HB 361
#11

The Senate Finance committee substitute made major changes that reduce the fiscal impact of the bill. Drinking Water and Domestic Wastewater which will not be treated as designated regulatory services, thus that fiscal note has been reduced to zero. The implementation for Solid Waste is delayed one year. The accounting system costs will be funded in year one for Solid Waste. Delaying the implementation date for Solid Waste allowed the department to reduce estimated implementation costs assuming that we can save money from lessons learned in our Water Quality work during year one.

Reduction in Revenues Collected

The bill limits costs which can be recovered rather than current language that permits full cost recovery. As a result, less revenues can be collected. The department conducted an in depth analysis of the data collected by the Solid Waste program in FY 1999 to project lost revenues. Data collected by the Solid Waste program is the best quality and most complete. It is representative of likely impacts of limiting the hourly rates and reducing the pool of costs which can be recovered. Based on that analysis, program revenues collected would drop by 56%. The committee substitute tempered this by increasing the rate allowed to cover actual benefits. With a delayed implementation date, the loss of revenues is reflected in the second year of the fiscal notes for Water Quality and in the third year for Solid Waste.

A secondary issue is the goal to establish as many fixed fees as possible. It is not possible to project how many fees will be collected as fixed, negotiated agreements or time and materials. Fees collected under negotiated agreements can be treated as statutory program receipts but fixed or time and materials billings may not. A department can not ask for additional GF program receipt authority as an RPL. As a result, the Water Quality fiscal note returns all receipt authority to general fund program receipts.

The committee substitute exempts businesses with less than 20 people from paying for inspection travel. The impact is expected in Water Quality. In Water Quality, collections will be reduced by 19.2 beginning in year 2. This is based on an estimate of 100 state, 200 placer mines, and 190 general permits being issued to businesses with less than 20 employees.

Tracking Costs and Time and Materials Billings

The intent of the bill is to have fixed fees where feasible. However, when it is not feasible, the department must be able to bill time and materials. Time tracking will be needed at the desktop of individual employees. The costs of time tracking is allocated equally to the programs affected by the bill. The department selected a program the department currently uses called "Timeslips" to respond to the uniform accounting and invoicing system requirements. It is in use by the air and the food safety and sanitation programs. Initial costs in year one are 124.2 and in future years 44.2 per year.

HB 361
#11

Increased Costs for Regulatory Process, Negotiation, Appeals and Petitions

Third, the bill increases costs by requiring the agency to set standard designated regulatory services fees in regulation; by allowing permittees to negotiate permit costs; and allowing appeals of charges based on both objective and subjective criteria.

There is a strong preference to have predictable fixed fees for services. Initially the fixed fees are estimates but in future revisions the committee substitute requires actuals. Developing those fixed fees will require examination of invoices and records to date to categorize different activities. Using the regulatory process will require program staff to examine similarities in services, administrative staff to assign costs, a regulation specialist to prepare regulatory language, and services of an attorney. Contractual costs will be incurred for public notices and hearings.

Appeals are permitted and envisioned on the billings. Resolving informal and formal appeals will require program staff to examine the text of the billing, administrative staff to research comparables and assign costs, and will also require the assistance of a regulations specialist.

revised to Delete Drinking Water and Domestic Wastewater and to delay implementation date for Solid Waste.
