

SB 156

Lance Lampert <[REDACTED]>
To: Senate State Affairs

Reply

Freedom! Freedom to choose how one medically cares for themselves. No person should be required to prove they have been vaccinated. Pass this bill. Best for all Alaskans. Thankyou.

SB 156

Derrick Bignell <[REDACTED]>

Hello My Name is Shelly Mead. I live in Wasilla and I'm writing in response to Covid Vaccine MANDATES. The media, Big Tech, and pharmaceutical companies are hiding the true harm these vaccines are causing people. The adverse reactions are much higher than is being reported. Vaccines of any kind should be a personal choice. And because of the lack of pertinent information being distributed to the public the informed consent isn't happening. There should never be "forced vaccines MANDATES " People have the God given right to chose what happens to their bodies along with the true facts about these rushed vaccines and the consequences for taking them. Please make an informed decision regarding any vaccine mandate before you vote. The information about covid vaccines IS out there. Please look for it. And make an INFORMED decision.
Thank you
Shelly Mead

Subject: SUPPORT for SB 156

Good Morning!

My name is Richard Stack from Eagle River Alaska. I wanted to let you know that I support Senator Reinbolds bill to protect medical freedom by banning vaccine mandates and vaccine passports in Alaska. Like many Alaskans I am vaccinated against Covid-19, but I don't believe anyone should be fired from their job, denied a public education, or barred from public participation for choosing not to. Please fight for Alaskan's medical and religious freedom, and support SB 156.

Thank you,

Richard Stack

To Whom it May Concern,

I would like to voice my opinion for you to consider as you represent me. The constitution protects our individual rights. We are a country that people wish to move to because of the freedom of personal choice our constitution ensures us.

No one should ever lose their ability to provide for their family, be denied a public education or be denied access to public places for choosing to decline a vaccine. Coercion is illegal. People have the right to consider all benefits and risks of Covid-19 vaccinations just like any other medications.

There are many reasons for declining a vaccination including: personal health reasons, pre-existing immunity from a prior Covid infection, religious reasons, and objections over the unethical methods used to develop and market certain Covid vaccines/lack of transparency.

Because of these reasons, I urge you to support SB156 and protect medical freedom in Alaska.

Thank you,
Linda Avery-Eaton

Dear Senators,

I am writing today to strongly urge you to support SB156!!

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children.

My husband, father of 4, was fired from his job because he stood up for his rights and refused to be coerced into receiving the Covid shot. He is on the right side of history. Will you be????

Alaska should follow the example of other states and prohibit vaccination mandates in state law now!

I urge you to support SB156 and Alaskan's rights to have medical freedom!

Sincerely,

Kelsie Clare

Tue 2/8/2022 9:31 AM

Hello Senators,

Please Support SB156 "The Medical Freedom Bill". If our right to consent or not to consent to what enters our bodies is not preserved, then we really have no rights at all. We are basically experimental guinea pigs to be auctioned off to the highest bidder.

I think many Alaskans would rather see the whole system collapse, then become experiments. Most Alaskans choose freedom over safety everyday. The simple choice to live in this land proves that idea. We live in one of the more naturally dangerous and extreme states in our country. If citizens want safety let them live in the other 49 states and let Alaska be free.

Thank you

Subject: SB156

Subject: SB156

Dear Senator Mike Shower:

Please SUPPORT SB156. Alaskans cannot have their medical freedom stripped from them. Mandating an EUA "vaccine" is insanity. There is no accountability, no liability, no risk to the agencies and pharmaceutical companies trying to force this upon the entire country, but GREAT risk of loss of freedom and health to Alaskans. Stop the insanity!

Personally this is insult on top of injury for my family. My husband survived Covid 19. Despite MatSu Regionals efforts to have a different outcome for him, he fought for his life and beat the forced "medical care" and mandated isolation for 4 months. We have lived the hell of having our medical freedom stripped from us. As he is recovering fighting for his life in the "hospital" the staff are threatening him that he needs to get the vaccine or he will most likely die if he gets Covid again. He is lying in a bed, can't talk, can't move and they stand over his bed telling him he might not survive...again and again. Talk about evil insanity. No, my husband, who has natural immunity, will not take a shot to further appease this evil agenda.

These discussions, mandates and Bills should not even be necessary. It is an FDA EUA. There has been no full disclosure of what is in these shots, no full disclosure of clinical trials and no informed consent. Bottom line...individuals cannot be mandated to inject a substance period!!

