

We the Stakeholders of AK want a Commissioner who is willing to terminate the current system of OCS and other social services that supports families our children! The State of AK HESS program needs to be terminated and re engineered which fosters support of the family vs destroying it - It is a known fact the system is corrupt and evil! No one is exempt from the games, even state legislators or employees!

Furthermore, it is a known fact the current system is broken and fails to respect Families and Family Values! Also, note we are fully aware of the agenda that is played out and supported by the State in order to generate federal funding! Remember are kids are not for sale! Let it be known once NESARA GASARA is in place, it will definitely change the current protocol: Maritime law will no longer be in affect - we the people will no longer be recognized as property of the State. Nor will the judicial system be allowed to operate as a bias system that deems one guilty without a jury or trial!

The HESS relationship with the court system needs to educate Judges that they create rulings that are written to foster co parenting and family vales vs written rulings that even a judge he/she would never live by or subject his own offspring too!

Lastly, this proposed selected Commissioner needs to be reminded to learn the US Constitution! A ruling that states Parents do posses Parental Rights and they are not to be violated by the State! A point the State of AK fails to recognize they are in violation and have been non compliant for the past 50 years or more!

Thank you
