Subject: Support for SB 156, re CoVid mandates

Dear Members of the Senate Health and Social Services,

I would appreciate acknowledgement of receipt of this email.

I am writing today in SUPPORT of SB 156, an act relating to CoVid 19 mandates, and non-discrimination of personal right to choose health options.

The mandates regarding CoVid 19 have had a devastating impact on my business. I have had to give up the full time space I had rented, lost a significant portion of customers and clients, and work opportunities, much to the detriment of the four footed clientele I serve (dog training/grooming/retail). The trickle down effect has been disastrous for "man's best friend", as well as "man".

The ever growing body of research, studies, and testimony is showing that the people of Alaska, and even the world, have been willfully misinformed, and illegally managed, to the detriment of many, including deaths and personal injury.

Please make this part of the testimony record for this hearing, today. You may contact me at this email address if you have any questions or desire further information.

Thank you,

Martha Fischbach

Hello, I would like to voice my support for SB 156 - this is crucial, not only for the immediate term of protecting Alaskans, but also into the future.

Without these protections, the logic of "for public health" can be used for nearly any government intervention in opposition to personal autonomy.

Thank you for furthering this cause.

Subject: Protect Medical Freedom in Alaska and Support Bill SB 156

Dear Department of Health and Social Services, Senator, Representatives,

There is absolutely no reason for the vaccination mandates and propaganda since COVID-19 injections do not stop transmission and do not stop infection. And yet people have lost their jobs, have been kicked out of school, have been denied access to public places for declining this medical intervention.

End all vaccine mandates, and support legislation that will protect me and my fellow Alaskans from vaccine mandate and vaccine passports!

Respectfully,
Isaac McCann

Senate Bill 156

BZ Bruce Zmuda <[redacted]>
To Senate State Affairs Sen. Mike Stowers Sen. Lara Reinbold Sen. Mia Costello Sen. Roger Holland Sen. Scott Kawasaki

Please support SB 156 to protect our medical freedom in the great state of ALASKA.

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Sincerely,

Bruce V Zmuda

Subject: SB156 Support

Dear Senator Reinbold,

I am writing in support of Senate Bill 156 (SB156). We need a State law to protect all Alaskans from overzealous local politicians, no matter where we live in Alaska. In Juneau, we have an assembly that overreaches their authority. They impose arbitrary mandates and encourage events only for the "vaccinated." We need SB156 to become law to protect all citizens regardless of their vaccination status, nor force anyone to be vaccinated against their will. This law would also prevent discrimination because of an individual's vaccination status. Covid has become a political circus and we need law in place to make that stop.

I appreciate your support for this very important bill that protects all of our citizens and our liberties.

Rep Story

Juneau, AK

Greetings from Juneau, Alaska. I am writing today to all members of the Senate State Affairs Committee regarding Senate Bill 156. I urge each of you to support SB 156 for the protection of medical freedom in Alaska.

All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention.

There are serious and valid reasons that many people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska.

Thank you for your attention,

Melissa Zahasky Paul Zahasky [REDACTED]

Rep Story

SUPPORT SB 156 [REDACTED]

I urge you to support S B 156 to protect medical freedom in Alaska.

Many people have a number of valid reasons for declining vaccination. The whole program to date has been a real goat rope with false and unscientific information being given as the rationale for draconian government overreach. Everyday we hear a new unsubstantiated reason for doing things. We have set many students back years in their development, from learning to talk on through the whole gambit of education. Many may never catch up. The government says you must take the shot and if it kills or severely damages you that is tough. Neither the pharmaceutical company nor the government is liable.

Government should also not be allowed to selectively decide which medicine prescribed by a doctor can or can't be given to the patient. In the case of COVID-19 there are too many verified stories of patients who were not allowed to obtain medications that in many instances were shown to save the lives of those who received them. Thank you for your consideration of my comments. It is a pleasure to hear of a bill, being considered, which has something to do with day to day Alaskan life and is not a political witch hunt.

Respectfully, Chuck Bickley Wasilla, 99623 Chuck Bickley [REDACTED]

Dear Honorable Committee Members,

Please support Alaskan's rights to medical freedom and self-determination by allowing Senate Bill 156 to be moved forward for Legislative consideration.

Thanks, Mike M D [REDACTED]

To Senator Reinhold,

I want to see vaccination discrimination outlawed in Alaska. I am with the public every day, and hear the results of vaccination relative to outcome. There is so little connection, I don't know why there is any credibility to vaccination left. It is far past the point of concern about health and is merely about control, which is highly unconstitutional.

Most sensible questions are never answered by those who insist on vaccinating: why the border is open without regard for screening or vaccination; why we are targeting the lowest risk members; why proven treatments are overlooked.

I responded very quickly to proven treatments, and refused and will refuse to be the experiment of someone who unwittingly identifies himself as 'science.'

To: Sen. Lora Reinbold; Senate Community and Regional Affairs; Senate Judiciary; Sen. Peter Micciche; Sen. Shelley Hughes
Subject: SB144

Senators and Committee Members,

I'm writing this evening to express my thoughts as a determined and informed Alaskan voter who was struck down in my prime with long-term disability and has experienced discrimination and violation of my Constitutionally-protected human rights, particularly over the past two years of abuse related to COVID-19. I decry discrimination and support Constitutionally-protected human rights including rights to medical privacy and independence; the right to free and open debate; the right to unfettered access to robust scientific data and methods; the right to freedom from coercion; the right to defend oneself, one's property, and others; the right to peaceably assemble; the right to bear arms; and right to free speech; and others. To this end, I support SB144 "an act relating to disaster emergencies".

However, the bill must go farther and impose specific minimum personal fines/compensation to affected/injured parties and minimum personal penalties for each offense.

Government exists in service to the community that empowers it, to preserve our Constitutionally-protected human rights and there must be accountability. In addition, our public appointed and elected officials must be held to a higher standard of integrity and transparency.

I'm reaching out to ask you to consider this matter carefully before you have an opportunity to discuss this bill with fellow lawmakers or cast a committee or Floor vote. Please make this a priority to pass this session.

Mariyanna

I have cc'd your Senator, Jesse Kiehl.

Thank you for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

Senator Lora Reinbold

Dear Senators,

COVID-10 injections do NOT stop transmission and do NOT stop infection, therefore herd immunity is impossible to achieve through "vaccination" and therefore, mass vaccination have no epidemiological justification, and therefore the societal goal of vaccinating everybody to protect others is null.

With this reality, vaccination mandates go into the trash can.

These two acknowledgements from the Center for Death and Coercion (CDC) are official recognition of the statement above:

Hi Madeleine,

Thank you for your reply. You're more than welcome to keep a copy of it if you think it will help the cause to end the mandates. I'm in Nikiski/North Kenai. My representative is Ben Carpenter. I just sent him a copy of my testimony to make sure he gets it.

My family and I feel quite isolated in Alaska right now, away from the our friends and family in the Lower 48. We avoid TSA as we have no desire to face the possibility of having to be fondled or have to go through those x-ray machines. It's just so intimidating, invasive, and the threat of strip search? Yikes! Now we can't drive through Canada unless we're vaccinated. This does not feel like freedom. Anything Senator Reinbold's office can do to help Alaskans and Americans who are citizens and law abiding to travel freely would be wonderful, especially given that people who aren't law abiding or citizens are entering our country and the red carpet is rolled out for them. Even the unvaccinated! Thank you for all that you guys are doing to help support freedom!

- Mrs. Sanchez

Subject: Re: SB 156

I also write in support of SB 156. It's a shame that there needs to be a law like this even introduced in order to reinforce our already existing freedom from medical and religious tyranny. We shouldn't be living of such threats and in fear like we have for the last 2 years with our freedoms being threatened, restricted, and suspended. Never in my life did I think I would see experience this in America. If I had known my country would do this to its people, I never would have signed up to defend her after 9-11. I don't know that living under the tyranny of someone like Saddam Hussein would be much worse than the trend away from freedom that we're seeing now. We all see where this is going. For many years we warned that vaccine mandates would be threatened and pushed on us, and we were called conspiracy theorists, but here we are. Maybe tyrannical governments in the past have established precedent with vaccine mandates and restrictions on freedoms for various reasons, including health concerns, but there is also precedent of mass genocide by tyrannical

Subject: Kenai testimony SB156

Thank you Jeffery Veal for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

I have cc'd Kenai legislators and hope they will become co sponsors on this critical piece of legislation.

Subject: Senate Bill 156

Dear Senator,

I'm writing in support of passing Senate Bill 156 and I appreciate your time.

My name is Teea Winger, I'm born and raised in Kenai. I'm a mother to three children (7,9,12). I serve on the Kenai City Council and my husband works in construction. We believe strongly in giving back thru volunteering, monetary donations or one's time.
As a mother it's my obligation to do what's best for our children. Those tough decisions start at days old with immunizations. Our children were given no more than one oral or injected vaccine at a time, thru all the "sets" of baby immunizations. That was our choice to safely administer vaccines one at a time to our children. My husband and I are not anti-vaccination we've both had all our vaccines as children and had adult boosters. It's our choice to make an informed decision on which vaccines our family receives. Our family does not want the flu, HPV or COVID vaccines and that should be our choice without consequences.
We have come to a point in this world that I never thought our we or our children would experience, forcing a vaccine without choice.

I understand the hardships we have all faced while navigating the last two years of a COVID world. However, no one should be denied the right to earn a living, go to an event, medical procedures, shopping, or education over a vaccination status. My husband should not be worried about leaving a company he loves to work for due to fear of forced vaccination. This puts unnecessary stresses on us and our family.

If a person wants to be vaccinated, that's great and their choice! If they want to wear a mask by themselves in the car, that's great and their choice! If a person doesn't want to be vaccinated or wear a mask, that's great and their choice!

This body has a chance to draw the line in the sand and say enough is enough. Policies are proving to be more deadly. This body has a chance to stand for personal liberty and the freedom to choose. In December 2021 the Kenai City Council voted unanimously to adopt Resolution 2021-70 Opposing Government Mandates Requiring Vaccines and Face Coverings Related to COVID 19. I will attach it. Our body has drawn the line in the sand.

Please vote yes on SB 156

Thank you,

Senator Lora Reinbold,

Thank you for your service to our great state of Alaska.

I see that the Senate Bill 156 will be considered tomorrow in the Senate State Affairs committee. I urge you to support Senate Bill 156. As I read the bill, I understand it will protect Alaskan's freedom to make their own choice about the COVID 19 vaccination. This choice should be with each individual and should not determine their job status or infringe on their medical privacy rights to disclose their status. There are many reason someone may or may not take the vaccine. That should be a private decision for them to make. One that they are able to weigh the benefits as well as the risks of the COVID 19 vaccination without feeling coerced.

Again, I ask the you stand in support of Senate Bill 156.

Thank you,

Sharon Walsh

HB 156
bet arm
penalties
legal

Thank you Senator Reinbold. I spoke to you by phone at your Public Affairs Hearing last week. My comment was in the form of a question of penalties for violations should the legislation become law. I hope you will ensure maximum penalties are available to prosecute violations.

I am stunned that Sen Myers is taking a weak position on something so important. Thanks for the information. My only guess is that he is unaware as to the magnitude of mandating a vaccine that has seriously harmed hundreds of thousands, not to mention killing 23,615 people as currently reported in VAERS. I guarantee no government organization will play the part of God and demand I get injected with a substance that is clearly unsafe, ineffective and killing my fellow Americans. I will remind you of the one of many Alaskans who testified at your hearing that suffered a permanent injury (Crohn's disease) because of this "vaccine". He will get no compensation because of the EAU status given to pharma that grants them a get out of jail free card and the Government won't even acknowledge the problem so he can't tap into the fund (I cannot recall the name) established to compensate vaccine injured individuals. You asked him a question about the medication he should be on and he replied it's \$1000.00/mo and he cannot afford it so he isn't even treating it. THIS pissed me off to no end. Thanks for your good work. I suppose we'll have to work on Sen Myers.

Sen Myers--

You're now in the To line. The accusation is you've gone limp on support for such a key piece of legislation and have actually stood in front of it and even harmed it. If you don't support HB-156 please have the guts to express your views. However be aware I will give you full credit for your position... whatever it is. Please Respond

Michael

Distinguished Committee Members,

As a proud citizen of this state, I am thankful that our communities are small and represent the fierce independent nature that Alaskans are known for.

In regards to SB 156 which you will be considering tomorrow, I plainly urge you to support this bill. Alaskans have the right to determine whether a COVID-19 injection is the right medical choice for themselves and their children, just like we would with any other medical choice.

This decision should be able to be made freely, without coercion and with access to accurate, transparent information. Any variation or inability to make this decision based on these factors or obstacles created to access this information is blatantly illegal, considering test subjects in medical trials or any human experiment are given a full picture of the tests they are to undergo or KNOWINGLY forfeit those rights. We should be given the same decency.

Trusting for an outcome of freedom tomorrow.

All the Best,

Devin Cress and the Cress family Devin Cress [REDACTED]@olive.com

Hello,

I am writing in support of SB 156.

All Alaskan's should have a choice and should not be discriminated against, especially for something that is under emergency use authorization. Many people have valid reasons for not wanting to get vaccinated. The science does not back up the COVID vaccines. Look at other counties opening up and removing all mandates, and getting rid of vaccine passports.

No Alaskan should be fired from their job because they are not vaccinated.

It is time to end the charade.

Thanks,

Mike

Michael

My staff can provide any information on amendments and voting record on the amendments. I warned the majority leader that if they messed with my critical amendments last year, it would likely have more than a 10 fold impact of SB91. Sadly they ignored my grave warning and gutted my amendment on the Senate floor and made it so weak, I decided to pull it. Others times the amendment successfully passed but never with the full impacts needed because I could not even get the conservatives on board, they cared more about employer not employee rights, even though the constitution protects INDIVIDUAL LIBERTIES, not corporate ones.

Honorable Senators,

I am writing to ask for your support for SB 156, to make vaccine passports and so-call immunity passports" unlawful in Alaska. It is unconscionable to force people to take any kind of medical treatment without their permission or restrict their access to society based on it. Instead we should insist on education and let every family decide what measures are best for them.

