Estimate of any current year (FY2000) cost: _____

POSITIONS

Full-time						
Part-time						
Temporary						

ANALYSIS: (Attach a separate page if necessary)

This bill amends and expands the substantive criminal law to address the use of computers and other technology in the widespread perpetration of crimes. Child pornography, theft of personal information with the intent to defraud, theft of personal information resulting in damage to a person's financial reputation, deceptive business practices, "hacking" to get unauthorized information or introduce false information, introducing damaging viruses, eavesdropping on other peoples' voice or e-mail are all offenses where technology has offered new ways for criminals to victimize individuals. The amendments in this bill will update existing law to help law enforcement prosecute those who cause harm to others through the use of computers and other technology.

BILL NO. SB 245
#2

ANALYSIS CONTINUATION

Much of the bill expands on existing crimes already being prosecuted, and is not anticipated to cause increased workload. The new crimes defined in the bill are expected to result in approximately ten new prosecutions in the first year, with the number increasing in future years. These new white-collar cases will be handed by existing staff. Although no new personnel are believed to be necessary, other resources will be needed.

Investigation and prosecution of cybercrimes require that the prosecutor keep up with the constantly changing world of information technology. Those who use computers to commit crimes are very knowledgeable about technology, and usually have state-of-the-art equipment. Prosecutors must have the same or better knowledge and equipment as those who use the equipment for illegal purposes.

The Department of Law intends to have three of its prosecutors specialize in this technology driven area of law: one in Anchorage OSPA, and one each in the Juneau and Fairbanks district attorney's offices. These assistant district attorneys will need on-going training to stay ahead of the inventive ways people come up with to use technology to cause harm to others and to keep up with how law enforcement is responding in other jurisdictions. The department estimates \$10.0 per year will be spent on training, divided equally between the three components. \$5.0 per year is included to maintain state-of-the-art computer equipment, software, peripherals, and associated communications devices in Anchorage OSPA as a resource for the entire Criminal Division to use in preparing and presenting its cases.
