Delete:\$10,776,400

Insert:\$14,176,400

Renumber accordingly

This amendment adds \$3.4 million to prevent the further erosion of the beachfront in Shishmaref allowing the community time to relocate. This community has been severely hit by global warming and over the course of the last several years has suffered substantial beach erosion. Many houses have already been moved and many others are in danger of falling into the sea. The entire community will have to move but this will take 5 to 7 years. This amendment will keep the community intact while they prepare to move their village. An additional \$1.1 million will be contributed by Kawerak.