My arguments: -

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Best regards, John Hawkins Anchorage AK ~~John.Hawkins@alaska.net~~

No vaccine mandates, passport's etc!

Ella Cotter North Pole Aileen Cotter ~~Aileen.Cotter@alaska.net~~

Please support SB 156 Virginia Burke ~~Virginia.Burke@alaska.net~~

Hello,

Please protect medical freedom and privacy in Alaska. Every persons right to make their own informed choice regarding vaccinations, without coercion, must be protected. Many Alaskans have good reasons for declining a vaccination; personal heath conditions, covid-recovered natural immunity, and conscientious objections to unethical methods. In addition the latest variant easily and frequently re-infects both vaccinated and unvaccinated. This breakthrough is going to continue with ongoing mutations. Thank you, Jon Agosti Anchorage, AK Jon Agosti ~~jon.agosti@alaska.net~~

Please support Senate Bill 156! I am not interested in having any more of my freedoms removed! Alaskans don't want it! Cathie Irwin Kodiak, AK Cathie Irwin ~~Cathie.Irwin@alaska.net~~

Please...I urge you to use all of your resources to support SB 156 and protect our medical freedoms!

Take a stand by doing everything in your power to stop the eroding of our Freedoms.

Sent from my iPad Carolyn Morse [REDACTED]

Members of the State Affairs Committee:

I add my voice to those urging you to recommend passage of SB 156 and make vaccine mandates and "passports" unlawful in Alaska. This legislation is needed to guard against government abuse of power to control individual lives and compel individual private medical choices that are constitutionally protected. This legislation is particularly important to end this over broad covid emergency orders and prevent a recurrence of these abuses in the future. No one should be forced to obtain particular medical interventions to keep their jobs or have the freedom to live and move in society. It has always been the case under our constitutional law that each individual is free to determine their individual risks and benefits from any medical treatment and choose the most appropriate course for themselves. If a medical intervention does have clear benefits relative to risk, people will not have to be forced into it. Many prefer not to participate in experimental medical trials unless all other interventions have failed and they should not be forced into it against their will.

Hello, I am a life long Juneau resident, voter and family member. I am reaching out to testify about what I feel is the right thing to do.

Remember that everyone has the freedom to choose a vaccine. However, to require it is an unacceptable step towards faceless tyranny.

Make unlawful mandates illegal again!

Darrell Harmon

Darrell Harmon [REDACTED]m

I am Estella Cotter, I live in North Pole, Alaska, and I am writing to ask you, to urge you, and if I must, to BEG you to protect our basic human right to govern our own bodies. NO mandatory vaccines NO mandatory testing. NO vaccine passports.

Thank you,

Estella Cotter 2 [REDACTED] North Pole, Alaska 99705

907-888-6585 Estella Cotter [REDACTED]

Hello,

I am writing in support of SB 156.

All Alaskan's should have a choice and should not be discriminated against, especially for something that is under emergency use authorization. Many people have valid reasons for not wanting to get vaccinated. The science does not back up the COVID vaccines. Look at other counties opening up and removing all mandates, and getting rid of vaccine passports.

No Alaskan should be fired from their job because they are not vaccinated.

It is time to end the charade. Sorry if this came twice, website shows a different address than I was verbally told.

Thanks,

Mike

North Pole Mike m[REDACTED]@com

Dear Senate State of Affairs Committee,

I am emailing in regards to Bill SB 156. I'm urging all of you to support this Bill for all Alaskans and our FREEDOM. 1st because it is the Constitutional thing to do and also the moral thing to do.

This Country was founded on FREEDOM to choose our religion and how we choose or not choose to live our lives and that includes our MEDICAL FREEDOMS..

I had to quit my job at ANTHC (AK Native Medical Center) I was a Medical Biller working at their Business office because of the illegal Covid Mandates this currant administration has been pushing.

I had several LEGAL grounds for asking for an expemption all of which were never considered.

1. I am Christian and I do not agree with injecting myself with aborted fetal cells
2. I had just recovered from stage 4 colon cancer treatments which included chemotherapy. I was not going to put my body under any more undue stress then its already been through
- 3 Most important, it is ILLEGAL to force any experimental drugs / procedures on ANYONE pursuant to the Nuremberg Code unless they consent.

This "consent" should be VOLUNTARY. And by VOLUNTARY I mean it shouldnt be a stipulation for keeping your job or being able to travel FREELY or to be out in public.

People will be watching closely. Those of you who do not support this Bill for our freedom will be remembered when election season rolls around.

Thank you Lora Reinbolt for introducing this Bill. I support it whole heartedly! Please keep fighting for our freedom.

Sincerely,

Alice Amik Anchorage, AK alby amik [REDACTED]@n

From: Kendal Pike Sent: Thursday, February 3, 2022 5:21 PM Subject: SB 156

To: Sen. Mike Shower <sen.mike.shower@akleg.gov>; Sen. Mia Costello <Sen.Mia.Costello@akleg.gov>; Sen. Roger Holland <Senator.Roger.Holland@akleg.gov>; Sen. Scott Kawasaki <Sen.Scott.Kawasaki@akleg.gov>; Michael Kruse <mike.t.kruse@gmail.com>

Senators,

I am a healthcare provider in Palmer and mother of 3 that is very concerned about the lack of privacy and freedom of choice we see in our State. While I worked through the entire pandemic without question, I was fired after 7 years over not being vaccinated. The hospital I started working at recently has harassed me about my religious beliefs and aggressively denied and requested additional documentation as well as requesting that I sign a document stating "I acknowledge that being unvaccinated can have life threatening consequences for my family, community, patients and coworkers". As these particular vaccines are NOT sterilizing and vaccinated individuals spread the virus equally, and some studies show more than, the unvaccinated it is imperative that we protect individual rights to choose what is best for their body and family.

See these studies for more information:

<https://www.medrxiv.org/content/10.1101/2021.11.12.21265796v1>

[https://www.thelancet.com/journals/laninf/article/PIIS1473-3099\(21\)00648-4/fulltext](https://www.thelancet.com/journals/laninf/article/PIIS1473-3099(21)00648-4/fulltext)

<https://www.medrxiv.org/content/10.1101/2021.07.28.21261295v1>

<https://pubmed.ncbi.nlm.nih.gov/34351882/>

As transmission is proven in both cases of vaccinated and unvaccinated individuals, forced participation in and proof of this medical intervention is not only pointless but intentionally cruel. I fully support SB 156 and encourage you to parcel out conditions of discrimination by private business where legal.

I am a personal testimony to being harassed based on my long held religious beliefs and denied exemptions arbitrarily. Businesses are not honoring the exemptions outlined by federal law nor are they accountable for the adverse events following coerced vaccination. Medical interventions should not preclude you from any part of society nor be public information to be abused. Hold the businesses accountable for any adverse events following vaccination to include any known events that could potentially occur as a result of vaccination including but not limited to blood clots, blood disorders, myocarditis, pericarditis, GBS, stroke, neurological problems, etc. In this way the individual who was forced to get the vaccine to be able to provide for their family, now has recourse against the business.

The business will be much less likely to force a product on employees and violate their ADA and civil rights exemptions if they will be on the hook for disability, hospital bills and civil litigation.

I thank you all for your time. I will be following this closely and would gladly welcome any discussion.

Warmly,

Kendal Kruse

Cc: Madeleine Gaiser
Subject: PLEASE set hearing for SB 156

Chair Wilson and Vice Chair Hughes;

I am writing to request you please set a hearing for SB-156. No one should be fired or refused employment because of their choice to choose medical freedom and bodily autonomy over fear and coercion.

Please protect our rights of choice and medical freedom.

Citizens are being coerced to choose treatments inappropriate for them based on their personal medical history and beliefs.

The following is my personal experience with this current injustice.:

I was employed from 6/29/2015 to 9/10/2021 (over 6 years) with Chugach Training & Educational Services LLC at Alaska Job Corps in Palmer as a Medical Record Clerk in the Wellness Clinic.

(This included working from home 2 days a week for several months during the 2020 COVID restrictions period 4/2020-11/2020 - all staff was tested before our staff and students were allowed to begin to return to Center.)

About 3 PM on Friday 8/27/2021, a user wide email was sent from our Center Director informing us that due to the Biden issued COVID vaccination mandate, as of 9/01/2021 all employees were required to show verification of COVID-19 vaccination or to complete & show verification of negative COVID-19 tests 3 times a week to have access to the Alaska Job Corps Center to continue working.

Due to religious and health reasons, I do not wish to risk taking the vaccine, and feel that is is discriminatory to request only unvaccinated persons to test, as vaccinated persons can still contract and spread the virus.

I expressed my concerns and beliefs to my Center Director who indicated the order was issued due to the Federal mandate.

I worked the following Monday 8/30 & Tuesday 8/31 and submitted my remaining leave time through 9/10/2021 in hopes of a change in policy. (I had already entered leave for Friday 9/3 for an extended 4 day Labor Day weekend).

on 9/13/2021 Monday, I spoke to HR and informed her I would need to turn in my keys and ID if policy had not changed. I was asked to write a letter of resignation. I indicated I was not resigning, but being forced to find employment elsewhere to earn income to survive since they were not allowing me on Center to work and wrote a letter to that effect upon submitting my keys & ID.

I applied for state unemployment benefits on 9/14/2021 online and have been continuing to file weekly claims and submitting required job searches.

I received a phone call from AKUIB for details of my employment separation and was highly offended to be subjected to having to justify my personal and medical reasons for my decision.

On 10/17/2021 I received a letter in my PO box postmarked 10/14/2021 (letter dated 10/13/2021) from UI Claim Center. The UI Claim Center letter indicated they determined that I did not establish good cause for voluntarily leaving my work & therefore denied benefits from application until 10/23/2021 as well as having my maximum payable benefits reduced by 3 times my weekly benefit amount.

Subject: RE: SB 156

Thank you Tracy for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

I have cc'd your legislators. Sen Hughes is a Co sponsor and I hope Rep Johnson will be in the House.

Senator Lora Reinbold

Subject: SB 156

State Affairs Committee, Senator Reinbold:
I fully support SB 156.

A vaccination should never be a requirement to exercise our rights. The privacy of one's health information including vaccination status should be protected.

No one should be discriminated against in any way based on vaccination status. Vaccine passports embody discrimination and carry negative historical associations.

Each person should have the right to decide whether or not to be vaccinated. This is only a choice if one is free to weigh the factors without pressure, coercion, threat, or social stigma. No one should lose a job or have a job application turned down because of a vaccine. No one should be barred from school or college because of a vaccine. No one should be denied or limited medical care because of a vaccine.

Please support SB 156. It needs to go before the legislature and be passed.

Thank you,
Tracy Wilson

Subject: Urgent Concern Ref. Forced Vaccinations & Digital Currency

SBSL
testimony

Dear Senator Hughes,

I want to say thanks for your dedicated service to the People of Alaska I appreciate all you've been doing for all of us! I'm deeply concerned with what I see as a coordinated agenda that's being aggressively rolled out since the onset of the current viral epidemic! It's very clear to me that several facets of this coordinated agenda (which I believe have been in the planning stages for many years) are now literally at our front gates and need our urgent attention! I feel it is urgent for all of us as Americans, and specifically us Alaskans to stand up for what we believe in and to speak out about those things that we oppose!

The media is all a buzz with news about the pharmaceutical companies trials and development of a vaccine for covid-19 and timeline estimates for a vaccine to be administered to the public. Many statements are being made, and laws, statues, and policies are now being formulated by federal, state and local politicians concerning this vaccine which some see as being available in the not too distant future. It seems obvious to me that the momentum is building for the introduction of forced vaccination policies in many states. While I'm not opposed to the medical research and development of vaccines that can be tested and proven to be safe to be administered to the public, I have grave concerns about taking any vaccine that's being rushed and administered without proper testing, trials and study of the potential long term side effects. I also feel that taking any vaccine should be a personal decision made by the individuals and families involved and that they should not be forced on anyone, at any time! I feel at this time that this is an issue of immediate concern and that We The People of the State of Alaska should proactively address this issue by introducing a bill making it illegal within the State of Alaska to force anyone to take a vaccine against their will! We urgently need someone who would have the courage to introduce such a bill and argue it's merits before the State Legislature and I think that you Senator Hughes would be the People's Best Chance to bring this forward! I believe a large majority of Alaskans would support this measure and would support you if you sponsor, co-sponsor, or support such a bill! Due to the gravity of this pandemic situation and the grave implications for our state of a misguided forced vaccination policy I'm also calling for our Governor to convene and emergency session of the legislature to discuss and vote on this measure, as soon as possible!

Another facet of this coordinated agenda that I see being promoted is the push to implement a forced departure regarding the use of cash and the roll out of an all digital currency, under a "bio-security" policy. This is another issue that I see looming on the horizon and as with the forced vaccination issue I feel that it would be in the best interest of the People Of Alaska to proactively introduce a bill in the State Legislature to provide and allow for the use of gold and silver as legal currency in Alaska regardless of what federal policy may become regarding the use of cash money. This would not be an empediment to stop the roll out of digital currency but simply a provision to allow the People of Alaska to freely buy, sell, and trade using sound money such as gold and silver.

Senator Hughes we are living in perilous times and those of us who still believe in The Constitution of the United States and our Bill of Rights need to stand up and speak up for those rights lest we see them fade into the night on our watch! I'm writing to ask for your help on these issues because I feel you're the People of Alaska's best hope to take action and get something done before it's too late! The time to act is now and may God be with our great Country and our great State of Alaska!

Sincerely,

Ross Perrine

~~5178 Spawen Court~~

December 5th, 2021

Governor Michael Dunleavy
Office of the Governor
PO Box 10001
Juneau, Alaska 99811-0001

Dear Governor Dunleavy,

I implore you; your state needs you and they need you *NOW*. People have, are, and will be at risk of being terminated from their jobs. Critical lifesaving early treatments and care are being blocked. This is not up to the Federal Government to determine. This is a state's decision, and I am asking you *to stand for your people*. Please take the time to read this and act. Courage is contagious, help set the example.