Thank you for your time.

Sincerely,

Cindy Hite

I am writing to voice my support of SB 156. Medical freedom is a basic human right. Everyone has the right to bodily autonomy and informed consent, free from coercion and force. Please support this bill. It has become increasingly clear that there are some in power who would force their will upon others, like President Biden's unconstitutional vaccine mandates, and it is critical that we protect Alaskans from such egregious overreach and medical tyranny. To deny someone services or employment based on a personal, private medical decision is nothing short of discrimination. We are on a dangerous slippery slope to creating a two class system of lesser, unclean human beings, and the thought is despicable. Please, protect the minority, protect the right to govern our own bodies, protect me and my children from forced vaccinations, and protect the equal rights of the unvaccinated.

Thank you,
Elizabeth Welsh

Tue 2/8/2022 9:29 AM

Dear Sir or Madam,

I am a health care professional and have concerns with mandating a very new vaccine with unknown side effects and preliminary concerning safety data.

It is unconstitutional and ethically wrong to mandate an injection to anyone. It's also unethical to coerce people into taking something they do not want or have concerns about just to keep their job and provide for their families.

This is not right and should be stopped.

Also these vaccines are not effective at acquiring or transmitting the virus especially with the newer variants-so we are mandating an ineffective vaccine with the risk of possible long term side effects?

We are built as a free society and requiring proof of vaccination in order to live your life and travel freely are completely against what this country stands for.

I hope you support the right to freedom and liberty that this country is founded upon.

Thank you,

Please support SB 156! The latest data from CDC shows that Sars-Cov-2 (which the government calls "covid") shows that the R-value (which measures how easily it's passed to other people, or "R"eproduction factor) is well below 1. 4 out of 5 Americans have already been infected with "Covid" and now have better immunity against it than any vaccine, (which the mRNA 'covid' "vaccines" are not normal vaccines, but experimental gene therapy shots with no long term studies.) There is absolutely ZERO reason why anyone should get these shots, and this is especially true for people that have already had "Covid" or are already immunocompromised! Look at the Netherlands, 77% of their population have gotten at least one of these shots and now they are having a full blown AIDS epidemic! BECAUSE OF THESE SHOTS. Covid itself is not at all deadly anyway, and you have a higher chance of dying from these so-called "vaccines" than from covid itself! More importantly, these shots DO NOT WORK. You can still get covid, you can still pass covid, and now you have a high chance of getting some neurological diseases or other major circulatory issues when you get this shot!! Look at VAERS and the new DMED data! People wanting to pump these shots into children are stupid, that is even more ridiculous than the mask mandates for children! Masks are for slaves! Stop this stupidity; anyone pushing vaccines and masks deserves to get sued into oblivion! This is Nuremberg 2.0 and all these "doctors" and "experts" need to be more transparent and debate in front of a live Television audience why their side is better. The fact that Fauci and all these other fake 'experts' refuse to be interviewed or take part in a debate is all the proof you need that these shots are DEADLY.

The government is not a doctor and has no right to tell me what I can or can't do to my body, you know... "MY BODY MY CHOICE". This is 100% the Roe v. Wade. and the government has no right to tell me what I can or can't do to my body.

Please read It's Time To End The Mandates <https://stevekirsch.substack.com/p/its-time-to-end-the-mandates>

Please EMAIL me if you have ANY QUESTIONS I have been researching this from the beginning and showing people COVID is a huge scam.

Thank you,

Kimberly Kennedy

To: Senate State Affairs; Sen. Mia Costello

Reply Reply All Forward ...

Tue 2/8/2022 9:53 AM

Dear Senator Costello,

Please SUPPORT SB 156, to protect medical and personal freedom in Alaska.

The Covid pandemic has become an endemic; essentially, Covid-19 is has become our new flu. Never in the past have we imposed vaccines or proof of vaccination on individuals. Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines. Forcing people to get the experimental MRNA shot will force some individuals to go against their morals, and **it also goes against the Nuremburg Code, as well as the American right to self govern.**

I find it astounding that there is so much we do not know or understand about the effects of the MRNA, as well as the financial/nefarious factors involved with the MRNA mandates and Dr. Fauci. I believe history will not be kind to those involved with mandating this drug on people, especially when there is know vaccine harm. The rest of the world is taking a huge step back from mandates and passports because the severity of the virus has lessened. Why on earth would we become more aggressive with mandates and passports?

