It is time to protect Alaskans' freedoms - our freedom to make *personal* medical decisions, our freedom to pursue a work environment that does not discriminate against personal medical decisions, our freedom to enter public places, and freedom for our children to gain a public education in an environment that is safe. I am not anti-vaccination and up until this point, I have had all vaccinations recommended by my doctor. There are a number of reasons why I have chosen not to vaccinate against covid at this point, but my reasons aren't the issue, what is at stake is my freedom to make this choice for myself. I cannot express strongly enough how important I believe it is to preserve medical freedom to each individual. Please vote in favor of SB156.

Respectfully,

Janet Birky

Subject: Senate Bill 156

Senator Shower,

I am emailing in support of Senate Bill 156 sooner by your fellow senator, Ms. Reinbold, please ensure this bill continues on tomorrow. I am an Alaskan resident who lives in Houston. I support this bill because vaccination for Covid-19 should not become something that the state forces people to do, there are myriad reasons why someone may not want to get out be unable to get the vaccination. These reasons include personal health conditions, pre-existing immunity from covid-19, religious reasons and conscientious objections. A medical intervention should not have the power to change someone's ability to go to school, go to work or participate in their community here in the great state of Alaska. Above all, Alaskans should have their choice about vaccinations, not be told what they have to do by someone else. This is why I support Senate Bill 156, please pass this bill on and ensure it becomes Alaskan law.

Thank you,
Arianna Mattila

Subject: SB 156

Please support medical freedom in Alaska.

Vaccine passports & forced mandates are unlawful & unethical.

Our government is based on inalienable rights that come from our creator not from our government. Our constitution is structured to have the government's role to protect & preserve those rights, not to trample them. Our whole model is based on consent of the governed. We do not consent to forced drugs. Each human has the right to decide which drugs, if any, go in their body.

Thank you for your support!

Good morning Alaska State Affairs and Senators,
I'm writing to you today to have my voice heard.. I agree with Senate Bill 156. Alaskan does not need any vaccine mandates or vaccine passports in my honest opinion. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention. Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion. Many people have valid reasons for declining the covid shot, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines. Flu shots have never been forced before. They should not be forced now. Masks have never been forced on planes or in any public building. They should not be forced now. People can take the shot if they choose to believe in the pharmaceutical companies quick Covid 19 drugs that were manufactured in a very short time, or developed/patented a long time ago. A person can believe what they see on TV or search and learn on their own. The truth.
Please vote to stop the forced vaccine mandates and Passports. Alaska has spoken. Thank you.

Sincerely,

Brian D. Brown

Vaccine mandate not in Alaska

Brian & Tanya Erwin <[redacted]>

Alaskan's should have the right to decide with advise from their physician if the vaccine is right for them. Alaska should be on the side of individual rights and not in the side of a mandate. No one should be punished for their decision to get vaccinated or not. There should never be a passport vaccination card allowed by government or private business. This would be discriminatory.

Dear Senators,

COVID-10 injections do NOT stop transmission and do NOT stop infection, therefore herd immunity is impossible to achieve through "vaccination" and therefore, mass vaccination have no epidemiological justification, and therefore the societal goal of vaccinating everybody to protect others is null.

With this reality, vaccination mandates go into the trash can.

These two acknowledgements from the Center for Death and Coercion (CDC) are official recognition of the statement above:

[Fully vaccinated people who get a breakthrough infection can transmit the virus, CDC chief says](#)

[CDC shifts pandemic goals away from reaching herd immunity](#)

Individual health protection is the only goal left for the C-19 shots, and that should be a personal health decision.

There is absolutely no scientific reason for the vaccination mandates and propaganda.
End all vaccine mandates, and make legislation that protects Medical Freedom in Alaska.

Make vaccine passports and other COVID-19 vaccine mandates **illegal** in Alaska.

Respectfully,
Mariyana McCann

Tue 2/8/2022 1:44 PM

Senators,

I am writing in support of SB 156 - Prohibit Covid 19 Vaccine Discrimination.

