomy is to be respected, that the patient always has the right to refuse, and that the job of healthcare workers is to educate not force any medical treatment - this is called provided informed consent. These are fundamental nursing concepts.

Therefore the thought that an individual forfeits the autonomy of their body by merely entering the field of health care is an atrocity and violates basic human rights. The counter argument that I've heard is invalid which is that the job of the nurse is to protect their patients. The vaccine does not stop transmissibility and this has been proven time and time again. Therefore, an unvaccinated and vaccinated nurse must practice the same safety protocols to prevent a hospital acquired infection. The real issue is that nurses and doctors are being segregated from society by losing their jobs and being denied certain services. This is not ok nor is it what being an Alaskan is about. We embrace diversity and foster an environment that is welcoming to opposing ideas. We do not force one sect of a population to succumb to another.

I implore to the committee to protect every Alaskan's right to work and right to decline a medical intervention through informed consent in the state of Alaska.

Thank you,

Desiree Cook

Subject: Senate Bill 156

Dear Senators,

I extend many thanks to Sen. Reinbold for sponsoring SB156 and I implore you all to champion this legislation fervently until it is safely enacted in Alaska. The draconian mandates in place in this and other areas of the state in the name of Covid-19 - a virus with over a 99% survival rate - must end now, particularly with regard to injections. Numerous reasons exist for declining the current experimental "vaccines" available, not the least of which include the questionable safety and known poor efficacy of any mRNA injection for the prevention and spread of the virus and its many variants. Aside from the aforementioned issues, Alaskans who do not wish to participate in the federal government's experimental medical injection program cannot easily pack up and leave the state for a more personal health friendly environment due to the logistical barriers for doing so.

Please preserve Alaskan's rights for making the best personal medical decisions for themselves and their children without government interference or restriction.

Thank you - Joaquita Martin Chugiak, Alaska 907-4[REDACTED]

To the Committee,

As a freedom minded Alaskan voter, I support the right for individuals to freely chose wether they want to take a COVID-19 vaccine or not. Seeing as we have had said vaccine available, in use and heavily lobbied for for over a year it seems those who want it by now, have gotten it. I support their choice but as for those of us who choose differently; I want the same freedom and do not believe the mandates that have been attempted, imposed and in some cases adjudicated as Unconstitutional by the Federal courts should hold any power over individuals of our State. Please support the right and freedom of Alaskans to make the choice on their personal health by getting SB 156 approved.

Thank you,

John A. Marrero John MARRERO [REDACTED]

Good Evening Senate Committee,

First, I'd like to say, thank you for your service to this committee and our community.

My 14 year old son and I are adventuring our fifth winter here, on the Kenai Peninsula. I moved us here, to Alaska, so he could experience what it's like to be a "real man". Alaska is one of "those places", if you're a true Alaskan you know what I'm talking about. I've traveled the northwest a lot, growing up in Oregon, family in California, and resided in both NE and SW areas of Washington, traveled through Canada three times, etc. Alaska is by far the best! We are proud to call Alaska our home!

I wrote that, to say this, I stand by all the committee members who are in favor of Senate Bill 156. Thank you for standing up for our medical freedoms and individual choices.

In our house, we believe in personal choices, followed by accountability! Informed consent, regarding the Covid-19 "vaccination" has not been happening, unfortunately. The falsehoods that lockdowns, masks, or that this "vaccine" are actually working to reduce the spread of Covid-19 is just that, false! Dr. Fauci, Big Pharma, Bill Gates, Biden, and more should all be held accountable for their "misinformation" to the public. Not to mention the, now, tens of thousands of deaths that have transpired because of this, so called, "vaccine". Hopefully, in the near future, Alaska's Senate Committee will lend a hand in said accountability.

In close, vaccine mandates and "immunity passports" should be unlawful, not just in our great state, but everywhere! Thanks again!

Thank you,

Teala Lund

(907) [REDACTED] Teala Lund [REDACTED]

Committee Members:

I became aware that your committee will be meeting tomorrow (Tuesday) to discuss the above bill. I urge you to support this bill and lobby for its passage. Alaskans should NOT be required to take vaccines or any medical procedures against their will.

Take the opportunity to work this now. It is time for our state to lead out in this area and protect the freedoms of our citizens.

I appreciate your time and will be monitoring your efforts and the committees' effectiveness.

Sincerely,

Randy Moore

[REDACTED]

Anchorage, Akaska 99516 Randy Moore [REDACTED]

We would greatly appreciate your support for S B156 Jim Payne in [REDACTED]

Please support SB 156. No Alaskan, or anyone else for that matter, should have basic freedoms, such as jobs, education, travel, access to public places, etc just because they haven't been vaccinated against Covid19. Many people have valid reasons for not having the vaccination and shouldn't be punished because of them. Thank you.

Susan K. Murray [REDACTED]

You are our elected representatives, not our owners. We are still a free people with autonomy to choose what we ingest or inject into our bodies. Forcing people to take THIS treatment (I'm not going to use the altered definition of vaccine), is a slippery slope for God only knows what to be forced on us next.

Coercion is NOT consent!

Voters in this country, in this state and in your communities are paying more attention than ever before to how their elected officials are representing them. Please support SB156.

Thank you,

David Bradford

Lifelong Ak Resident David [REDACTED]

Linda Nott Linda Nott [REDACTED]

I have already argued the facts with my employer. The majority of my friends and coworkers agree, my employer would lose mass admin, just with "mandating" the mask. Let people decide for themselves, when did America/Alaska become a dictatorship implemented by the states. An injection is a further step in the wrong direction, dividing families and neighbors creating a hostile environment not only for auto-didactic individuals but our children as well!

Isolating the sick is a quarantine, isolating the healthy is tyranny. One size has never fit all and government be it local or fed. has no control over the people.

The power comes from the people.. yet we see this tom-foolery before us today.

Let's not create a society where we have a social score.. or need Our Papers to be free.... when that right is inherent to All Americans. Not just those complicit with a tyrannical government who ignore and subjugates its law-abiding, tax-paying citizens

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Life, Liberty and Pursuit of Happiness. Forcing or coercing people to participate in experimental medical procedures which could deprive them of all three violates those principles you all swore an oath to protect. I'm writing you all to urge you to support this bill out of committee.

If there was one change I would recommend it would be to change all references "agency/agents of the state [may] not" and "persons [may] not" to "agency/agents/persons shall not...require an individual to be vaccinated against COVID-19...".

Thank You

Mike Willmon

907. 993. [REDACTED] Mike Willmon [REDACTED]

Dear Senate State Affairs Committee, Please consider the importance of allowing Alaskan citizens to retain the right of freedom and choice when it comes to medical interventions. I support Senate Bill 156 and urge you to do the same.

As an example, currently in the state of Alaska graduated students are not allowed certain opportunities for CTE training because they choose not to be vaccinated. People are losing their jobs and having to change their standard of living, change employers, or are remaining unemployed due to mandated vaccination policies. Let's get our people back to work and back to making a living for their families. Do away with any mandates for required vaccination in the state of Alaska. These mandates go against our Constitutional rights in the United States. Not only that, but upon researching, it has been found that countries and states with the majority of their populations vaccinated are showing greater numbers of Covid cases occurring in their citizens. Thank you for voting for SB 156 to give people back their freedom of choice.

Sincerely,

Lori Zulliger Lori Zulliger [REDACTED]

It's a free choice issue! Let's strive to preserve our National value of Freedom.

Dear Senate Committee and Senators ,

I urge you, as a long time citizen of Alaska, to support SB 156 in order to maintain a persons autonomous rights to their medical freedoms. The forcing of a person to accept medical procedures, with unknown consequences, by taking their right to work, live, and interact in public and private sectors should be alarming to anyone who believes in, and swore to uphold the United States Constitution.

No one in the public sector has had informed consent that can be applied to the Covid-19 vaccines from any supplier or company. To force vaccination without informed consent on any population is a violation of basic human rights, and subject to Human Rights violation consequences.

Please support SB 156! Kristen Holland

Fairbanks, Alaska Remember, every day is new. Kristen Holland [REDACTED]@gmail.com

Please support this bill in favor of medical freedom. It's appalling that this level of coercion is even happening in our country. Please protect Alaskan's right to make informed decisions regarding their own bodies, these decisions should NOT be made by a governing body!

Thank you for accepting my comments and urgings for support for this bill.

Alisa Raisanen

Wasilla AK Alisa Raisanen [REDACTED]

Sent from Mail for Windows I support SB 156, I believe continued covid mandates and a covid shot health card to prove statues to gain pubic access around town violates my health privacy rights and is an un American authoritarian requirement that has never been required to move freely in America before regardless of serious public health emergencies. Thank you for your time Aaron Hoelscher Eagle River voter aaron [REDACTED]

Greetings from Juneau, Alaska. I am writing today to all members of the Senate State Affairs Committee regarding Senate Bill 156. I urge each of you to support SB 156 for the protection of medical freedom in Alaska. All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention. There are serious and valid reasons that any people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska. Thank you for your attention, Paul Zahasky Paul Zahasky [REDACTED]

I'm writing you to tell you that vaccine mandates are an immoral and communistic thing to implement upon citizens. In the United States of America we have the right to choose what is put in our bodies and if we do not want something in our bodies we should not have to be forced to do it by threat of losing our jobs which feed our families. What is happening to us is straight up evil. There is no other word for it. We are living in tyranny in an Orwellian nightmare. These vaccines, which are still under emergency use authorization (EUA) according to the cdc, have not been tested thoroughly to know the long-term effects. As an MRI/CT/xray technologist, combat veteran, and lifelong researcher of science, I have witnessed numerous cases of people being harmed by them both young and old. Based on my own data from what I have witnessed it is my opinion that these vaccines are not safe or effective considering that they do not prevent the spread or infection of COVID-19. Therefore I do not see the need to take it, and I definitely disagree with it being forced upon us against our will. To me this is a human rights issue, which I would fight to the death for. I can tell you there are a lot of other people who feel the exact same way. We will not change our mind no matter what when it comes to being forced by a corrupt government to take an experimental shot propped up up by leftists who want communism and a new world order.

Matthew Winn [REDACTED]

I am in SUPPORT of SB 156, to protect medical freedom in Alaska. I am a super voter. Thank You, Becky
Becky Baldau [REDACTED]

Hello everyone,

In my humble opinion granting governments at any level, or businesses, the authority to compel medical procedures is a precedent I really, really don't want to be set. Granted, it's already happening however that's what this bill is about, is it not? Ending mandates and coercion aimed at forcing people to take part in human experimentation?

mRNA vaccines are experimental. They have not gone through long term clinical trials. If we accept that we can be forced to participate in these experiments, where will that stop? In 2009, Pfizer was fined \$2.3 billion dollars. \$1.3 billion, and an additional \$1 billion for civil allegations under the False Claims Act. Pfizer falsely promoted Bextra, antipsychotic drug Geodon, antibiotic Zyvox, and antiepileptic Lyrica. The company was also accused of paying kickbacks related to these drugs and submitting false claims to government health care programs based on uses that weren't medically accepted. Bextra was pulled from the market in 2005 after it was deemed unsafe. That's just one example. Do you really want to allow this sort of thing to continue? To continue without the legal consequences to drug manufacturers and governments when they force people to take drugs? Will the precedent eventually be used to force people to accept surgical procedures? If you're thinking, 'no', then you might want to review human history.

Thanks for your time

Greetings,

I am writing in to ask for support of Senate Bill 156.

While I already believe that the Government shouldn't try to restrict the movement of the people, I have an additional reason I believe this bill should go through.

Demanding vaccination in order to move freely is detrimental to anyone who chooses not to receive the vaccine, but is further detrimental to those who cannot receive the vaccine.

The Covid 19 vaccine is not recommended for anyone who has ever had anaphylaxis. I have two children who have had anaphylaxis to certain exposures, and both require an epi-pen for life saving measures. I believe if our population is required to show a vaccine passport, to move freely, it will unnecessarily discriminate against those who cannot safely obtain the vaccine.

I believe in the right to medical care absent the interference of Government, and I respectfully request you adopt this bill, not only to protect our already valuable freedoms, but to protect those who would be persecuted for something they literally have no control over.

Thank you very much for your time and attention to this important matter.

Cejie Benoit

(907) [REDACTED]

Hello Fellows,

I want to share this, Please please DO not let them mandate us, We all have the freedom of choice . A Lot of medical people cannot have anymore on top of risk injury, Also there are a lot of people who have allergies that are in the vaccine and cannot have it. Leave that to CHOICE of I TO the people. If you do not let people have a choice of their own bodies. People will rise, people will fight back. We don't need problems in this Alaska state.. We are doing well. So please support SB156 and support the construction of the United States for the people even ALASKANS!! They have violated the hipa rights, ada rights. We want it back.. our private lives ...

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

[REDACTED]

Good morning,

I was on the line for the public hearing SB156 yesterday before time ran out. Thank you for taking the time to listen and for reading my story.

I would really appreciate it if our legislators would send a clear and resounding reminder to every organization, agency, employer, corporation, etc that Alaska citizens are still free.

I was laid off from the north slope on the first day that all employees were required to wear a non-prescribed medical device over their faces. I haven't found suitable employment that require a mask or an injection as a condition of employment. Consequently my unemployment benefits ran out in December 2020.

Over the past 2 summers, I travelled to western Alaska (where my family is from) to go to fish camp. Summer 2020, we were required to complete paperwork and show proof of negative "covid" tests. I was compliant.

Summer 2021, the village of Unalakleet demanded paperwork to be completed, proof of a covid "vaccine" or proof of a negative test. (The shot or test were also required as a condition of travel for one of the air carriers). This time, I did not comply. Upon arrival at the airport, I was asked for private health information (which I pointed out to them), I answered their questions honestly. I was told that I wouldn't be able to travel. I explained that I had purchased the tickets unconditionally and my money was accepted. At this point they called Unalakleet and passed the phone to me. The lady on the phone identified herself as some covid team and asked for my health information, again I pointed out that she was asking me for private information, but I would answer. She replied that I would have to reschedule my travel until I had proof of a negative test. My question, was "under whose authority?" She replied that this was from this tri-villages covid team, or something like that. I replied that this team had not purchased my tickets. Upon my arrival in Unalakleet, I was met by the covid team representative and the Unalakleet police. They told me that I had to step outside to talk to them, where I was told that I had to fill out the paperwork. Incidentally, their paperwork includes all of my personal details (name, residence address, phone number), purpose for travel, destination, vaccination status, quarantine options. By signing the paperwork, a person is agreeing that they will comply and if not, agrees to fines of \$250-\$1000 and refusal to complete incurs a \$500 fine. I am not yet aware of any consequences for non-compliance. I had pointed out to them that the year prior, they were requiring proof of a negative

test. This year they were requiring proof on an injection or a negative test, what would they require next year? A mark on my forehead or on my right hand? This is straight out of the book of Revelation in the Bible. This is exactly where they are so boldy

leading us.

My life has been turned upside down by the fear that everyone is harboring.

I thank you so much for the work you are doing to protect and help us.

God bless you and protect you! You are in my prayers.

Kind regards,

Brenda Hastie

Good Evening,

I am writing to ask that you please protect the rights of Alaskans by passing this bill which would protect our freedom of choice. It is critical that Alaskans should not be made to turn against one another over the issue of being vaccinated vs not vaccinated. I and others like me, should not need to live in fear of losing our jobs or being denied entry into public buildings because of our beliefs against vaccination. If we cannot protect our basic freedom of choosing what we put into our bodies then we cannot say that we live in a free country.

Thank you for your time.

Ashley

Sent: Tuesday, February 8, 2022 6:19 PM

To: Sen. Mike Shower <sen.mike.shower@akleg.gov>

Subject: No to the mandates

Dear Senator Shower, Senator Roger Holland,

I think these mandates need to end. These are encroaching on peoples rights to have employment, to travel, to seek medical care, and turning people against each other.

I know there are doctors who won't see patients because they don't have the The patient doesn't have the vaccinations.

My dad needed a procedure and they threaten not to do a life-saving procedure because he didn't have the vaccine. We were able to discuss with the physician and plead for him to do the procedure. I know my dad is in a vulnerable population but he was not well enough We felt that he should not have that in his system. Awhile after his procedure, he had contracted Covid, Was sick for a while and recovered.

I have a granddaughter who's three and they're talking about pushing the vaccine on them. I think this is wrong. She has cancer and they've been pushing her to get the vaccine. She's had recently got sick with Covid and she was able to fight the virus. Her whole immediate family all have had Covid and survived. I am afraid that these mandates will force my daughter to inject her three year old so she can get treatment for her cancer. She should have the right to receive treatments and ability to fly to receive treatment no matter if she had the vaccine or not.

We were in the middle of the pandemic flying back-and-forth to Seattle children's on a plane full of sick people while she was receiving care/chemo. That was a very stressful time and unsure time. But now we know she did fine during that season. after catching Covid recently.

I'm a nurse, and raised my two daughters on my own. I can't believe that they can take away my ability to keep a job as a nurse After all the hard work and sacrifices I made to become a nurse. I'm not military but I was willing to put myself out there and care for people in the beginning of this pandemic of the COVID-19. At the time nobody knew much of anything or what would happen to people. I made a choice despite if this thing would kill me I was going to still take care of other people. I chose to put myself in harms way. I should still be able to choose and not be forced to do what I feel is right.

I have seen patients with The two vaccinations and the booster. They Still get sick of Covid. Some of them are hospitalized. The vaccines honestly are not the cure to prevent this. Why should people be forced to have something that's not a cure. The vaccine can cause harm. It's not 100% safe.

I ask that you please vote NO for the vaccine and other mandates.

Thank you Amy Paul

Subject: FW: SUPPORT SB 156

Dear Chairman Shower

I urge you to SUPPORT SB 156, which would make vaccine mandates and so-called "immunity passports" unlawful in Alaska.

If anyone wishes to get vaccinated, they should have that choice. But to demand that everyone become vaccinated in order to hold employment, buy food at the store, travel, or do any other activity required for life and survival is beyond reckless -- it is what totalitarian dictatorships do.

Hitler's government performed medical experiments on people against their will. These mandates are not that far from Hitler's work. Basically, the Federal government has been telling people that if they did not comply and get something injected into their bodies that they did not feel comfortable having done, then -- as far as the dictators in government are concerned -- that person can just go away and lose their home, and can go starve to death! That's the ultimate end for those being forced out of employment.

This bill needs to be supported so that Alaska sends a clear message that vaccine mandates and "immunity passports" go against everything Alaskans stand for, many of whom moved here to get away from the heavy hand government trying to control everything about our lives.

Subject: I ask you to support SB156

My dearest senator,

I ask you to support SB156 to protect the rights of Alaska's citizens and your constituents against COVID 19 mandates. Alaskans must not be coerced when it comes to our health and the health of our children.

Coercion is illegal in Alaska and Alaskans have the right to determine the benefits and risks of COVID-19 vaccination just like any other medication. There are multiple reasons to refuse the vaccination:

1. Immunity from prior COVID infections.
2. Personal health reasons.
3. Objections over the unethical methods used to coerce Alaskans to get the shot.

Senator, Alaska must protect its citizens by following the example set by other states by prohibiting vaccination mandates in our state law, immediately.

No one should lose their job, be thrown out of school, or denied access to public spaces for turning down the COVID 19 vaccination. For example, no one can attend events at the Anchorage Performing Arts Center unless you provide proof of vaccination or a negative Covid test. I believe this is against my HIPA rights to medical privacy when an unknown/non-medical admin person must approve entry to our public property based on my medical status.

Again Senator, I implore you to vote for SB156 to protect your constituents from vaccine mandates.

Sincerely,

Joan Henry

Subject: Support Senate Bill 156

Dear Senators,

I support Senate Bill 156, sponsored by Senator Lora Reinbold, which would make vaccine mandates and so-called "immunity passports" unlawful in Alaska. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Requiring proof of a "vaccine" or proof of any other medical intervention or negative test until very recently would have been considered discrimination and would have been subject to prosecution. When have we ever asked someone if they were positive for Hepatitis to go to the movie theater? Or Tuberculosis? Or HIV? Those health issues are both contagious and have a higher mortality rate than COVID.

Are we going to mandate that no one may use cigarettes and other Tabaco products, those cause serious health issues and my health can be negatively affected by 2nd hand smoke, strain is placed on the health care industry from COPD and lung cancer, so we should mandate no one may use tobacco? No one gets a choice about their own health right? This is where the logic of demanding people accept one course of action goes, we then add more and more mandates until there is no freedom or choice ever again.

My body! My Choice! The constitution says I have the right to LIFE, LIBERTY, and the PURSUIT OF HAPPINESS! I cannot be mandated to accept any medical intervention that I am concerned will affect my LIFE, LIBERTY or PURSUIT OF HAPPINESS!

