ANALYSIS: (Attach a separate page if necessary)

HB159 would require the Bureau of Vital Statistics (BVS) to issue, upon the request of a parent, a "certificate of birth resulting in a stillbirth" for an intrauterine fetal death occurring after 20 complete gestational weeks. Approximately 50 stillbirths are recorded in Alaska annually. Based on response in other states passing similar legislation, it is expected most families would request such a certificate. These certificates would cost \$20.00 each. The division has adequate budget authorization to receive these additional receipts resulting in a zero fiscal note, even though there will be a cost to the requestor similar to other certificates.

Minimal programming and administrative time will be necessary to issue such certificates - amounting to an estimated \$1,000 annually. Assuming 50 certificates are issued each year at \$20 each, costs will be covered by the fee. The BVS budget is funded primarily by receipt supported services; all certificates issued - birth, death, fetal death - require a \$20 fee.