I do hope this supports those in the medical profession who are choosing not to get the Covid 19 Vaccine. We have the same rights as anyone else and are currently being discriminated against with the current CMS Mandates. This State can not afford to lose medical professionals. So many have been forced to quit or get "vaccinated". There are those who have been forced to choose between vaccinate or not being able to provide for their families.

No one should be forced or coerced into having something injected into their body. Especially something that has not undergone years of research to determine long term effects. The push to vaccinate the entire population of the world is a gross overreach of every government entity. There is not one medication, injectable or treatment that is safe for 100% of the population. Look up any medication etc and you can see lists of contraindications, side effects, give with caution for this medical condition.

For these reasons and many more I support SB 156.

Thank you for your time.

Tue 2/8/2022 1:36 PM

State Affairs Committee, Senators:

I fully support SB 156.

A vaccination should never be a requirement to exercise our rights. The privacy of one's health information including vaccination status should be protected.

No one should be discriminated against in any way based on vaccination status. Vaccine passports embody discrimination and carry negative historical associations.

Each person should have the right to decide whether or not to be vaccinated. This is only a choice if one is free to weigh the factors without pressure, coercion, threat, or social stigma. No one should lose a job or have a job application turned down because of a vaccine. No one should be barred from school or college because of a vaccine. No one should be denied or limited medical care because of a vaccine.

Please support SB 156. It needs to go before the legislature and be passed.

Thank you,
Tracy Wilson

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

It is a serious red flag to me when the vaccine developers ask to have their data hidden from the people for 25- 75 years- free from litigation for those it harms. It is also perplexing that if the vaccine(s) are truly to save the world from Covid, why are the ingredients and 'recipes' not open source and free so that any pharmaceutical or medical company can make them. And the fact that our government uses scare tactics, threats and intimidation to coerce people into taking the vaccine does not provide much confidence in it.

Please support SB 156.

We removed extra line breaks from this message.

Using heavy-handed, coercive measures, we've witnessed the prevailing, totalitarian worldview of the powers-that-be seek to control all individual health choices, against the will of the people.

A single narrative is permitted, while all opposing views are disallowed. This is what oppressive authoritarianism looks like. We The People have had enough.

Ironically, in order to secure our inalienable rights endowed by our Creator, we allocated limited power to the government, deriving their just powers from the consent of the governed.

If our representatives would faithfully fulfill their oaths to uphold the State and U.S. Constitutions (a false oath is called perjury), then we wouldn't have to resort to another law prohibiting our government from unconstitutionally forcing medical procedures and digital-ID-medical passports against the will of the People. Because of this failure of duty, we ask you to support Senate Bill 156, which would protect Alaskan's individual liberties by further clarifying the unlawfulness of forced injections and medical procedures without individual, informed consent, in addition to medical passports, which oppressively prohibit the non-compliant from the free exercise of their God-given liberties.

It is God alone who is sovereign, not powerful men. We have freedom because there is a higher law which holds everyone to account.

Alaskan residents,

I'm writing to ask you to please support SB 156. Vaccine mandates and passports make absolutely no sense. It is well known now that vaccines do not stop the spread of Covid. Why are they being mandated? It is well known that vaccinated individuals can still get and spread Covid. The only reason for an individual to get a vaccine is for their own personal safety because it may potentially lead to less severe symptoms, which may potentially lessen the likelihood of going to the hospital and/or dying. It is a personal decision for personal safety. It does not affect community safety! And now that we know more about natural immunity we know that there's absolutely no reason to get a vaccine if you've already had and recovered from Covid! It's basically like getting a natural vaccine! The vaccine has obviously not been a magical solution for ending this pandemic, and mandating everybody get them makes absolutely no sense! Many people have already had and recovered from Covid so they have natural immunity that is probably superior to vaccination. Many people have health problems that put them at higher risk of vaccine injury. This is a legitimate reason to decline vaccination and these people should not lose their jobs because they don't want to injure themselves. Many people have had injuries from the first Covid vaccinations and do not want to continue so they are not considered fully vaccinated. Why in the world would anybody force these people to subject themselves to further injury?! Or take away their livelihoods if they refuse?! It's wrong and unethical! It also makes absolutely no scientific or common sense! Stop the senseless mandates! I am in favor of this bill because it makes it illegal to force this one size fits all health decision on people who have so many different health issues, bodies, sensitivities, and life situations. It's wrong. It will not help us end this pandemic, it will only cause more harm to people and their families, to businesses and our communities.

