FISCAL NOTE ANALYSIS

STATE OF ALASKA
2022 LEGISLATIVE SESSION

Analysis

Background

This bill would add a sixth program to the Alaska Department of Revenue, Tax Division's (Department) roster of seafood assessment and tax programs, to be managed similarly to the other five programs. This bill provides for the creation and termination of new regional fisheries development associations for the purpose of developing commercial fishery resources. This bill also establishes a framework to create or terminate developing fishery management assessments to fund the associations. The rates for these assessments will be determined by a vote of the appropriate association. The association will also vote on what resources are subject to the assessment.

Revenue generated by the new fishery development assessments would be collected by the Department and deposited into the state treasury and accounted for separately. Program receipts are tracked using fund code 1261 shared taxes (DGF). The revenue is treated as restricted in that it is intended to be appropriated to the Department of Fish and Game for funding of the qualified regional fishery development association in the developing fishery area in which the assessment was collected. Appropriations from the account are not made from Unrestricted General Funds.

Revenue Impact

The revenue impact of this bill cannot be determined at this time.

Revenue generation is dependent on the creation of developing fishery associations and related assessments, the rate of the assessment, the resources subject to the assessment, and the success of the fishery producing those resources. All revenue would be considered Other Restricted in that it would be intended for appropriation back to the relevant development associations.

Implementation Cost

This bill would not require the Department to make material changes to its Tax Revenue Management System (TRMS). Therefore, there would be no cost to the Department for implementation. After the implementation of the changes, this bill would cause a small additional administrative burden on the Department.

Resources required to implement this bill would include staff time to collect and administer the new assessment and to update Revenue Online for the common property reporting, and other miscellaneous costs when applicable. These costs will be absorbed by the Tax Division using existing resources.