This *must be* a free choice decision to either get a shot or not get the shot. There should be *no coercion or shaming or disingenuous* nontransparent information. This just is not right. It's not moral or ethical. You need to *STAND UP*. Please. We need a comprehensive solution, and it is very apparent the shots/boosters are not the only solution that needs to be available. Thank you for taking the time to read my letter and thank you for all you have and are doing.

Short Version:

Actions Needed:

- ***Immediately stay any mandates for shots related to COVID-19 or any mandates requiring shaming persuasion techniques*** such as: Requiring employees or contractors to take the shot/booster or face termination or requiring only unvaccinated or undeclared individuals to get weekly testing at their expense or requiring that only unvaccinated or undeclared individuals be shamed and coerced by requiring that only unvaccinated or undeclared individuals maintain social distancing and masking. *All of these things* should be up to the individual, PERIOD. Their jobs and livelihood *should not* be blocked. A letter in regard to federal contractors is not going to do it. You need to act, and you need to put teeth into it. You need to apply this not only to critical responders but to *all* companies doing business in this state. I urge you to review and model what Florida is doing. The legal implications I will outline below; however, you don't have time. Your state is bleeding out.
- ***Immediately cease and desist with blocking the unique standard of care between doctors and their patients.*** Allow the individuals to choose with their doctors what the best choice is individually and with medical freedom from coercion and penalty for choosing not to follow the mass protocol being pushed by the federal government. This is a state decision. Sir, if you have to make changes, do it. The folks that are blocking serve at your pleasure. It is vital that you have the right people on the boat and that they are all paddling in the same direction. You have the power. Use it. I will outline below; however, you don't have time. Your state is losing lives *right now*.

Subject: Re: SB 156

SB 156 Group.

I was just notified by a friend that this free "safe and effective" vaccine will no longer be "free". HRSA will no longer be reimbursing for the vaccine.:

The Uninsured Program has stopped accepting claims for testing and treatment due to lack of sufficient funds. Confirmation of receipt of your claim submission does not mean the claim will be paid. No claims submitted after March 22, 2022 at 11:59 pm ET for testing or treatment will be processed for adjudication/payment.

On April 5, 2022 at 11:59 pm ET, the Uninsured Program will also stop accepting vaccination claims due to a lack of sufficient funds.

*Submitted claims will be paid subject to the availability of funds.

This should be a wake up call to all legislatures. The emergency is over.

On Fri, Mar 25, 2022 at 1:23 PM Lyndsey Sanchez <[REDACTED]>

I also write in support of SB 156. It's a shame that there needs to be a law like this even introduced in order to reinforce our already existing freedom from medical and religious tyranny. We shouldn't be living of such threats and in fear like we have for the last 2 years with our freedoms being threatened, restricted, and suspended. Never in my life did I think I would see experience this in America. If I had known my country would do this to its people, I never would have signed up to defend her after 9-11. I don't know that living under the tyranny of someone like Saddam Hussein would be much worse than the trend away from freedom that we're seeing now. We all see where this is going. For many years we warned that vaccine mandates would be threatened and pushed on us, and we were called conspiracy theorists, but here we are. Maybe tyrannical governments in the past have established precedent with vaccine mandates and restrictions on freedoms for various reasons, including health concerns, but there is also precedent of mass genocide by tyrannical governments when the people would not comply with their immoral demands, so precedent does not make something established, moral, or acceptable, in our present, or our future.

I choose to not take the vaccine on religious grounds, as my body is my Temple, and I do not desire to defile it with what I, due my religious beliefs, deem to be toxic. My God, who is my Creator, is my Healer, and my Protector. Full stop. I only want to put into my body what I believe He deems to be acceptable in my Temple. I don't know whether this vaccine or its passports could be the dreaded mark of the beast, but see as how religious convictions are being tested with it, and people have been imprisoned with lockdowns, forced to cover their faces and airways, not allowed to go shopping or open their businesses to make an income, all in order to pressure them to comply, I see how it could be, so no thank you, because we all know what the Bible says about those who take that mark! If you don't know, it would behoove you to open a Bible and look it up! I also, and some of my family members, have in the past had harmful reactions to vaccinations, including developing lumps, allergies to foods like fish and nuts, hearing loss, seizures, dangerously high fever, severe respiratory infections such as pneumonia, etc... I shutter to think what else may come down the road as a result of years and generations of vaccinations. I have such severe drops in blood pressure when presented with needles that I have several times passed out while giving blood and being given IVs, that I once was ordered by a doctor to never give blood again because the last time I gave blood he said he could not find a pulse and I did not seem to be breathing. He said it was not easy regaining my vitals and he at one point became very concerned that I might not regain

immunity. Vaccines have never contributed to the eradication of any pathogen with animal reservoirs, which every pathogen except Variola (smallpox) has. Therefore, there is no governmental interest in in forced or coerced vaccination. Vaccination is an immune system manipulation that any individual may consider, but it will have no effect on the disease risk of another individual.

Nor can an argument against SB 156 be based on the Biden administration's mandate for Medicare/Medicaid billing. While the Supreme Court of the United States has chosen not to enjoin such a mandate, it is still in trial with no final decision. It should be noted that no FDA approved vaccine for COVID-19 is available in the United States at present. While Comirnaty has been approved, it is not available in the US. Therefore no available COVID-19 vaccine in the US can be required as all are experimental, and no one can be forced to consent to experimental treatment under federal law. Further, while said mandate prevents submitting bills to Medicare/Medicaid from unvaccinated providers, it does not prevent any provider from delivering and charging for care. Employers can comply with SB 156 simply by charging patients directly for their services. The Federal government will then have the choice between ending its mandate, or making Medicare/Medicaid useless in Alaska. In short, SB 156 would simply make all employers and healthcare providers into a large bargaining block against the federal government's unconstitutional mandate. In fact, it is this financial coercion of this mandate that requires a "don't ask, don't keep records" amendment to SB 156, so that no employer or governmental entity can use vaccine status to discriminate on specious grounds.

SB 156 stands on the firmest ground, both for medical, biological and constitutional reasons.

Senator Reinbold,

Today I listened to the discussion surrounding SB156 and I support you whole-heartedly.

I am a health care provider, Registered Dietitian, in Palmer. I was fired for not receiving the vaccine from Norton Sound Health Corporation for which I worked nearly 7 years though I was breastfeeding. You might be aware that several infants have died as a result of the mothers vaccination through breast milk exposure. I am now working part time for Petersburg Medical Center, completely remote and they have harassed me and rejected my first letter for Religious Exemption. I submitted a legal letter with citations and they rejected that and wanted me to fill out their specific form to include signing that "I acknowledge by not getting the vaccination I am potentially life threatening to my family, community, patients, and coworkers. I have witnessed vaccine injury in the acute care. I will likely get fired as they have not told me whether they accepted my religious exemption appeal and have said they may ask for verifying documents.

Might I suggest if you add anything to this bill regarding private businesses, you could add language that any injury that is included as a potential risk of any of the vaccines (stroke, myocarditis, heart attack, GBS, neurological damage, etc) if the business forces vaccination as a term of employment they are liable for any medical costs for any of those health issues following the vaccination. Do not write that they have to be proven to be associated with the vaccine since no

Subject: I support HB 156

Senate State Affairs Committee:

Alaska should set the example for America and the world as the place where the right to life is protected and celebrated from conception to natural end of life. That right to life includes the freedom and liberty to live without coercion from employers, schools, the healthcare establishment, and the government.

I support SB 156 and the prohibition of vaccine mandates and the requirement to share any of my private healthcare information.

I urge you to vote in favor of protecting my life, liberty, private healthcare information, and vaccine status. Vote yes on SB 156 today.

Subject: SUPPORT SB 156

Senator Shower,

Please SUPPORT SB 156. To protect medical freedom in Alaska!

Nobody should be fired, kicked out of school, or denied access to public places for declining to accept a medical intervention.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines. And many of us have loved ones that have been hurt and even died after taking the COVID shots.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination themselves, just like other medical interventions, and make a free and informed choice, without coercion.

SUPPORT SB 156!

Sincerely,
Dennis and Michele Deering, Palmer AK 99645

Douglas McKinnis <douglas.mckinnis@alaska.gov>
To: Senate State Affairs

Members of the Senate State Affairs Committee:

Please support SB156!!

For personal freedom to thrive, vaccine passports must be codified as unlawful. We need your support.

No free society can endure the tyranny of vaccine passport restrictions.

Remember the Truckers!

They speak the message of the Alamo. Personal Freedom must be defended. Attacks on our constitutional rights will be defended at all costs.

Please join the freedom loving by supporting SB156.

Thank you sincerely!

Doug McKinnis

Palmer, AK 99645

Hello,

My name is Desiree Cook and I am a Palmer resident with my husband and 4 kids. My husband works on the slope and the uncertainty of pending vaccine mandates over the last 12 +\ months had been very stressful. Thankfully, due to the SCOTUS ruling, he doesn't have to worry about choosing between his personal autonomy and feeding his family.

I am not in the same boat. I am going to graduate from UAA with my bachelors of science in nursing in May 2022 and the uncertainty of whether or not I will be employable due to turning down a vaccine for an illness I've recovered from twice weighs heavily on me.

All nursing theories throughout nursing school have taught that individual autonomy is to be respected, that the patient always has the right to refuse, and that the job of healthcare workers is to educate not force any medical treatment - this is called provided informed consent. These are fundamental nursing concepts. Therefore the thought that an individual forfeits the autonomy of their body by merely entering the field of health care is an atrocity and violates basic human rights. The counter argument that I've heard is invalid which is that the job of the nurse is to protect their patients. The vaccine does not stop transmissibility and this has been proven time and time again. Therefore, an unvaccinated and vaccinated nurse must practice the same safety protocols to prevent a hospital acquired infection.

The real issue is that nurses and doctors are being segregated from society by losing their jobs and being denied certain services. This is not ok nor is it what being an Alaskan is about. We embrace diversity and foster an environment that is welcoming to opposing ideas. We do not force one sect of a population to succumb to another.

I implore to the committee to protect every Alaskan's right to work and right to decline a medical intervention through informed consent in the state of Alaska.

Thank you, Desiree Cook desiree cook d [REDACTED] m

Senate Bill 156

Mandy Gates <[REDACTED]>
To Senate State Affairs

Committee Members,

My name is Amanda Gates. I have been an Alaskan for 30 years. My family and I love this state and all that it stands for.

With that said, I urge you to please support Senate Bill 156! Without your support, our state of hard working, innovative and entrepreneurial individuals will decay. We will become a state of divided personalities that no longer help their neighbors and instead will label by vaccinated and unvaxxed.

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Please take the points into consideration while making your choice. Our state depends on it!

Sincerely,

Amanda Gates

Gunalcheesh for taking the time to hear my story.

My name is Tina Johnson . I am an Alaskan Native Tlingit from the Kaagwaantaan Clan. I am also a shareholder of Huna Totem Corporation. I was born and raised in Hoonah, Alaska and have made it my home for over 70 years.

Hoonah opened a cannery in 1912 that was in operation when I was a child. My father was a fisherman and my mother worked there. We used to live at one of the cannery cabins as a family during the fishing season. I would make trips to picnic on the beach in front of the cannery as I grew my own family. I used to take my grandchildren there all the time. I would take them fishing off the beach.

In 2004, Huna Totem Corporation renovated the old cannery, naming it Icy Strait Point and turned it in to an attractive tourist destination. Icy Strait point has restaurants, a crab shack, gift shops and more. This was to help our struggling town with jobs and bring money to our businesses. Things were going well until covid, and like all other tourism in Alaska, our businesses got hit hard.

In response to the covid pandemic, Icy Strait Point (Huna Totem Corporation sister company) is requiring vaccinations for all employees, guests and any residents who want to visit Icy Strait Point. Employees are unable to make their own choices regarding the vaccine. Along with those mandates, they are not allowing residents of Hoonah and even Huna Totem shareholders to come down to Icy Strait Point without a vaccine. It angers me to see the requirements of the vaccine being enforced in our small town. We see and feel the division it is causing. As a shareholder, it makes me angry to see that it is my corporations money that funds this place to operate, and I can't even step foot on our property. It is my right and any individuals' right to say I am not going to take the vaccine and I should not be penalized for it. Tourists can get off the cruise ship, use the cannery for touring and walk in to our village. It is outright discrimination to say I, an unvaccinated person do not have access to my land. I would like to see the SB 156 pass and stop this division in my community.

Tina Johnson

Subject: In support of SB 156

I'm writing in support of SB 156.

I live in Sitka, where some have begun to develop a medically discriminatory, informal vaccine passport system where certain non-profits and businesses are refusing entry to residents without proof of vaccination; those I'm aware of include the Sitka Fine Arts Camp, which my children enjoyed for several years but are now unable to attend, and Ludvig's Bistro, a higher-end restaurant. SFAC also presents various plays to the community throughout the year, with many community members now barred from attendance because of their Covid vaccination status. These groups have done this despite existing local, state and federal medical anti-discrimination laws. As far as I know these and other entities have not yet been challenged legally.

That I even have to write this email — that you even have to take up the passage of this bill — is astonishing to me. No one should be required to receive ANY substance into his/her body without informed consent and the right to say no without discrimination — ever. We are not cogs in a civic gear — we are individuals who will make the decision on whether to be vaccinated in consult with our families and medical provider(s). And when you consider the growing body of yet-to-be-publically-acknowledged evidence that these yet-EUA vaccines not only are ineffective, but actually harmful to so many, this should be a non-issue. But here we are.

I want to say thank you to the sponsor(s) of this bill, and that you have my family's support in Sitka as to its passing.

I appreciate all of your work,

Amy Bethune
Sitka, Alaska

Dear Senate State Affairs Committee,

We ask you to support SB 156.

