

# FISCAL NOTE

No. 1

**STATE OF ALASKA  
2000 LEGISLATIVE SESSION**

BILL Bill Version: SB 175  
(S) Publish Date: 2/22/00

Revision Date/Time: \_\_\_\_\_ Dept Affected: Natural Resources  
Title: STATE MINING LAW BRU: Minerals, Land & Water Development  
Component: Claims, Permits and Leases

Sponsor: SRES  
Requestor: SRES Component No. 2460

Expenditures/Revenues (Thousands of Dollars)  
Note: Amounts do not include inflation unless otherwise noted below.

OPERATING EXPENDITURES	FY2001	FY2002	FY2003	FY2004	FY2005	FY2006

**ANALYSIS:** *(Attach a separate page if necessary)*

Alaska is experiencing a boom in mineral locations. The number of new claims has increased from 3,000-4,000 per year in the early 1990s to over 15,000 last year. Because of this increase, each year it takes longer and longer for DNR to process all the new locations. It now takes 12 weeks, almost a full mining season, for DNR to process new claims.

This bill would reduce DNR's processing requirements. In addition, it would allow locators to stake their locations in a manner that allows DNR to automate a significant part of the process. Thus, the bill is necessary to ensure that DNR's level of service does not deteriorate further if, as expected, 10,000 new claims are staked in the next few years. (cont.)

Finally, the bill would also save the mineral locator money in being able to locate fewer mineral locations to cover the same area, which will result in less staking and recording.

The major change is that the bill allows locators to stake claims according to aliquot parts (referred to as Meridian, Township, Range, Section Claims, or MTRSC, in the bill).

This bill provides a one-time 50% reduction in rental for new MTRSC mineral locations and previous mineral locations converted to MTRSC as an incentive to locate the new MTRSC locations provided in this bill. The one-time incentive-induced reduction in rental will cost the State an estimated \$50K in reduced rentals. This bill also provides a new, previously untapped source of rental revenue from requiring rental for prospecting site locations at the same rental amount as for new mining locations. Requiring rental for prospecting site locations, which had no rental requirement previously, will result in fewer prospecting site locations (estimated 75% reduction) and more mining claims or leasehold locations being staked in their place. This "switching" by the mining industry will result in an estimated net rental increase of \$200K annually. Thus, the net effect of the bill is to increase revenues from the mineral industry by approximately \$150K annually, approximately half of which would go to the permanent fund.

Currently, DNR puts prospecting site locations in the state's computerized public land records, but not on the status plats. DNR does, however, put new mining claims and leasehold locations in the public land records as well as on the status plats. Thus, the "new rental revenue" needs to be used to process the additional locations and to reduce the processing time of new locations expected. Without the bill, the claim processing time will, in future years, climb to 14 or 16 weeks or longer (i.e., it would take longer than a full mining season to process the claims). This is a much lower level of service than the mining industry deserves. This bill, without the fiscal note, will allow the processing time to stay at the relatively poor service level of approximately 12 weeks. The bill plus the funds in the fiscal note would allow DNR to lower processing times to approximately 6 weeks.
