Subject: HB133

I wanted to comment my support for HB133. I am a road board member for RSA 21 Big Lake. The open meetings act is very difficult for us on road boards.

With being on a road board it's imperative that we be able to communicate to other board members without violation. We end up having only two of the members being aware of any given task or concern that comes up. If we could communicate between us we would be much more effective to the community we serve. Many times on the road board I serve that has five members, only Pat Daniels the primary and myself know what we are doing. Essentially it cause the road board to only have two active members.

Other road boards only have two members they can not communicate at all.
