ANALYSIS: (Attach a separate page if necessary)

If the current federal law is not changed, the FFY06 Federal Medical Assistance Payment (FMAP) for Medicaid Services will be 50.16%, down 7.42% from the 57.58% in FFY05. This decrease is more than twice that of the state with the next highest cut. While the federal government recognizes the high cost of living in Alaska by adding a 25% COLA to federal salaries, the federal government does not recognize the high cost of living when calculating federal payments. Alaska has the highest hospital inpatient cost per day and is in the top ranks of pharmacy costs. The reduction in FMAP will result in a loss of federal funds and an increase in state general funds of \$53 million in FY06 and \$73 million in FY07. Over the next 10 years the cost of the FMAP reduction is projected to exceed \$900 million.

ANALYSIS CONTINUATION

Assuming the level of Behavioral Health Medicaid Services in FY06 will be the same as in FY05, the FMAP reduction will result in a \$7,909.2 reduction in federal revenues for this component that will need to be supplanted by GF.
