---

Members of the Senate Finance Committee,

I have been a supporter of Alaska Community Action on Toxics for some time now.. Through that organization I have become aware of the group of chemicals called PFAS (perfluoroalkyl and polyfluoroalkyl substances). PFAS have been used in manufacturing and fire retardants for years. .They are dangerous chemicals and their continued use must end. This bill is a step in the right direction.

One of your charges as elected officials is to protect the public. Addressing PFAS chemical contamination is priority one. This Bill (SB 121) is a great step.

Thank you,

Bob Sylvester
