FISCAL NOTE ANALYSIS

STATE OF ALASKA
2022 LEGISLATIVE SESSION**Analysis**

This proposed legislation would create an Invasive Species Council within the Department of Fish and Game (DF&G). It also creates a new account in the general fund called the invasive species response fund. The Council is tasked with facilitating cooperation and communication among entities within and external to the council and to make recommendations to DF&G to prevent, manage and eradicate invasive species and recommend expenditures from the newly created invasive species response fund. As proposed, there would be a 27-member council representing 18 different stakeholder groups, not including federal or state agencies, with varying expertise, interests and perspectives.

In this legislation, the council members are not eligible to receive per diem or travel from DF&G. The legislation requires at least four meetings in the first year and at least one annual meeting in out years. For the purposes of this fiscal note, the department assumes the mandatory meetings will be held in person and additional meetings will be held telephonically as a way to reduce costs.

Invasive Species Council

Estimated costs to support the proposed council include:

Personal Services - the department expects to need a Program Coordinator 2 position to support the council, facilitate implementing the bill and draft the 5-year strategic plans. This position would be used for nine months in the first year and six months in the outyears.

Services - \$13.7 for the first year and \$4.0 in out years is expected for meeting support which would include meeting space, technology, and public involvement support.

Invasive Species Management Decal

This legislation requires the department to develop an invasive species management decal with the council and offer them for sale to the public for \$20 each. The department estimates to collect \$3.9 annually based upon an average of Fish & Wildlife Conservation Stamps that were sold between calendar years 2017-2019. Estimated costs to support the decal program include:

Services - the department estimates a cost of \$0.7 in the first year for a graphic design contract.

Commodities - this includes \$1.0 annually in outyears for printing/materials and \$0.2 for marketing.