We believe that nobody should be fired from their job, ineligible to apply for a job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention. We believe Alaskans should have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion. We believe many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for supporting SB 156! Jerel and Kimberly Price Anchorage, AK Jerel and Kimberly Price
[REDACTED]

It is essential that you vote yes on Senate bill 156. No one should lose a job over bodily autonomy. This experimental gene therapy has not been vetted. People must remain free to decide for themselves which medical treatments they may need, there are several options that have been documented to work well against Covid.

Thank you ,Jim Way Sitka Jim Way [REDACTED]

Dear Senators,

I am an Alaskan family medicine physician. One of the things that makes healthcare in Alaska so great is that we have the freedom to practice the art of medicine, meaning unique and individualized care based on each person's goals and values. By allowing vaccine mandates and passports, not only would individuality be jeopardized, but also basic human rights and freedom. If there is risk, there must be choice. Not only do the currently available COVID-19 vaccines have known risks such as myocarditis, but the extent of risks such as blood clots, paralysis, and even death is unquantified. How then is it ethical to mandate such a vaccine if the vaccine itself does not prevent infection or transmission of the virus and is not current to the infection we are now facing? The COVID-19 vaccines only code for the spike protein of the original COVID-19 virus. The spike protein present in the omicron strain has at least 30 mutations in that one protein alone, rendering the vaccine virtually ineffective.

I have been actively treating COVID-19 since before the onset of the omicron variant and have seen vaccinated person after vaccinated person test positive for COVID-19 with symptoms that are largely indistinguishable from those who are not vaccinated. Thankfully a large percentage of our population now has natural immunity which is at least as effective if not more than vaccine immunity.

In sum, mandating the COVID-19 vaccines for all would strip the individualism and freedom that make Alaskans Alaskan, cause unnecessary injury and even death without choice for little to no benefit to our communities or workplaces. As a physician who took an oath not to harm, I ask that as human beings you do the same and make the right choice for the people of this great state.

Subject: SUPPORT SB156 - FREEDOM TO CHOOSE

Hello Alaskan Senators and Representatives,

I urge each of you to **STAND UP AND SUPPORT SB156** and protect medical freedom in Alaska. We expect your full support of this important legislation that will protect you, me and all our fellow Alaskans from any vaccine mandates or any experimental jab mandates.

"COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

Please, oppose COVID vaccine mandates and protect Alaskan workers and students!

NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept an experimental vaccine of any kind.

Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 experimental vaccination just like other medications.

There are many reasons for declining a vaccination, including; personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market certain COVID jabs.

Please, do the right thing and do the job you are hired for in supporting us Alaskans and what we believe in....FREEDOM TO CHOOSE WHAT GOES INTO OUR BODIES!

Thank you for your time and hard work!

Thank you Patti for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

I have cc'd your Senator-I hope he will become a co sponsor and help get this bill through the house-it is critical to protect our liberty.

Subject: Re: Senate Bill 156

Hello Senator Mike Shower,

I am writing to urge you to support Senate Bill 156, especially for the following readings:

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

I personally have a pre-existing autoimmune disease that flares and becomes extremely aggravated by any kind of vaccines. I take it upon myself to be responsible and avoid large gatherings during flu/sickness seasons and rely on many homeopathic remedies to aid my immune system; I do these by choice and of course because I cannot tolerate vaccines. I feel that preserving this ability to choose what is best for me is important and no mandate should threaten this freedom to choose.

Thanks so much for taking the time to hear my concerns and I sincerely hope you take Alaskans like myself in consideration when it comes to Senate Bill 156.

Sincerely,

Rochelle King (Kenai Peninsula resident)

Subject: Public testimony in support of SB156 February, 8 2022

Hello, my name is Alisha Asplund. I am from district D8.

I wish to thank the members of the Senate State Affairs Committee for allowing me to share this public testimony today February, 8 2022

I will be representing myself, my mother- Beth Asplund District D8, and My Aunt- Bonnie Hager District E9 today.

We support SB156.

My mom and I feel that individuals should not be threatened with loss of employment, denied access to an education, lose the ability to travel within and between states, or be denied access to public places for simply declining to comply with "one size fit all" health interventions or treatments such as COVID-19 vaccination, and thus be denied the right to weigh the benefits and risks that are relevant to them as an individual with their specific medical history and personal health conditions.

My mom and I feel very strongly that we should be trusted to make our own personal medical decisions based on our personal medical history, individual health conditions, or other valid personal or ethical reasons.

My mom and I do not believe that the government should support or facilitate the discrimination of individuals based on the individuals COVID-19 vaccination/immunity status or other personal health choices.

My Aunt wanted me to make sure to include that she is specifically against the idea of vaccine passports being required for travel. And supports the section of the bill that stated "may not require an individual to produce documentation of the individual's COVID-19 vaccination status or a COVID-19 immunity passport in order to travel to or with in the state."

Thank you for your time,

Alisha Asplund and Beth Asplund

To Whom It May Concern,

I would like to voice my support for SB156 "An Act relating to COVID-19 immunization rights; and relating to objection to the1

administration of a COVID-19 vaccine." I have 2 recommendations:

1. Remove the specificity to COVID-19 so that it would cover all vaccines, past, present, or future. This would eliminate the need to re-address this issue in the face of similar threats to freedom.
2. Add clarification that it also applies to contractors and subcontractors. The imposition of a vaccine requirement for contractors is effectively the same treatment and should be clarified that this is not acceptable.

Thank you,

David Durst

907-4 [REDACTED]

[REDACTED]

Please outlaw any vaccine mandates in alaska.

Sincerely,

David Newcomb

Subject: Re: SB 156

Senator Reinbold,

I agree with you. I have a writing and calling campaign in the works for the Senators and Representatives regarding SB 156.

My husband and I realized after we were discharged from the hospital that the vaccinations were not legally enforced on children when a Pastor and friend told us. It is hospital policy to assume vaccination. Though we had clear instructions on the white board in our room and the birth plan the hospital violated that and the nurses lied to us. The issues around vaccination have been a serious problem since 1986 when liability was removed and mandates were created. It certainly has culminated in a major issue now over covid 19 vaccinations.

I will work my hardest to help support this bill. Please tell me if there is a time where in person testimony would be more powerful. My husband and I would certainly consider coming to Juneau to do that.

Thank you,
Kendal

Thank you for your heartfelt email. The Big pharma industry is impacting our lives in such unbelievable ways. This covid vax medical tyranny has crossed the line. I am also deeply concerned about the vax by 2 initiative. If you have any data about them saying it is illegal not to vaccinate your baby I would like to see it, that is not accurate. State statute is very clear we are an opt in not an opt out state for any medical procedure including vaxes.

I appreciate you being involved. This bill has many hurdles to go to get to the finish line. The worst part is lack of informed consent, coercion and the fact so many do not know their rights. We must defend individual liberty and not big pharma or corporate interests with medical covid tyranny.

Chuck -thanks for your thoughtful response.

Have you contacted your House Rep and Senator for support of this bill? Is your Senator Wilson? Rep Eastman? Here is an update on the bill.

Thank you for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

Dear Alaska Senate State Affairs Committee, I am a Life long Alaskan who has lived in the Matsue valley for the last twenty years, I serve my community in the waste and recycling industry. An industry with has continued without interruption these past two years.

SB156 needs to be passed in order to protect our safety, our freedom and our industry, do not be misled in to thinking that what this committee decides on this issue will have any affect on the virus or pandemic. It will however have great affect on whether or not our great state can ever find any semblance of health and business. More over I would like to inform you that how you conduct your selves today inn regards to this issue, will inform me of weather you are the kind of leader that deserves to continue in state office or weather you have been taken by fear to think that more and more control will save us.

I have never been one to write senators or get "involved" never worked in or on a campaign, never been to a protest. I will however watch all of you and see how you handle this issue because if you can't stand ups for my basic human right I will actively campaign against you.

You can consider that these views are shared by my wife and will help in the campaign against you should it come to that.

Ian and Kristina Goodwin.

Dear Senator Shower,

I implore you to consider voting yes on the upcoming bill, SB156. I am a freedom-loving Alaskan and American. I am not an anti-vaxer, but it is every person's inherent right to choose which chemicals to put into our bodies without having to worry about losing our jobs, denied medical access or access to public places. I am sure you would not want to be forced to put something into your body that you did not want, whether it be a covid shot or anything else for that matter. I have had covid and, therefore, I have natural antibodies, as do many others. No one, not even the vulnerable, should be forced to do this against their will. America was founded on freedom, unlike the tyranny of the government those founding fathers ran away from. You were elected to represent us and do the will of the people, not to bring tyranny to this country. And any American that thinks this is okay to force this on others needs to maybe have a history lesson about WHY America was founded.

Sincerely,

Marc Lynch

Dear senators,

I urge you to SUPPORT SB156 and protect medical freedom in Alaska!

I strongly believe that COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. I personally have lost my job after noncompliance with vaccines mandates. I have medical and religious exemptions that were not honored. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine.

Many of my previous coworkers were coerced into getting the jab to keep their jobs and feed their families. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications.

There are many reasons for declining a vaccination, including: personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market certain COVID vaccines.

There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!

Respectfully,
Rebecca Crawford

Subject: My Support of SB 156

Dear Senator Mike,

As a longtime Registered Nurse, familiar with the importance of, and responsibilities that go with, Informed Consent, I am in full support of SB156, as applies to preserve both my, and my patient's freedom to make informed decisions regarding our health, something which I, for one, do not take lightly. SB 156 will serve to protect those rights we have fought so hard to preserve.

Today, Alaskans are under unprecedented attack of their freedom to choose their own destinies, and I am proud of you and your colleagues taking a stand for the people of this great State who continue to put their trust in you to protect our rights. Thank you.

Tim Langdon RN

Greetings from Juneau, Alaska. I am writing today to all members of the Senate State Affairs Committee regarding Senate Bill 156. I urge each of you to support SB 156 for the protection of medical freedom in Alaska.

All residents of Alaska could be harmfully impacted without the protection of medical freedom. Jobs and education should not be withheld, nor access to public places denied because Alaskan residents choose to decline medical intervention.

There are serious and valid reasons that many people have for declining vaccination which include pre-existing immunity from a prior COVID infection and conscientious objection to the unethical methods used to develop COVID vaccines (this includes the use of a dismembered living child in the womb, up to the age of birth.) Some people also have personal health conditions which dictate that it could be seriously harmful or even lethal to themselves to receive these vaccines.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccinations just like other medical interventions, and make a free and informed choice, without coercion.

Once again, I urge you to support SB 156, for the protection of medical freedom in Alaska.

Thank you for your attention,

Melissa Zahasky Paul Zahasky [REDACTED]

SUPPORT SB 156 [REDACTED]

I urge you to support S B 156 to protect medical freedom in Alaska.

Many people have a number of valid reasons for declining vaccination. The whole program to date has been a real goat rope with false and unscientific information being given as the rationale for draconian government overreach. Everyday we hear a new unsubstantiated reason for doing things. We have set many students back years in their development, from learning to talk on through the whole gambit of education. Many may never catch up. The government says you must take the shot and if it kills or severely damages you that is tough. Neither the pharmaceutical company nor the government is liable.

Government should also not be allowed to selectively decide which medicine prescribed by a doctor can or can't be given to the patient. In the case of COVID-19 there are too many verified stories of patients who were not allowed to obtain medications that in many instances were shown to save the lives of those who received them. Thank you for your consideration of my comments. It is a pleasure to hear of a bill, being considered, which has something to do with day to day Alaskan life and is not a political witch hunt.

Respectfully, Chuck Bickley Wasilla, 99623 Chuck Bickley [REDACTED]

Dear Honorable Committee Members,

Please support Alaskan's rights to medical freedom and self-determination by allowing Senate Bill 156 to be moved forward for Legislative consideration.

Thanks, Mike M [REDACTED]

Please vote NO mandatory vaccine usage on the people living in Alaska, employers, employees, elderly, babies, children, military ALL PEOPLES. It's our bodies our choices which medical treatments we decide to use.

Thank You

Senators,

I am writing in support of SB 156, to protect freedom in Alaska. Please stand with the reasonable truth that NO one should be forced to get an experimental Vaccination to have to work or travel or get treatment or transplants! This is among one of the most saddest times in history of government overreach, and this will go down as a catastrophic event in history. Please stop the mandates. Protect our freedoms.

From: rolan@[REDACTED]

To: senatestateaffairs@akleg.gov

Senate State Affairs Committee,

Dear Chairman Shower and Members,

I am pleased that SB156 will be before you on Feb.3. I encourage you to support this bill. I strongly believe that Alaskans' right to choose whether or not to receive a Covid-19 inoculation needs to be protected in law.

Informed Consent is a bedrock principle of medicine and public health. Covid vaccine mandates and passports would supplant informed consent with a system of social rewards and penalties instead of the rational consideration of medical risk and benefit that defines this basic freedom.

Under the current patchwork of Covid vaccine requirements in the U.S., people are being pressured to accept Covid vaccines in order to keep their jobs, attend college, visit restaurants, etc. That is a form of coercion that deserves a strong prohibition in Alaska.

The Covid vaccines are still in trial under FDA Emergency Use Authorization while their safety and effectiveness are being evaluated. The US Vaccine Adverse Event Reporting System, the best vaccine safety data gathering system in the world, has recorded over 20,000 deaths associated with the Covid vaccines, compared to an average of just 155 deaths each year from normal vaccines in the preceding 10 years. Millions of Americans are paying attention and declining to participate in these Covid vaccine trials.

Declining to be Covid-vaccinated is a safe and responsible position. Effective and safe treatments are available to prevent hospitalization and death from Covid. Well informed Alaskans can make the choice.

Alaska needs clear statutory protection of the right to informed consent, and the right to decline these potentially harmful Covid vaccines.

Thank you for considering my comments,

Rolan Ruoss

Dear Senator Reinbold,

Thank you for agreeing to be a guest on my Children's Health Defense Live Internet TV program Advocacy Lifeline today on Monday March 21st, at 1:30 pm CST. As requested, I called your office as well and left a voice message confirming.

Riley, our producer, will send you by email about an hour before the show starts with the link to join the show. Please use a headset if possible so there is no feedback and be in a quiet place with no background noise. I am copying Riley so she has your email to send you the link, and as well copying your staff so they have this information as well.

