### Financing Clean Energy in Alaska

Chris Rose Executive Director Renewable Energy Alaska Project (REAP)

> House Finance Committee May 2021

Renewable Energy Alaska Project

Founded in 2004, REAP is a statewide nonprofit coalition of over 60 electric utilities, Alaska Native Corporations, clean energy developers, businesses and other NGOs

REAP's mission is to increase renewable energy development and promote energy efficiency in Alaska

### **REAP Education & Programs**

STEM educators promoting AK *EnergySmart* and *Wind for Schools reach hundreds of classrooms annually* 

Alaska Network for Energy Education and Employment (ANEEE)

Sustainable Southeast Partnership (SSP)

Alaska Wind Working Group

**Energy Transition Initiative Partnership Program** 

Conferences, Workshops, Renewable Energy Fairs, Public Presentations

### **REAP Advocacy**

- 2008: Renewable Energy Fund, \$100 million (\$270 million total)
- 2008: \$360 million to AHFC for home weatherization (\$640 million total)
- 2010:Emerging Energy Technology FundHouse Bill 306 (State Energy Policy)
- 2016: SB 196 (PCE Endowment)
- 2017: Property Assessed Clean Energy (C-PACE)
- 2014-2021: Railbelt Electric Grid Reform
- 2017-2021: Green Bank

### Alaska's Annual **Billion Dollar** Bonfire

Each year, Alaskans collectively spend approximately \$5 billion on electric, heating, and transportation energy. At least 20% of that energy is wasted land goes up in smoke.

### Energy Efficiency: The "First Fuel"

Alaskans will spend an estimated <u>\$5 BILLION</u> on diesel fuel, natural gas and gasoline for our electricity, heat and transportation in the next year – and approximately 20% will be wasted

### Weatherization and Rebate Programs

- \$640 million appropriated by the state since 2008
- Over 50,000 homes average savings: 30%
- Average annual fuel savings is over 25 million gallons of diesel equivalent

# Renewable Energy Grant Fund

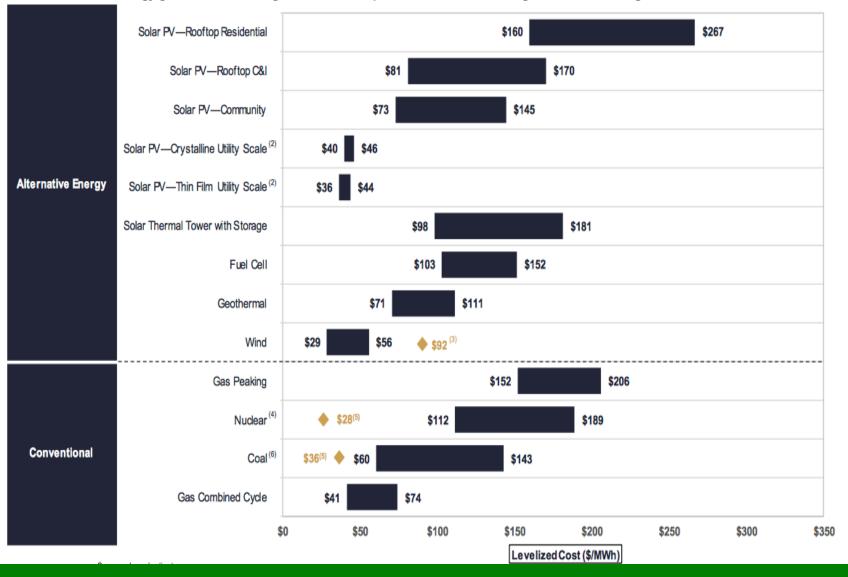

#### Established in 2008

\$270 million in state appropriations have leveraged another \$200 million in federal and private dollars In 2020, 80+ projects displaced the equivalent of 30 million gallons of diesel fuel

#### Levelized Cost of Energy Comparison—Unsubsidized Analysis

Certain Alternative Energy generation technologies are cost-competitive with conventional generation technologies under certain circumstances<sup>(1)</sup>

Why Private Financing for Clean Energy is Lacking

 Short track record for clean energy financing

 Clean energy projects are small and distributed

Lack of capital market liquidity and maturity

Human and organizational behavior

### **Elements of Green Banks**

A focus on commercial technologies

A dedicated source of capital

A focus on leveraging private investment

A relationship with government

### **Functions of Green Banks**

**Design** Loan Products & Programs to De-Risk

**Educate** Private Banks on the Opportunity

Market Loan Products and Programs

Leverage Private Investment Capital

### Passage of SB 123 Will:

- Lower the energy burden of Alaskans
- Develop investment opportunities for Alaskan lending institutions
- Create jobs and promote business development
- Keep precious energy dollars circulating in the economy
- Position the state to receive federal operating and investment capital