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion or discrimination.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for standing for freedom!

Subject: Please support SB 156

Hello all,

I'm writing to urge you to support SB 156 to protect medical freedom in Alaska. A "one-size-fits-all" approach to healthcare has never worked in the past, nor will it work with COVID-19. Alaskans have a right to decide for themselves whether they want to inject themselves with the COVID-19 shot every 3-4 months as a treatment option (I abstain from calling it a vaccine since it does not function as one) or whether they want to take care of themselves and those around them using other effective and proven protocols. To hold Alaskan livelihoods, educational opportunities and rights to medical treatment hostage is a horrific violation of human rights. I urge you to take a stand on this issue to protect freedoms over our own bodies.

The COVID-19 shot comes with risks (as does all of life) and Alaskans should be able to decide for ourselves whether we want to accept those risks or take other routes.

Thank you for your time.

To: Sen. Mike Shower <sen.mike.shower@akleg.gov>

Subject: Support SB 156

Greetings from Juneau, Alaska. I am writing you today, Senator Shower, regarding Senate Bill 156. I urge you to support SB 156 for the protection of medical freedom in Alaska.

All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention.

There are serious and valid reasons that any people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska.

Thank you for your attention,

Senators, WE THE PEOPLE ARE THE MASTERS OF BOTH CONGRESS AND THE COURTS. NOT TO OVERTHROW THE CONSTITUTION BUT TO OVERTHROW THE MEN WHO PERVERT THE CONSTITUTION

The fact that we even have to do this so that we can have choice blows my mind!

I can tell you right know that if any forced shots or vaccine passports are even considered you will have the biggest push back ever.

I will never be an "illegal person".

If you want the shot without researching it that's on you. But no one will ever put anything into my body that I don't want there!

Needle rape, or just rape from a rape survivor I can assure you if anyone tries to come at me with a forced anything. I will come out in top. The amount of control that people want over our bodies is sickening.

Subject: SB 156 Support

Dear Senate State of Affairs Committee,

I am emailing in regards to Bill SB 156. I'm urging all of you to support this Bill for all Alaskans and our FREEDOM.

1st because it is the Constitutional thing to do and also the moral thing to do.

This Country was founded on FREEDOM to choose our religion and how we choose or not choose to live our lives and that includes our MEDICAL FREEDOMS..I had to quit my job at ANTHC (AK Native Medical

Center) I was a Medical Biller working at their Business office because of the illegal Covid Mandates this current administration has been pushing.

I had several LEGAL grounds for asking for an exemption all of which were never considered.

1. I am Christian and I do not agree with injecting myself with aborted fetal cells
2. I had just recovered from stage 4 colon cancer treatments which included chemotherapy. I was not going to put my body under any more undue stress than it already been through
- 3 Most important, it is ILLEGAL to force any experimental drugs / procedures on ANYONE pursuant to the Nuremberg Code unless they consent.

This "consent" should be VOLUNTARY. And by VOLUNTARY I mean it shouldn't be a stipulation for keeping your job or being able to travel FREELY or to be out in public.

People will be watching closely. Those of you who do not support this Bill for our freedom will be remembered when election season rolls around.

Thank you Lora Reinbolt for introducing this Bill. I support it wholeheartedly! Please keep fighting for our freedom.

Sincerely,

Alice Amik

Subject: SB 156

I urge you to support S B 156 to protect medical freedom in Alaska.

Many people have a number of valid reasons for declining vaccination. The whole program to date has been a real goat rope with false and unscientific information being given as the rationale for draconian government overreach. Everyday we hear a new unsubstantiated reason for doing things. We have set many students back years in their development, from learning to talk on through the whole gambit of education. Many may never catch up.

The government says you must take the shot and if it kills or severely damages you that is tough. Neither the pharmaceutical company nor the government is liable.

Government should also not be allowed to selectively decide which medicine prescribed by a doctor can or can't be given to the patient. In the case of COVID-19 there are too many verified stories of patients who were not allowed to obtain medications that in many instances were shown to save the lives of those who received them.

Thank you for your consideration of my comments. It is a pleasure to hear of a bill, being considered, which has something to do with day to day Alaskan life and is not a political witch hunt.

Respectfully,

Chuck Bickley

Subject: Senate Bill 156

Dear Senator Shower,

I am writing to ask you to stand up for the rights of Alaskans to live healthy lives and decide for ourselves whether or not to put certain things in our bodies.

The idea of vaccine mandates and immunity passports just chills my bones, reminding me of Nazi Germany and current life in China under communist rule.

As a follower of Christ, I have a moral abhorrence to the way the mRNA "vaccines" were tested and/or manufactured using aborted human baby tissue.

Furthermore, the University of Pittsburgh expose has revealed that the fetal tissue is sometimes taken from aborted babies, delivered alive, with tissue gleaned before the heart stops.

If I were to accept one of these "vaccines," I would be supporting that evil industry.

I cannot be a part of that.

If vaccine mandates and immunity passports become the law in Alaska, our beloved state becomes a partner to that horrible crime.

Please support Senate Bill 156.

Subject: SUPPORT SB 156

Dear Alaska Senators:

I would like to implore you to support SB 156! This will protect the rights and medical freedoms of all Alaskans! I am a firm believer of Life, Liberty and the Pursuit of Happiness. If the liberal agenda gains support, and vaccine mandates, medical passports, and other agendas become more widespread, this will severely hamper every Alaskan from making the best decisions possible for them and their families. No one should be fired from their job, kicked out of school, denied jobs and schooling and denied access to public areas simply for having a differing opinion on medical procedures (immunizations, vaccines, masks, etc.).

All Alaskans have the right to weigh the benefits and risks of COVID 19 vaccination, just like all other medical procedures and interventions, and to make their free and informed choice...not forced through coercion or bribed with lottery style winnings. Many Alaskans have valid reasons for declining vaccination, including (but not limited to) personal health conditions, pre-existing immunity from prior COVID infection and moral/ethical objections to how the vaccine was developed.

Again, I implore you to side with the American way of life, side with personal freedoms and dignity for all Alaskans! No one should be forced by medical and political tyrants to conform to their medical opinions.

Subject: Senate Bill 156

Dear Senator,

Please support Senate Bill 156. It is essential that Alaskans remain free to make informed decisions on their healthcare without coercion. Nobody should ever be fired from their job, refused entry into school, or denied access to public places for refusing a medical procedure. There are many of us who have valid reasons for not getting a covid-19 vaccine. These include: natural immunity via prior infection, personal health concerns, reported side effects, and conscientious objection to manufacturing methods. Mandating a vaccine is unethical, anti-freedom and flat-out wrong.

People who advocate mandatory vaccines do so through erroneous logic: if they vaccine worked and they have it, then why does somebody else need to get the vaccine in order for them to feel safe? That flies in the face of reason. The argument that we need to relieve pressure on the medical system is laughable. Obesity and the many diseases directly caused by lifestyle choices that lead to obesity is the largest drain on the healthcare system. If lawmakers were really concerned about the health of their constituents they would take aim at the fast-food and processed-foods industry.

Sincerely,

Travis Robotkay

To whom it may concern -

Alaskan should have the right to choose whether or not they want to receive injections into their own body. Making it a mandate removes Alaskans freedom; especially considering that it's a well-known fact that as any virus mutates, it becomes weaker, just as this Covid virus has been doing. Covid injections have not kept individuals from contracting Covid or from having serious symptoms, evidenced by the large majority of people ending up in the hospital since the vaccines came out, though they were vaccinated.

Vote for the freedom of Alaskans.

Subject: SB156

I am writing today in support of SB156, a bill which will help keep Alaskans safe from vaccine mandates and 'immunity passports.'

Too many Alaskans have faced terrible discrimination due to simply exercising their rights as an American citizen to the freedom to their own private medical decisions over the past year. No one should be forced or coerced into taking an unwanted, experimental injection in order to keep their employment and provide for their family, to travel, or to in any way participate in society. Medical privacy rights have been trampled and can only be seen as the first step in the onslaught of our other rights as Americans and Alaskan citizens. I am expressing my unequivocal support for this bill. Thank you.

Subject: SUPPORT SB 156: Protect Medical Freedom in Alaska

Honorable Senators,

I am writing to ask for your support for SB 156, to make vaccine passports and so-call immunity passports" unlawful in Alaska. It is unconscionable to force people to take any kind of medical treatment without their permission or restrict their access to society based on it. Instead we should insist on education and let every family decide what measures are best for them.

My arguments: ~

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Subject: SB156

Senators and Committee Members;

I'm writing this evening to express my thoughts as a determined and informed Alaskan voter who was struck down in my prime with long-term disability from vaccine injury. I support Constitutionally-protected human rights, promote medical privacy, and decry discrimination. To this end, I support SB156 "an Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine." However, the bill does not go far enough. The bill should be broadened beyond COVID-19 medical issues and include specific minimum fines/compensation to affected/injured parties and minimum penalties for each violation, possibly including criminal penalties if so authorized.

Government exists in service to the community that empowers it, to preserve our Constitutionally-protected human rights, including the right to make informed medical decisions with trusted medical experts and family. Government does not exist to take the place of our private medical decisions. Similarly, schools are for educating, not stepping in place of parents and administering medical procedures. Furthermore, free movement within our country's borders is vital to commerce and defense; free right to employment and economic participation is essential to our country's strength and stability. Americans who make medical decisions based on individual considerations are not lesser Americans and they are entitled to the same Constitutional protections of their human rights as all Americans.

I'm reaching out to ask you to consider this matter carefully before you have an opportunity to discuss this bill with fellow lawmakers or cast a committee or Floor vote. Please make this a priority to pass this session.

Heather O'Claray

Juneau, Alaska

Hello people,

I am in favor of this bill and the favoring of freedom and civil liberties and would like our legislature to back this senate bill to protect the people against this unjust employment discrimination that is dividing our country.

Kimberly Frey <kimberly.frey@uaa.edu>

UAA BSEE Student

Hello,

See below. Can you please hold a hearing on this bill as soon as possible?

Thank you!

Patti Asman

There is a bill that was filed on 1/18/2022 that we need to get behind. It is SB (Senate Bill)-156 its title is "An Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine." This bill would make it where you cannot be discriminated against for vaccination status. <http://www.akleg.gov/basis/Bill/Detail/32?Root=SB%20156>

Please hold a hearing on SB 156 as soon as possible. There currently seem to be no protections for those who make different decisions than what the propaganda machines want for us to do. Thanks so much.

Shannon Wileman shannon.wileman@akleg.com

Dear Senate Affairs,

I am requesting that you bring this bill to the Senate Bill and discuss as soon as possible. There needs to be some relief for people in regards to vaccinations. There should be no coercion or discrimination for anyone that does not want to participate in an experiment.

Thank you for your immediate attention to this matter.

Sincerely, Sherry Coburn [REDACTED]

I am writing today to request you hold a hearing on SB-156 as soon as possible. Alaskans need to be assured they will be treated equally and will not be discriminated against, ridiculed, bullied or refused from an establishment based on vaccination status.

As the pandemic goes on we obtain new information. We now know that while the Biden Administration and the Mayor Austin D. Quinn in Anchorage were ridiculing American Citizens and ostracizing the "essential workers" of the pandemic who have gone to work since day one, got COVID-19 and recovered, those COVID-19 survivors were 6x more protected against the Delta Variant than the vaccinated population. These divisive, manipulative comments were harmful and I believe if you were to look at the vaccination status of Alaska's victims of suicide in 2021, you would find a high correlation of unvaccinated in that population in 2021 due to the government's bullying actions and them feeling hopeless. We know of situations where passengers would not sit next to children on airplanes because they were not vaccinated! It's unconscionable and this behavior must stop.

SB-156 will help support the growing population of Alaska resident COVID-19 survivors who were 6x as protected as the vaccinated against the Delta variant and are, to this day, unable to provide "informed consent" for the vaccine, as is required by law. If you would like to know more about this, please ask. I'm happy to share why.

Asking who is vaccinated and who is not vaccinated must cease as it is discriminatory based upon confidential medical conditions. Furthermore, it is an outdated measurement tool. We now know vaccines do not keep someone from getting the virus, from being contagious with the virus, or from spreading it. In fact, the most recent data shows the vaccinated are more likely to have the virus and be asymptomatic, they replicate the virus more aggressively (produce more of it faster), and they are MORE likely to transmit it to others unknowingly than the unvaccinated.

Please take up this discussion immediately and remove the outdated, divisive messaging of "vaccinated" vs "unvaccinated" and correct the record. We do not have a "pandemic of the unvaccinated." What we have according to the CDC is a pandemic of the obese with 78% of people hospitalized with covid being overweight or obese. We have a pandemic of the unwell according to the CDC with a vast majority of people dying with covid already having 4 or more comorbidities and being extremely ill before they contracted COVID-19. We also have an alarming amount of mistrust by the American people of our government officials at this time as a result of not making quick changes as a result of new information contradicting lockdowns and restrictions on the public. It's long past time for that to stop.

Thank you,

Ruby Dee Buchanan

To the Senate State Affairs Committee ,

YES, I fully support this bill. I think it is totally irresponsible to vaccinate the whole population , especially our kids, with an experimental 'vaccine'. I hear of more and more side effects and deaths from the jab and who knows what the long term consequences will be.... If people want to take the jab, that is their decision. It should be a choice not a mandate.

Thank you very much for supporting this bill.

anna seuffert [REDACTED]@m

Hi, both my husband and I are registered voters and we support SB 156. Please support this bill. It's critical. Thanks, Cary and Lydia Kimball, Kodiak

Dear Chairman Shower and Members,

I am pleased that SB156 will be before you on Feb.3. I encourage you to support this bill. I strongly believe that Alaskans' right to choose whether or not to receive a Covid-19 inoculation needs to be protected in law.

Informed Consent is a bedrock principle of medicine and public health. Covid vaccine mandates and passports would supplant informed consent with a system of social rewards and penalties instead of the rational consideration of medical risk and benefit that defines this basic freedom. Under the current patchwork of Covid vaccine requirements in the U.S., people are being pressured to accept Covid vaccines in order to keep their jobs, attend college, visit restaurants, etc. That is a form of coercion that deserves a strong prohibition in Alaska.

The Covid vaccines are still in trial under FDA Emergency Use Authorization while their safety and effectiveness are being evaluated. The US Vaccine Adverse Event Reporting System, the best vaccine safety data gathering system in the world, has recorded over 20,000 deaths associated with the Covid vaccines, compared to an average of just 155 deaths each year from normal vaccines in the preceding 10 years. Millions of Americans are paying attention and declining to participate in these Covid vaccine trials.

Declining to be Covid-vaccinated is a safe and responsible position. Effective and safe treatments are available to prevent hospitalization and death from Covid. Well informed Alaskans can make the choice.

Alaska needs clear statutory protection of the right to informed consent, and the right to decline these potentially harmful Covid vaccines. Thank you for considering my comments,

Thank you

Carolyn Beck

Carolyn Beck [REDACTED]@ [REDACTED]. [REDACTED]

The Alaska state government or any other form of government shouldn't be allowed to mandate or coerce any individual to take a fake vaccine (eua) or have a passport or even to take a test if it's against the will of the individual especially given the facts they now know about this so called man made covid virus. They can't come up with a cure of any kind for any other virus so to think and act differently with this virus is absolutely ridiculous. Please pass sb156 and keep Alaskans safe from mandates or any other forced control that isn't necessarily beneficial for the masses. Thank you for keeping us safe and allowing us as individuals to have our own choice in serious issues like this.

Keep looking up!!!!

Andy Cizek [REDACTED]@ [REDACTED]. [REDACTED]

Good morning,

I strongly support this bill and hope our legislature does everything in its power to pass it. This will absolutely prevent a 2-tiered social structure in which 40% of Alaskans will be discriminated against. I commend Senator Reinbold and Senator Shower for standing up for the rights of all Alaskans.

Sincerely,

Jake Plancich

Anchorage Resident

Jake [REDACTED]

I lived in Alaska for my entire life, until recently relocating to Illinois for employment opportunities and want to share my experience with COVID-19 vaccine passports and voice my support for SB156.

1. There is no worse feeling than not being permitted access to a building / restaurant / funeral home / or church as currently is strictly enforced in Cook County Illinois. It is completely degrading to the human experience and gives a stigma of being "unclean" and not included.
2. Allowing for the freedom for people to make personal decisions related to their medical needs, as recommended by their personal doctor is a core principle for living in the "Last Frontier". Generations of men and women braved Alaska's harsh weather, vast mountaintops, and forging across one of the continent's largest rivers in pursuit of a lifestyle that cannot be replicated in any other place in the world. Alaskans have forsaken safety as the number one priority for this pursuit of freedom; and my family has been following this path for 5 generations. As Alaskans, we don't want this freedom that has always been so integral to our creed to be diminished.
3. As the COVID-19 pandemic continues in full force in Illinois, with no end in sight, our family is re-considering relocating back to my home state. Alaska would most certainly be able to attract more conservative, working, tax paying people relocating to the state by writing into law a bill outlawing COVID-19 vaccination passports.
4. I would also like to make it clear that there is no study, and no evidence that indicates that the current mRNA technologies employed for the COVID-19 shots provide any benefit from transmission of COVID-19, therefore someone vaccinated against COVID-19 will spread COVID-19, exactly the same as someone unvaccinated against COVID-19.

Please consider the comments above. Look at your own roots as an Alaskan, and ask why you live here & what brought your family here generations ago. Please, pass SB 156, to keep the last frontier free.

To Whom It May Concern,

I would like to voice my support for SB156 "An Act relating to COVID-19 immunization rights; and relating to objection to the

administration of a COVID-19 vaccine." I have 2 recommendations:

1. Remove the specificity to COVID-19 so that it would cover all vaccines, past, present, or future. This would eliminate the need to re-address this issue in the face of similar threats to freedom.
2. Add clarification that it also applies to contractors and subcontractors. The imposition of a vaccine requirement for contractors is effectively the same treatment and should be clarified that this is not acceptable.

Thank you,

David Durst

I would implore you to please support SB 156 so that peoples individual rights, health and well being is being taken into consideration. Allow for people to have the freedoms to choose instead of it being chosen for them. Our state and our nation need to know that the individuals rights outweigh the minorities fears.

Thank You

Micah Miessner [redacted]@gmail.com

Alaskans should have the right to choose whether they want to receive injections into the body or not. Making it a mandate removes Alaskan's freedom of choice; especially since it's a well known fact that as any virus mutates it becomes weaker, just as this Covid virus has been doing.

Covid Inoculations have not kept individuals from contracting Covid or from having serious symptoms, evidenced by a large majority of people ending up in the hospital, though they had been vaccinated.

Vote for the freedom of Alaskans. Thank you,

Kathy Murray STTS Murray s [redacted]@m

I respectfully request that you SUPPORT SB 156, to protect medical freedom for the people residing in our Great State of Alaska.

We, the People, should not be punished in any way for not wanting to participate in any medical procedure, including vaccinations.

We, the People, should be able to make our own decisions when it comes to our heath.

Thank you.

Carla Eisberg [redacted] Eagle River, AK 99577

Carla Eisberg [redacted]@t

I am writing today in support of SB156, a bill which will help keep Alaskans safe from vaccine mandates and 'immunity passports.'

Too many Alaskans have faced terrible discrimination due to simply exercising their rights as an American citizen to the freedom to their own private medical decisions over the past year. No one should be forced or coerced into taking an unwanted, experimental injection in order to keep their employment and provide for their family, to travel, or to in any way participate in society. Medical privacy rights have been trampled and can only be seen as the first step in the onslaught of our other rights as Americans and Alaskan citizens. I am expressing my unequivocal support for this bill. Thank you.

Dear Senator,

Please SUPPORT SB 156, to protect medical freedom in Alaska

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

My family and I are lifelong Alaskans, local business owners, and job creators.

We acknowledge that government mandates regarding personal health decisions are unethical and inappropriate. Though we may not agree with their values, we echo the creed of those pro-abortionists who claim: "My body, my choice".

We SUPPORT SENATE BILL 156. Alaska doesn't need to follow the trend of the progressive anti-freedom states.

Sándor Yager

Anchorage, Alaska Sándor Yager [REDACTED]

Dear Senator,

Please support Senate Bill 156. It is essential that Alaskans remain free to make informed decisions on their healthcare without coercion. Nobody should ever be fired from their job, refused entry into school, or denied access to public places for refusing a medical procedure. There are many of us who have valid reasons for not getting a covid-19 vaccine. These include: natural immunity via prior infection, personal health concerns, reported side effects, and conscientious objection to manufacturing methods. Mandating a vaccine is unethical, anti-freedom and flat-out wrong.

