Temporary						

ANALYSIS: (Attach a separate page if necessary)

The Regulatory Commission of Alaska (RCA) regulates pipelines and pipeline carriers operating in Alaska under AS 42.06.140(a). AS 42.06.240 requires the RCA to issue a certificate of public convenience and necessity for pipeline carriers engaged in the intrastate transportation of oil or gas by pipeline, or constructing or extending pipeline facilities. To the extent this legislation results in the construction of an intrastate pipeline subject to RCA regulation, costs will be accounted for under the existing RCA structure.

The RCA's budget is funded through the Regulatory Cost Charge (RCC) mechanism and direct charge mechanisms. General funds are not allocated for support of the agency, nor are they anticipated to be necessary as a result of this legislation. The RCC is recalculated each year and allows the agency to recover its operating costs through an assessment on the revenues of economically regulated utilities and pipeline carriers.