Senator Reinbold, I am excited to talk to you about SB 156. I am especially impressed that you had some bipartisan support for your bill in the Senate vote. As I mentioned to you earlier, I have been a big supporter of bills to stop discrimination based on vaccine status and have been in strong opposition to the employer vaccine mandates that we have seen during COVID-19. I'd like to help get more people in Alaska more engaged to communicate with their Representatives to get this bill passed in the House! I am also hoping this interview can inspire legislators in other states to take a stand to protecting our freedoms. I will ask you to share some of the details of the statements that were made in support of the bill and we can also debunk some of the statements that were made against the bill. I will also ask you to describe in your own words what you think people should do to help move the bill to passage as well as offer any tips to our guests listening on best practices for communicating with legislators about bills that are important to them. Those of us who follow this issue closely are very grateful for your strength and leadership!

Please try and link in to the show sometime between 1:20 and 1:25 pm CST just for a moment to test microphone and camera. The show will start promptly at 1:30 pm CST, and I will go through a short intro for the show and make some announcements. Then I will ask our producer to bring you on about 5 minutes into the show at about 1:35. Our interview will last about 20-25 minutes.

Thank you and looking forward to our time to talk on Advocacy Lifeline!

Subject: Letter supporting SB156

Take Action to Preserve Your Right to Informed Consent

Informed Consent is a bedrock principle of medicine and public health. The Covid vaccine mandates and passports being promoted around the world will subvert informed consent into a system of social rewards and penalties, or bullying and discrimination. Our rational consideration of medical risk and benefit will be replaced by a decision to keep our job, be able to travel, or not rock the boat. These repressive measures will not take us to a benevolent place. In these two years of Covid, the words "safety" and "science" have been perverted into a shorthand for "Be afraid, do what you're told and don't ask questions."

An interested person who asks will soon discover answers that don't fit the mainstreamed narrative. The Covid vaccines are still in trial under FDA Emergency Use Authorization while their safety and effectiveness are being evaluated. The US Vaccine Adverse Event Reporting System, the best vaccine safety data gathering system in the world, has recorded over 20,000 deaths associated with the Covid vaccines, compared to an average of just 155 deaths each year from normal vaccines in the preceding 10 years. Millions of Americans are paying attention and declining to participate in these Covid vaccine trials.

The Alaska Legislature will be considering various bills this session relating to Covid vaccine mandates or passports. The first and most concise of these bills, SB156, will be heard in the Senate State Affairs Committee this Thursday, Feb.3, at 3:30 pm.

You can read the text of the bill by typing SB156 in the search bar at the Alaska Legislature homepage <http://w3.akleg.gov/index.php>

To listen to the meeting online go to the Legislature homepage and follow the tabs to Standing Committees, then Senate State Affairs Committee
<http://www.akleg.gov/basis/Committee/Details/32?code=SSTA> Click the Meetings tab to find the Audio/Visual link for the Feb. 3 meeting.

If time allows, the Committee Chairman may invite public comment on the bill at this meeting. The Legislative Teleconference call-in number is 844-586-9085.

You can email your comments to the committee at senatestataffairs@akleg.gov

At the federal level, Alaska Senator Dan Sullivan has cosponsored S.2846, The Natural Immunity Is Real Act, to ensure that millions of Americans who have been infected with Covid will have their immunity status recognized in law. A recent study published by the CDC reviewing data from millions

Subject: Please vote YES! in favor of supporting SB 156

February 7, 2022

RE: Please Support Bill SB 156 as proposed by Senator Lora Reinbold

Dear Senator Shower,

My name is Kailah Marie, and I was a full-time student and federal student worker attending the University of Alaska pursuing a Bachelors's Degree in Biological Sciences. After my bachelor's, I anticipated moving forward in obtaining a Doctorate degree in Pharmacognosy. My passion resides in phytomedicinal drug development. In short, my dream was to solve one of the most significant threats to global health and food security we face today – antibiotic resistance.

On November 21, 2021, I received an email from Pat Pitney, Interim UA President, that due to the threat of losing over 200 million dollars in federal aid, the institution had essentially no choice but to implement a vaccination requirement for all faculty and staff. On Dec 9, 2021, I received another disturbing email. This email outlined the institution's decision that all students attending 'in-person' classes or on-campus services must be vaccinated, further instructing students that unless the college received proof of vaccination must be submitted by January 21, 2022, or the student would be dropped from enrolled classes.

As a science degree-seeking student, I am required to take science courses – and accompanied labs – on campus. The University of Alaska has not implemented a reasonable online alternative for students who do not wish to get the vaccine. As a result, multiple students, including myself, were ejected from the college system and could not continue their education.

Although it is possible to attend an online college elsewhere, I can't help but feel disheartened that I am not obtaining this education within the community and culture of Alaska and its great people. That I am unable to participate in the local programs and events that support friends, neighbors, and businesses which is a staple in what makes Alaska such a great place to live. That and the culture that no matter who you are, where you come from, what you believe that Alaska offers opportunity. I just want that same opportunity back.

Please vote YES! in favor of supporting SB 156.

Please support SB156 and allow us to make our own decisions about Covid-19 vaccines. Please protect medical freedom in Alaska.

COVID-19 vaccine mandates violate the rights of Alaskans. There are many reasons for declining a vaccination, including, personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market COVID vaccines. No Alaskan should be coerced when it comes to their health and the health of their children. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine. There is already an ongoing shortage of healthcare and other workers due to these mandates. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications.

I OPOSE forcing someone to accept a COVID-19 vaccination out of fear that they will no longer be able to work, travel, go to school, or enjoy other cherished American freedoms if they say NO or decide to wait.

Thank you,
Patty Heyes

Senate Bill SB156

Queen Parker <[REDACTED]>
To Senate State Affairs

Please support this bill.

It goes against common sense.

Eva LoForte

907-~~855-8~~ Eva LoForte ~~_____~~

Honorable Senators,

I am writing to ask for your support for SB 156, to make vaccine passports and so-call immunity passports" unlawful in Alaska. It is unconscionable to force people to take any kind of medical treatment without their permission or restrict their access to society based on it. Instead we should insist on education and let every family decide what measures are best for them.

My arguments: -

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Best regards, John Hawkins Anchorage AK ~~_____~~ jhawkins@alaska.com

No vaccine mandates, passport's etc!

Ella Cotter North Pole Aileen Cotter ~~_____~~ ailen@northpole.com

Please support SB 156 Virginia Burke ~~_____~~ vb@alaska.com

Hello,

Please protect medical freedom and privacy in Alaska. Every persons right to make their own informed choice regarding vaccinations, without coercion, must be protected. Many Alaskans have good reasons for declining a vaccination; personal heath conditions, covid-recovered natural immunity, and conscientious objections to unethical methods. In addition the latest variant easily and frequently re-infects both vaccinated and unvaccinated. This breakthrough is going to continue with ongoing mutations. Thank you, Jon Agosti Anchorage, AK Jon Agosti ~~_____~~ jagosti@alaska.net

* Please support Senate Bill 156! I am not interested in having any more of my freedoms removed! Alaskans don't want it! Cathie Irwin Kodiak, AK Cathie Irwin ~~_____~~

Please...I urge you to use all of your resources to support SB 156 and protect our medical freedoms!

Take a stand by doing everything in your power to stop the eroding of our Freedoms.

We are getting hundreds of phone calls, emails etc to protect an individual right to chose the covid vax or not. I believe leg legal sent us a wonderful memo in Sept that showed in state law that no one was mandated to take the shot, they were protected in state law. Let alone, federal law says EUA cannot be mandated so if it not fully approved they have automatic opt out/ required to opt in. Is that correct?

The constitution does not protect a business, it protects individuals liberties correct? SB156 is constitutional I wholeheartedly believe and aligns with the current state law. We may need someone to testify on behalf of this (we received no memo when sb156 was drafted-it is almost identical to all the legislation on this same issue last year, I never recall getting any memos for all the resolutions, amendments etc to protect an individual right to chose and keep their believes private regarding vax, medical care etc.

Thank you Leg Legal. I spoke with Megan about this earlier today.

Subject: RE: Support SB 156

Mr. Pike;

Although I agree with the facts you're presenting, I do not support what is trying to be accomplished through SB 156.

- SB 156 cedes the argument that the government should favor the rights of one group over another. (Individuals have the right to take action to defend themselves against threats from other people whether it is catching a disease or causing other physical harm by other means, the same principle applies.)
- SB 156 specifies a specific case – COVID 19. Another statute would have to be passed to provide the same protection from the next threat someone decides is an 'emergency'.
- State statutes cannot override federal laws.
- Therefore, SB 156 is a well-intended, but ill-considered method to solve the problem.

Thank you,

Rep. Mike Prax

Subject: SB 156 - STOP mandated vaccinations!!

Senator Mike, Senator Scott, Senator Mia, Senator Roger,

Vaccine mandates are Unconstitutional and violate the Civil Rights of Alaskans!

These shots are NOT effective! the highest COVID case counts are among the vaccinated in countries with the highest vaccination rates, and have skyrocketed astronomically since the "vaccine" rollout!

<https://www.redvoicemedia.com/video/2022/02/covid-cases-never-really-told-us-much-but-this-brilliant-summary-shows-where-we-are-today/>

These shots are NOT "safe"!

All the health organizations around the world are reporting alarming rates of injury and death due to the "vaxx"! Our own VAERS system (which only documents 1% of true adverse events) indicates huge numbers of vaccine injury and death!

<https://tv.gab.com/channel/redvoicemedia/view/dr-mccullough-were-seeing-vaccine-injury-61f84c5462d414218dd7aff8>

The Emergency Use Authorization (EUA) for these shots should be immediately revoked, God forbid they must NEVER be MANDATED!!!

These are CRIMES AGAINST HUMANITY!!

The pharmaceutical companies are amassing unfathomable wealth from the misery they are inflicting on the Public!

Do NOT cave into the special interests!

Only those complicit in these crimes, or the cowardly, participate in these HUMAN RIGHTS VIOLATIONS!!

Think Nuremberg Code.

Then think NUREMBERG TRIALS.

Protect Alaskans from this criminal conspiracy!

No I think its your:

SENATE BILL NO. 156
IN THE LEGISLATURE OF THE STATE OF ALASKA
THIRTY-SECOND LEGISLATURE - SECOND SESSION
BY SENATOR REINBOLD
Introduced: 1/18/22
Referred: State Affairs, Health and Social Services

SB 156

Several places its says agent of the state or person "may not require". That reads like they have discretion or a choice.

It should say an agent or person "shall not require".

HTH

Mike

Subject: Alaska SB 156

Dear Senators,

Thank you for moving this legislation to committee to review!

The mRNA shots are genetic modification only: they do not reduce transmission, they do not reduce infection rates, and they do not reduce death.

These are the things a genuine vaccine is supposed to do. These shots are NOT "vaccines", they are spike protein injections: i.e., bioweapons.

Neither "safe" nor "effective", they are responsible for (1) all the COVID hospitalizations currently; (2) all the "variants"; and (3) 95% of all new COVID deaths.

Not only should you not MANDATE these injections, you should OUTLAW them!

These shots should be CRIMINALIZED.

And while you're drafting the legislation, add direct penalties to persons who violate the law. Right now there are no penalties and there are many people willing to violate discrimination laws now with no fear of reprisal.

Thank you and God bless you!

<https://www.adn.com/nation-world/2022/02/10/mask-mandates-are-falling-nationwide-heres-why/>

Throughout history, the U.S. government has managed to keep secrets hidden from the public. When they release these secrets, many are quite surprised and astonished at everything they've managed to get away with. Countless conspiracies involving programs such as Area 51 and MKULTRA have become mainstream in modern-day culture. The desire for such secretive knowledge is ever abundant, and no matter how much we think we know, we're always proven wrong. Despite the current rise in conspiracy theories involving government testing, many verified instances of such cases have remained hidden from the public for decades. Here are ten of them.

Subject: [REDACTED] *** SB156, suggested amendment

-----Original Message-----

From: rolan@akleg.gov <[REDACTED]>
Sent: Wednesday, February 2, 2022 11:36 AM
To: Madeleine Gaiser <Madeleine.Gaiser@akleg.gov>
Subject: [REDACTED] SB156, suggested amendment

Hello Madeleine,

I have a suggestion for amending language in SB156, Sec. 18.09.280. Objection to the administration of a COVID-19 vaccine.

The section title uses the phrase "Objection to", and the phrase "object to" appears in the body on lines 21 and 23.

On line 26 the phrase "decision to decline" is used to describe an individual's action of refusing a COVID-19 vaccine - the thing that is being protected by this section.

This choice of wording appears slightly inconsistent, and might be legally significant. To my ear, the phrase "An individual may object to" sounds like it will protect an individual's right to hold an opinion or belief about a Covid vaccine, but might not clearly protect their right to refuse that vaccine.

In comparison, using the words "decline" and "decision to decline" is affirmative language that clearly defines a protected action.

For consistency, clarity and strongest protection, I suggest changing the title of Sec. 18.09.280 to: "Decision to decline the administration of a COVID-19 vaccine.", and replacing the phrase "object to" on lines 21 and 23 with the word "decline".

Thank you for considering my comments.

Subject: FW: SUPPORT SB 156, to protect medical freedom in Alaska

Follow Up Flag: Follow up
Flag Status: Flagged

We are getting hundreds of phone calls, emails etc to protect an individual right to chose the covid vax or not. I believe leg legal sent us a wonderful memo in Sept that showed in state law that no one was mandated to take the shot, they were protected in state law. Let alone, federal law says EUA cannot be mandated so if it not fully approved they have automatic opt out/ required to opt in. Is that correct?

The constitution does not protect a business, it protects individuals liberties correct? SB156 is constitutional I wholeheartedly believe and aligns with the current state law. We may need someone to testify on behalf of this (we received no memo when sb156 was drafted-it is almost identical to all the legislation on this same issue last year, I never recall getting any memos for all the resolutions, amendments etc to protect an individual right to chose and keep their believes private regarding vax, medical care etc.

