ANALYSIS: (Attach a separate page if necessary)

The evaluation and cleanup process for illegal drug sites proposed in this bill will require the Department to develop health standards, sampling protocols, analytical methods, and decontamination guidelines for lead, mercury, volatile organic compounds, and methamphetamines. The Department may also determine whether additional substances pose a substantial risk and include such substances in the guidelines development. In the first year funds will be used for the initial guidelines development. In the out years funds will be used to review and update the standards and protocols, and provide for the development of additional standards for compounds that may be added to the list of substances covered under this legislation. An addition of one compound per year is assumed.