People who advocate mandatory vaccines do so through erroneous logic: if they vaccine worked and they have it, then why does somebody else need to get the vaccine in order for them to feel safe? That flies in the face of reason. The argument that we need to relieve pressure on the medical system is laughable. Obesity and the many diseases directly caused by lifestyle choices that lead to obesity is the largest drain on the healthcare system. If lawmakers were really concerned about the health of their constituents they would take aim at the fast-food and processed-foods industry.

Sincerely,

Travis Robotkay

Travis [REDACTED]@protonmail.com

Dear Alaska Senators:

I would like to implore you to support SB 156! This will protect the rights and medical freedoms of all Alaskans! I am a firm believer of Life, Liberty and the Pursuit of Happiness. If the liberal agenda gains support, and vaccine mandates, medical passports, and other agendas become more widespread, this will severely hamper every Alaskan from making the best decisions possible for them and their families. No one should be fired from their job, kicked out of school, denied jobs and schooling and denied access to public areas simply for having a differing opinion on medical procedures (immunizations, vaccines, masks, etc.).

All Alaskans have the right to weigh the benefits and risks of COVID 19 vaccination, just like all other medical procedures and interventions, and to make their free and informed choice...not forced through coercion or bribed with lottery style winnings. Many Alaskans have valid reasons for declining vaccination, including (but not limited to) personal health conditions, pre-existing immunity from prior COVID infection and moral/ethical objections to how the vaccine was developed.

Again, I implore you to side with the American way of life, side with personal freedoms and dignity for all Alaskans! No one should be forced by medical and political tyrants to conform to their medical opinions.

I am writing to address SB 156.

I urge each member of this committee to pass then forward this bill to the next level. Our nation is based on the foundation of having inalienable rights direct from the Creator to life, liberty, and to pursue happiness. Those basic rights are shelved when each person cannot do their own research on a medical procedure which is injected into their own bodies (right of life) using these experimental shots. To pursue happiness MUST remain with the individual- even if you think this procedure will keep them alive. We, as citizens, MUST be free (right of liberty) to choose our own way.

Please allow this bill to advance. Keep vaccine mandates and any use of vaccine passports unlawful in this beautiful state I call home.

Thank you for a moment of your time.

Dennis & Susan Tayman dwt [REDACTED]

Who is support SB 156 to protect medical freedom in Alaska or Alaskans thank you Carolyn Morse

Sent from my iPad Carolyn Morse [REDACTED]

Members of the State Affairs Committee:

I add my voice to those urging you to recommend passage of SB 156 and make vaccine mandates and "passports" unlawful in Alaska. This legislation is needed to guard against government abuse of power to control individual lives and compel individual private medical choices that are constitutionally protected. This legislation is particularly important to end this over broad covid emergency orders and prevent a recurrence of these abuses in the future. No one should be forced to obtain particular medical interventions to keep their jobs or have the freedom to live and move in society. It has always been the case under our constitutional law that each individual is free to determine their individual risks and benefits from any medical treatment and choose the most appropriate course for themselves. If a medical intervention does have clear benefits relative to risk, people will not have to be forced into it. Many prefer not to participate in experimental medical trials unless all other interventions have failed and they should not be forced into it against their will.

Distinguished Committee Members,

As a proud citizen of this state, I am thankful that our communities are small and represent the fierce independent nature that Alaskans are known for.

In regards to SB 156 which you will be considering tomorrow, I plainly urge you to support this bill. Alaskans have the right to determine whether a COVID-19 injection is the right medical choice for themselves and their children, just like we would with any other medical choice.

This decision should be able to be made freely, without coercion and with access to accurate, transparent information. Any variation or inability to make this decision based on these factors or obstacles created to access this information is blatantly illegal, considering test subjects in medical trials or any human experiment are given a full picture of the tests they are to undergo or KNOWINGLY forfeit those rights. We should be given the same decency.

Trusting for an outcome of freedom tomorrow.

All the Best,

Devin Cress and the Cress family Devin Cress devincress@live.com

Hello,

I am writing in support of SB 156.

All Alaskan's should have a choice and should not be discriminated against, especially for something that is under emergency use authorization. Many people have valid reasons for not wanting to get vaccinated. The science does not back up the COVID vaccines. Look at other counties opening up and removing all mandates, and getting rid of vaccine passports.

No Alaskan should be fired from their job because they are not vaccinated.

It is time to end the charade.

Thanks,

Mike

Dear Senate State of Affairs Committee,

I am emailing in regards to Bill SB 156. I'm urging all of you to support this Bill for all Alaskans and our FREEDOM. 1st because it is the Constitutional thing to do and also the moral thing to do.

This Country was founded on FREEDOM to choose our religion and how we choose or not choose to live our lives and that includes our MEDICAL FREEDOMS..

I had to quit my job at ANTHC (AK Native Medical Center) I was a Medical Biller working at their Business office because of the illegal Covid Mandates this currant administration has been pushing.

I had several LEGAL grounds for asking for an expemption all of which were never considered.

1. I am Christian and I do not agree with injecting myself with aborted fetal cells
2. I had just recovered from stage 4 colon cancer treatments which included chemotherapy. I was not going to put my body under any more undue stress then its already been through
- 3 Most important, it is ILLEGAL to force any experimental drugs / procedures on ANYONE pursuant to the Nuremberg Code unless they consent.

This "consent" should be VOLUNTARY. And by VOLUNTARY I mean it shouldnt be a stipulation for keeping your job or being able to travel FREELY or to be out in public.

People will be watching closely. Those of you who do not support this Bill for our freedom will be remembered when election season rolls around.

Thank you Lora Reinbolt for introducing this Bill. I support it whole heartedly! Please keep fighting for our freedom.

Sincerely,

Subject: Please vote YES! in favor of supporting SB 156

February 7, 2022

RE: Please Support Bill SB 156 as proposed by Senator Lora Reinbold

Dear Senator Shower,

My name is Kailah Marie, and I was a full-time student and federal student worker attending the University of Alaska pursuing a Bachelors's Degree in Biological Sciences. After my bachelor's, I anticipated moving forward in obtaining a Doctorate degree in Pharmacognosy. My passion resides in phytomedicinal drug development. In short, my dream was to solve one of the most significant threats to global health and food security we face today – antibiotic residence.

On November 21, 2021, I received an email from Pat Pitney, Interim UA President, that due to the threat of losing over 200 million dollars in federal aid, the institution had essentially no choice but to implement a vaccination requirement for all faculty and staff. On Dec 9, 2021, I received another disturbing email. This email outlined the institution's decision that all students attending 'in-person' classes or on-campus services must be vaccinated, further instructing students that unless the college received proof of vaccination must be submitted by January 21, 2022, or the student would be dropped from enrolled classes.

As a science degree-seeking student, I am required to take science courses – and accompanied labs – on campus. The University of Alaska has not implemented a reasonable online alternative for students who do not wish to get the vaccine. As a result, multiple students, including myself, were ejected from the college system and could not continue their education.

Although it is possible to attend an online college elsewhere, I can't help but feel disheartened that I am not obtaining this education within the community and culture of Alaska and its great people. That I am unable to participate in the local programs and events that support friends, neighbors, and businesses which is a staple in what makes Alaska such a great place to live. That and the culture that no matter who you are, where you come from, what you believe that Alaska offers opportunity. I just want that same opportunity back.

Please vote YES! in favor of supporting SB 156.

I am writing to support the SB156 George Hodges [REDACTED]

Please support Senate Bill 156 and protect our freedom to chose what is best for each individual. I am 67 and have had Covid twice. It was not fun either time, but I didn't die! I took Ivermectin and had the monoclonal antibody infusion which was quite helpful. Prior to getting Covid, I was told by two different doctors to NOT get the so called vaccine due to some very serious health issues. In addition, I had allergic reactions to flu shots on 2 different occasions in the past. Had I received the so called Covid vaccine I was told by a local doctor he had not doubt I wouldn't be alive today.

Should the Covid vaccine be mandated it would be a death sentence for me! My children may very well carry the same gene(s) which causes me to be at risk for dire consequences from the experimental shot. They should not be forced to get the jab due to what could be a death sentence for them.

Important information regarding the lack of research in the development of the experimental vaccine has been censored and medical professionals locally and around our country speaking out have been persecuted. What's wrong with this picture!? Why is the public being used as lab rats? This vaccine was rushed without proper testing and should not be forced on anyone. The negative outcomes on those receiving the jab are being covered up and not addressed by mainstream media, but the information is out there and can be found.

The fact that children 5-11 are now being encouraged to take the jab is deeply concerning to me. This is a group that isn't at risk for developing complications or death. Why would any parent subject their child to an experimental vaccine that can't be validated as non harmful to children? To mandate the jab for children is reprehensible!

This Covid jab is experimental and saying it isn't is just bad science. It can't be equated with the current vaccines given to our children. All those vaccines underwent YEARS of testing and never were mandated.

Instead of years of testing, the "Covid vaccine" was thrust on people around the world and they quickly became test subjects without informed consent or the ability to receive any compensation should negative side effects occur. People received this experimental vaccine under the guise that it prevented Covid. Then the boosters came on the scene. They did not prevent Covid and yet the mandate is still being considered! Why?

Vaccinated and unvaccinated are both at risk of getting covid. Boosters are pretty much worthless and appear to not be able to keep up with the variants. Then the "powers that be" said those vaccinated will have a less severe virus to deal with. Well, that's still to be determined and at this point if anyone is still listening to "the authorities" they can't be believed at this point.

There has been so much false and deceptive information regarding the "Covid vaccine." So much of what was given as fact in the beginning has now proved to be false. Please don't allow this "vaccine" to be mandated in our state. This is not a "one size fits all" situation and we have a right to make our own choice based on our own situation and personal values and health issues.

Thank You for listening. Cheryl Tatom [REDACTED]

Dear Sirs,

I am writing to ask you to support Senate Bill 156 to protect medical freedom in Alaska.

As a prior service Army officer I hold freedom near and dear to my heart. I ask you to please protect our jobs, schools, freedom to public access and our freedom to decide for ourselves with our doctors of choice the medical treatments that we feel best suit each of our personal needs.

Thank you for your attention,

Yours, Deborah Peterson Deborah Peterson [REDACTED]

I am against government mandates for Covid vaccinations. Medical treatments should be each individual choice. I am not against vaccinations, I have been vaccinated. I just do not want the government forcing it. Forcing vaccinations and other medical treatment is like China or other communist countries. We need to fight to keep out freedoms!

J.E. Merry Judith Merry [REDACTED]

Greetings from Juneau, Alaska. I am writing today to all members of the Senate State Affairs Committee regarding Senate Bill 156. I urge each of you to support SB 156 for the protection of medical freedom in Alaska.

All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention.

There are serious and valid reasons that many people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska.

Thank you for your attention,

Melissa Zahasky Paul Zahasky [REDACTED]

SUPPORT SB 156 [REDACTED]

I urge you to support S B 156 to protect medical freedom in Alaska.

Many people have a number of valid reasons for declining vaccination. The whole program to date has been a real goat rope with false and unscientific information being given as the rationale for draconian government overreach. Everyday we hear a new unsubstantiated reason for doing things. We have set many students back years in their development, from learning to talk on through the whole gambit of education. Many may never catch up. The government says you must take the shot and if it kills or severely damages you that is tough. Neither the pharmaceutical company nor the government is liable.

Government should also not be allowed to selectively decide which medicine prescribed by a doctor can or can't be given to the patient. In the case of COVID-19 there are too many verified stories of patients who were not allowed to obtain medications that in many instances were shown to save the lives of those who received them. Thank you for your consideration of my comments. It is a pleasure to hear of a bill, being considered, which has something to do with day to day Alaskan life and is not a political witch hunt.

Respectfully, Chuck Bickley Wasilla, 99623 Chuck Bickley [REDACTED]

Dear Honorable Committee Members,

Please support Alaskan's rights to medical freedom and self-determination by allowing Senate Bill 156 to be moved forward for Legislative consideration.

Thanks, Mike M D [REDACTED]

Please support bill SB 156. Protect medical freedom.

Thank you Kathy Doyle Kathy Doyle [REDACTED]

As an Alaskan Resident I would like to urge you to SUPPORT SB 156, to protect medical freedom in Alaska.

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thanks for your support on Senate Bill 156,

Tracy

> On Feb 7, 2022, at 2:57 PM, Cheryl Tatom <cheryl_tatom@yahoo.com> wrote: Please support Senate Bill 156 and protect our freedom to choose what is best for each individual. I am 67 and have had Covid twice. It was not fun either time, but I didn't die! I took Ivermectin and had the monoclonal antibody infusion which was quite helpful. Prior to getting Covid, I was told by two different doctors to NOT get the so called vaccine due to some very serious health issues. In addition, I had allergic reactions to flu shots on 2 different occasions in the past. Had I received the so called Covid vaccine I was told by a local doctor he had no doubt I wouldn't be alive today.

> Should the Covid vaccine be mandated it would be a death sentence for me! My children may very well carry the same gene(s) which causes me to be at risk for dire consequences from the experimental shot. They should not be forced to get the jab due to what could be a death sentence for them.

Important information regarding the lack of research in the development of the experimental vaccine has been censored and medical professionals locally and around our country speaking out have been persecuted. What's wrong with this picture!? Why is the public being used as lab rats? This vaccine was rushed without proper testing and should not be forced on anyone. The negative outcomes on those receiving the jab are being covered up and not addressed by mainstream media, but the information is out there and can be found.

> The fact that children 5-11 are now being encouraged to take the jab is deeply concerning to me. This is a group that isn't at risk for developing complications or death. Why would any parent subject their child to an experimental vaccine that can't be validated as non harmful to children? To mandate the jab for children is reprehensible!

>

> This Covid jab is experimental and saying it isn't is just bad science. It can't be equated with the current vaccines given to our children. All those vaccines underwent YEARS of testing and never were mandated. Instead of years of testing, the "Covid vaccine" was thrust on people around the world and they quickly became test subjects without informed consent or the ability to receive any compensation should negative side effects occur. People received this experimental vaccine under the guise that it prevented Covid. Then the boosters came on the scene. They did not prevent Covid and yet the mandate is still being considered! Why?

> Vaccinated and unvaccinated are both at risk of getting covid. Boosters are pretty much worthless and appear to not be able to keep up with the variants. Then the "powers that be" said those vaccinated will have a less severe virus to deal with. Well, that's still to be determined and at this point if anyone is still listening to "the authorities" they can't be believed at this point.

There has been so much false and deceptive information regarding the "Covid vaccine." So much of what was given as fact in the beginning has now proved to be false. Please don't allow this "vaccine" to be mandated in our state. This is not a "one size fits all" situation and we have a right to make our own choice based on our own situation and personal values and health issues.

> Thank You for listening. Cheryl Tatom [REDACTED]

Hello all,

I'm writing to urge you to support SB 156 to protect medical freedom in Alaska. A "one-size-fits-all" approach to healthcare has never worked in the past, nor will it work with COVID-19. Alaskans have a right to decide for themselves whether they want to inject themselves with the COVID-19 shot every 3-4 months as a treatment option (I abstain from calling it a vaccine since it does not function as one) or whether they want to take care of themselves and those around them using other effective and proven protocols. To hold Alaskan livelihoods, educational opportunities and rights to medical treatment hostage is a horrific violation of human rights. I urge you to take a stand on this issue to protect freedoms over our own bodies. The COVID-19 shot comes with risks (as does all of life) and Alaskans should be able to decide for ourselves whether we want to accept those risks or take other routes. Thank you for your time.

Sarah Hoover Sarah Tyndall [REDACTED]

To whom it may concern,

I am writing today in favor of SB 156. I fully support the bill and want to see it passed. Alaskans (and all people across the world, really) deserve bodily autonomy and to be protected against forced medical procedures. This shouldn't even be a question! Please do the right thing for the people and protect their rights by passing this bill.

Thank you, Cassandra Ryan [REDACTED]

Hello,

My name is Desiree Cook and I am a Palmer resident with my husband and 4 kids. My husband works on the slope and the uncertainty of pending vaccine mandates over the last 12 +\ - months had been very stressful. Thankfully, due to the SCOTUS ruling, he doesn't have to worry about choosing between his personal autonomy and feeding his family.

I am not in the same boat. I am going to graduate from UAA with my bachelors of science in nursing in May 2022 and the uncertainty of whether or not I will be employable due to turning down a vaccine for an illness I've recovered from twice weighs heavily on me.

All nursing theories throughout nursing school have taught that individual autonomy is to be respected, that the patient always has the right to refuse, and that the job of healthcare workers is to educate not force any medical treatment - this is called provided informed consent. These are fundamental nursing concepts. Therefore the thought that an individual forfeits the autonomy of their body by merely entering the field of health care is an atrocity and violates basic human rights. The counter argument that I've heard is invalid which is that the job of the nurse is to protect their patients. The vaccine does not stop transmissibility and this has been proven time and time again. Therefore, an unvaccinated and vaccinated nurse must practice the same safety protocols to prevent a hospital acquired infection.

The real issue is that nurses and doctors are being segregated from society by losing their jobs and being denied certain services. This is not ok nor is it what being an Alaskan is about. We embrace diversity and foster an environment that is welcoming to opposing ideas. We do not force one sect of a population to succumb to another.

I implore to the committee to protect every Alaskan's right to work and right to decline a medical intervention through informed consent in the state of Alaska.

Thank you, Desiree Cook desiree cook d [REDACTED] m

I am emailing you to ask you to please support SB 156, the government has no business telling people what they should be putting in their bodies!!! Please support this bill! Thank you!! Jerilee Musgrove, Soldotna, Alaska and a life long Alaskan

I am writing to urge you to support SB 156.

Why should anyone be fired from their job or denied access to a public place for declining a medical intervention?

There are good reasons for deciding against vaccination. Personal health situations, pre-existing immunity from having Covid, and objection to

the unethical methods used to make the Covid vaccines are all legitimate reasons to refuse an experimental vaccine for your own body.

Alaska citizens should be free to decide for themselves the benefits or risks of Covid-19 vaccination. Please protect the right to make this personal decision for Alaskans.

Honorable Senators,

I am writing to ask for your support for SB 156, to make vaccine passports and so-call immunity passports" unlawful in Alaska. It is unconscionable to force people to take any kind of medical treatment without their permission or restrict their access to society based on it. Instead we should insist on education and let every family decide what measures are best for them.

My arguments: -

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Subject: Please read this and join me in supporting SB 156

Dear Senator:

My husband and I are residents of Anchor Point (Senate District P, House District 31). We love our country and vote in every local, state, and federal election.

I am pleased to see that SB 156 is now in front of you for consideration. SB 156 has my total support: No one should be fired from their job, kicked out of school, or denied access to a public place simply because they decline to participate in a government-sponsored, scientifically questionable, and suspiciously-supported medical experiment. ALL Americans have the right to make their own medical decisions. With regard to the veracity of Covid-19 reports, claims, cures, and "vaccines," you and I as citizens have the RIGHT to make our own free and informed choice, without coercion. Many people have valid reasons for declining vaccination, including personal health, pre-existing immunity from previous infection, and simply the right to a conscientious objection to the methods, sources, and real motivation (\$\$\$) behind the development and administration of Covid "vaccines". The CDC has reversed its views and unethically disregarded studies that run counter to their current position. At this point they are not in an honorable position to dictate nor force medical procedures, injections, medications for treatment of Covid, much less disregard our citizens' basic human rights under our Constitution.

I exhort you to take a stand for our American citizenry. Graciously persuade your fellow senators to put personal freedom, civil rights, and human dignity first by fully supporting and passing SB 156. I would be honored if you would thoughtfully consider the full import of your decision and contact me if I may support your efforts.

Respectfully,

Ann G. Cline

[REDACTED]

It is essential that you vote yes on Senate bill 156. No one should lose a job over bodily autonomy. This experimental gene therapy has not been vetted. People must remain free to decide for themselves which medical treatments they may need, there are several options that have been documented to work well against Covid.

Thank you ,Jim Way Sitka Jim Way [REDACTED]

Dear Senators,

I am an Alaskan family medicine physician. One of the things that makes healthcare in Alaska so great is that we have the freedom to practice the art of medicine, meaning unique and individualized care based on each person's goals and values. By allowing vaccine mandates and passports, not only would individuality be jeopardized, but also basic human rights and freedom. If there is risk, there must be choice. Not only do the currently available COVID-19 vaccines have known risks such as myocarditis, but the extent of risks such as blood clots, paralysis, and even death is unquantified. How then is it ethical to mandate such a vaccine if the vaccine itself does not prevent infection or transmission of the virus and is not current to the infection we are now facing? The COVID-19 vaccines only code for the spike protein of the original COVID-19 virus. The spike protein present in the omicron strain has at least 30 mutations in that one protein alone, rendering the vaccine virtually ineffective.

