Full-time						
Part-time						
Temporary						

**ANALYSIS:** (Attach a separate page if necessary)

This bill repeals the sunset provision in AS 38.05.145(c). Repealing the sunset provision allows DNR to continue to enter into reimbursable agreements with pipeline right-of-way lease applicants for costs incurred by DNR when assisting them in the preparation of their lease applications. The fiscal impact of passing this legislation is \$0.0. The impact of not passing the legislation is significant. For FY 04 DNR budgeted about \$336.0 for these services. If we are no longer able to enter into reimbursable services agreements with these prospective clients we will not be able to participate in the pre-application review. Applicants are required to submit detailed applications that include significant engineering and design work. It is critical that DNR participate at the pre-application phase before applicants have invested substantial time and money in a project that may not be feasible.
