Subject: HB170

Thank you for working to ensure Alaska's energy security in HB170, which also will lessen pollution and climate concerns. This action is urgently needed.

I'm asking you to support HB170 with the amendment proposed by REAP: that the priority of the bank is to "develop loan programs for energy efficiency and renewable energy projects for residential, commercial and community buildings."

That will go a long way to ensuring the goal of the legislation is attained, maximizing the law's benefit for energy efficiency and clean energy solutions.

Thank you very much.

Subject: HB 170 Green Bank

Dear members of the House Finance Committee:

I am very concerned about AIDEA being the recipient and manager of an Alaska Green Bank. I have heard nothing but scandals coming from that organization for years. In addition, they are fossil fuel based and I feel they have no motivation to make Alaska energy independent with renewables. Their mission has been to develop and sell fossil fuels.

For these reasons I ask you to amend this bill to prevent any loopholes for the AIDEA to change the true purpose of a green bank and make it accountable to the legislature and the public.

Thank you for this opportunity to testify.

Mary C Burtness