I have been actively treating COVID-19 since before the onset of the omicron variant and have seen vaccinated person after vaccinated person test positive for COVID-19 with symptoms that are largely indistinguishable from those who are not vaccinated. Thankfully a large percentage of our population now has natural immunity which is at least as effective if not more than vaccine immunity.

In sum, mandating the COVID-19 vaccines for all would strip the individualism and freedom that make Alaskans Alaskan, cause unnecessary injury and even death without choice for little to no benefit to our communities or workplaces. As a physician who took an oath not to harm, I ask that as human beings you do the same and make the right choice for the people of this great state.

Julie Stewart MD

## Sen. Lora Reinbold

---

**From:** Brittany A <[REDACTED]> ✓  
**Sent:** Tuesday, February 8, 2022 4:49 PM  
**To:** Sen. Lora Reinbold  
**Subject:** SB 156 Testimony

Senator Reinbold,

My name is Brittany Lauper, I live in Anchorage and I am representing myself. I fully support the proposed Senate Bill 156 to protect our God given rights to bodily autonomy.

At age 27 I was diagnosed with a genetic disorder called Lynch Syndrome which causes my DNA to mutate and attack my body which caused colorectal cancer - and by God's grace I was able to be healed from that. Lynch Syndrome gives me a much higher possibility of other cancers as well and I have been unable to get my yearly preventative exams due to the requirements of the doctor's & surgery offices.

The mRNA technology that these injections use does affect your DNA & genes and I will not risk testing them on my body for any reason. Even if these weren't experimental injections, I still would not test them on my body. That is my choice.

I finally met with my own surgery doctor and after going through all the questions & notes I brought with me, all she could say was "it's safe and effective". No elaboration on how it could affect someone with a DNA disorder. When I respectfully asked her "is this your medical opinion that it's safe for me and my personal medical history? Or is this your ethical opinion because you think I should get it?" And she said it's her ethical opinion and she believes everyone should get it and "I could probably find an anti-vax doctor that would sign my medical exemption for me." This, to me, is malpractice.

The audacity of a government thinking they can force something into my body and everything other human with NO regard to personal medical circumstances and requiring us to jump through hoops to get a medical or religious exemption - only to put us on some kind of list to keep track of us like we're prisoners.

This experiment that they are coercing many confused & fearful people into is no less than evil. I know you have seen the unbelievable numbers of deaths and injuries caused by this experimental injection. The stress and anxiety caused from the threats of losing our ability to make an income is not to be downplayed either.

We need to hear more of our State leaders speaking up loudly about the dangers of this shot. I cannot stand to hear "safe and effective" one more time. It is a lie. There is no proof that this is safe OR effective. There are no successful safety studies and it. It is dangerous and it is killing people. This injection is the most toxic serum in US history - and it's only been 1 year. If we know this data - you have to know this data too. And we the people will hold anyone pushing this accountable.

I do not understand how anyone is still pretending like this is any kind of cure for getting back to our normal free lives. Anyone who is injected can get the illness and spread it. Anyone who has eyes can see very clearly they will never let up on their tyranny - unless we refuse it.

So, I support this Bill and I ONLY support our elected leaders that uphold their oath to protect our

**Subject:** Senate Bill 156

Dear Senators,

I extend many thanks to Sen. Reinbold for sponsoring SB156 and I implore you all to champion this legislation fervently until it is safely enacted in Alaska. The draconian mandates in place in this and other areas of the state in the name of Covid-19 - a virus with over a 99% survival rate - must end now, particularly with regard to injections. Numerous reasons exist for declining the current experimental "vaccines" available, not the least of which include the questionable safety and known poor efficacy of any mRNA injection for the prevention and spread of the virus and its many variants. Aside from the aforementioned issues, Alaskans who do not wish to participate in the federal government's experimental medical injection program cannot easily pack up and leave the state for a more personal health friendly environment due to the logistical barriers for doing so.

Please preserve Alaskan's rights for making the best personal medical decisions for themselves and their children without government interference or restriction.

Thank you -

**Subject:** Support Senate Bill 156

Dear Senators,

I support Senate Bill 156, sponsored by Senator Lora Reinbold, which would make vaccine mandates and so-called "immunity passports" unlawful in Alaska. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Requiring proof of a "vaccine" or proof of any other medical intervention or negative test until very recently would have been considered discrimination and would have been subject to prosecution. When have we ever asked someone if they were positive for Hepatitis to go to the movie theater? Or Tuberculosis? Or HIV? Those health issues are both contagious and have a higher mortality rate than COVID.

Are we going to mandate that no one may use cigarettes and other Tabaco products, those cause serious health issues and my health can be negatively affected by 2<sup>nd</sup> hand smoke, strain is placed on the health care industry from COPD and lung cancer, so we should mandate no one may use tobacco? No one gets a choice about their own heath right? This is where the logic of demanding people accept one course of action goes, we then add more and more mandates until there is no freedom or choice ever again.

My body! My Choice! The constitution says I have the right to LIFE, LIBERTY, and the PURSUIT OF HAPPINESS! I cannot be mandated to accept any medical intervention that I am concerned will affect my LIFE, LIBERTY or PURSUIT OF HAPPINESS!

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion or discrimination.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for standing for freedom!

2/8/2022

Dear Governor Dunleavy,

I am writing this to plead for help and relief from the unconstitutional covid vaccine mandates being forced on members of my family working for the Ketchikan Indian Community clinic in Ketchikan. They are now being coerced or forced into getting the still experimental covid 19 vaccines, if they want to keep their jobs or seats on boards related to the KIC Health Clinic, by the CMS mandate issued by the Biden administration.

My family members have applied for religious and medical exemptions, but word is being spread now that the "tribal council" is not going to allow ANY exemptions of any kind just issue a get vaxxed or lose your job ruling. I find this highly problematic that the "council" of a sovereign nation is forcing members of this sovereign nation (Alaska Native Tribes) to submit their sovereignty to the CMS service, a branch of a foreign nation to the tribes of Alaska, because the CMS has threatened the funding of the health clinic in Ketchikan if KIC does not comply with the unconstitutional mandate.

At this point may I remind you that MANDATES are not LAWS, have not been legislated by congress, and that this vaccine is EXPERIMENTAL with no long term studies of the adverse effects, and the government as well as the vaccine manufacturers, have been caught hiding pertinent information on the adverse effects of these vaccines, as well as not giving information on what is in these "vaccines" and updated and full information on the adverse effects that are needed for full informed consent!

( Attorney Tom Renz speaks at the panel discussion moderated by Senator Ron Johnson on data released by whistleblowers in the department of defense on covid-19 vaccine adverse reactions and deaths. Discussion of a 300% increase seen in cancer follows Tom's brief report to the panel.

This clip was taken from the following panel discussion January 24th, 2022. COVID-19: A Second Opinion. A group of world renowned doctors and medical experts provide a different perspective on the global pandemic response, the current state of knowledge of early and hospital treatment, vaccine efficacy and safety, what went right, what went wrong, what should be done now, and what needs to be addressed long term  
<https://rumble.com/search/video?q=Tom%20Renz> )

The video above is 9 minutes long, you should watch it as the attorney exposes that the Dept. of Defense has been "doctoring" and hiding data on the adverse effects of the vaccine, and that these effects are so significant many of the doctors on this panel thought this experiment should be stopped because of the HARM they are causing!

Every day there is more and more information on this experimental injection, which was called a vaccine. We were told it would give immunity, stop the spread, and keep those receiving it from getting hospitalized or lessen the effects, AND IT HAS BEEN SHOWN TO ACHIEVE NONE OF THESE! I have been told the covid infection rate at KIC is 81% vaxxed! This vaccine is an abject

FAILURE as a vaccine and is causing irreparable harm, young people in the prime of life now dropping dead from heart problems, young athletes dropping dead on the playing field, so many people with devastating neurological problems so bad they need assisted care to live, cannot work, and have had their lives DESTROYED by this injection! This injection is being shown to destroy the immune systems of many with these adverse effects, and it is not a vaccine, it is GENE THERAPY, and is permanently altering the DNA of those getting this injection, it is a total experiment and continuing to FORCE it on others is INSANE and a violation of our human rights!

NOBODY should be fired from their jobs or prevented from participating in our society and commerce for declining to accept ANY vaccine or medical procedure, not to mention one so ineffective that now 80% of the covid cases are fully or partially vaxxed!

ALL REQUEST FOR EXEMPTIONS SHOULD BE ALLOWED....AND ACCOMADATED!

Alaskans and all HUMAN BEINGS have the RIGHT to evaluate the benefits versus the RISKS of all medical procedures, and make INFORMED decisions, based on facts and the evidence (that is presently being withheld from us) and FREELY consent or decline without being illegally coerced, intimidated, or bullied. Threats of losing your job and income, healthcare, and the ability to financially take care of your family IS NOT INFORMED AND FREE CONSENT! NO one should be prevented from going to school or college because they declined this experimental medical procedure!

THOSE WHO DECLINE THIS INJECTION HAVE VALID CONCERNS!

Many who are religious have conscientious objections to the unethical methods used to develop these injections! Many have LEGITIMATE concerns that these vaccines will harm their health, as is being shown in the highest amount of adverse effects reported, more than all other vaccines in history COMBINED! Many have already had this disease and HAVE NATURAL IMMUNITY, which HAS BEEN SHOWN IN STUDIES TO BE SUPERIOR to the short lived positive results of this injection. AND MANY MORE DON'T WANT TO PARTICPATE IN AND EXPERIMENTAL INJECTION THAT ALTERS THEIR DNA GENOME, AND WHICH NO ANIMAL STUDIES OR LONG TERM STUDIES HAVE BEEN DONE!

THESE ARE ALL LEGITIMATE REASON FOR DECLINING THIS INJECTION!

I am now asking you to do all in your power to stop these illegal and unconstitutional mandates, they are a violation of the Nuremburg code, our laws on INFORMED CONSENT, and OUR HUMAN RIGHTS!

PLEASE USE YOUR EXECUTIVE AUTHORITY TO INTERCEED AND STOP THIS ... NOW!

And PLEASE fully support and push SENATE BILL 156, which would make vaccine mandates and passports ILLEGAL in Alaska, as it should be! I urge you to try to get this legislation passed and

signed as fast as possible and to use your executive action to temporary halt these mandates , while this legislation is pending!

I am also sending this letter CC'd to the Senate State Affairs Committee and it's members and urging them to please share this letter with the entire legislature.

Now about myself. I am a 73 year resident of Alaska, born and raised, of mixed heritage of European and Native American. I have a large family of mixed heritage of European/Native American/ Alaska Native/Hispanic/black, and my children, and many cousins here, are members of the Ketchikan Indian Community and Alaska native, so I do have a dog in this fight and many concerns about my fellow Americans of not only the adverse PHYSICAL effects of this injection, but also EXTREME CONCERNS on allowing our federal government to FORCE medical procedures on the SOVEREIGN citizens of Alaska and the other states and territories! Are we citizens who "own the government" which requires CONSENT OF THE GOVERNED, or are we a FEDERAL GOVERNMENT WHO OWNS "IT'S SUBJECTS" AND CAN IMPOSE MEDICAL PROCEDURES ON THEM? AND WHERE DOES THIS STOP? IF THEY CAN IMPOSE THIS, CAN THEY THEN IMPOSE OTHER PROCEDURES, UP TO AND INCLUDING HARVESTING THE ORGANS OF ITS SUBJECTS AS CHINA DOES NOW?

Please stop this insanity of mandates NOW, FREEDOM IS THE...RIGHT....TO CHOICE.

MANDATES ARE DICTATES AND THE OPPOSITE OF FREEDOM,

WHERE ARE YOU GOING TO STAND?? FOR FREEDOM OR A DICTATORSHIP?

Sincerely,

 Byron Whitesides

Ketchikan, Alaska

PS: IT'S PAST TIME TO STAND UP FOR ALASKA AND OUR PEOPLE AND NULLIFIES THESE UNREASONABLE AND UNCONSTITUTIONAL MANDATES BY ASSERTING OUR 10<sup>TH</sup> AMENDMENT RIGHTS. THE STATES MADE THE FEDERAL GOVERNMENT AND ARE SUPERIOR AND SOVEREIGN TO IT.

## sovereign

**To:** Senate State Affairs <SenateStateAffairs@akleg.gov>  
**Subject:** Senate Bill 156

Dear Senator,  
Please support Senate Bill 156. It is essential that Alaskans remain free to make informed decisions on their healthcare without coercion. Nobody should ever be fired from their job, refused entry into school, or denied access to public places for refusing a medical procedure. There are many of us who have valid reasons for not getting a covid-19 vaccine. These include: natural immunity via prior infection, personal health concerns, reported side effects, and conscientious objection to manufacturing methods. Mandating a vaccine is unethical, anti-freedom and flat-out wrong.

People who advocate mandatory vaccines do so through erroneous logic: if they vaccine worked and they have it, then why does somebody else need to get the vaccine in order for them to feel safe? That flies in the face of reason. The argument that we need to relieve pressure on the medical system is laughable. Obesity and the many diseases directly caused by lifestyle choices that lead to obesity is the largest drain on the healthcare system. If lawmakers were really concerned about the health of their constituents they would take aim at the fast-food and processed-foods industry.

Sincerely,  
Travis Robotkay

**Subject:** testimony sb156: NO to vaccine mandates

For public testimony on sb156

**From:** STTS Murray ~~seedtothesower@gmail.com~~ ✓  
**Sent:** Monday, February 7, 2022 2:10 PM  
**To:** Sen. Lora Reinbold <Sen.Lora.Reinbold@akleg.gov>  
**Subject:** NO to vaccine mandates

To whom it may concern -

Alaskan should have the right to choose whether or not they want to receive injections into their own body. Making it a mandate removes Alaskans freedom; especially considering that it's a well-known fact that as any virus mutates, it becomes weaker, just as this Covid virus has been doing.

Covid injections have not kept individuals from contracting Covid or from having serious symptoms, evidenced by the large majority of people ending up in the hospital since the vaccines came out, though they were vaccinated.

Vote for the freedom of Alaskans.

Respectfully,  
Kathy Murray

Your story is heart wrenching and to be honest they violated the law. I would seek legal council.

Thank you for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to [SHSS@akleg.gov](mailto:SHSS@akleg.gov) or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

Respectfully,  
Senator Lora Reinbold

**Subject:** Vaccines and mandates

I was fired from my job one day before I was ready to work from home because because I did not have the vaccines accents my employer would not honor my religious beliefs. The owner of the medical facility I was working at stated she wanted everyone to be vaccinated be vaccinated even though I was going to work from home work from home the next day. When I pointed certain things out she then added other things on to why she was terminating my position. Yet the 1st thing out of her mouth was the vaccine and the mandates.

Everyone should have a choice I want they put into their body everybody has the right to work without a mask.

Dear Senator Reinbold,

Alaskans have the right to weigh the benefits and risks of medication and medical treatment options including the right to decide what is injected into their body.

Proof or justification to any entity via exemptions for the Covid vaccines violates an individuals privacy and compromises their freedom.

Thank you for introducing this bill and for protecting the freedom and quality of life of Alaskans.

Sincerely,

**Subject:** SB 156

Dear Senator,

I am writing in support of SB 156. As a resident of Fairbanks for nearly 50 years, I feel I should have a voice in those issues affecting all Alaskans. I would urge you to carefully consider all the implications that any Covid-19 vaccine mandate or identification of vaccination status would have. I believe these would be unconstitutional overreach by government which would have broad repercussions for employment, schools, tourism, healthcare rationing, insurance and liability issues, personal freedom and the impossibility of fully informed consent. Until the FDA, CDC and the pharmaceutical industry as a whole are FULLY investigated and FULLY transparent with ALL the information regarding these experimental Covid-19 gene therapies, every person is at great risk. No one should ever be required by mandate to take any medical device or treatment with unknown short-term or long-term consequences.

Please support and vote for SB 156. Thank you for thinking deeply on this topic.

Dear Senator Reinbold,

First, THANK YOU for all you to do fight the nonsense going on in our state.

Second, please, vote in support of, YES, on SB 156! I assume you will.

I was fired from my job as a nurse due to the mandate that I receive a covid vaccine. Even now, the available vaccines in our country are EXPERIMENTAL. As such, they should be required of no one.

I loved my job as a nurse. I have since found employment elsewhere, where objections to receiving the vaccine are granted. But really, I was fired! For not receiving an experimental vaccine.

**Subject:** RE: SB 156

3 people  
have tabled  
the issue

Thank you Rebecca. Those stories are tragic. Please send any and all heart wrenching stories. We are trying to read one per senate session.

Senator Micciche had not supported the vax bill of rights and protections for workers last year, he and another member tabled the bill, their have been tragic consequences. I have been working on this for well over a year.

We appreciate you contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to [SHSS@akleg.gov](mailto:SHSS@akleg.gov) or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

Respectfully,  
Senator Lora Reinbold

Senator Reinbold,

Please put me on record supporting SB 156 to the entire committee. I personally know 3 people who developed myocarditis immediately after receiving the vaccine and died. My nose daughter in Anchorage says children are experiencing the same (myocarditis) after receiving the vaccine. And we all have heard of the 100 professional athletes. The Vares reporting system isn't even touching the real numbers of injuries and deaths.

Thank you. Please distribute this to the committee.

**Subject:** SB 156 Testimony

Senator Reinbold,

My name is Brittany Lauper, I live in Anchorage and I am representing myself. I fully support the proposed Senate Bill 156 to protect our God given rights to bodily autonomy.

At age 27 I was diagnosed with a genetic disorder called Lynch Syndrome which causes my DNA to mutate and attack my body which caused colorectal cancer - and by God's grace I was able to be healed from that. Lynch Syndrome gives me a much higher possibility of other cancers as well and I have been unable to get my yearly preventative exams due to the requirements of the doctor's & surgery offices.

The mRNA technology that these injections use does affect your DNA & genes and I will not risk testing them on my body for any reason. Even if these weren't experimental injections, I still would not test them on my body. That is my choice.

I finally met with my own surgery doctor and after going through all the questions & notes I brought with me, all she could say was "it's safe and effective". No elaboration on how it could affect someone with a DNA disorder. When I respectfully asked her "is this your medical opinion that it's safe for me and my personal medical history? Or is this your ethical opinion because you think I should get it?" And she said it's her ethical opinion and she believes everyone should get it and "I could probably find an anti-vax doctor that would sign my medical exemption for me." This, to me, is malpractice.

The audacity of a government thinking they can force something into my body and everything other human with NO regard to personal medical circumstances and requiring us to jump through hoops to get a medical or religious exemption - only to put us on some kind of list to keep track of us like we're prisoners.

This experiment that they are coercing many confused & fearful people into is no less than evil. I know you have seen the unbelievable numbers of deaths and injuries caused by this experimental injection. The stress and anxiety caused from the threats of losing our ability to make an income is

**To:** Sen. Lora Reinbold <Sen.Lora.Reinbold@akleg.gov>  
**Subject:** Re: SB 156

Senator Reinbold,

I agree with you. I have a writing and calling campaign in the works for the Senators and Representatives regarding SB 156.

My husband and I realized after we were discharged from the hospital that the vaccinations were not legally enforced on children when a Pastor and friend told us. It is hospital policy to assume vaccination. Though we had clear instructions on the white board in our room and the birth plan the hospital violated that and the nurses lied to us. The issues around vaccination have been a serious problem since 1986 when liability was removed and mandates were created. It certainly has culminated in a major issue now over covid 19 vaccinations.

I will work my hardest to help support this bill. Please tell me if there is a time where in person testimony would be more powerful. My husband and I would certainly consider coming to Juneau to do that.

Thank you,  
Kendal

Thank you for your heartfelt email. The Big pharma industry is impacting our lives in such unbelievable ways. This covid vax medical tyranny has crossed the line. I am also deeply concerned about the vax by 2 initiative. If you have any data about them saying it is illegal not to vaccinate your baby I would like to see it, that is not accurate. State statute is very clear we are an opt in not an opt out state for any medical procedure including vaxes.

I appreciate you being involved. This bill has many hurdles to go to get to the finish line. The worst part is lack of informed consent, coercion and the fact so many do not know their rights. We must defend individual liberty and not big pharma or corporate interests with medical covid tyranny.

Senator Reinbold,

Thank you for sending the information for me to testify and for allowing so many to speak. I had tears listening to the first two speakers. I am so glad that you made the maximum amount of time for testimony.

I reached out to Senator Wilson and Senator Hughes to express my support.

