I support SB 107 to split an annual 5POMV withdrawal from the permanent fund 75/25 with the 75% for government services. I have been advocating for this split for over 20 years. I am distressed that the legislature cannot fix our fiscal situation and wastes so much time covering the same ground each year. It is time to restore the CBR instead of continuing to drain it. It is time to sufficiently fund education and a defined benefit retirement system.

I also advocate for using a rolling average price of oil for revenue projections.
