Temporary						

ANALYSIS: (Attach a separate page if necessary)

The Habitat Division will require one additional habitat biologist III to conduct reviews of the fish and wildlife values and public uses of these resources on the lands proposed for conveyance to the university. These reviews will be used by DNR to evaluate whether or not conveyance of specific parcels out of the public domain is in the best interests of the state. Assumptions: 1) many university selections will be in remote locations requiring travel from ADF&G offices; 2) between 25,000 and 62,500 acres will need review by ADF&G each years; and 3) field reviews will only be affordable for those parcels thought to be of highest value for continued production of fish and wildlife and public use of these resources.