I do hope you put 'teeth' into the bill to deter these individuals from violating the laws they are already comfortable violating.

I wanted to let you know that while I don't feel comfortable naming the specific pediatrician I will see she has privileges at Providence and her practice is inside Prov.

When we had our first two children at Providence we had it in our birth plans to delay vaccination until their 2 month appointment. Both times the hospital staff vaccinated our children without our consent and claimed they never saw our documentation. We complained and were told that it was their policy to vaccinate every child and that it was illegal to not vaccinate your baby.

**Subject:** Senate bill 156

Greetings,

I am writing in to ask for support of Senate Bill 156.

While I already believe that the Government shouldn't try to restrict the movement of the people, I have an additional reason I believe this bill should go through.

Demanding vaccination in order to move freely is detrimental to anyone who chooses not to receive the vaccine, but is further detrimental to those who cannot receive the vaccine.

The Covid 19 vaccine is not recommended for anyone who has ever had anaphylaxis. I have two children who have had anaphylaxis to certain exposures, and both require an epi-pen for life saving measures. I believe if our population is required to show a vaccine passport, to move freely, it will unnecessarily discriminate against those who cannot safely obtain the vaccine.

I believe in the right to medical care absent the interference of Government, and I respectfully request you adopt this bill, not only to protect our already valuable freedoms, but to protect those who would be persecuted for something they literally have no control over.

Thank you very much for your time and attention to this important matter.

We are getting hundreds of phone calls, emails etc to protect an individual right to chose the covid vax or not. I believe leg legal sent us a wonderful memo in Sept that showed in state law that no one was mandated to take the shot, they were protected in state law. Let alone, federal law says EUA cannot be mandated so if it not fully approved they have automatic opt out/ required to opt in. Is that correct?

The constitution does not protect a business, it protects individuals liberties correct? SB156 is constitutional I wholeheartedly believe and aligns with the current state law. We may need someone to testify on behalf of this (we received no memo when sb156 was drafted-it is almost identical to all the legislation on this same issue last year, I never recall getting any memos for all the resolutions, amendments etc to protect an individual right to chose and keep their believes private regarding vax, medical care etc.

Thank you Leg Legal. I spoke with Megan about this earlier today.

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

**Subject:** [REDACTED] SB156, suggested amendment

Hello Madeleine,

I have a suggestion for amending language in SB156, Sec. 18.09.280. Objection to the administration of a COVID-19 vaccine.

The section title uses the phrase "Objection to", and the phrase "object to" appears in the body on lines 21 and 23.

On line 26 the phrase "decision to decline" is used to describe an individual's action of refusing a COVID-19 vaccine - the thing that is being protected by this section.

This choice of wording appears slightly inconsistent, and might be legally significant. To my ear, the phrase "An individual may object to" sounds like it will protect an individual's right to hold an opinion or belief about a Covid vaccine, but might not clearly protect their right to refuse that vaccine.

In comparison, using the words "decline" and "decision to decline" is affirmative language that clearly defines a protected action.

For consistency, clarity and strongest protection, I suggest changing the title of Sec. 18.09.280 to: "Decision to decline the administration of a COVID-19 vaccine.", and replacing the phrase "object to" on lines 21 and 23 with the word "decline".

Thank you for considering my comments.

**Subject:** No mandatory vaccinations

Dear Senator

I am writing asking for your support and voting to pass Senate Bill 156 which would make all vaccine mandates and immunity passports unlawful in the state of Alaska.

No one should be forced by our government to take a vaccine to keep a job or to be able to attend school.

People have many sincere and legitimate reasons for not wanting to be vaccinated including medical and religious reasons. There have been over 10,000 deaths in our country attributed to vaccine adverse reactions and many people don't believe it's worth the risk to prevent a virus that has a 99.5 recovery rate. All Alaskans should have this right to make their own personal health decisions!

Thank you so much and looking forward hopefully to this bill passing and giving all Alaskans the ability to determine their own destinies without government interference.

Sincerely,  
Murry Keith

Throughout history, the U.S. government has managed to keep secrets hidden from the public. When they release these secrets, many are quite surprised and astonished at everything they've managed to get away with. Countless conspiracies involving programs such as Area 51 and MKULTRA have become mainstream in modern-day culture. The desire for such secretive knowledge is ever abundant, and no matter how much we think we know, we're always proven wrong. Despite the current rise in conspiracy theories involving government testing, many verified instances of such cases have remained hidden from the public for decades. Here are ten of them.

Chair Wilson and Vice Chair Hughes,

I am requesting that you please immediately set a hearing for SB156. This important legislation must be given every opportunity to pass this session and the time is now to send a clear message that Alaskans hold fast our human rights and will not tolerate discrimination of any sort. Please help us stop this madness as families are mistreated, segregated, unfairly disciplined, restricted, or fired. They are being coerced to choose treatments inappropriate for them based on their personal medical history and the actual risk:reward scenario. Constituents statewide, including the key independent voters, are speaking loudly in swarms to support this bill. Please hear your base in this critical election year!

Please hear SB156 next week and welcome public testimony before your committee to keep the positive momentum before voters grow too weary to participate.

Thank you

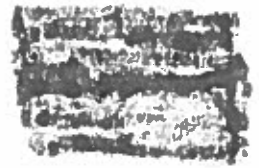

Heather O'Claray  
Juneau, AK

**To:** Sen. David Wilson; Sen. Shelley Hughes  
**Cc:** Madeleine Gaiser  
**Subject:** PLEASE set hearing for SB 156

**Chair Wilson and Vice Chair Hughes;**

**I am writing to request you please set a hearing for SB-156. No one should be fired or refused employment because of their choice to choose medical freedom and bodily autonomy over fear and coercion.**

**Please protect our rights of choice and medical freedom.**

**Citizens are being coerced to choose treatments inappropriate for them based on their personal medical history and beliefs.**

**The following is my personal experience with this current injustice.:**

I was employed from 6/29/2015 to 9/10/2021 (over 6 years) with Chugach Training & Educational Services LLC at Alaska Job Corps in Palmer as a Medical Record Clerk in the Wellness Clinic.

(This included working from home 2 days a week for several months during the 2020 COVID restrictions period 4/2020-11/2020 - all staff was tested before our staff and students were allowed to begin to return to Center.)

About 3 PM on Friday 8/27/2021, a user wide email was sent from our Center Director informing us that due to the Biden issued COVID vaccination mandate, as of 9/01/2021 all employees were required to show verification of COVID-19 vaccination or to complete & show verification of negative COVID-19 tests 3 times a week to have access to the Alaska Job Corps Center to continue working.

Due to religious and health reasons, I do not wish to risk taking the vaccine, and feel that is is discriminatory to request only unvaccinated persons to test, as vaccinated persons can still contract and spread the virus.

I expressed my concerns and beliefs to my Center Director who indicated the order was issued due to the Federal mandate.

I worked the following Monday 8/30 & Tuesday 8/31 and submitted my remaining leave time through 9/10/2021 in hopes of a change in policy. (I had already entered leave for Friday 9/3 for an extended 4 day Labor Day weekend).

on 9/13/2021 Monday, I spoke to HR and informed her I would need to turn in my keys and ID if policy had not changed. I was asked to write a letter of resignation. I indicated I was not resigning, but being forced to find employment elsewhere to earn income to survive since they were not allowing me on Center to work and wrote a letter to that effect upon submitting my keys & ID.

I applied for state unemployment benefits on 9/14/2021 online and have been continuing to file weekly claims and submitting required job searches.

I received a phone call from AKUIB for details of my employment separation and was highly offended to be subjected to having to justify my personal and medical reasons for my decision.

On 10/17/2021 I received a letter in my PO box postmarked 10/14/2021 (letter dated 10/13/2021) from UI Claim Center. The UI Claim Center letter indicated they determined that I did not establish good cause for voluntarily leaving my work & therefore denied benefits from application until 10/23/2021 as well as having my maximum payable benefits reduced by 3 times my weekly benefit amount.

I did not receive ANY UIB benefits until 12/3, have been seeking new employment, and NOT as of yet received a hearing date for my appeal.

As a 62 year old voting taxpayer who has worked since I was 12 years old, I am astonished at the injustice I am receiving.

Thank-you for your time & consideration.

**Subject:** RE: Stunning Vaccine information

*HB 156*  
*betamides*  
*penalties*  
*legal*

Thank you Senator Reinbold. I spoke to you by phone at your Public Affairs Hearing last week. My comment was in the form of a question of penalties for violations should the legislation become law. I hope you will ensure maximum penalties are available to prosecute violations.

I am stunned that Sen Myers is taking a weak position on something so important. Thanks for the information. My only guess is that he is unaware as to the magnitude of mandating a vaccine that has seriously harmed hundreds of thousands, not to mention killing 23,615 people as currently reported in VAERS. I guarantee no government organization will play the part of God and demand I get injected with a substance that is clearly unsafe, ineffective and killing my fellow Americans. I will remind you of the one of many Alaskans who testified at your hearing that suffered a permanent injury(Crohns disease) because of this "vaccine". He will get no compensation because of the EAU status given to pharma that grants them a get out of jail free card and the Government won't even acknowledge the problem so he can't tap into the fund(I cannot recall the name) established to compensate vaccine injured individuals. You asked him a question about the medication he should be on and he replied its \$1000.00/mo and he cannot afford it so he isn't even treating it. THIS pissed me off to no end. Thanks for your good work. I suppose we'll have to work on Sen Myers.

Sen Myers--

You're now in the To line. The accusation is you've gone limp on support for such a key piece of legislation and have actually stood in front of it and even harmed it. If you don't support HB-156 please have the guts to express your views. However be aware I will give you full credit for your position... whatever it is. Please Respond

Vr,

Michael Potts

Dear Senators,

Thank you for moving this legislation to committee to review!  
The mRNA shots are genetic modification only: they do not reduce transmission, they do not reduce infection rates, and they do not reduce death.  
These are the things a genuine vaccine is supposed to do. These shots are NOT "vaccines", they are spike protein injections: i.e., bioweapons.

Neither "safe" nor "effective", they are responsible for (1) all the COVID hospitalizations currently; (2) all the "variants"; and (3) 95% of all new COVID deaths.  
Not only should you not MANDATE these injections, you should OUTLAW them!  
These shots should be CRIMINALIZED.

And while you're drafting the legislation, add direct penalties to persons who violate the law. Right now there are no penalties and there are many people willing to violate discrimination laws now with no fear of reprisal.  
Thank you and God bless you!

Dear Senator,

I am writing in support of SB 156. As a resident of Fairbanks for nearly 50 years, I feel I should have a voice in those issues affecting all Alaskans. I would urge you to carefully consider all the implications that any Covid-19 vaccine mandate or identification of vaccination status would have. I believe these would be unconstitutional overreach by government which would have broad repercussions for employment, schools, tourism, healthcare rationing, insurance and liability issues, personal freedom and the impossibility of fully informed consent. Until the FDA, CDC and the pharmaceutical industry as a whole are FULLY investigated and FULLY transparent with ALL the information regarding these experimental Covid-19 gene therapies, every person is at great risk. No one should ever be required by mandate to take any medical device or treatment with unknown short-term or long-term consequences.

Please support and vote for SB 156. Thank you for thinking deeply on this topic.

Attention Alaska State Legislature,

It has come to my attention that Senate Bill 156, Sponsored by Sen. Lora Reinbold (R-Eagle River) is introduced into the Alaska State Legislature. This bill will help protect Alaskan Citizens right to make personal health choices for themselves and their loved ones. I support Alaskans right to choose their own health care. I also do not wish to be pressured by outside lobbyists, especially those of pharmaceutical company's, nor State Governments Agencies in mandating injection or ingestion of any drugs into my body or my family members. I implore you to support Senate Bill 156 and keep Alaskan's Free to make personal health care choices thus also supporting our freedoms and right to medical privacy. I am a voter and I do vote regularly. I have lived in Alaska over 30 years and shared this with everyone which is a lot of people.

Please let me know if you intend on supporting this bill or not.

Respectfully,

Jesse Thacker

---

**Dear Senator Reinbold,**

I am writing in support of Senate Bill 156 (SB156). We need a State law to protect all Alaskans from overzealous local politicians, no matter where we live in Alaska. In Juneau, we have an assembly that overreaches their authority. They impose arbitrary mandates and encourage events only for the "vaccinated." We need SB156 to become law to protect all citizens regardless of their vaccination status, nor force anyone to be vaccinated against their will. This law would also prevent discrimination because of an individual's vaccination status. Covid has become a political circus and we need law in place to make that stop.

I appreciate your support for this very important bill that protects all of our citizens and our liberties.

### Take Action to Preserve Your Right to Informed Consent

Informed Consent is a bedrock principle of medicine and public health. The Covid vaccine mandates and passports being promoted around the world will subvert informed consent into a system of social rewards and penalties, or bullying and discrimination. Our rational consideration of medical risk and benefit will be replaced by a decision to keep our job, be able to travel, or not rock the boat. These repressive measures will not take us to a benevolent place. In these two years of Covid, the words "safety" and "science" have been perverted into a shorthand for "Be afraid, do what you're told and don't ask questions."

An interested person who asks will soon discover answers that don't fit the mainstreamed narrative. The Covid vaccines are still in trial under FDA Emergency Use Authorization while their safety and effectiveness are being evaluated. The US Vaccine Adverse Event Reporting System, the best vaccine safety data gathering system in the world, has recorded over 20,000 deaths associated with the Covid vaccines, compared to an average of just 155 deaths each year from normal vaccines in the preceding 10 years. Millions of Americans are paying attention and declining to participate in these Covid vaccine trials.

The Alaska Legislature will be considering various bills this session relating to Covid vaccine mandates or passports. The first and most concise of these bills, SB156, will be heard in the Senate State Affairs Committee this Thursday, Feb.3, at 3:30 pm.

You can read the text of the bill by typing SB156 in the search bar at the Alaska Legislature homepage <http://w3.akleg.gov/index.php>

To listen to the meeting online go to the Legislature homepage and follow the tabs to Standing Committees, then Senate State Affairs Committee <http://www.akleg.gov/basis/Committee/Details/32?code=SSTA> Click the Meetings tab to find the Audio/Visual link for the Feb. 3 meeting.

If time allows, the Committee Chairman may invite public comment on the bill at this meeting. The Legislative Teleconference call-in number is 844-586-9085.

You can email your comments to the committee at [senatestataffairs@akleg.gov](mailto:senatestataffairs@akleg.gov)

At the federal level, Alaska Senator Dan Sullivan has cosponsored S.2846, The Natural Immunity Is Real Act, to ensure that millions of Americans who have been infected with Covid will have their immunity status recognized in law. A recent study published by the CDC reviewing data from millions

----- Original Message -----

From: rolan@[REDACTED]

To: senatestateaffairs@akleg.gov

Senate State Affairs Committee,

Dear Chairman Shower and Members,

I am pleased that SB156 will be before you on Feb.3. I encourage you to support this bill. I strongly believe that Alaskans' right to choose whether or not to receive a Covid-19 inoculation needs to be protected in law.

Informed Consent is a bedrock principle of medicine and public health. Covid vaccine mandates and passports would supplant informed consent with a system of social rewards and penalties instead of the rational consideration of medical risk and benefit that defines this basic freedom.

Under the current patchwork of Covid vaccine requirements in the U.S., people are being pressured to accept Covid vaccines in order to keep their jobs, attend college, visit restaurants, etc. That is a form of coercion that deserves a strong prohibition in Alaska.

The Covid vaccines are still in trial under FDA Emergency Use Authorization while their safety and effectiveness are being evaluated. The US Vaccine Adverse Event Reporting System, the best vaccine safety data gathering system in the world, has recorded over 20,000 deaths associated with the Covid vaccines, compared to an average of just 155 deaths each year from normal vaccines in the preceding 10 years. Millions of Americans are paying attention and declining to participate in these Covid vaccine trials.

Declining to be Covid-vaccinated is a safe and responsible position. Effective and safe treatments are available to prevent hospitalization and death from Covid. Well informed Alaskans can make the choice.

Alaska needs clear statutory protection of the right to informed consent, and the right to decline these potentially harmful Covid vaccines.

Thank you for considering my comments,

Rolan Ruoss

PO Box [REDACTED]

From: Kendal Pike Sent: Thursday, February 3, 2022 5:21 PM Subject: SB 156

To: Sen. Mike Shower <sen.mike.shower@akleg.gov>; Sen. Mia Costello <Sen.Mia.Costello@akleg.gov>; Sen. Roger Holland <Senator.Roger.Holland@akleg.gov>; Sen. Scott Kawasaki <Sen.Scott.Kawasaki@akleg.gov>; Michael Kruse <mike.t.kruse@gmail.com>

Senators,

I am a healthcare provider in Palmer and mother of 3 that is very concerned about the lack of privacy and freedom of choice we see in our State. While I worked through the entire pandemic without question, I was fired after 7 years over not being vaccinated. The hospital I started working at recently has harassed me about my religious beliefs and aggressively denied and requested additional documentation as well as requesting that I sign a document stating "I acknowledge that being unvaccinated can have life threatening consequences for my family, community, patients and coworkers". As these particular vaccines are NOT sterilizing and vaccinated individuals spread the virus equally, and some studies show more than, the unvaccinated it is imperative that we protect individual rights to choose what is best for their body and family.

See these studies for more information:

<https://www.medrxiv.org/content/10.1101/2021.11.12.21265796v1>

[https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

<https://www.medrxiv.org/content/10.1101/2021.07.28.21261295v1>

<https://pubmed.ncbi.nlm.nih.gov/34351882/>

As transmission is proven in both cases of vaccinated and unvaccinated individuals, forced participation in and proof of this medical intervention is not only pointless but intentionally cruel. I fully support SB 156 and encourage you to parcel out conditions of discrimination by private business where legal.

I am a personal testimony to being harrassed based on my long held religious beliefs and denied exemptions arbitrarily. Businesses are not honoring the exemptions outlined by federal law nor are they accountable for the adverse events following coerced vaccination. Medical interventions should not preclude you from any part of society nor be public information to be abused. Hold the businesses accountable for any adverse events following vaccination to include any known events that could potentially occur as a result of vaccination including but not limited to blood clots, blood disorders, myocarditis, pericarditis, GBS, stroke, neurological problems, etc. In this way the individual who was forced to get the vaccine to be able to provide for their family, now has recourse against the business.

The business will be much less likely to force a product on employees and violate their ADA and civil rights exemptions if they will be on the hook for disability, hospital bills and civil litigation.

I thank you all for your time. I will be following this closely and would gladly welcome any discussion.

Warmly,

Kendal Kruse

To: Sen. Mike Shower Sen. Scott Kawasaki Sen. Mia Costello Sen. Roger Holland

Subject: SB 156 - STOP mandated vaccinations!!

Senator Mike, Senator Scott, Senator Mia, Senator Roger,

Vaccine mandates are Unconstitutional and violate the Civil Rights of Alaskans!

These shots are NOT effective! the highest COVID case counts are among the vaccinated in countries with the highest vaccination rates, and have skyrocketed astronomically since the "vaccine" rollout!

<https://www.redvoicemedia.com/video/2022/02/covid-cases-never-really-told-us-much-but-this-brilliant-summary-shows-where-we-are-today/>

These shots are NOT "safe"!

All the health organizations around the world are reporting alarming rates of injury and death due to the "vaxx"! Our own VAERS system (which only documents 1% of true adverse events) indicates huge numbers of vaccine injury and death!

<https://tv.gab.com/channel/redvoicemedia/view/dr-mccullough-were-seeing-vaccine-injury-61f84c5462d414218dd7aff8>

The Emergency Use Authorization (EUA) for these shots should be immediately revoked, God forbid they must NEVER be MANDATED!!!

These are CRIMES AGAINST HUMANITY!!

The pharmaceutical companies are amassing unfathomable wealth from the misery they are inflicting on the Public!

Do NOT cave into the special interests!

Only those complicit in these crimes, or the cowardly, participate in these HUMAN RIGHTS VIOLATIONS!!

Think Nuremberg Code.

Then think NUREMBERG TRIALS.

Protect Alaskans from this criminal conspiracy!

Subject: Re: Senate Bill 156

Hello Senator Mike Shower,

I am writing to urge you to support Senate Bill 156, especially for the following readings:

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

I personally have a pre-existing autoimmune disease that flares and becomes extremely aggravated by any kind of vaccines. I take it upon myself to be responsible and avoid large gatherings during flu/sickness seasons and rely on many homeopathic remedies to aid my immune system; I do these by choice and of course because I cannot tolerate vaccines. I feel that preserving this ability to choose what is best for me is important and no mandate should threaten this freedom to choose.