Furthermore, moving toward a vaccine passport would infringe on personal liberty. We have God-given liberties to protect ourselves and our children. Vaccine passports are evil, and would threaten those liberties. In other words, nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Thank you for your consideration.

Respectfully,

Kimberly Kennedy

Dear Senate State Affairs Committee,

I am writing to you as a Family Medicine physician and mother, asking you to please support SB 156 today. A "one size fits all" approach to requiring blanket COVID 19 immunizations for all is absolutely absurd, and is certainly not based on actual science. While I agree that, for some, the COVID 19 vaccination would be helpful and protective, it is not the case for all citizens, nor does it come without some risk. Additionally, natural immunity is, for most, robust and long lasting.

Please support SB 156. Thank you for your time.

Senators,

Greetings from Wasilla.

I Strongly support SB 156! It is overdue time to end the divisive dictates that have not only destroyed many people's lives, but more importantly eroded the freedom that defines who we are. A thinking mind cannot ignore the facts that so much one sided effort to persuade us into fearful obedience has created mistrust of our government and institutions that should be open to truth and transparency. Passing this bill will expedite a return to proper health care relationships between individuals and doctors, as well as duties of citizens and government.

As an Alaskan, I would like to encourage Senators Mike Shower, Lora Reinbold, Mia Costello, Roger Holland and Scott Kawasaki to please vote in favor of making this unlawful mandate for vaccines illegal in the State. I am also hopeful this will extend to any Community Health Centers allowed by the State to operate their business here. The federal government wants to have business in the state, they have to follow the State's rules, right? You can tell I work for one here in Bethel.

While you are at it can you make these stupid mask mandates illegal also while educating these poor fearful citizens that masks don't work. Common sense and experience has shown this.

Thank you so much for helping Alaskan's stay free especially from these local governments who want to make mandates law such as the mask mandates in Bethel. This is illegal for them to do this I heard but they do it anyway. I heard from the City Mayor they will pass the mask mandates and if the City gets sued . . . well that is what the City Attorney is for. Terrible way to run anything.

Thank you again for all your help.

Angie Smitley

Hello,

My name is Jalyne Sciotti and I am writing in regards to Senate Bill 156.

I am a born and raised Alaskan and I urge you to support SB 156 to keep Alaskans independent and protect our medical freedom. Mandatory vaccines and vaccine passports should be unlawful in the state of Alaska because it is our right to have medical freedom. People should never be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right and capability to weigh the benefits and risks of COVID-19 vaccination, just like any other medical interventions, and to make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection.

Thank you,

Jalyne Sciotti

Sent from my iPhone I am an 80 year old female Alaskan resident since 1983. I believe that I have the right to make my own decisions about my health without government interference personally I think masks have little to do with transmission and I wear them as little as possible. I was vaccinated not because of governmental controls but because I came from a generation that didn't have vaccines when I was a child and I got all those childhood diseases except polio

Hello,

I am emailing you to show my **support** for SB 156. I strongly oppose forced vaccinations of any kind, but especially the Covid 19 vaccine. No one should be forced to get this shot in order to work, go to school, attend public events, get medical care or surgeries, or anything else. This should be a choice!

It is discrimination, unlawful, and unconstitutional to force this on anyone.

I will keep this short and sweet as I have already sent in multiple emails to my Juneau Representatives, Andi Story and Jessie Kiehl. I wanted to make sure my message was loud and clear for the Senate State Affairs hearing today which I cannot attend in person.

Please consider this my official support for this Bill.

Respectfully,
Lisa Idell-Sassi

Dear Alaska Senate State Affairs Committee,

My name is James Walsh and I am a citizen of this great State of Alaska presently living on the Kenai Peninsula. I am writing to you to fervently appeal to your common sense and vote in favor of **Senate Bill 156**. Here is why I think that you should be in favor of this bill

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion**.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Making this vaccine mandatory will do nothing to slow the spread of the virus as numerous studies have shown. The vaccine does nothing to stop the spread of the virus. The vaccine is also still experimental and should not be mandatory for anyone. Please do the right thing and support Senate Bill 156.

