- 1 (1) the current health care system is unsustainable;
- 2 (2) improving and protecting the health of Alaskans must be a primary goal of  
3 the state;
- 4 (3) all Alaskans should have access to essential health care services that are  
5 affordable, that are based on publicly debated criteria, and that consider the well-being of  
6 individuals across their life spans;
- 7 (4) Alaska has an economic interest in ensuring equitable financing of  
8 essential health care for Alaskans who do not have access to basic health care;
- 9 (5) health care policies should emphasize public health and encourage the use  
10 of quality service and evidence-based treatment that are appropriate and safe and that  
11 discourage over-treatment;
- 12 (6) health care providers and informed patients must be the primary decision  
13 makers who are accountable for an individual's health;
- 14 (7) health care funding should be explicit, predictable, and economically  
15 sustainable;
- 16 (8) an economically sustainable health care system requires that providers  
17 receive fair and adequate compensation;
- 18 (9) health care must be balanced with other programs that also affect health;  
19 and
- 20 (10) health care must account for the allocation of resources and the human  
21 consequences of funding decisions.