Thanks so much for taking the time to hear my concerns and I sincerely hope you take Alaskans like myself in consideration when it comes to Senate Bill 156.

Sincerely,

Rochelle King (Kenai Peninsula resident)

**To:** Sen. Lora Reinbold; Senate Community and Regional Affairs; Senate Judiciary; Sen. Peter Micciche; Sen. Shelley Hughes  
**Subject:** SB144

Senators and Committee Members,

I'm writing this evening to express my thoughts as a determined and informed Alaskan voter who was struck down in my prime with long-term disability and has experienced discrimination and violation of my Constitutionally-protected human rights, particularly over the past two years of abuse related to COVID-19. I decry discrimination and support Constitutionally-protected human rights including rights to medical privacy and independence; the right to free and open debate; the right to unfettered access to robust scientific data and methods; the right to freedom from coercion; the right to defend oneself, one's property, and others; the right to peaceably assemble; the right to bear arms; and right to free speech; and others. To this end, I support SB144 "an act relating to disaster emergencies".

However, the bill must go farther and impose specific minimum personal fines/compensation to affected/injured parties and minimum personal penalties for each offense.

Government exists in service to the community that empowers it, to preserve our Constitutionally-protected human rights and there must be accountability. In addition, our public appointed and elected officials must be held to a higher standard of integrity and transparency.

I'm reaching out to ask you to consider this matter carefully before you have an opportunity to discuss this bill with fellow lawmakers or cast a committee or Floor vote. Please make this a priority to pass this session.

Heather O'Claray

I support SB 156.

Shawn Aspelund,

SUPPORT SB 156

Mike Mitchell  
To Senate State Affairs

Senate Affairs,

I urge you to SUPPORT SB 156, which would make vaccine mandates and so-called "immunity passports" unlawful in Alaska.

If anyone wishes to get vaccinated, they should have that choice. But to demand that everyone become vaccinated in order to hold employment, buy food at the store, travel, or do any other activity required for life and survival is beyond reckless -- it is what totalitarian dictatorships do.

Hitler's government performed medical experiments on people against their will. These mandates are not that far from Hitler's work. Basically, the Federal government has been telling people that if they did not comply and get something injected into their bodies that they did not feel comfortable having done, then -- as far as the dictators in government are concerned -- that person can just go away and lose their home, and can go starve to death! That's the ultimate end for those being forced out of employment.

This bill needs to be supported so that Alaska sends a clear message that vaccine mandates and "immunity passports" go against everything Alaskans stand for, many of whom moved here to get away from the heavy hand government trying to control everything about our lives.

Mike Mitchell  
Fairbanks, AK 99707

Hello senate affairs committee,

I am writing in support of an 156,  
Due to knowing people personally who have died or have been injured from the vaccine amongst other concerns of people losing their employment over getting a vaccine. Please allow Alaskans and people visiting Alaska keep our freedom to choose what we want or don't want to have put in to our bodies.  
Not to mention if Alaska decided to force the vaccines on individuals both resident and non resident it would do so much damage in every field health care education tourism.  
Thank You for your time and consideration please pass sb 156.

To whom it may concern,

I write to urge you to support SB 156 and protect the rights of the people of Alaska. Vaccinations should not be enforced, nor should people be shamed, lose their job or be pushed out of school over declining to be injected. It is unlawful and goes against the freedom that the American people have fought for. Being part of the essential workforce that continued to serve the community during the "pandemic", it is completely out of line to now turn around and push to enforce a vaccination that we all survive without. It is our right to make an educated decision of how to protect ourselves.

Thank you for your time,

From: kathy.truenorth <[kathy.truenorth@alaska.gov](mailto:kathy.truenorth@alaska.gov)>

Sent: Tuesday, February 8, 2022 3:44 PM

To: Sen. Mike Shower <[sen.mike.shower@alleg.gov](mailto:sen.mike.shower@alleg.gov)>

Subject: Support SB 156

Dear Senator Showers,

Alaskans have the right to weigh the benefits and risks of medication and medical treatment options including the right to decide what is injected into their body.

Proof or justification to any entity via exemptions for the Covid vaccines violates an individual's privacy and compromises their freedom.

Thank you for supporting this bill and the freedoms of the Alaskans you serve.

Sincerely,

Katherine Harris

Subject: SB 156

Dear Senator Shower,

Please, vote in support of, YES, on SB 156!

I was fired from my job as a nurse due to the mandate that I receive a covid vaccine. Even now, the available vaccines in our county are EXPERIMENTAL. As such, they should be required of no one.

I loved my job as a nurse. I have since found employment elsewhere, where objections to receiving the vaccine are granted. But really, I was fired! For not receiving an experimental vaccine.

No one should lose a job, be kicked out of school, or denied access to public places for declining to accept a vaccine -- especially an EXPERIMENTAL one that has been so sadly politicized.

Please help restore medical freedom to this great state by voting YES on SB 156.

Thank you and may God bless you for all you do.  
Mary Kemper

### Vaccine discrimination

 Melissa Coppin  
To Senate State Affairs <[redacted]>

I strongly oppose any move to make vaccination mandatory or to discriminate against any person based on their vaccination status. To abuse and mistreat people in the name of "protecting" them is mockery and inhumane. I support SB 156 and strongly plead that you act on behalf of those who are truly experiencing discrimination.

Melissa Coppin

Alaska Senate Affairs Committee,  
I would like to state my support of SB 156 and likewise urge senate support of this bill that would protect medical freedom in Alaska. No one should have their livelihood threatened or be denied access to school or services simply for declining a medical intervention. Alaskans have a right to weigh the risks and benefits of vaccination, and make a free and informed choice without coercion. Many Alaskans have valid reasons, based on unique health history, previous infection and recovery from covid, or religious beliefs (for example) to decline vaccination. Removing freedom of choice only inspires division and dissension in our state and local communities. I urge you to support the side of freedom, peace, and unity for all Alaskans.

Sincerely,  
Heaven Brock

I'm writing in support of SB 156.

I live in Sitka, where some have begun to develop a medically discriminatory, informal vaccine passport system where certain non-profits and businesses are refusing entry to residents without proof of vaccination; those I'm aware of include the Sitka Fine Arts Camp, which my children enjoyed for several years but are now unable to attend, and Ludwig's Bistro, a higher-end restaurant. SFAC also presents various plays to the community throughout the year, with many community members now barred from attendance because of their Covid vaccination status. These groups have done this despite existing local, state and federal medical anti-discrimination laws. As far as I know these and other entities have not yet been challenged legally.

That I even have to write this email — that you even have to take up the passage of this bill — is astonishing to me. No one should be required to receive ANY substance into his/her body without informed consent and the right to say no without discrimination — ever. We are not cogs in a civic gear — we are individuals who will make the decision on whether to be vaccinated in consult with our families and medical provider(s). And when you consider the growing body of yet-to-be-publically-acknowledged evidence that these yet-EUA vaccines not only are ineffective, but actually harmful to so many, this should be a non-issue. But here we are.

I want to say thank you to the sponsor(s) of this bill, and that you have my family's support in Sitka as to its passing.

I appreciate all of your work,

Amy Bethune

Tue 2/8/2022 3:43 PM

I am testifying in support of SB 156. The practice of discriminating based on vaccine status, especially for a virus for which the vaccines we have available DO NOT STOP, is absolutely asinine.

This issue has affected my family personally, as my oldest son is awaiting separation from the military due to his refusal to be vaccinated. His dream was to serve his country, and after one short year, his dream is being crushed over a vaccine that has done nothing to preserve the readiness of our military. In fact, when he got COVID last month, so did half of his ship. (Note: EVERY other shipmate was vaccinated.) And they all quarantined and they all recovered and got back to work. My son is the only member of his ship who has refused the vaccine, and is the only one onboard required to mask at all times. Even while underway for extended periods. Even though he just recovered from COVID and has antibodies. He is being unjustly punished for his non-compliance, not because his vaccination status has made him more of a threat than his vaccinated shipmates. I recognize that this specific example is not Alaska specific, although he is an Alaska resident.

It should be obvious to everyone, knowing what we know now, that any attempt to make vaccination a requirement for participation in ANY activity in an effort to eliminate or even lessen the spread of this disease is the very definition of a fool's errand. Vaccination does not stop infection, it does not stop hospitalization, it does not stop death. The only thing vaccine passports achieve is rewarding the compliant and punishing the non-compliant. There is simply no demonstrable health and safety benefit.

Thank you,  
Amanda Spratt

Hello fellows,

I want to share this, please please DO not let them mandate us. We all have the freedom of choice. A lot of medical people cannot have anymore on top of risk injury. Also there are a lot of people who have allergies that are in the vaccine and cannot have it. Leave that to CHOICE of ITD the people. If you do not let people have a choice of their own bodies, people will rise, people will fight back. We don't need problems in this Alaska state. We are doing well. So please support SB156 and support the construction of the United States for the people even ALASKANS!! They have violated the hippa rights, ada rights. We want it back. our private lives ...

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

Respectfully,  
Jeorghette Wales  
Juneau Resident

SB-156

 markdundore < >  
To  Senate State Affairs

Hello,

I would like to communicate my public support for HB156.

Please consider that coercion has no place in civilized society- whether bullying in schools, arm-twisting in politics, or punitive retaliation against businesses and individuals. Although it is common place, it is inexcusable and should not be condoned or continued.

The status quo encourages wholesale discrimination in the arenas social, economic, government, arts, and medical care.

This discrimination lies in the face of federal and state constitutional protections.

I implore you to support freedom of medical choice and supporting the constitutionally protected rights - support SB 156

Thank you,  
Mark (Aiyávk' Laliñi) Dundore

As a registered voter, resident of Alaska, a law abiding citizen of the United States, and God-fearing person, I respectfully ask each member of this committee to support Senate Bill 156.

Discrimination based on COVID-19 vaccination status or COVID-19 immunity passport status should not be allowed to take place in our state or country. To deprive people of goods, services or their ability to earn a living because they choose not to take a shot goes against the very spirit of the American Dream, the United States Constitution, the Alaska State constitution and Judeo-Christian principles. In my opinion, forceable compliance of vaccination, or any medical intervention, is pure evil. It mirrors a control mechanism of tyranny for nefarious purposes and should never be tolerated or accepted.

Please do the right thing in this matter and put an end to this wicked push for COVID-19 vaccination compliance. People are watching and the large majority of people believe medical decisions are the choice of the individual, even those who have chosen to take the shots. You would do very well to support SB 156.

Sincerely,

Anna Fisher

Dear Senator,

COVID-19 mandates violate our constitutional rights. Alaskans should not have to be forced to take an experimental medication, which has failed to prevent Covid infection and transmission. I'm a Registered Nurse, who worked through the pandemic, now healthcare workers are forced to choose between our health or our jobs. Our choice should be respected. Alaska should follow the examples of other states and prohibit vaccination mandates in state law now!

Thank you,

Dayle Kodama

## In support of SB156

Mindi Shoemaker  
To Senate State Affairs

Hello,

I am emailing in support of SB 156. I strongly oppose forced vaccinations of any kind, but especially the Covid 19 vaccine. No one should be forced to get this shot in order to work, go to school, travel, attend public events, get medical care, or anything else. Where there is risk there must be choice. I personally know people who have been injured from the COVID shot. Pharmaceutical companies aren't even being held liable for injuries that these shots are causing.

My family and I have all already had and recovered from COVID. We do not need, consent, or agree to any experimental treatments.

It is discrimination, unlawful, and unconstitutional to force this on anyone.

Please consider this my official support for this Bill.

Sincerely,  
Mindi Shoemaker

## Support for Senate Bill 156. Please protect our freedom!

Jeremy Twaddle <  
To Senate State Affairs

I and MANY others in Sitka are in support of Senate Bill 156. Please protect our medical freedom! There are countless people I have spoken with that are to afraid to speak out for fear or being punished or fired.

This is not ok. No one should have to live in fear of Mandates.

Thank you all, Jeremy Twaddle

Subject: No Mandates in My State

I want you to know you have my family's support. We can agree about the non-sensical absurdity that has been the 2 year disaster of the Covid-response. It certainly has made it clear that we need to keep a better eye on the leaders in industry and government. That said let me say something else, one move towards tyranny will light a real fire, so let's be sure to stamp out the sparks now, lest we all suffer the conflagration later. My wife was fired for refusing the job, the feckless native corp. she worked for would not consider her official religious exemption, wouldn't hear her medical concerns (she suffers from an autoimmune disease), nor offer a reassignment, all of this only weeks after a glowing department assessment. In fact when it was established that she would not be bribed or bullied (and believe me, they tried) into compliance she was treated as a pariah. If the issue were sexual orientation, gender dysphoria, or race the company's behavior would without doubt be litigable. Please be stalwart and brook no nonsense from the Vax-zealots; they don't need to be convinced, they need to be beaten. The evidence will be manifest in time. Thank you, Stefan Sanders

Hello,

I am emailing you to show my support for SB 156. I strongly oppose forced vaccinations of any kind, but especially the Covid 19 vaccine.

It is ridiculous that Health Care professionals are telling their patients that this Covid vaccine is safe when CDC's Vaccine Adverse Event reporting system shows thousands of deaths and over a 100,000 adverse events from these Covid Vaccines. Children are being forced by their parents to get this vaccine because of the pressure to do so. And there are many children getting myocarditis afterwards.

Pfizer asked the Supreme Court for 65 years for the required safety report and was turned down. Forced vaccination goes against our constitutional rights.

There is a lot of harm being done with false reporting with numbers and deceit when there is no Informed Consent. You can't say that these vaccines are safe when people are either dying or acquiring adverse events from these shots. There is also deceit when the hospitals are not counting people as fully vaccinated until 14 days after both Covid shots.

No one should be forced to get this shot in order to work, go to school, attend public events, get medical care or surgeries, or anything else. This should be a choice! It is discrimination, unlawful, and unconstitutional to force this on anyone. Please consider this my official support for this Bill.

Sincerely,

Sherice Cole

To: Patty Heyes <[REDACTED]>  
Subject: support SB156

Please support SB156 and allow us to make our own decisions about Covid-19 vaccines. Please protect medical freedom in Alaska.

COVID-19 vaccine mandates violate the rights of Alaskans. There are many reasons for declining a vaccination, including: personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market COVID vaccines. No Alaskan should be coerced when it comes to their health and the health of their children. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine. There is already an ongoing shortage of healthcare and other workers due to these mandates. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications

I OPPOSE forcing someone to accept a COVID-19 vaccination out of fear that they will no longer be able to work, travel, go to school, or enjoy other cherished American freedoms if they say NO or decide to wait.

Thank you,

Hello, to whom it may concern, I am writing to urge you to please support SB 156 today. And please stand up for medical freedom in Alaska. Please realize, that as FREE Americans, we all have the right and privilege to choose what kind of medical service we want and how we as individuals want to protect ourselves from illness. Vaccine mandates and business that bar customer service will divide us all and create separate social classes. It is completely unnecessary in regards to protection against spreading Covid 19 as it is widespread knowledge and supported by science that the vaccines serve no real protection against spreading or stopping the virus.

Many, many people have valid reasons for declining a "vaccination" (we cannot even technically call it that as it has not passed the requirements of what a vaccine is). Many people have health conditions, are pregnant, trying to conceive, already have immunity and have objections to the unethical methods used to develop certain Covid vaccines.

WE HAVE A RIGHT TO DECIDE AND NOT BE FORCED INTO A DECISION.

Ask yourselves what this would do to our communities and state if these mandates were passed? Imagine all the division, hatred, discrimination and loss of revenue it would cause, not to mention more people suffering the devastating consequences that the medical field is now predicting and starting to see in health.

STAND UP FOR YOUR STATE TODAY. Be filled with boldness and courage and do what is right. Do not be ruled by fear. FIGHT FOR THOSE WHO ARE EXPECTING YOU TO UPHOLD FREEDOM.

Thank you, Adena Compton

Subject: Support and Protect Medical Freedom

Dear Senators,

There is absolutely no reason for the vaccination mandates and propaganda since COVID-10 injections do not stop transmission and do not stop infection. And yet people have lost their jobs, have been kicked out of school, have been denied access to public places for declining this medical intervention.

End all vaccine mandates, and support legislation that will protect me and my fellow Alaskans from vaccine mandate and vaccine passports!

Respectfully,  
Isaac McCann  
Juneau, AK 99801

SB 156

Rebecca Doran <[redacted]>  
Te Senate State Affairs

I am in full support of bill 156.

No person should be forced any object into their body. Nobody should be losing jobs, being denied travel or normal living over what they chose. Everyone has their valid reasons for denying the covid vaccine, and should not even be questioned! We are fighting for our bodily rights.  
Please pass SB 156  
Sincerely, Rebecca Doran

Senate Bill 156

Committee Members,

My name is Amanda Gates. I have been an Alaskan for 30 years. My family and I love this state and all that it stands for.

With that said, I urge you to please support Senate Bill 156! Without your support, our state of hard working, innovative and entrepreneurial individuals will decay. We will become a state of divided personalities that no longer help their neighbors and instead will label by vaxxed and unvaxxed.

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Please take the points into consideration while making your choice. Our state depends on it!

Sincerely,

Amanda Gates

First, what's the point of the "jab" and all the boosters if you can still get Covid????

I am in support of managing my own healthcare. I don't want the state, the federal government, or even my doctor telling me I have to get a mandated vaccine. MY BODY MY CHOICE!

Many people have valid reasons for declining vaccination, including personal health conditions, cancer, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Covid is highly treatable. The promotion of an experimental vaccine is inextricably linked to the suppression of treatment or any hope of prevention. With the refusals of hospitals and doctors to provide lifesaving treatment in the early stages of Covid people need to be prepared to protect their own life and the lives of others. But, NOT BY THE EXPERIMENTAL VACCINE!

Mandating an experimental gene therapy, called a vaccine, is WRONG! No one should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention that has been shown to have serious side effects or even death. Government and business who are forcing employees to take the "jab" should be required to pay for any and all adverse reactions for that employee and be responsible for the healthcare of that individual for the rest of their life. After all that individual will have to live with any condition that is caused by the "vaccine." And in some cases the side effects may not show up for years. But regardless anyone who took the "vaccine" because it is mandated must receive medical coverage from the employer for life!

All Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination/gene therapy, just like other medical interventions, and make a free and informed choice, without coercion.

I hope you will support SB 156.

Please consider supporting [Senate Bill 156](#). Every Alaskan should have the choice as to whether the Covid Vaccine is appropriate for them or their children to receive.

This issue is not a one sizes fits all. Alaskans with their knowledge and advice from their providers can make the best decision for medical interventions, not the government. Some may feel that it is in their best interest to minimize the risks of contraction the virus by taking extreme measures that they themselves impose. Some decide to take the covid vaccine. While others decide their risks factors do not warrant minimizing their activities or taking a vaccine, but rather live their lives to the fullest.

However, in ND circumstances should any Alaskan or American Citizen be fired from their job, denied an in person education, or feel segregated because of the lack of a COVID-19 shot.

Let's not even get into the fact that the vaccine is still in experimental stages, that is not something I am willing to risk for my children. When the risks for children are so low for those contracting the actual virus. The long term complications from the vaccine are unknown.

Also remember herd immunity is science. It is unfortunate that many have lost their lives due to Covid, including those I know.

Every American has a freedom to decide what is best for them.

I hope I can count on your support for SB 156. Our future generation depends on it.

Mon 2/7/2022 9:11 PM

Dear Senate State Affairs Committee members,

I am urging you to support Senate Bill 156. It is my understanding that, in part, this bill would make so called "immunity passports" and "vaccine passports" unlawful. This should pass easily. To discriminate against anyone based on their vaccine status is DISCRIMINATION. It's the same thing as discriminating against someone because of their race, color, religion, age, etc.

We know a lot more now than even a year ago. It is obvious that these Covid shots do not stop transmission or infection. The only ones possibly benefiting are the individuals getting the injections. This should be allowed as a choice individuals make. It should not be from coercion. Many Alaskans have been unfairly forced to take an injection they didn't want to keep their job. Other Alaskans have lost their jobs because they wouldn't submit to the ultimatum. This is wrong and has to stop.

Please vote in favor of S.B. 156.

Sincerely,

Mark Slama

Subject: HB156

I would like to offer my testimony on HB 156. I wholeheartedly support HB 156 for the State of Alaska.

Without getting into my personal health information - I believe in choices for all Alaskans. In truth - all Americans should have the right to make the choice to decide to roll up their sleeve or not. To force everyone into the same situation will put many people at serious risk-as it would me. Reactions are real, some are mild, some are serious and some are deadly. Let people make that choice-most people know their bodies, their health, their reactions to certain situations better than a nurse at Fred Meyers.

