**ANALYSIS:** (Attach a separate page if necessary)

The Habitat and Restoration Division would require one additional Habitat Biologist III position to conduct the statewide reviews of the proposed land selections to provide input to DNR as to whether or not the conveyance of specific parcels out of the public domain was in the best interest of the state given the value of the public trust fish and wildlife resources produced on those parcels. Assumptions:

- 1) many University selections will be in remote locations requiring travel from ADF&G offices;
- 2) between 25,000 and 62,500 acres would need review by ADF&G each year; and
- 3) field reviews would only be affordable for those parcels thought to be of highest value for the continued production of fish and wildlife important for commercial and sport fishing, hunting, subsistence, and /or tourism.