Sincerely,

Pastor James Walsh

I SUPPORT SB 156. Protect medical freedom in Alaska! No Alaskan should be forced to choose between keeping their job and following their conscience, religious belief, or medical advice. Religious and medical exemptions can be denied forcing Alaskans into litigation to fight for their jobs or to relent and comply. No Alaskan should face this choice. Alaskans should not be forced to put something into their bodies to feed their families! Protect medical freedom, protect the right to work! Support SB156.

Dear Senators Shower, Reinbold, Costello, Holland, and Kawasaki,

I support SB156, and I encourage you to support this bill. I strongly believe that Alaskans' right to choose whether or not to receive a covid vaccine needs to be protected in law. Right now people are given a "choice," but that choice often also requires them to choose between employment or not, higher education or not, and entry into community events or not. That sort of "choice" is based on coercion and lacks compassion. It also goes against the informed consent principle of medicine. Social rewards and penalties should not be a factor in what sorts of health and medical decisions people make.

Though it's not any one's business, I'll tell you that I am vaccinated. I am NOT anti-vax. But I AM a firm believer that a person's mind and body are their own and that they are sacred. We each get to make our own health decisions, and not every person should be required by mandate to come to the same conclusions on how to achieve health. As we've seen in so many aspects of life, diversity is a good thing.

Though I do have a valid covid vaccine card, I have personally refused to go any event that requires I show it. I stand firmly against vaccine passports as I believe they are more of a charade than an actual measure of health or likely/unlikelihood of spreading covid. They are discriminatory with no true justification. If we are sick, we should stay home, period. A vaccine passport does not prevent a vaccinated person from entering an event when they are feeling under the weather. A vaccine passport does exclude a person who is well.

Most covid vaccines are still in trial and are only able to be administered under FDA Emergency Use Authorization. People should not be coerced, forced, or required to have medical procedures (vaccines or other wise) that have not cleared ordinary regulatory authorization. If the vaccine manufacturers were held liable for vaccine injury, I think everyone would feel more comfortable since they would know the manufacturers have really covered all their bases in ensure a safe product.

I believe SB156 will preserve bodily autonomy, which is the most basic human right. In a time when corporations can cover the planet with plastics that never go away, poison our water with toxic PFAS chemicals and pesticides, and burn fossil fuel without limits—all things that are killing our planet and altering human life as we know it for forever, I think worrying about, mandating, and monitoring an individual's vaccination status is just a misuse of energy, focus, and funding.

I do not like the division that covid mandates have created in our small Alaskan communities. The tribalism on both sides is terrifying. I would like to see SB156 pass so that that people can make medical decisions without basing them on employment, schooling, or social exclusions. Vaccine passports are a form discrimination that has no place here.

Thank you for your service,

Lisa Daugherty

Re: SUPPORT SB 156 - PROTECT MEDICAL FREEDOM IN ALASKA

Brian Edmondson
To: Senate State Affairs; Sen. Mia Costello

[Reply](#) [Reply All](#) [Forward](#) [...](#)

Tue 2/8/2022 10:18 AM

Dear Senator Costello,

To echo the plea of fellow Alaskans,.....**Please SUPPORT SB 156, to protect medical and personal freedom in Alaska.**

The Covid pandemic has become an endemic; essentially, Covid-19 is has become our new flu. Never in the past have we imposed vaccines or proof of vaccination on individuals. Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines. Forcing people to get the experimental mRNA shot will force some individuals to go against their morals, and **it also goes against the Nuremberg Code, as well as the American right to self govern.**

I find it astounding that there is so much we do not know or understand about the effects of the mRNA, as well as the financial/nefarious factors involved with the mRNA mandates and Dr. Fauci. I believe history will not be kind to those involved with mandating this drug on people, especially when there is know vaccine harm. The rest of the world is taking a huge step back from mandates and passports because the severity of the virus has lessened. Why on earth would we become more aggressive with mandates and passports?

Furthermore, moving toward a vaccine passport would infringe on personal liberty. We have God-given liberties to protect ourselves and our children. Vaccine passports are evil, and would threaten those liberties. In other words, nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Thank you for your consideration.

Respectfully,

Brian Edmondson

To Whom it may Concern,

I am in support of the senate bill 156 to protect medical freedom in Alaska. Please protect us from causing undue harm, being coerced into being vaccinated for jobs in alaska, and for protecting our youth from unnecessary medical procedures. We should be allowed to make the decision for oneself and our families oh what is right for our own bodies and health.

Thank you for your time,

Sincerely,

Chelsea D McLeod