Thank you Leg Legal. I spoke with Megan about this earlier today.

Subject: SUPPORT SB 156, to protect medical freedom in Alaska

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

I did not receive ANY UIB benefits until 12/3, have been seeking new employment, and NOT as of yet received a hearing date for my appeal.

As a 62 year old voting taxpayer who has worked since I was 12 years old, I am astonished at the injustice I am receiving.

Thank-you for your time & consideration.

Subject: Senate bill 156

Greetings,

I am writing in to ask for support of Senate Bill 156.

While I already believe that the Government shouldn't try to restrict the movement of the people, I have an additional reason I believe this bill should go through.

Demanding vaccination in order to move freely is detrimental to anyone who chooses not to receive the vaccine, but is further detrimental to those who cannot receive the vaccine.

The Covid 19 vaccine is not recommended for anyone who has ever had anaphylaxis. I have two children who have had anaphylaxis to certain exposures, and both require an epi-pen for life saving measures. I believe if our population is required to show a vaccine passport, to move freely, it will unnecessarily discriminate against those who cannot safely obtain the vaccine.

I believe in the right to medical care absent the interference of Government, and I respectfully request you adopt this bill, not only to protect our already valuable freedoms, but to protect those who would be persecuted for something they literally have no control over.

Thank you very much for your time and attention to this important matter.

Thank you for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

Respectfully
Senator Lora Reinbold

Subject: NO to vaccine mandates

To whom it may concern -

Alaskan should have the right to choose whether or not they want to receive injections into their own body. Making it a mandate removes Alaskans freedom; especially considering that it's a well-known fact that as any virus mutates, it becomes weaker, just as this Covid virus has been doing.

Covid injections have not kept individuals from contracting Covid or from having serious symptoms, evidenced by the large majority of people ending up in the hospital since the vaccines came out, though they were vaccinated.

Vote for the freedom of Alaskans.

Respectfully,
Kathy Murray

Dear Senator,
Please support Senate Bill 156. It is essential that Alaskans remain free to make informed decisions on their healthcare without coercion. Nobody should ever be fired from their job, refused entry into school, or denied access to public places for refusing a medical procedure. There are many of us who have valid reasons for not getting a covid-19 vaccine. These include: natural immunity via prior infection, personal health concerns, reported side effects, and conscientious objection to manufacturing methods. Mandating a vaccine is unethical, anti-freedom and flat-out wrong.

People who advocate mandatory vaccines do so through erroneous logic: if they vaccine worked and they have it, then why does somebody else need to get the vaccine in order for them to feel safe? That flies in the face of reason. The argument that we need to relieve pressure on the medical system is laughable. Obesity and the many diseases directly caused by lifestyle choices that lead to obesity is the largest drain on the healthcare system. If lawmakers were really concerned about the health of their constituents they would take aim at the fast-food and processed-foods industry.

Sincerely,
Travis Robotkay

Senate State Affairs Committee:

Alaska should set the example for America and the world as the place where the right to life is protected and celebrated from conception to natural end of life. That right to life includes the freedom and liberty to live without coercion from employers, schools, the healthcare establishment, and the government.

I support SB 156 and the prohibition of vaccine mandates and the requirement to share any of my private healthcare information.

I urge you to vote in favor of protecting my life, liberty, private healthcare information, and vaccine status. Vote yes on SB 156 today.

Senator Lora Reinbold,

I am writing in support of SB 156, to protect freedom in Alaska. Please stand with the reasonable truth that NO one should be forced to get an experimental Vaccination to have to work or travel or get treatment or transplants! This is among one of the most saddest times in history of government over reach, and this will go down as a catastrophic event in history. Please stop the mandates. Protect our freedoms.

Dawn Bailey

Please support bill SB 156. Protect medical freedom.

Thank you Kathy Doyle Kathy Doyle [REDACTED]

As an Alaskan Resident I would like to urge you to SUPPORT SB 156, to protect medical freedom in Alaska.

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thanks for your support on Senate Bill 156,

Tracy

> On Feb 7, 2022, at 2:57 PM, Cheryl Tatom <cheryl_tatom@yahoo.com> wrote: Please support Senate Bill 156 and protect our freedom to choose what is best for each individual. I am 67 and have had Covid twice. It was not fun either time, but I didn't die! I took Ivermectin and had the monoclonal antibody infusion which was quite helpful. Prior to getting Covid, I was told by two different doctors to NOT get the so called vaccine due to some very serious health issues. In addition, I had allergic reactions to flu shots on 2 different occasions in the past. Had I received the so called Covid vaccine I was told by a local doctor he had not doubt I wouldn't be alive today.

> Should the Covid vaccine be mandated it would be a death sentence for me! My children may very well carry the same gene(s) which causes me to be at risk for dire consequences from the experimental shot. They should not be forced to get the jab due to what could be a death sentence for them.

Important information regarding the lack of research in the development of the experimental vaccine has been censored and medical professionals locally and around our country speaking out have been persecuted. What's wrong with this picture!? Why is the public being used as lab rats? This vaccine was rushed without proper testing and should not be forced on anyone. The negative outcomes on those receiving the jab are being covered up and not addressed by mainstream media, but the information is out there and can be found.

> The fact that children 5-11 are now being encouraged to take the jab is deeply concerning to me. This is a group that isn't at risk for developing complications or death. Why would any parent subject their child to an experimental vaccine that can't be validated as non harmful to children? To mandate the jab for children is reprehensible!

>

> This Covid jab is experimental and saying it isn't is just bad science. It can't be equated with the current vaccines given to our children. All those vaccines underwent YEARS of testing and never were mandated. Instead of years of testing, the "Covid vaccine" was thrust on people around the world and they quickly became test subjects without informed consent or the ability to receive any compensation should negative side effects occur. People received this experimental vaccine under the guise that it prevented Covid. Then the boosters came on the scene. They did not prevent Covid and yet the mandate is still being considered! Why?

> Vaccinated and unvaccinated are both at risk of getting covid. Boosters are pretty much worthless and appear to not be able to keep up with the variants. Then the "powers that be" said those vaccinated will have a less severe virus to deal with. Well, that's still to be determined and at this point if anyone is still listening to "the authorities" they can't be believed at this point.

There has been so much false and deceptive information regarding the "Covid vaccine." So much of what was given as fact in the beginning has now proved to be false. Please don't allow this "vaccine" to be mandated in our state. This is not a "one size fits all" situation and we have a right to make our own choice based on our own situation and personal values and health issues.

> Thank You for listening. Cheryl Tatom [REDACTED]

Hello all,

I'm writing to urge you to support SB 156 to protect medical freedom in Alaska. A "one-size-fits-all" approach to healthcare has never worked in the past, nor will it work with COVID-19. Alaskans have a right to decide for themselves whether they want to inject themselves with the COVID-19 shot every 3-4 months as a treatment option (I abstain from calling it a vaccine since it does not function as one) or whether they want to take care of themselves and those around them using other effective and proven protocols. To hold Alaskan livelihoods, educational opportunities and rights to medical treatment hostage is a horrific violation of human rights. I urge you to take a stand on this issue to protect freedoms over our own bodies. The COVID-19 shot comes with risks (as does all of life) and Alaskans should be able to decide for ourselves whether we want to accept those risks or take other routes. Thank you for your time.

Sarah Hoover Sarah Tyndall [REDACTED]

To whom it may concern,

I am writing today in favor of SB 156. I fully support the bill and want to see it passed. Alaskans (and all people across the world, really) deserve bodily autonomy and to be protected against forced medical procedures. This shouldn't even be a question! Please do the right thing for the people and protect their rights by passing this bill.

Thank you, Cassandra Cassandra Ryan [REDACTED]

The fact that children 5-11 are now being encouraged to take the jab is deeply concerning to me. This is a group that isn't at risk for developing complications or death. Why would any parent subject their child to an experimental vaccine that can't be validated as non harmful to children? To mandate the jab for children is reprehensible!

This Covid jab is experimental and saying it isn't is just bad science. It can't be equated with the current vaccines given to our children. All those vaccines underwent YEARS of testing and never were mandated.

Instead of years of testing, the "Covid vaccine" was thrust on people around the world and they quickly became test subjects without informed consent or the ability to receive any compensation should negative side effects occur. People received this experimental vaccine under the guise that it prevented Covid. Then the boosters came on the scene. They did not prevent Covid and yet the mandate is still being considered! Why?

Vaccinated and unvaccinated are both at risk of getting covid. Boosters are pretty much worthless and appear to not be able to keep up with the variants. Then the "powers that be" said those vaccinated will have a less severe virus to deal with. Well, that's still to be determined and at this point if anyone is still listening to "the authorities" they can't be believed at this point.

There has been so much false and deceptive information regarding the "Covid vaccine." So much of what was given as fact in the beginning has now proved to be false. Please don't allow this "vaccine" to be mandated in our state. This is not a "one size fits all" situation and we have a right to make our own choice based on our own situation and personal values and health issues.

Thank You for listening. Cheryl Tatom [REDACTED]

Dear Sirs,

I am writing to ask you to support Senate Bill 156 to protect medical freedom in Alaska.

As a prior service Army officer I hold freedom near and dear to my heart. I ask you to please protect our jobs, schools, freedom to public access and our freedom to decide for ourselves with our doctors of choice the medical treatments that we feel best suit each of our personal needs.

Thank you for your attention,

Yours, Deborah Peterson Deborah Peterson [REDACTED]m

I am against government mandates for Covid vaccinations. Medical treatments should be each individual choice. I am not against vaccinations, I have been vaccinated. I just do not want the government forcing it. Forcing vaccinations and other medical treatment is like China or other communist countries. We need to fight to keep out freedoms!

J.E. Merry Judith Merry [REDACTED]m

Dear Senates and rest of the leaders,

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

Please support the People! Myself very allergic to many medication !! Please support SB156, Support the hippa,ada laws Thank you!!

Robin Baine Robin Bain [REDACTED]

I SUPPORT SB 156 - PLEASE, PLEASE PASS THIS BILL!

Travis [REDACTED] Senator@mail.com

Dear Alaska Senators:

I would like to implore you to support SB 156! This will protect the rights and medical freedoms of all Alaskans! I am a firm believer of Life, Liberty and the Pursuit of Happiness. If the liberal agenda gains support, and vaccine mandates, medical passports, and other agendas become more widespread, this will severely hamper every Alaskan from making the best decisions possible for them and their families. No one should be fired from their job, kicked out of school, denied jobs and schooling and denied access to public areas simply for having a differing opinion on medical procedures (immunizations, vaccines, masks, etc.).

All Alaskans have the right to weigh the benefits and risks of COVID 19 vaccination, just like all other medical procedures and interventions, and to make their free and informed choice...not forced through coercion or bribed with lottery style winnings. Many Alaskans have valid reasons for declining vaccination, including (but not limited to) personal health conditions, pre-existing immunity from prior COVID infection and moral/ethical objections to how the vaccine was developed.

Again, I implore you to side with the American way of life, side with personal freedoms and dignity for all Alaskans! No one should be forced by medical and political tyrants to conform to their medical opinions.

Respectfully:

Jonathan Bailey S [REDACTED] (Retired) Anchorage, Alaska

To: Sen. Gary Stevens; Senate Rules
Subject: Please hear SB-156

Chair Stevens,

I am asking that you please set a hearing for SB-156 for the Rules Committee at your earliest availability. Alaska as already seen discrimination against its citizens based on COVID-19 vaccination status. Discrimination of any kind should not be tolerated.

I have said it before and I will say it again. The data shows that vaccines are effective at preventing severe illness and/or death. However, the data also shows that the vaccine does not prevent someone from catching or transmitting COVID-19. Alaska is an opt-in state where any one undergoing any type of medical treatment is required to give their informed consent without coercion. All medical procedures have some measure of risk. It is up to the individual and their doctor to decide which risks they are willing to take.

Please hear SB-156 to protect the rights of the residents of Alaska.

Thank you

Louis Imbriani

My husband almost lost his job for not getting the vaccine due to having Left ventricular hypertrophy that appeared suddenly a couple months after he had Covid. We did not want to risk compounding his condition by risking a very real side effect of the vaccine causing additional heart-related problems. He was not given a medical or religious exemption from his employer and would have been fired had the Supreme Court upheld vaccine mandates for employers. I would rather have my husband here with me and be broke, than lose him to an experimental vaccine that does not have open records and/or decades of studies behind it. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

I'm writing to ask you to please support SB 156. Vaccine mandates and passports make absolutely no sense. It is well known now that vaccines do not stop the spread of Covid. Why are they being mandated? It is well known that vaccinated individuals can still get and spread Covid. The only reason for an individual to get a vaccine is for their own personal safety because it may potentially lead to less severe symptoms, which may potentially lessen the likelihood of going to the hospital and/or dying. It is a personal decision for personal safety. It does not affect community safety! And now that we know more about natural immunity we know that there's absolutely no reason to get a vaccine if you've already had and recovered from Covid! It's basically like getting a natural vaccine! The vaccine has obviously not been a magical solution for ending this pandemic, and mandating everybody get them makes absolutely no sense!

Subject: SB156

I am unable to call in this afternoon to testify. I understand that you are creating a bill for immunization rights. I am happy that the Senate is considering medical freedom. I would also like to request that freedom to choose medical devices (such as masks) and medical procedures (such as testing for diseases with no symptoms when the test is controversial and faulty). I cannot financial survive another lockdown. As a person who cannot tolerate wearing masks, there is no job security for me as long as people have the attitude of "we have to follow policy." For some reason this policy seems to be in place for mandating masks, but not for following HIPPA or ADA. I am unable to leave Alaska due to mask policies to find freedom in another state.

Subject: RE: I support HB 156

Thank you Dave for contacting my office about the Covid 19 Vax Bill of Rights. We have had an overwhelming positive response to the bill. Official public testimony in Health and Social Services, Chair David Wilson, is on March 1 at 130 pm. Please either send this to SHSS@akleg.gov or call into testify from Juneau 907-586-9085, from Anchorage 907-563-9085. Try to keep your testimony concise if you can 30 seconds to 3 minutes and say if you support the bill or not. Also please get your legislator to co sponsor in the House or Senate to ensure it's passage. This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vax status. It has a tremendous opportunity to attract highly trained medical professionals and many other professionals who do not want the covid 19 vax mandated in any way. Please contact my staff if you choose to be added to the mailing list to be updated on this legislation.

