ANALYSIS: (Attach a separate page if necessary)

This bill establishes a 25,291 acre State Forest in Southern Southeast Alaska by redesignating certain state-owned parcels. A timber management plan would be developed to actively manage the parcels for higher timber volumes per acre, shorter rotations and less impact on wildlife. This would involve thinning young second-growth stands; a long-term investment not justified for undesignated lands.

Implementation of this bill will not require new positions or funding. The bill will have no short-term impact to the revenue stream, but will provide for long-term increases in forest productivity and subsequent increased timber revenues.