Thank you

My husband almost lost his job for not getting the vaccine due to having **Left ventricular hypertrophy** that appeared suddenly a couple months after he had Covid. We did not want to risk compounding his condition by risking a very real side effect of the vaccine causing additional heart-related problems. He was not given a medical or religious exemption from his employer and would have been fired had the Supreme Court upheld vaccine mandates for employers. I would rather have my husband here with me and be broke, than lose him to an experimental vaccine that does not have open records and/or decades of studies behind it. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion or other threats and intimidation tactics.

Many people, such as my husband, have valid reasons for declining vaccination, including personal health conditions

Please join other states that have vaccination requirements and passports banned by legislation (not just the governor).

Here's a good list of those with similar legislation or executive order:

I urge you to SUPPORT SB 156, to protect medical freedom in Alaska

I am amazed we find ourselves here, but Tyrants are active these days and perhaps desperate. This right to personal medical freedom is not only made clear in our Constitution but it is also protected under international law (Nuremberg code). Make no mistake, mandated vaccination is medical tyranny.

SB 156 will codify these protections for Alaskans so future tyrants can not redefine our basic God given rights.

The vaccines are not effective or safe. These facts are becoming readily apparent and now being admitted even in the mainstream media. People are fed up and will not take much more tyranny (see Canada). People will loose their livelihoods, right to travel freely unmolested, or be discriminated against forever without revolution. Alaskans especially will not stand by and be walked upon. I urge you all to get on the right side of history and support sb 156 and in doing so support human dignity, basic human rights, international law and the Constitution of the United States of America

So it is clear. Governments do not give and take away people's God given rights. You have a choice, to get on the right side of this issue or the wrong side. The people will sort you out eventually.

To The State Fairs Committee,

I am writing to you today because it has come to my attention that there is a bill being considered by this committee that supports protecting medical freedom in the Alaska. I urge you to support this bill.

I come from a very large family. I was born and raised in Alaska with my six sisters and have many generations of family members that have enjoyed the lifestyle Alaska promotes. My great grandparents homesteaded here when they were in their teens and have created a large family tree that has roots all over the state.

In my immediate family, all of my sisters (and their families) have had Covid. None of them had any bad side effects from the illness. Sadly, three of my sisters were COERCED into getting the "Covid Vaccine" (after the illness) in order to keep their jobs. All three of my sisters had an adverse reaction from the "vaccine" and two are still suffering from those reactions today. No one should ever have to choose between getting an experimental injection and their job. For that matter, no one should have to be threatened with anything being withheld from them and getting injected with this experimental gene therapy. I am ashamed that our country has gone down this path and I am hoping that our great state will stand up against this tyranny and do what is right.

Please support Senate Bill 156 and stand up for medical freedom.

Thank you for your time and your commitment to our State.

Best,
Katherine Gluth

Dear Committee

I am in support; my family is in support and anyone I know is in support of this bill. I could write a book on why however suffice to say no vaccine passports, no mandating of vaccines OR masks in businesses or schools, and allow no censorship from opposing opinions any longer! You must pass this bill the medical TYRANY must stop!

Very Sincerely
Debbie Ramin

When state employees who are vaccinated get benefits such as paid leave when they are sick and non-vax'ed employees don't this is discrimination. This is currently happening in our state. The rules should apply equally to all citizens.

To those we voted into office:

I'm writing to support SB156. It is your sworn duty to defend our rights and that includes bodily autonomy. As a veteran I take this oath seriously and I hope you do, too.

As someone who has a child who has been vaccine injured, I urge you to protect his life and ours. Everyone deserves the right to make their own medical decisions for themselves and for their children and not be forced like something out of a Nazi playbook or a Cuban dictatorship. Please, be on the right side of history.

Tlazohcamati,

Maggie Matheson, MBA