I am writing to ask you to please support SB156.

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection.

Thank You!

Dear Senator Reinbold,

I would like to state my support of SB 156 and likewise urge senate support of this bill that would protect medical freedom in Alaska. No one should have their livelihood threatened or be denied access to school or services simply for declining a medical intervention. Alaskans have a right to weigh the risks and benefits of vaccination, as with any medical intervention, and make a free and informed choice without coercion. Many Alaskans have valid reasons, based on unique health history, previous infection and recovery from covid, or religious beliefs (for example) to decline vaccination. Removing freedom of choice only inspires division and dissension in our state and local communities. I urge you to support the side of freedom, peace, and unity for all Alaskans.

Sincerely,
Kirsten Belloni

To: SB 156
Subject: SB 156
Attachments: IMPACT-COVID-positioning-strategy-memo.pdf

I am writing in support of SB 156 and would like this testimony submitted to the record as a public testimony to the committee. I am a project manager who has served all of Alaska for the past 15 years, 10 of that in rural Alaska. I am originally from Eagle River and now reside in Palmer with my wife and children.

Before I begin, I would like to address one of the particularly silly responses I have heard from the Legislature and other government agencies: that somehow the Legislature does not want to pass a bill that "tells businesses what to do" This is the weakest response to this bill imaginable. The government tells businesses what they can and can't every day through ADA regulations, building codes, license requirements, and the other thousands of state regulations published on the State of Alaska website. The government already tells businesses not to discriminate against anything in Title 7 or the 1964 Civil Rights Act. This bill is merely an extension of the idea that people can not discriminate against another person. Medical segregation is no different than discrimination by race, religion, or another defining characteristic

To further emphasize that this is not a public health emergency, please find the attached report from Impact Research. A national research group dedicated to creating a narrative to unseat republicans. That's a direct quote from their website. <https://www.impactresearchinc.com/>

This document is the source of the recent pivot by liberal leaders and government agencies. The "public health" circus that we have endured for 2 years is now over. This is so the narrative can be flipped to:

1. Democrats "beat" covid. Zero Covid and forced vaccines have been the drumbeat for 9 months, not suddenly that doesn't poll well.
2. People are worn out. How is that a reason to end an emergency unless there never was one, to begin with?.
3. And my personal favorite: • Stop talking about restrictions and the unknown future ahead. If we focus on how bad things still are and how much worse they could get, we set Democrats up as failures unable to navigate us through this. When 99% of Americans can get vaccinated, we cause more harm than we prevent with voters by going into our third year talking about restrictions. And, if Democrats continue to hold a the posture that prioritizes COVID precautions over learning how to live in a world where COVID exists but does not dominate, they risk paying dearly for it in November.

The memo is attached for your reference.

Example #001 ADA

The ADA prohibits discrimination based on disability in employment, State and local government, public accommodations, commercial facilities, transportation, and telecommunications. It also applies to the United States Congress

To be protected by the ADA, one must have a disability or have a relationship or association with an individual with a disability. An individual with a disability is defined by the ADA as a person who has a physical or mental impairment that substantially limits one or more major life activities, a person who has a history or

After reading the insert of the vaccine, we learned the manufacturer stated her reaction was a known side effect, and she should not receive any vaccines if the reaction occurred. When we approached our doctor on this issue, we were hastily thrown out of the practice as anti-VAXes. We were not even allowed to question the vaccine. The law provides for exemptions, but medical professionals, businesses, and governments are allowed to discriminate against a population for a purely political and partisan issue.

More recently, I have been threatened with my job and way to provide for my family and under constant scrutiny from employers and potential clients as to my current status. These entities take State and Federal funds and claim they do not have to comply with Civil Rights Acts or Title 7 anti-discrimination laws. Vaccinated or not, no one should be allowed to discriminate against a personal choice that has no effect on anyone but themselves. The Vaccine has been proven, federally admitted to, and ignored by global media to NOT prevent transmission. The fact that a vaccinated person can spread Covid at the same rate as a vaccinated person means no passport, mandate, or another form of proof will keep our population safe.

February 8, 2022

Senator Mike Shower
Chairman, Senate State Affairs Committee
State Capitol – Room 429
Juneau, Alaska 99801

Re: Support SB 156

Dear Senator Shower:

Alaska Family Action urges you to support Senate Bill 156: "An Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine."

We support SB 156 because it would eliminate harmful COVID-19 vaccine mandates and so-called "immunity passports," regardless of whether these dictates emanate from governmental agencies or from private businesses.

One of the most fundamental principles of medical ethics is that patients must be allowed **free and informed consent** before accepting a medical intervention. We agree with a statement from the National Catholic Bioethics Center (NCBC) that points out how mandates undermine the principle of free and informed consent:

"The best ethical decision-making occurs when individuals have sufficient information for discernment and are able to reflect without undue external pressures placed on them. Mandates, by their very nature, exert pressure that can be severe if employment or the ability to further one's education are threatened."

<https://www.ncbcenter.org/ncbc-news/vaccinemandatestatement>

We also agree with the American College of Pediatricians which has stated,

"It is fundamental that the right of individual conscience be preserved. Coerced vaccination would irreparably harm Constitutional rights and the patient-physician relationship."

<https://acped.org/press/joint-statement-on-vaccines-and-conscience-protection>

Many Alaskans have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Testimony Re: SB 156
Alaska Family Action
Page 2

We have heard the concern expressed that SB 156 will interfere with the ability of private businesses to manage their affairs. However, we have numerous laws on the books already that prevent private sector employers from violating the human rights and dignity of their workers.

For example, Alaska has laws restricting the use of child labor, and prohibiting sexual harassment in the workplace. We even have certain areas of commerce that are prohibited completely, e.g., prostitution and illicit drugs. We have these rules because the common good requires it. As a society, we've discerned that some things are more sacred than "making a buck."

Alaska Family Action believes that no Alaskan should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Sincerely,

A handwritten signature in black ink, appearing to read "Jim Minnery", with a stylized flourish at the end.

Jim Minnery, President
Alaska Family Action

To: Sen. Lora Reinbold; Rep. Ken McCarty; Rep. Kelly Merrick
Subject: Follow up on the Eagle River Listening Session from 1/5/2022

SB 156

Senator Reinbold, Representative McCarty and Representative Merrick,

Thank you for taking the time to conduct the listening session at the Eagle River Library. Unfortunately, my water heater went out and had to leave the session early to meet the technician to make the repairs. I wanted to reiterate my points and provide them to you in a written form.

Medical Freedom

Medical freedom for the individual

Allowing individuals to make the choice what goes in their bodies and not their employers or politicians. Especially when the substances have not gone through rigorous tests or trials and are still considered Phase 3 experimental.

Medical freedom for medical professionals

Medical professionals face rigorous testing, examination and scrutiny. Not only in their endeavor to become a medical professional but also in their practice of medicine. As I mentioned, doctors right now are unable to get generic prescribed medications for their patients because of the political implications. This puts your constituents lives in jeopardy and it needs to be stopped.

Finally, on the topic of medical freedom DO NOT allow for discrimination for any reason including medical or vaccination status.

Balance the budget

- Cut wasteful spending
 - If the impact cannot be measured then it's probably wasteful.
- Find new sources of revenue for the state.

Elections

- Use multifactor identification for voters. Especially for mail-in ballots.

Sent: Sunday, February 27, 2022 12:19 PM
To: Sen. Lora Reinbold <Sen.Lora.Reinbold@akleg.gov>
Subject: Please support SB156

- SB 156 would allow Alaska citizens to move about freely in society, regardless of their COVID-19 vaccination status. It would also prohibit harmful employer COVID-19 vaccine mandates.
- These mandates lay the groundwork for discrimination against individuals who are simply exercising personal discretion regarding their own medical choices. Often, these mandates include penalties for employees who choose not to comply, even if they do not pose any type of risk to their coworkers, customers, or other individuals.
- It is not unreasonable to implement certain common-sense health and safety policies in the workplace, such as directing employees to stay home if they are sick, or if they are exhibiting certain symptoms which indicate that coming to work would pose an unnecessary risk to themselves or someone else or that would prevent them from performing their duties. It is unreasonable to penalize perfectly healthy individuals who simply have not received a particular vaccine.
- A person's job is a necessity for him or her. Individuals who want and need to work should not have to choose between losing a job that provides for themselves and their families, or taking a vaccine they do not want or need.
- Our American system of government was founded upon protecting the rights of individuals. This protection entails prohibiting the intrusion upon these rights from other individuals and entities.
- Vaccine mandates are inappropriate, especially when the vaccine in question is already available to all who want it. These mandates force individuals who wish to remain

To: Sen. Lora Reinbold
Subject: Mandates

- I say Stop all mandates with masks and covid 19 shots. I believe it is a flu and even a more dangerous variety, but I also believe it is a greedy money grab. Big Pharma is forcing us to pay our tax dollars
- over and over again for one shot after the other. And those same shots do not stop anyone from getting the flu and still passing it on to others. A vaccination should be able to accomplish its job of stopping the covid altogether.
- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Hello Kelli –
So far in only have Dr. Priestly and Mike Kruse as invited testifiers on SB 156.

Do you have other people, such as Dr. Orso, you would like to be on the invited testifier list?

If so, in order to adequately prepare for the committee, I will need their names (and emails if they will be on teams) by 11 am. If they are not on the list of invited testifiers, they are still of course welcome to participate under public testimony.

Thank you,

Jasmin Martin

Subject: SB 156

Please support SB 156 and protect medical choice freedom in Alaska. We the citizens of Alaska, and the United States, are in a sad state of affairs (sorry, no pun intended :), that a bill like SB 156 is even being introduced! After two years of being "informed" on the pro's and con's of the COVID-19 vaccinations, we citizen's of Alaska and our Nation should "freely" be able to make the informed decision on receiving or not the COVID-19 shot. The time is now to bring unity and healing amongst our neighbors and nation.
Please say no to mandatory vaccinations.

Thank you for listening and thank you for your service to the people of Alaska.
Best regards,
Davida Ahlgren

Please support SB 156.

Alaskans have a right to choose what to put into their bodies. No one should lose a job, be forced out of schools, or denied access to public places for simply choosing to not have something injected into their bodies.

People as individuals, also have individual reasons for declining injections. Whether natural immunity, conscientious objections to the unethical methods used to develop certain covid vaccines, and/or concerns about the use of still an experimental shot. People should have the choice to either get a shot or not.

Thank you for taking time to consider the concerns of so many.

Freedom that's what America is about. Alaska, the last frontier. Let's keep it that way.

Thank you Senator Reinbold for sponsoring this bill and fighting for the freedoms of Alaskans.

A tax paying citizen.

Subject: Senate bill 156

Dear Senate State Affair

I am writing you Senators because I am very concerned about all the talk about needing a passport or the demand for a shot that has not been fully tested. There are many things wrong about all this talk. The first thing is everyone should have the right to decide if they want the shot. If the shot dose work, then if you have the shot you well not be in any danger, so why do these people have the right to tell me what to do, if they are protected. It should be every individuals right to decide for themselves.

The second thing I find wrong with all this is the talk about needing a passport. If you allow this to happen for the shot what will stop the people in power from making you have to have all shots and a passport, regardless of you beliefs or health condition. The passport could later be for anything the government wants you to do so they can keep tract of you.

I hope you will think about these very important things and decide to pass this

law.

Subject: Please support SB 156

Hello all,

I'm writing to urge you to support SB 156 to protect medical freedom in Alaska. A "one-size-fits-all" approach to healthcare has never worked in the past, nor will it work with COVID-19. Alaskans have a right to decide for themselves whether they want to inject themselves with the COVID-19 shot every 3-4 months as a treatment option (I abstain from calling it a vaccine since it does not function as one) or whether they want to take care of themselves and those around them using other effective and proven protocols.

To hold Alaskan livelihoods, educational opportunities and rights to medical treatment hostage is a horrific violation of human rights. I urge you to take a stand on this issue to protect freedoms over our own bodies.

The COVID-19 shot comes with risks (as does all of life) and Alaskans should be able to decide for ourselves whether we want to accept those risks or take other routes.

Thank you for your time.

Sarah Hoover

As an Alaskan Resident I would like to urge you to SUPPORT SB 156, to protect medical freedom in Alaska.

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thanks for your support on Senate Bill 156,

Tracy

Subject: Support for SB 156

February 8, 2022

Good Morning,

I am writing to you in support of SB 156. I am watching my family, friends and community members lose their jobs THIS FRIDAY for not getting the COVID Vaccination – Ketchikan Indian Community Tribal Health Clinic is about to let go 20% of its workforce this Friday because of the CMS Mandate. I am concerned about how these citizens will pay their winter bills, feed their families, and survive.

No one should be fired from their job, kicked out of school, denied public access or health care for simply declining a medical intervention.

We have the rights to weigh the benefits and risks of any vaccination and especially the Covid 19 vaccination. Just like any other medical interventions and make a free and informed choice without coercion.

My mom and I feel very strongly that we should be trusted to make our own personal medical decisions based on our personal medical history, individual health conditions, or other valid personal or ethical reasons.

My mom and I do not believe that the government should support or facilitate the discrimination of individuals based on the individuals COVID-19 vaccination/immunity status or other personal health choices.

My Aunt wanted me to make sure to include that she is specifically against the idea of vaccine passports being required for travel. And supports the section of the bill that stated "may not require an individual to produce documentation of the individual's COVID-19 vaccination status or a COVID-19 immunity passport in order to travel to or with in the state."

Thank you for your time,

Alisha Asplund and Beth Asplund

To Senator Lora:

Thank you for all the hard work you are doing for Alaskans. Thank you for sponsoring SB 156. Keep up the good work!