A few years back the cry across the nation was "our body, our choice". I demand that we are allowed the same right.

This ends my testimony.

Kerri Mullis  
Rural Deliana

Senate state affairs committee,

I am emailing in support of Senate Bill 156, please ensure this bill continues on tomorrow. I am an Alaskan resident who lives in Houston. I support this bill because vaccination for Covid-19 should not become something that the state forces people to do, there are myriad reasons why someone may not want to get out be unable to get the vaccination. Thes reasons include personal health conditions, pre-existing immunity from covid-19, religious reasons and conscientious objections. A medical intervention should not have the power to change someone's ability to go to school, go to work or participate in their community here in the great state of Alaska. Above all, Alaskans should have their choice about vaccinations, not be told what they have to do by someone else. This is why I support Senate Bill 156, please pass this bill on and ensure it becomes Alaskan law.

Thank you,  
Arianna Mattia

## SB 156 Testimony from Kaydee Scarola

[Reply](#) [Reply All](#) [Forward](#) [...](#)

Tue 2/8/2022 7:14 PM

Hello,

I was on the public testimony phone call today, and my name was called at about 5:15pm, and my phone taken off mute, but for some reason Sen Reinhold spoke for a second and then called on the next person.

Maybe it's a good thing, because I was going to make a lame joke and momentarily claim I was opposed to SB156! I was heartened to not hear a single person who was opposed to this bill. There is hope that the discrimination we, as medical freedom advocates, have endured will end. I FULLY SUPPORT SB156, as well as "more teeth" in the bill to retroactively hold accountable those sheep who enjoy a power trip in turning you away from medical treatment, businesses, etc, for not vaccinating. I was denied treatment from Rande Lucas, [LAC](#), for not having taken the jab. I would also support metaphorical FANIGS that extend into unconstitutional mask mandates, too.

I am a stay at home mom to three kids and small business owner. I have lived in Beluga for 15 years and have recently begun to build in, and move to Glacier View, AK with my husband. I have only worn a mask two times in this entire pandemic (yes, very inconvenient!) both times in the ER with my son after he experienced a seizure. I voiced my dissent that they required a mask on him when just minutes before, rolling into the ER, he had been needing oxygen! Masking was the only way I could stay at my son's side in a terrifying ordeal. I know others who have experienced much worse, like my cousin unable to visit his mom when she was in Providence, near death, all alone.

My son's seizures started after a routine well child visit at 18 months old where vaccines were administered. His early vaccine injury that continues to this day is what woke our family up; therefore, none of us have received the experimental genetic modification technology being sold as a "vaccine." Seeing a friend of a friend become paralyzed after the shot further seals the fact that we will not comply and we will never take the injection. I will not bend a knee to medical rape.

With the safety of this current injection clearly on display as a horror film set within a circus, we actually have a responsibility to halt the vaccine program. Why it continues skips "flumoxing" and falls squarely into the horrific realm of "Agenda 21 and New World Order."

I do not even need to speak to the efficacy, either; we all know the jabbed still get Covid, and still transmit Covid...so...Therefore, what is the point of the shot? What, therefore, is the point of mandating it and requiring a passport, other than repeating Nazi Germany and creating billions of profit for big pharma?

There is a quote attributed to Dr Benjamin Rush, a signer of the Declaration of Independence. "UNLESS WE PUT MEDICAL FREEDOM INTO THE CONSTITUTION, THE TIME WILL COME WHEN MEDICINE WILL ORGANIZE INTO AN UNDERGROUND DICTATORSHIP... TO RESTRICT THE ART OF HEALING TO ONE CLASS OF MEN AND DENY EQUAL PRIVILEGES TO OTHERS WILL CONSTITUTE THE BASTILLE OF MEDICAL SCIENCE... ALL SUCH LAWS ARE UNAMERICAN AND DESPOTIC AND HAVE NO PLACE IN A REPUBLIC... THE CONSTITUTION OF THIS REPUBLIC SHOULD MAKE SPECIAL PRIVILEGE FOR MEDICAL FREEDOM AS WELL AS RELIGIOUS FREEDOM."

Let reason, logic, courage, sanity, and True North leadership prevail to guide our great State of Alaska and this Legislature to being on the right side of history!

Thank you,

Kaydee Caraway Scarola

Hello all,

I support SB156 to eliminate covid-19 shot mandates. The bill should also include mask mandates as well. New data coming out show masks don't work and covid shots are not a "one size fits all". I think its time to protect the citizens of Alaska and pass SB156.

Thank you for your time

Subject: SN 156

Dear Committee Members,

My name is Nickole Stalnaker, I and my husband like so many people are immune compromised. Against our better judgment took both Pfizer vaccines. We were against any and all of the vaccines because we didn't believe they were studied enough to be safe.

What we heard of the way they were developed by using "Live aborted fetal tissue" and exactly how they extract the tissue from aborted live babies goes against everything we believe in.

These two issues are huge problems for us. "Trust" is another. Are we supposed to follow blindly the directions of those who wish to dictate policies simply because they had been voted into office? Senator Murkowski was not voted into office by the people, she took over the position because of her late Father.

We don't believe that Government should impose such Draconian Measures onto the people of Alaska nor in a free society.

Covid 19 and the lesser variants are becoming non lethal and the vaccines are not effective in protecting those who had the vaccine nor in stopping the spread of the variants

Please vote in favor of SN 156 for the freedom of all in this GREAT STATE!

To: [Senate.State.Affairs@allego.gov](mailto:Senate.State.Affairs@allego.gov)  
Subject: SB 156

To whom it may concern:

I urge you to please support SB 156. The mandates have nothing to do with "what's good for the people." It's much deeper than that. All of these mandates destroy freedom. We people have God-given rights the government has no business interfering with. These mandates take away our right to make our own medical decisions for ourselves and our families. They take away our right to speak our views freely, with no retribution. They take away our right to worship as we choose. They take away our right to gather publicly. And they take away our right to have a job or run a business to support our families.

It has come to that point where the government controls the people. Somewhere along the way, this has become the goal of many in government. We need to stop this before we are no different than any other country and no longer a light to others.

So, again, I urge our leaders in Alaska to support SB 156 and make the right and courageous choice for Alaskans, in the face of big government.

Thank you for your time.

Dear Senators and members of the Alaska Legislature.

I have just sent this email letter to Governor Dunleavy, and please consider it as if I wrote it to all of you also, and please share with other members of the legislature.

Byron Whitesides Byron Whitesides <[REDACTED]>

---

2/8/2022

Dear Governor Dunleavy,

I am writing this to plead for help and relief from the unconstitutional covid vaccine mandates being forced on members of my family working for the Ketchikan Indian Community clinic in Ketchikan. They are now being coerced or forced into getting the still experimental covid 19 vaccine, if they want to keep their jobs or seats on boards related to the KIC Health Clinic, by the CMS mandate issued by the Biden administration.

My family members have applied for religious and medical exemptions, but word is being spread now that the tribal "council" is not going to allow ANY exemptions of any kind, just issue a get vaxxed or lose your job ruling. I find this highly problematic that the "council" of a sovereign nation is forcing members of this sovereign nation to submit their sovereignty to the CMS service, a branch of a foreign nation to the tribes of Alaska, because the CMS has threatened the funding of the health clinic in Ketchikan if KIC does not comply with the unconstitutional mandate.

At this point may I remind you that MANDATES are not LAWS, have not been legislated by congress, and that this vaccine is EXPERIMENTAL with no long term effects, and the government as well as the vaccine manufacturers, have been caught hiding pertinent information on the adverse effects of these vaccines, as well as not giving information on what is in these "vaccines" as well as updated and full information on the adverse effects that are needed for full informed consent!

( Attorney Tom Renz speaks at the panel discussion moderated by Senator Ron Johnson on data released by whistleblowers in the department of defense on covid-19 vaccine adverse reactions and deaths. Discussion of a 300% increase seen in cancer follows Tom's brief report to the panel.

This clip was taken from the following panel discussion January 24th, 2022. COVID-19: A Second Opinion. A group of world renowned doctors and medical experts provide a different perspective on the global pandemic response, the current state of knowledge of early and hospital treatment, vaccine efficacy and safety, what went right, what went wrong, what should be done now, and what needs to be addressed long term <https://rumble.com/search/video?q=Tom%20Renz> )

The video above is 9 minutes long, you should watch it as the attorney exposes that the Dept. of Defense has been "doctoring" and hiding data on the adverse effects of the vaccine, and that these effects are so significant many of the doctors on this panel thought this experiment should be stopped because of the HARM they are causing!

Every day there is more and more information on this experimental injection, which was called a vaccine. We were told it would give immunity, stop the spread, and keep those receiving it from getting hospitalized or lessen the effects, AND IT HAS BEEN SHOWN TO ACHIEVE NONE OF THESE! I have been

told the covid infection rate at KIC is 81% vaxxed! This vaccine is an abject FAILURE as a vaccine and is causing irreparable harm, young people in the prime of life now dropping dead from heart problems, young athletes dropping dead on the playing field, so many people with devastating neurological problems so bad they need assisted care to live, cannot work, and have had their lives DESTROYED by this injection! This injection is being shown to destroy the immune systems of many with these adverse effects, and it is not a vaccine, it is GENE THERAPY, and is permanently altering the DNA of those getting this injection, it is a total experiment and continuing to FORCE it on others is INSANE and a violation of our human rights!

NOBODY should be fired from their jobs or prevented from participating in our society and commerce for declining to accept ANY vaccine or medical procedure, not to mention one so ineffective that now 80% of the covid cases are fully or partially vaxxed!

ALL REQUEST FOR EXEMPTIONS SHOULD BE ALLOWED....AND ACCOMADATED!

Alaskans, and all HUMAN BEINGS have the RIGHT to evaluate the benefits versus the RISKS of all medical procedures, and make INFORMED decisions, based on facts and the evidence (that is presently being withheld from us) and FREELY consent or decline without being illegally coerced, intimidated, or bullied. Threats of losing your job and income, healthcare, and the ability to financially take care of your family IS NOT INFORMED AND FREE CONSENT! NO one should be prevented from going to school or college because they declined this experimental medical procedure!

THOSE WHO DECLINE THIS INJECTION HAVE VALID CONCERNS!

Many who are religious have conscientious objections to the unethical methods used to develop these injections! Many have LEGITIMATE concerns that these vaccines will harm their health, as is being shown in the highest amount of adverse effects reported, more than all other vaccines in history COMBINED! Many have already had this disease and HAVE NATURAL IMMUNITY, which HAS BEEN SHOWN IN STUDIES TO BE SUPERIOR to the short lived positive results of this injection. AND MANY MORE DON'T WANT TO PARTICPATE IN AND EXPERIMENTAL INJECTION THAT ALTERS THEIR DNA GENOME, AND WHICH NO ANIMAL STUDIES OR LONG TERM STUDIES HAVE BEEN DONE!

THESE ARE ALL LEGITIMATE REASON FOR DECLINING THIS INJECTION!

I am now asking you to do all in your power to stop these illegal and unconstitutional mandates, they are a violation of the Nuremburg code, our laws on INFORMED CONSENT, and OUR HUMAN RIGHTS!

PLEASE USE YOUR EXECUTIVE AUTHORITY TO INTERCEED AND STOP THIS ... NOW!

And PLEASE fully support and push SENATE BILL 156, which would make vaccine mandates and passports ILLEGAL in Alaska, as it should be! I urge you to try to get this legislation passed and signed as fast as possible and to use your executive action to temporary halt these mandates , while this legislation is pending!

I am also sending this letter CC'd to the Senate State Affairs Committee and it's members and urging them to please share this letter with the entire legislature.

Now about myself. I am a 73 year resident of Alaska, born and raised, of mixed heritage of European and Native American. I have a large family of mixed heritage of European/Native American/ Alaska Native/Hispanic/black, and my children, and many cousins here, are members of the Ketchikan Indian Community and Alaska native, so I do have a dog in this fight and many concerns about my fellow Americans of not only the adverse PHYSICAL effects of this injection, but also EXTREME CONCERNS on allowing our federal government to FORCE medical procedures on the SOVEREIGN citizens of Alaska and the other states and territories! Are we citizens who "own the government" which requires CONSENT OF THE GOVERNED, or are we a FEDERAL GOVERNMENT WHO OWNS "IT'S SUBJECTS" AND CAN IMPOSE MEDICAL PROCEDURES ON THEM? AND WHERE DOES THIS STOP? IF THEY CAN IMPOSE THIS, CAN THEY THEN IMPOSE OTHER PROCEDURES, UP TO AND INCLUDING THE ORGANS OF IT'S SUBJECTS AS CHINA DOES NOW?

Please stop this insanity of mandates NOW, FREEDOM IS THE...RIGHT....TO CHOICE.

MANDATES ARE DICTATES AND THE OPPOSITE OF FREEDOM,

WHERE ARE YOU GOING TO STAND?? FOR FREEDOM OR A DICTATORSHIP?

Sincerely,

Byron Whitesides

Ketchikan, Alaska

PS: IT'S PAST TIME TO STAND UP FOR ALASKA AND OUR PEOPLE AND NULLIFY THESE UNREASONABLE AND UNCONSTITUTIONAL MANDATES BY ASSERTING OUR 10TH AMENDMENT RIGHTS. THE STATES MADE THE FEDERAL GOVERNMENT AND ARE SUPERIOR AND SOVEREIGN TO IT.

sovereign

Definitions

from The American Heritage® Dictionary of the English Language, 5th Edition.

- noun One that exercises supreme, permanent authority, especially in a nation or other governmental unit, as.
- noun A king, queen, or other noble person who serves as chief of state; a ruler or monarch.
- noun A national governing council or committee.
- noun A nation that governs territory outside its borders.
- noun A gold coin formerly used in Great Britain.
- adjective Self-governing; independent.
- adjective Having supreme rank or power.
- adjective Paramount; supreme.

- adjective Of superlative strength or efficacy.
- adjective Unmitigated.

I strongly support the passage of SB156  
and would like my voice heard and counted.

I would also like to encourage support or passage of legislation applying to any and all discrimination including masks. Below is part of the experience I've had under the threat of vaccine discrimination and the ongoing mask discrimination.

As a critical thinking free person I have been discriminated against for almost 2 years now on a daily basis. The government has been enabling and promoting this discrimination and that should end now.

From the beginning the fear and the segregation have been the main message by our local officials and media. The continued mandates and daily reports of case numbers and injection rates perpetuate that fear. Anyone trying to speak reasonably about the risk and negative impacts of masking and business restrictions or unproven injections is labeled as a conspiracy theorist and silenced or cancelled. In Juneau alone we have beautiful, thoughtful, caring and hardworking business owners being threatened with violence, bullied and called racists simply for voicing support for the natural human freedoms recognized by a constitution that is the founding document for one of the most free and successful countries on earth. The USA has historically given hope to many in the world that true freedom is possible. Now that freedom is being scorned and those trying to preserve it, punished and reviled as uncaring and selfish bigots. I hold that the main reason this division and hate is occurring is a result of exactly how Juneau and much the country has handled this trying time. There is no doubt that something devastating and unprecedented is occurring but the debate or science is far from settled on what exactly is happening let alone how to best address it. I, for one, believe that anything going against promoting unity and upholding the freedoms recognized by the constitution is criminal and devastating this town and country.

There's the science, and then there's the shifting message to try and set expectations after the fact. The covid injection, according to many world leaders, scientists and media reports, would indeed stop people from catching covid or being hospitalized. Which led to neighbors being afraid of any one who chose to not take the injection and blame them for rises in cases. We've learned that's not true. Not only is it not true but many that said it would be true now say it was never intended to do that, more lies. From the first weeks of the shots many people were speaking up that it wasn't stopping the spread, they were shunned and cancelled. I work in most of the hospitals in southeast AK and in May of 2021, I was told to hold off on my scheduled work because Covid has been "blowing through the "vaccinated" and it has spread to a great deal of hospital employees despite the shots" and the masks. We have known this for over 1 year and some officials, you still here the ads on the radio from locals here in Juneau, are still saying it prevents the spread so get your shot and we can end this. That is blatantly false.

Most types of masks and cloth masks in particular were shown in 2020 to be ineffective at stopping the spread of covid, but that science was ignored (and the news reports about it disappeared) once again

many very qualified people were speaking up that there are very valid concerns with universal masking and it's benefits are negligible at best. More shunning and discrediting. Instead, the political "experts" thought it was more important to say "We've got to do something!" even if that something did not provide any tangible results. The hypocrisy and the lies do nothing but sow division and hate. People are not dumb, they know when they are being deceived and manipulated and they don't like it.

Qualified, well-researched medical doctors and epidemiologists in this town (Juneau) and around the world were shut down and silenced if they didn't mimic the CDC approved talking points. Which are now crumbling on a daily basis. Still, one of the most important scientific facts that local and national leadership won't discuss is the lack of risk to healthy, able-bodied, children and working age adults. These people are not "filling up" hospitals, and a little self-guided research will expose how misleading the headlines are - no conspiracy theories necessary. Although they do become self-evident once one takes the time to learn the facts and the real science versus authoritarian narratives.

Since the Mask mandates I have been forced to wear them enough that I have developed fairly severe asthma that limits my activities and keeps me up, sometimes panicked and gasping for air, many nights. I am now on daily medication and have to manage all that comes with it. I have never been diagnosed with or prescribed any medication for breathing related illness prior to 2021. My condition technically exempts me from the CBJ mask mandates but because of the fear and daily messaging that people not wearing masks or not jabbed are responsible for all of this suffering, many businesses will not allow me in. Public buildings, which are my places of work included. I want to see Alaska lower all mitigation mandates to recommendations and enact laws to protect medical freedom without risk of retribution for everyone and forever.

Thank you,

Nathan Carey

February 8, 2022

Senator Mike Shower  
Chairman, Senate State Affairs Committee  
State Capitol – Room 429  
Juneau, Alaska 99801

**Re: Support SB 156**

Dear Senator Shower:

Alaska Family Action urges you to support Senate Bill 156: “An Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine.”

We support SB 156 because it would eliminate harmful COVID-19 vaccine mandates and so-called “immunity passports,” regardless of whether these dictates emanate from governmental agencies or from private businesses.

One of the most fundamental principles of medical ethics is that patients must be allowed **free and informed consent** before accepting a medical intervention. We agree with a statement from the National Catholic Bioethics Center (NCBC) that points out how mandates undermine the principle of free and informed consent:

“The best ethical decision-making occurs when individuals have sufficient information for discernment and are able to reflect without undue external pressures placed on them. Mandates, by their very nature, exert pressure that can be severe if employment or the ability to further one’s education are threatened.”

<https://www.ncbcenter.org/ncbc-news/vaccinemandatestatement>

We also agree with the American College of Pediatricians which has stated,

“It is fundamental that the right of individual conscience be preserved. Coerced vaccination would irreparably harm Constitutional rights and the patient-physician relationship.”

<https://acpeds.org/press/joint-statement-on-vaccines-and-conscience-protection>

Many Alaskans have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

**Testimony Re: SB 156**  
**Alaska Family Action**  
**Page 2**

We have heard the concern expressed that SB 156 will interfere with the ability of private businesses to manage their affairs. However, we have numerous laws on the books already that prevent private sector employers from violating the human rights and dignity of their workers.

For example, Alaska has laws restricting the use of child labor, and prohibiting sexual harassment in the workplace. We even have certain areas of commerce that are prohibited completely, e.g., prostitution and illicit drugs. We have these rules because the common good requires it. As a society, we've discerned that some things are more sacred than "making a buck."

Alaska Family Action believes that no Alaskan should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Sincerely,

**Sent:** Friday, February 25, 2022 8:53 AM  
**To:** Madeleine Gaiser  
**Subject:** SB 156 public testimony

My letter To the committee:

Good morning

I hear that you're going to be taking testimony for SB156 on March 1st. Unfortunately I'll be flying that day to Spokane Washington.

I'd like to submit my testimony by email instead.

Please support this bill.

It's critical that we have freedom to choose what to put inside our own bodies because so many people like me and my children and grandchild are very sensitive to shots and in my immediate and extended family, we've had violent reactions to shots including life threatening responses.

Covid shots specifically have been shown to have the highest rate of side effects and death then all the other shots combined.

Another reason is if we don't guard our personal freedoms now when it comes to our bodies, then how can we expect our children or grandchildren to have any freedoms at all. And also, in their day, what if the govt says that certain people need to be sterilized or take some other drug, "for the good of the community". What's to stop this from escalating and becoming more regulations over our health in the future?

I could actually write a book as to why I don't support forced shots or any forced invasive medical treatment inflicted on us. I hope you will see the ramifications of allowing this intrusion to proceed any further.

