ANALYSIS: (Attach a separate page if necessary)

This bill will have a negligible impact on operating costs, and there is no capital cost associated with this project. This bill changes the riparian standards under the Forest Resources & Practices Act, but doesn't change the process DNR uses to administer the standards.

The Division of Forestry included state, municipal, Trust, and private landowners in the development of these recommendations. Their assessment was that the proposed changes would have a negligible economic impact on their operations because the timber value per acre is low, many riparian areas are naturally unforested, and landowners have routinely included voluntary buffers in their harvest operations.