~~I am writing to inform you to support SB 156, sponsored by Senator Lora Reinbold.~~

Please support the bill. Alaskans and all Americans should be free to choose to vaccinate or not. Nobody should be fired from their job, kicked out of school, or denied access to public places for declining to be vaccinated. We should be allowed to make a free and informed choice about vaccinations, without coercion.

I myself have had covid twice, and therefore have built up natural immunity to it. I also have a medical condition that prevents me from taking the vaccine.

I believe there has not been a long enough time for the testing process, to know for sure the effects of the drugs used and also to know for sure how many months after taking the vaccine will it be effective. I've been reading that the vaccine is no longer effective after 120 days.

I urge you to support SB 156.

Thank you,

Lucy Weinfurter

Sent: Wednesday, March 9, 2022 11:51 AM
To: Sen. Gary Stevens; Senate Rules
Subject: Please hear SB-156

Chair Stevens,

I am asking that you please set a hearing for SB-156 for the Rules Committee at your earliest availability. Alaska has already seen discrimination against its citizens based on COVID-19 vaccination status. Discrimination of any kind should not be tolerated.

I have said it before and I will say it again. The data shows that vaccines are effective at preventing severe illness and/or death. However, the data also shows that the vaccine does not prevent someone from catching or transmitting COVID-19. Alaska is an opt-in state where any one undergoing any type of medical treatment is required to give their informed consent without coercion. All medical procedures have some measure of risk. It is up to the individual and their doctor to decide which risks they are willing to take.

Please hear SB-156 to protect the rights of the residents of Alaska.

Thank you

Louis Imbriani

Subject: Please move SB 156 forward

Dear Senators and representatives

Good evening

Im writing today to ask if you could hear SB 156 and move it along.

SB 156 is critical because many people lost their jobs and some became very ill and even died from the covid shots. We know first hand of a sudden death from the shot and of many side effects they've caused in friends and neighbors.

But, that's not all, it's so important to preserve and guard our freedoms so that they can never force anyone into taking drugs again for travel, employment, shopping, receiving medical care, visiting family, or any other reason. The way this was handled was completely unconstitutional and outright cruel. And to make it all even worse, the shots didn't even work. Most of the people we knew that got shots caught covid anyway.

Please stand up for our safety, our rights and our freedom and put SB 156 on the schedule to be heard so we can pass it and make it a permanent law so we never have to endure suffering and hardship like this again. And also, so our children and grandchildren will be safe from future tyrants.

Thank you for reading my email today

Subject: You MUST Support SB 156

Please support SB 156! The latest data from CDC shows that Sars-Cov-2 (which the government calls "covid") shows that the R-value (which measures how easily it's passed to other people, or "R"eproduction factor) is well below 1. 4 out of 5 Americans have already been infected with "Covid" and now have better immunity against it than any vaccine, (which the mRNA 'covid' "vaccines" are not normal vaccines, but experimental gene therapy shots with no long term studies.) There is absolutely ZERO reason why anyone should get these shots, and this is especially true for people that have already had "Covid" or are already immunocompromised! Look at the Netherlands, 77% of their population have gotten at least one of these shots and now they are having a full blown AIDS epidemic! BECAUSE OF THESE SHOTS. Covid itself is not at all deadly anyway, and you have a higher chance of dying from these so-called "vaccines" than from covid itself! More importantly, these shots DO NOT WORK. You can still get covid, you can still pass covid, and now you have a high chance of getting some neurological diseases or other major circulatory issues when you get this shot!! Look at VAERS and the new DMED data! People wanting to pumping these shots into children are stupid, that is even more ridiculous than the mask mandates for children! Masks are for slaves! Stop this stupidity; anyone pushing vaccines and masks deserves to get sued into oblivion! This is Nuremberg 2.0 and all these "doctors" and "experts" need to be more transparent and debate in front of a live Television audience why their side is better. The fact that Fauci and all these other fake 'experts' refuse to be interviewed or take part in a debate is all the proof you need that these shots are DEADLY.

The government is not a doctor and has no right to tell me what I can or can't do to my body, you know... "MY BODY MY CHOICE". This is 100% the Roe v. Wade. and the government has no right to tell me what I can or can't do to my body.

Please read It's Time To End The Mandates <https://stevekirsch.substack.com/p/its-time-to-end-the-mandates>

Please EMAIL me if you have ANY QUESTIONS I have been researching this from the beginning and showing people COVID is a huge scam.

Thank you,

My husband almost lost his job for not getting the vaccine due to having **Left ventricular hypertrophy** that appeared suddenly a couple months after he had Covid. We did not want to risk compounding his condition by risking a very real side effect of the vaccine causing additional heart-related problems. He was not given a medical or religious exemption from his employer and would have been fired had the Supreme Court upheld vaccine mandates for employers. I would rather have my husband here with me and be broke, than lose him to an experimental vaccine that does not have open records and/or decades of studies behind it. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion or other threats and intimidation tactics.

Many people, such as my husband, have valid reasons for declining vaccination, including personal health conditions

Please join other states that have vaccination requirements and passports banned by legislation (not just the governor).

Here's a good list of those with similar legislation or executive order:

Great article from Zerohedge regarding the pull-back of some corporations from the illegal vaccine mandates:

<https://www.zeroledge.com/political/panic-us-mega-corporations-rush-abandon-vax-mandate>

I like Tyler Durden's commentary...how did we get here? The powerful people and social forces that got us to this point may reflect on any loss but, not in the way we think. If the mandate is over-ruled they will only reflect on how they lost this time and how to succeed the next time. Basically, they will be back.

We have gone from the pain of two weeks to flatten the curve to waking up to the fact we are involved a life-long struggle to restore our once great nation. COVID was a gift in this respect...it forced us to wake up. Had we not, we may still be lumbering down the wrong path. Waking up is important but, only action can restore the world we want our children. Please stay active in your neighborhoods and towns, school board and local political races. No local council is too small or unimportant to be saved. Forget about DC (for now). The way back is restoring these local / state institutions one by one. Just as our grandparents island hopped through the Pacific to save our country so must we recapture our own institutions.

Please reach out to me personally if you have any questions; especially regarding Critical Race Theory in our schools. That is where the real fight is. It is pointless providing a decent life for ourselves, complete with toys, time and wealth, if the next generation despise the country they will one day govern...and us for loving it.

Todd

It was great talking with you Colton and Tim recently. We had a successful symposium up here regarding medical legal rights of Alaskans where Tim, Colton & I spoke. Highlights are up on Empowering Alaskans.com.

We also had a very heart wrenching listening session last Monday where we heard 5 tough hours of testimony that the shots, and the mandates are having on Alaskans. Some highlights are up on the same website.

When we spoke last week you mentioned Roert Baines was keeping track of the 12-13 successful cases that have won in court against Bidens illegitimate vax mandate. Do you mind putting us in touch with him or getting us the links to the cases. We want to offer people hope that are fighting and fearful, I believe that will help.

Thanks kindly and with deep respect,

Lora

Subject: SB 156

156

Ought the Bill not address all vaccines, vs only the COVID-19 "Vaccines"?

Are you certain the term "Covid immunity passport" is well enough defined to stand alone without further descriptors?

Are you certain the Sec 18.09.280 uses strong enough language, for instance if my child is threatened with the Covid "vaccine" I will "object" but I also will do far more than object, I will use any means necessary to protect my child from the jab and would like to know that I have the legal right to do so, short of deadly violence of course.

You include Sec. 18.09.290 Definition of C-19, perhaps COVID VACCINES ought to be defined as well, as the truth of their status as vaccines is murky, eg. CDC Sept. 2021 definition change.

Thank you very much for your work, my wife was fired for refusing the jab and more than that was treated very badly before termination, if the reason for this treatment were racial vs medical it would warrant a lawsuit.

Mainstream Misinformation is without doubt the main source of this community rending issue.

SB 156

Dr. Amerling,

First I want you to know AFLDRS has been my inspiration since the beginning of Covid and Dr. Simone Gold and your crew have helped us survive Covid tyranny on every level, hats off to you bold and wise physicians. So many cowards played it safe and so many lives have been lost. They need to be held accountable.

SB156 attached has had about 500 positive emails (one negative) and is the Tsunami bill they are calling it for it is unstoppable in the Senate we believe. I had similar legislation before the Senate for over a year, our Governor Dunleavy and leadership did not like it so it stalled out last year. So much suffering could have been prevented.

The bill will likely move out of HSS next week and go to Rules. We will need your testimony as it moves to the HOUSE, where it may die if it does not get massive attention.

Blessings for your wise and faithful work against covid medical tyranny!

I hope to meet AFLDS doctors someday, that would be a dream come true!

SB 156

Dear Senator Reinbold,

First, THANK YOU for all you to do fight the nonsense going on in our state.

Second, please, vote in support of, YES, on SB 156! I assume you will.

I was fired from my job as a nurse due to the mandate that I receive a covid vaccine. Even now, the available vaccines in our country are EXPERIMENTAL. As such, they should be required of no one.

I loved my job as a nurse. I have since found employment elsewhere, where objections to receiving the vaccine are granted. But really, I was fired! For not receiving an experimental vaccine.

No one should lose a job, be kicked out of school, or denied access to public places for declining to accept a vaccine – especially an EXPERIMENTAL one that has been so sadly politicized.

Please help restore medical freedom to this great state by voting YES on SB 156.

Thank you and again, may God bless you for all you do!

Thank you
SB156

Dear Senator Reinbold,

I am writing in support of Senate Bill 156 (SB156). We need a State law to protect all Alaskans from overzealous local politicians, no matter where we live in Alaska. In Juneau, we have an assembly that overreaches their authority. They impose arbitrary mandates and encourage events only for the "vaccinated." We need SB156 to become law to protect all citizens regardless of their vaccination status, nor force anyone to be vaccinated against their will. This law would also prevent discrimination because of an individual's vaccination status. Covid has become a political circus and we need law in place to make that stop.

I appreciate your support for this very important bill that protects all of our citizens and our liberties.

Subject: Health committee in New Hampshire just unanimously passed a bill to protect doctors who prescribe off label, so should pass the R legislature handily

SB156
+ NV testimony

The bill prevents any licensing board from threatening the license of a doctor for treating people with off-label drugs, as has been done since the beginning of medicine, so long as there is informed consent. "The state of New Hampshire confirms its strong support for the autonomous clinical decision-making authority of a physician and that a physician may lawfully use an FDA approved drug product, biologic or medical device for an off-label indication when such use is based upon sound scientific evidence or sound medical opinion; and therefore the board shall not take disciplinary or non-disciplinary remedial action against a licensee for the off-label use of drugs, biologics, or devices," reads the opening of the bill.

There is a stronger bill (HB 1022) coming up soon for a vote in the committee specifically directed at ivermectin, making it over the counter in any pharmacy based on a standing order from a local doctor.

Senator Reinbold,

I agree with you. I have a writing and calling campaign in the works for the Senators and Representatives regarding SB 156.

My husband and I realized after we were discharged from the hospital that the vaccinations were not legally enforced on children when a Pastor and friend told us. It is hospital policy to assume vaccination. Though we had clear instructions on the white board in our room and the birth plan the hospital violated that and the nurses lied to us. The issues around vaccination have been a serious problem since 1986 when liability was removed and mandates were created. It certainly has culminated in a major issue now over covid 19 vaccinations.

I will work my hardest to help support this bill. Please tell me if there is a time where in person testimony would be more powerful. My husband and I would certainly consider coming to Juneau to do that.

Thank you,
Kendal

Thank you for your heartfelt email. ~~The Big Pharma industry is impacting lives in such a way that it is a medical tyranny.~~ I am also deeply concerned about the vax by 2 initiative. If you have any data about them saying it is illegal not to vaccinate your baby I would like to see it, that is not accurate. State statute is very clear we are an opt in not an opt out state for any medical procedure including vaxes.

I appreciate you being involved. This bill has many hurdles to go to get to the finish line. The worst part is lack of informed consent, coercion and the fact so many do not know their rights. We must defend individual liberty and not big pharma or corporate interests with medical covid tyranny.

I look forward to watching SB 156 and any and all other vaccine related laws move through the process.

I am always available for question or testimony.

Thank you,

Kendal Kruse

Thank you for writing. Your story is heart wrenching. Would you like to testify next Tuesday in committee for public testimony for 3 minutes? Can I share your story with or without your name? I understand there is a freedom rally I believe this weekend in St Petersburg. Wish I could get there to support you!

Please feel free to reach out to me or my staff for support. We appreciate you and your inner strength and intelligence.

and severe reaction to the vaccine. When I asked her why she didn't tell us that the first day, she responded "I didn't want you to become anti-vax because of a rare event". I asked if her previous extremely high fevers (105) and numerous other frightening symptoms that forced us to move out of Nome to be able to be closer to a big hospital for her health, was a result of her intolerance to the vaccine or ingredients, she replied "likely, yes". When I asked for the inserts, she said "there's nothing in there for you, it's all complicated clinical data". I finally convinced her to give me the inserts and it clearly stated that if these specific events my daughter had as an infant occurred she should not receive any other vaccinations for risk of life threatening events and death. The insert also said it is likely genetic and can present in siblings. I then asked the same pediatrician if she would write a medical exemption for my daughter considering the insert specifically stated not to receive more vaccination. She told me "No and if you do not wish to vaccinate your children now we won't be able to keep them in our practice".

Exemptions have not ever worked the way they were intended. Our pediatrician knew our daughter was having bad reactions to vaccination and continued to push vaccination to the point of her life threatening event. I see now many physicians have denied writing exemptions for patients who have serious blood clotting issues, previous extreme reactions to vaccination, previous GBS among many other diagnoses contraindicated to these specific vaccinations. We must protect individual rights and sovereignty. There are no consequences for any of the businesses, doctors or government when there are reactions and private businesses are actively and aggressively denying honest exemptions. We have nothing if we do not have our bodies.

I am praying for you and will be following this closely.

If you have the time and ability could you point me to where to find the "opt in state medical devices and services" laws you mentioned. I would like to provide those to a number of parents who are fighting the school districts around the state.

Thank you and God Bless you,

Kendal Kruse