Please support SB 156

Thank you so much and have a great day  
Pamela Samash

Subject: SUPPORT SB 156

Dear senators,

**Lunge you to SUPPORT SB156 and protect medical freedom in Alaska!**

I strongly believe that COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. I personally have lost my job after noncompliance with vaccines mandates. I have medical and religious exemptions that were not honored. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine.

Many of my previous coworkers were coerced into getting the jab to keep their jobs and feed their families. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications.

There are many reasons for declining a vaccination, including: personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market certain COVID vaccines.

There is already an ongoing shortage of healthcare workers due to these mandates. **Alaska should follow the example of other states and prohibit vaccination mandates in state law now!**

Respectfully,  
Rebecca Crawford

Subject: Vaccine Discrimination

Hello,

I am writing in support of SB156 for many reasons. I am an unvaccinated healthcare worker holding on to a healthcare job that daily I wait for the email from my boss inquiring into my vaccine or exemption status so that I can remain employed. I've given 25 years of service to the healthcare industry. As a professional working adult I know no other job. I've held various healthcare positions in multiple facilities and companies across Fairbanks. My niche is specialized and I'm very proficient at it. But with this vaccine mandate push infecting the state, county, and world, my little slice of work life is now affected. And I'm not happy about it. I support Lora Reinbolt's intention with this piece of legislation and I expect fellow legislators to do the same. This is an easy one. Even Juneau shouldn't be able to muck this one up. It is a freedom issue ladies and gentlemen. One's vaccine does nothing to protect another. This is common knowledge now. It does not protect against transmission. It does not protect against infection. The CDC has admitted this. I doubt the descriptor vaccine is even accurate. Regardless, there is very damning evidence, mostly ignored by mainstream media, that this vaccine may not be safe for some people. That alone should shelve any mandate whether levied by government or as a condition of employment. Period. Why we need a piece of legislation like this is insulting. This is discrimination in its purest form. Two societies. The privileged vaccinated and the pain unvaccinated. This mandate does not breed unity. Quite the opposite. It divides people and pits them against each other. This is NOT America and is a poor testimony on liberty. I request, no DEMAND, my representatives in both the state house and senate to boldly and definitively support this legislation. No ands, ifs, or buts. Freedom. I'll do me. You do you. No hard feelings. If someone feels unsafe it should be THEM that dons the triple layer N-95 mask, face shield, goggles, gown, and cloth covering. NOT ME!!!

Thank you and have a nice day.

Subject: Support for SB 156

Good morning Senator Mike Shower,

As a resident of this great state I request that you support Senate Bill 156 (SB 156).

Protection of medical privacy and the ability of individuals to select the types of medical intervention they deem best is key to protecting our individual freedom. Giving control of an individual's medical treatment to a governing body eliminates personal freedom and is a large step towards government ownership of its citizens. This is in stark contrast to the foundational structure and establishment of the State of Alaska and the United States of America: a government by the people, for the people.

Thank you,  
Dennis Hansen

To Senator Reinhold,

I want to see vaccination discrimination outlawed in Alaska. I am with the public every day, and hear the results of vaccination relative to outcome. There is so little connection, I don't know why there is any credibility to vaccination left. It is far past the point of concern about health and is merely about control, which is highly unconstitutional.

Most sensible questions are never answered by those who insist on vaccinating: why the border is open without regard for screening or vaccination; why we are targeting the lowest risk members; why proven treatments are overlooked.

I responded very quickly to proven treatments, and refused and will refuse to be the experiment of someone who unwittingly identifies himself as 'science.'

Hello to whom this email is addressed,  
I am writing to encourage you to vote YES on this bill.  
It is one of the few straight forward bills I have read and its content has the highest level of importance in our modern world.  
Any who oppose this bill will be noted. Know that there are a lot of people interested in this bills outcome and the persons who oppose it.  
I sincerely hope we as Alaskans are fortunate enough to not have the establishment influence in our ranks.  
I doubt that is the case and I am sure someone on this email is partial to the NWO agenda. Regardless, its in your best interest to not expose yourself on this legislation.  
Do the right thing and ensure we Alaskans have a safe haven here in our home state.  
Thank you.

Best regards,  
Joel

Subject: Senate Bill 156 - Stop Medical Mandates

Unless we make it illegal, vaccine mandates will continue to be required by employers, and government agencies.

The Anchorage School District is still discriminating against individuals based on vaccination status! This includes teachers when performing chaperone responsibilities as it turns out.

Attached is my most recent column on this subject, published in Must Read Alaska on January 26, 2022.

<https://mustreadalaska.com/dan-smith-anchorage-school-district-should-rescind-mandatory-vaccine-test-for-volunteers-and-coaches/>

We must prohibit COVID-19 vaccine discrimination! Alaskans have the right to weigh the benefits and risks of this vaccine based on their own personal and medical situations. We are capable of making our own informed choices without coercion or public ridicule and humiliation.

Dear Senator Showers,

I implore you to consider voting yes on the upcoming bill, SB156. I am a freedom-loving Alaskan and American. I am not an anti-vaxxer, but it is every person's inherent right to choose which chemicals to put into our bodies without having to worry about losing our jobs, denied medical access or access to public places. I am sure you would not want to be forced to put something into your body that you did not want, whether it be a covid shot or anything else for that matter. I have had covid and, therefore, I have natural antibodies; as do many others. No one, not even the vulnerable, should be forced to do this against their will. America was founded on freedom, unlike the tyranny of the government those founding fathers ran away from. You were elected to represent us and do the will of the people, not to bring tyranny to this country. And any American that thinks this is okay to force this on others needs to maybe have a history lesson about WHY America was founded.

Sincerely,

Please support SB156 and allow us to make our own decisions about Covid-19 vaccines. Please protect medical freedom in Alaska

COVID-19 vaccine mandates violate the rights of Alaskans. There are many reasons for declining a vaccination, including: personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market COVID vaccines. No Alaskan should be coerced when it comes to their health and the health of their children. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine. There is already an ongoing shortage of healthcare and other workers due to these mandates. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications.

I OPPOSE forcing someone to accept a COVID-19 vaccination out of fear that they will no longer be able to work, travel, go to school, or enjoy other cherished American freedoms if they say NO or decide to wait.

Thank you,

Representatives,

I reach out to you as a concerned Alaskan, wife, mother of 5 and a business owner. I have held trust in our medical system most of my life. I was adamant about receiving vaccinations on schedule. I never considered myself an "anti-vaxer".

Then we faced the outbreak of Covid-19. The response left heads spinning. So much conflicting information and people who claim to have all the answers...changing the answers. Lies, deceit and pressure has left a bitter taste in the mouths of many Alaskans. Especially here in Fairbanks where the medical options are so limited.

We were very concerned with the unethical and rushed development of these Covid-19 "vaccinations". My husband and I decided we wanted more information before making our decision.

Then the pressure to become "fully vaccinated" was laid on thick. Not suspicious at all. Our entire family contracted Covid-19 in the first wave. We recovered and developed natural immunity.

We researched and learned of all the benefits natural immunity has to offer on a broader spectrum and were by then seeing friends and family encounter negative reactions to "covid vaccines" as time went on. Because of this we decided to stay with natural immunity.

We firmly believe people should be able to make their own choices medically. We should not fear losing jobs and income, which puts food on our tables, and in our children's mouths, and fuel in our tanks, because employers or officials decide to take choices away from us. Not enough is known and no one has the right to trample on individuals rights

Will you deny many Alaskans and their children their rights and liberties?

I can assure you that I, and many others in agreement with my stance, will not go along quietly. We will have a voice. We have to because this is in no way acceptable. We have seen the risks and it's not being accurately represented. When you see loved ones injured by this "vaccine" or even die, the answer to us is simple. We will not risk our lives for experimental injections which were created via unethical development methods.

I have several friends still dealing with these side effects today including my best friend who struggles with severe pain and heart issues now at the age of 34. Otherwise a healthy and active hiker and biker with no previous conditions. Her dreams have been crushed by debilitating side effects caused by Pfizer covid "vaccination". Her symptoms began soon after her injection. She is having to get continued medical care and further testing. She is now on heart and blood pressure medication for the foreseeable future. She had to take the vaccine for her job. A concerned mother of two just trying to give her kids the best, can now hardly manage to cook dinner.

My husband's best friend was taken to the ER within hours of his covid "vaccine" because it caused blood clotting in his lungs. He is still struggling and now on continued medications as well.

None of this is acceptable in any way. SB 156 needs to be passed. Mandates over people's lives can not be allowed in the Land of the Free. It is nothing more than gift wrapped oppression. We are citizens of a Free Nation, not subjects to rule over.

I choose freedom for myself and my family. Freedom of choice and say no to oppression and coercion. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical experimentation. Because THAT is what this has become. Just one more thing to divide people and allow for unneeded segregation.

If you could please provide me with a list of the covid-19 long term side effects, who is responsible to pay for medical costs when we are injured via this medical experimentation, and keep an eye on who has stock in Moderna, Pfizer and Johnson and Johnson that would be much appreciated.

Forever for freedom,  
Mina Delain  
Fairbanks AK

Dear Senators,

There is absolutely no reason for the vaccination mandates and propaganda since COVID-10 injections do not stop transmission and do not stop infection. And yet people have lost their jobs, have been kicked out of school, have been denied access to public places for declining this medical intervention.

End all vaccine mandates, and support legislation that will protect me and my fellow Alaskans from vaccine mandate and vaccine passports!

Respectfully,

Isaac McCann

I could write a dissertation on this topic but, I will spare you. The C19 mandates narrative we have lived under for the last two years are nothing more than a moving target. The "science" is far from settled as some would have us believe but, it appears to be getting clearer as the narrative continues to change. In times when facts become fiction and fiction becomes facts, we must take a stand for reality. Let me be clear, I'm neither for, nor against vaccines. What I am is a believer in individual choice and taking personal responsibility for ones own actions. It is my responsibility to weight the benefits and/or consequences for my personal medical decisions. Informed consent implies one has the right to choose to consent or not.

Government C19 mandates are an attempt to coere and stifle open discourse. Have we forgot our founding principles? The C19 mandates infringe on individual liberty and the freedom to choose what's best for oneself. The result is discrimination based on conformity. I support Senate Bill 156 in its present form. I hope we can remember we live in the great State of Alaska where hardy folks make up their own mind and are aloud to think for themselves.

As a veteran who served in Europe during the Cold War, I've had a first hand look at oppressive governments that control the masses through mandates, intimidation, coercion and oppression. I hope we choose the right road and avoid becoming a police state where people live in constant fear. We don't need anymore Covid cowards. Do the right thing and pass this bill.

Subject: Senate Bill 156

Dear Senator,

I'm writing in support of passing Senate Bill 156 and I appreciate your time.

My name is Teea Winger, I'm born and raised in Kenai. I'm a mother to three children (7,9,12), I serve on the Kenai City Council and my husband works in construction. We believe strongly in giving back thru volunteering, monetary donations or one's time.

As a mother it's my obligation to do what's best for our children. Those tough decisions start at days old with immunizations. Our children were given no more than one oral or injected vaccine at a time, thru all the "sets" of baby immunizations. That was our choice to safely administer vaccines one at a time to our children. My husband and I are not anti-vaccination we've both had all our vaccines as children and had adult boosters. It's our choice to make an informed decision on which vaccines our family receives. Our family does not want the flu, HPV or COVID vaccines and that should be our choice without consequences.

We have come to a point in this world that I never thought our we or our children would experience, forcing a vaccine without choice.

I understand the hardships we have all faced while navigating the last two years of a COVID world. However, no one should be denied the right to earn a living, go to an event, medical procedures, shopping, or education over a vaccination status. My husband should not be worried about leaving a company he loves to work for due to fear of forced vaccination. This puts unnecessary stresses on us and our family.

If a person wants to be vaccinated, that's great and their choice! If they want to wear a mask by themselves in the car, that's great and their choice! If a person doesn't want to be vaccinated or wear a mask, that's great and their choice!

This body has a chance to draw the line in the sand and say enough is enough. Policies are proving to be more deadly. This body has a chance to stand for personal liberty and the freedom to choose. In December 2021 the Kenai City Council voted unanimously to adopt Resolution 2021-70 Opposing Government Mandates Requiring Vaccines and Face Coverings Related to COVID 19. I will attach it. Our body has drawn the line in the sand.

Please vote yes on SB 156

Thank you.

Subject: Please Support Senate Bill 156

To the Senators of the State Senate Affairs Committee,

I'm writing to implore you to support Senate Bill 156 to make any vaccine mandates or vaccine passports unlawful in the state of AK.

Nobody should be coerced in any way to receive a medical treatment, especially if that treatment comes with risks, and even more especially if the full extent of those risks are unknown. To do so is an outright attack on Alaskans' civil, inherent and religious rights as listed in Article 1 of the AK constitution - causing inequality between those vaccinated and unvaccinated, denying individuals the ability to make free-will decisions to protect their life and liberty and pursuit of happiness, and violating the moral objections of the religious.

The Covid-19 vaccines use new, virtually untested mRNA technology and they have been developed and "approved" at an unprecedented speed without appropriate time to determine long-term or even short term consequences. Even worse, they have utterly failed to stop the spread of the Covid-19 disease. The VAERS vaccine reporting system makes it clear that in the short term, Covid-19 vaccine side effects are numerous, frequent and sometimes deadly. No Alaskan should be denied the same civil liberties that anybody else has because they choose not to take the risk of being vaccinated. No Alaskan should lose their job, their ability to provide for themselves and their families, because they choose to stand up for their rights and not submit to an unproven medical treatment. Additionally, they should not have to submit to weekly testing to prove they are not sick when they don't have any symptoms. Such testing is expensive and often yields inaccurate results. Lastly, no Alaskan should be coerced into getting a treatment that violates their religious views on the sanctity of life. All of the currently available Covid-19 vaccines have used fetal cells in either development or testing. Many religious persons find fetal cell usage detestable and know that the continued acceptance of the use of fetal cells for research is a guarantee that the lives of the unborn will continue to be discarded to fuel the research industry and no alternative methods for testing new therapies will ever be developed.

Please vote to support Senate Bill 156 and protect the rights of your Alaskan constituents.

Sincerely,  
Brandi Fleishman

To: Sen. Mike Shower <sen.mike.shower@alleg.gov>  
Subject: SUPPORT SB 156

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Please support SB 156!

Sincerely,

Theresa Bird 99507

Subject: Outlaw vaccine mandates

COVID vaccines have not been shown to prevent infection or transmission with a slight but real risk of serious side effects, as evidenced by VAERS reports. People should be able to choose freely whether to take the vaccine as it does not protect others, only the person receiving the vaccine. Thank you.

Douglas McKinnis <douglas.mckinnis@alaska.gov>  
To Senate State Affairs

Members of the Senate State Affairs Committee:

Please support SB156!!

For personal freedom to thrive, vaccine passports must be codified as unlawful. We need your support.

No free society can endure the tyranny of vaccine passport restrictions.

Remember the Truckers!

They speak the message of the Alamo. Personal Freedom must be defended. Attacks on our constitutional rights will be defended at all costs.

Please join the freedom loving by supporting SB156.

Thank you sincerely!

Mia Costello <Sen.Mia.Costello@alleg.gov>; Sen. Roger Holland <Senator.Roger.Holland@alleg.gov>; Sen. Scott Kawasaki <Sen.Scott.Kawasaki@alleg.gov>  
Subject: Fwd: SB 156 my testimony

Good Morning All -

I am writing in support of SB 156 and would like this testimony submitted to the record. I am a project manager who has served all of Alaska for the past 15 years, 10 of that in rural Alaska. I am originally from Eagle River and now reside in Palmer with my wife and children.

As a direct result of this pandemic, our livelihoods have been threatened every day since the experimental vaccination began being administered. Both of our employers have stated that we may be subject to disciplinary action, or in the case of my wife actually terminated despite our deeply held religious beliefs and documented medical exemptions. In addition, our entire family survived COVID Exposure in 2020 but are not allowed to cite natural immunity. This one size fits all medical approach is unscientific, discriminatory in nature and at best unethical. Vaccines are proven dangerous and ineffective as demonstrated by my daughters reaction in 2019. She was given a well child exam vaccine as part of the vaccine schedule, and immediately went into uncontrolled vomiting, seizure and spiked fevers for days. I was on site in rural AK, with no way home to take care of my family due to a medically induced life threatening event. Our doctor spend 6 months denying the reaction, and finally when pressed agreed that it was most likely the vaccine that cause the reaction, but didn't want us to have a negative opinion of vaccines.

After reading the insert of the vaccine, we learned the manufacture stated her reaction was known side affect, and she should not receive any vaccines if the reaction occurred. When we approached our doctor on this issues, we were hastily thrown out of the practice as anti-VAXes. We were not even allowed to question the vaccine. The law provides for exemptions, but medical professionals, business and government is allowed to discriminate against a population for a purely political and partisan issue.

More recently, I have been threatened with my job and way to provide for my family and under constant scrutiny from employers and potential clients as to my current status. These entities take State and Federal funds and claim they do not have to comply with Civil Rights Acts or Title 7 anti discrimination laws. Vaccinated or not, no one should be allowed to discriminate against a personal choice that has no affect on anyone but themselves. The Vaccine has been proven, federally admitted to, and ignored by global media to NOT prevent transmission. The fact that a vaccinated person can spread Covid at the same rate as a vaccinated person means no passport, mandate or other form of proof will keep our population safe.

I expect your full support for this Bill to move on through the committee process and become law. The world is opening back up and reducing all restrictions and you should be a leader in ending medical tyranny, government overreach, and legalized segregation.

Alaska is a free state. If we do not fight now, our children will not have the opportunity to fight in the future.

Mike Kruse

To: Sen. Mike Shower <[Sen.Mike.Shower@alleg.gov](mailto:Sen.Mike.Shower@alleg.gov)>  
Subject: Support SB 156

Sir,

Please support SB 156. I lost my job (of over 16 yrs) due to exercising my freedom in not getting COVID 19 "vaccination". The losses both personally and collectively as Alaskans to these mostly ineffective mandates has been an unnecessary burden. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion. It is important for the future economic direction of our state we not encumber ourselves with overly intrusive mandates and travel complicating regulations. We want to be a destination state, whether it be for recreation and tourism or permanent relocation. Freedom attracts, regulations repel.

Thanks

Dean L. Robinson

Subject: Opposition to Covid Vaccine Mandates

Dear Senate Committee:

I strongly oppose vaccine mandates, and I am in support of SB156 to protect our medical freedom in Alaska.

I don't know if you are aware of the turmoil in the world, but mandates are affecting us worldwide. Look at Canada! We the people are exhausted from the mandates and the segregation it has caused. As a nurse, I support medical freedom and privacy for all. Covid passports and mandating vaccines for employment, shopping, medical care, or education is unethical and wrong.

Let's make a stand together for Alaska and move forward from Covid-19!

Sincerely,

Malai Smith  
Anchorage, AK

Subject: SB156 "An Act relating to COVID-19 immunization rights

We would like to encourage support of Senate Bill 156. Our freedoms are very important to us as Alaskans, medical or otherwise. We appreciate your consideration of this all important issue.

To be clear, **WE WILL NOT ACCEPT MANDATES.**

Thank you for your time.

Sincerely,

Mary Garrett - Fairbanks

To: Senate State Affairs

Cc: Carole Marvd

To whom It May Concern:

I am an Alaska Resident of 45 years and I strongly oppose COVID-19 vaccine mandates. Such a mandate violates the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!

**It is critical that you stand up for Alaskans. If someone wants the vaccine they can get it; it is not right to FORCE such a vaccine on everyone.**

Subject: Support Senate Bill 156

To: The State Fairs Committee.

I am writing to you today because it has come to my attention that there is a bill being considered by this committee that supports protecting medical freedom in the Alaska. I urge you to support this bill.

I come from a very large family. I was born and raised in Alaska with my six sisters and have many generations of family members that have enjoyed the lifestyle Alaska promotes. My great grandparents homesteaded here when they were in their teens and have created a large family tree that has roots all over the state.

In my immediate family, all of my sisters (and their families) have had Covid. None of them had any bad side effects from the illness. Sadly, three of my sisters were COERCED into getting the "Covid Vaccine" (after the illness) in order to keep their jobs. All three of my sisters had an adverse reaction from the "vaccine" and two are still suffering from those reactions today. No one should ever have to choose between getting an experimental injection and their job. For that matter, no one should have to be threatened with anything being withheld from them and getting injected with this experimental gene therapy. I am ashamed that our country has gone down this path and I am hoping that our great state will stand up against this tyranny and do what is right.

Please support Senate Bill 156 and stand up for medical freedom.

Thank you for your time and your commitment to our State.

Best,  
Katherine Gluth
