**Be It Resolved by the Senate:**

WHEREAS the communities on the Bering Sea are dependent on the sea to provide them access to other areas of Alaska and the United States; and

WHEREAS these communities have inadequate harbor facilities, which present a danger to navigation and impede the free flow of commerce; and

WHEREAS these communities are economically depressed, partially because of additional transportation expenses resulting from their inadequate harbor facilities, with the city of Nome particularly handicapped because of the absence of suitable harbor facilities; and

WHEREAS the situation in Nome would be greatly improved if the jetties were extended and the channel deepened to permit deep-sea barges to ply the waters of the channel; and

existing dredge is 38 years old and should be replaced;

BE IT RESOLVED that the Corps of Engineers is respectfully urged to make the following improvements at Nome: first, extend the jetties approximately 350 feet; second, deepen the channel to approximately eight feet; and third, provide a new dredge the type of which shall be determined by the U. S. Army Engineers; and be it

FURTHER RESOLVED that the old clamshell dredge together with its tugboat, the "Carpenter," is requested to be transferred to Unalakleet to be used in dredging the channel of the Unalakleet River for the remainder of the useful life of this equipment; and be it
