ANALYSIS: (Attach a separate page if necessary)

The Department is requesting funds for construction of a new virology laboratory in Fairbanks. The project would be financed through Certificates of Participation (COPs). As a result of the project, the operational expenses of the building will increase. The Department currently pays \$150,000 annually to the University under a lease for the cost of building operational expenses. This includes all utilities, building insurance, fire and police protection, waste disposal, custodial, grounds keeping, maintenance and repair, and snow removal. This cost will increase by an estimated \$200,000 annually due to the increased size of the proposed virology laboratory. Since maintenance and repair are included in this amount, the Department will not need to include this building in the Department's overall deferred maintenance capital request when renovation and repair needs arise. The increase will take effect in FY 2010, when the new lab is expected to be completed and occupied by public health staff.
